4. A disturbance; nonsense. (Forby, ta Worcester.)
bŏb'-bĭn, " bŏb'-in, s. [From Fr. bobtne; sp. bobina = s bobbin, reed, or reel. Compare Ir. \& Gael. baban =a tassel, a fringe; bare Ir. \& Gael.
5. Ord. Jang.: A wooden pin with a head on which thread is wound for making lace. [1I. I.]

Yon cottager. who weaves at her own doos,
Yillow and bobbine all her little store.. Cruth.

## II. Technically:

1. Spinning: A spool with a bead at ona or both euds to hold yarn. It has one head When it serves as a cop in apinnirg, as a thread-holder in abnttles of loons, and as cop in warping-machines. in spinning or warping it is slipped on a epinde and revolves thene with, being held thereon by a spring or by the tightness of its fit. (Knight.)
2. Sewing-machine: A small spool adapted to receive threal and to be spplied withis a ahuttle. ( $\mathrm{K}^{\prime n}$ ight.)
bobbin and fy frame. The ordinary roving machine of the cotton msonfacture Its fanction is to draw and twist the sliver, and wind the roving on a bobbin. The bobbins containing the slivers are nonnted in severa rowa on a creel which has skewers for their recaption. Each sliver 1rasses between a pair of guides, which give it a horizontal traversing motion, so that it shall not bear upoo a constsnt part of the surfaces of the drawing rollers between which it next passes. These drawing-rollers are arranged in pairs (see Drawina-frame), end bave a relstively th creasins rate of speed, the second revolving faster than the first, and the third faster than the second. The bobbin has two motions-one around the spindle on which it is sleeved, and
one uy and down on the apindle. The former is for the winding on of the roving, and the latter to distribnte the roving in coils alongalde each other along the length of the bobbin. Bobbin and fiy frames are of two kinds, coarse and fine, or first and second. The coarse, or and ine, of tirst and recond. The coarse, or firgt, bobbin and til frame acts upon aivers
from cans filled st the drawing-frame and from. cans flled st the drawing-frame and or second, bobbin ond fy frame acts upan rovings, or slubbings as they are ofton called, from bobbins filled at the first trame and placed on the skewers of the creel placed behind the roller-beam. (Knight.)

## bobbla-lace, s.

Weaving: Lace mado upon a pillow with bobbins. The pillow is a hard cusbion covered with parchmeut, on which the pattern of the meshes is drawn. Pine are inserted into the lines of the pattern and determine the meshes. Thicker thread, called gimp, is interlsced with the meshee, sccording to the pattern on the parchment, The thread is wound apon bobphas, and is twlated, crossed, and eccured by pine. [PILLOw-LACE.]
bobbin-stand, s. A frame for holding the bobbins for warps of a loom, threads of a warping-machine, and yarna of a spinningmachine. The bobbin or reel rotates on a apindle fixed in a base-plate. It is covered with \& metallic disk, oupported a littie sbove the top of the opooi on a shoulder of the egindle, and held down by a screw-nnt.

## bobbin-winder, $s$.

Weaving: A device for winding thresd or yarn npon a bobbin. The bobbin is eupported on a fixed shaft, which is made to rotate contimuously.
Sewing-machine: A device adapted to receive a a auttle-bobbin and rotats it oo that it may be wound with thread. Tbe winders are usually opersted by being turned in contact with the driving-wheel, balance-wheel, or band. Some winders are supplied with an sutomatic thread-distribntor, to lay the thread evenly.
bob'-bǐn-ět, s. [Eng. bobbin; (n)et.] Wearing: A machine-made cotton net, origiualiy imitated from the lace made by botbins npon a pillow. It consists of a series of parallel threads which may be considered sa warp-threads, sud two eystems of oblique thresda which proceed from the right to the lefi, and from the left to tbe right respectively. Earh weft tbread has a vingle turn around each crossing of a warp, a a train of the respective weft tbraads gives a serpentine course to the warps.
bobbinet-machine, s. A machipe for making bobbinets. It was originally derived from the stocking-frame, invented in 1589 by William Lee, M.A., of Cambridge. Hammond (sbout 1768) modified a stocking-frame to (sbont 1768) modifted a stocking-rrame to make a coarse imitainon of Brussels groand; this was the pin-machine. In 1784, the warpframe was invented, for making warp-lace ; and in the next decade, the bobbin-franie. In 1809, IIeatheote
chide. (Knight.)

(5) A general collection, a pandect; as, a ody of divinity, a body of the civil law.
(6) A garment, a vestment.
"A Body round thy Body, wherola that strange Thee of thine zat suug, detyling sil rariatlous of
climate."-Carlyte: Sartor Resartus, bk. i., ch. ix
2. Of persons:
(1) Individually.
(a) A person, a human being, with no contempt indicated. (Eng.)
II In this aense it ia now rarely used, though it was once, as an independent word, but it still remains in the very common compound terms, anybody, nobody, somebody, everybody, \&c. (q.v.). [ANYDONy, Somebody, \&c.]

Thet I, unworthy body as I am,
Should censure thus on lovely gentlemen."
akesp. : Troo Gent. of Verona, is "A deBowr'd meid!
And by an eminent body, that ealorc'd
Shakesp: Meas. for Hoas., Iv. 4
(b) A contemptuons term for a human being, man or woman, of humble lot, or in a pitiable plight. (Scotch.) (Generally in this aease pronounced in the pl. büddüs.)
alaving bodies."-Scott: Antiouary eh wiven live, puir " Town's bodiss ran, an' stood shelgh.
Burns: Tho An Asd Farmeriad. New Year Morning salutation to his Auld Mare Maggie.
(2) Collectively.
(a) A corporation; a number of men united by a common tie or organized for some purpose, as for deliberatiou, government, or busineza.
tried by the whole boay of the peerase."-Hacould be Hist, Eng., ch. vvili.
(b) A mass of men, even when not so united.
". . life and death bave divided betweea them the who
(c) The main part of an army ; the centre, as distinguiahed from the winge, the vanguard, and the rear-guard.
"The rat of the king's arriay won led ly the general and the rear cunsiated of one thousand foot, come: manded under Colonel Thel well."-Ctarendon.
T Crabb thus diatinguiahes between body, corpse, and carcase:-"Body, here taken in the
improper sense for a dead body, . . . is appli cable to either men or brutes, corpse to men only, and carcase to brutes only, unless when only, and carcase to brutes only, unless when taken in a contemptuous sense. When apeating of any particular person who is daceased, we should nse the aimple term body; the body
was euffered to lis to long unburisd. When deaignating ite condition as lifelesa, the term corpse is preferable; he was taken up as a corpse. When designatling the body as a lifeless lump separated from the aoul, it may be characterised (though contemptuously) as a carcase; the fowla devour the carcase." (Crabb: Eng. Syn.)

## II. Technically:

1. Geom. : Any aolid figure ; as, a epherical body.
"The path of a moving point in a ilne, that of a
georuetre body in munther body."-Weisbach; Trane Foodrich \& Portor.)
2. Physics: An aggregate of vary amall moleculea, these again being aggregatea of atill amaller atoms. The object of phyaics is ths atudy of the phenomana preaented by bodies. (Ganot: Physics (trans. by Atkinson), 5th ed., p. 1.)
3. Alchem. Pl. (bodies): Metallic bodiea, metals, zaswering to tha celestial bodiesi.e., to tha planets. Thay are contradiatingulahed from spirits-i.e., auch bodiea as can be driven off in vapour ; four auch apirits and seven bodiea were recognised. (See ex)

boil'-ẽr, s. \& a. [Eng. boil; er.]
A. As substantive:

1. Of persons: Ons who boils anything; spec., one whoae occupstion ia to do so.
"That soch aiterationo of torreatrial matter are not

2. Of things: A vessel in which water or other liquid or any solid is boiled.
"Thls woftee-room is much frequented: and thery
II. Technically:

Preum.: A vessel in which liquid is bolled.
ar Miost kinds have separata nsmes. Various household boilers are called kettlea, satucepans, and clothes-boilers; one for raising steam, a steam-generstor; ons for dyeing, copper; one used in sugsr-refining, a pan one for distillation, a stili; ons for chemical purposes, s retort or sn alembic; ons for reducing lard and tallow, a digester, or, in some cases, a tank. (Knight.)
B. As adjective: Designed for a boiler, or in any other way pertaining to a boiler. (See the compounds which follow.)
boller-alarm, s. An spparatus or device for indicating a low stage of water in steam boilers. [StEAM-boileb Alarm, Low-water Alarm.]
boiler-feeder, An arrangement, usually sutomatic and self-regulating, for supplying a boiler with wster.

## boller-float, s.

Steam-engine: A flost which rises and fall with the changing height of water in a steam boiler, and so turns off or on the feed-water.

## boller-furnace, $s$.

Steam-engine: A furnsea specifically adapted for the heating of a steam-generator. The shapea vary with those of the boilere them selves.

كate, fat, fare, amidst, whãt, fâll, father; wē, wět, hëre, camẹl, hẽr, thêre; pine, pit, sire, sir, marine; gō, pơtu

## botler-iron, s. Rolled iron of $\ddagger$ to $\ddagger$-inch thickness, used for making steam-bollers,

 tanks, the ekin of stipe, dc.
## boller-maker, s. A maker of bollera.

bofler-malding, $a$ \& $\&$.
A. $A_{8}$ adj. : Designed to be usod in the maklog of bollers.
B. As subst.: The act or occupation of makiog boilers.
bofler-plate, s. A plate or ghost of iron, it to tioch thick, used in the construction of boilers.
boiler-protector, s. A non-condacting covering to prevent the escape of heat. Among the devicea for this purpose may be citedfelt, treated in various wsye, asbestos, and lagging. Allied to the above in position, if not in duty, are water-jackete to utilize the heat. sir-fluea add abields to protect surroanding bodies against the rsdiated heat.

## boller-prover, s .

Hydraulics: A force-pump with preasuroindicator, used to try the power of a boiler to resist rupture under a given atress of hydraulio pressure.

## boller-stay, s.

Steam-engine: A tie-bar by which the flat plates on the opposite sides of boilers are connected, in order to ensble them to resict internal pressure. The atays cross an intervening weter or eteam space.

## boller-tube, s

Stzam-engine: The tabes by which heat from the furnace is diffused through the mass of water in locomoilve and other bollere of the smaller clase. They are vaually arranged longitudinally of the boiler, and ere fitted by team and water-tight connections to lts heads.
6012'-er-y, s. [Eng. boiler; -y.]

1. A sslt-house or place where brine is evaporated.
2. 4 boilsry (q.v.).

Don'-1ng, boy-lyng, * boy-2y̆̃ge, pr. par., a., \& s. [BOIL, *,]
A. \& B. As pres. part. \& particip. adj. : In enses correspondiog to those of the verb.

"TheIr wrath had beeo heated to noch o temporn-
ture that whit everybody else would have called boil.
ing renl neemed to them Leodicuan lukewarmanem."-
Tbid, ch. $v$.
a' Despairiog Qaul her boiling youth rentraing,
Dissoivid hor dream of oulversal sway.
C. As substantive:

1. Chem. \& Ord. Lang. (from the intransitive verb):
(1) Boiling or ebullition is the rapid formetion in any liquid of bubbles of vapour of a pressure equal to that of the superincumbent atmosphere at the time.
With © considerable quantity of water in combination With econslderable quantity of water." $\rightarrow$ Todd $\&$ Bow-
man: Phyoiol, A nat., vol. $1 .$, ch. $i$., pt. 41 . man: Phyoiol, Anat., vol. i., ch. 1., pt. 41.
(2) (From the transitive verb). The art or operation of cooking by means of heating in water raised to the point of ebullition.
"If yon live io a rich family, roasting and boiling
2. Fig. of the human passions: Inflamed, hot, greatly agitated.
"God saw it necessary by sach mortiteations to
queveh tho doilings of a furlous overfowing appotite quench tho ofilings of a furlous, overflo wing appetite, $\rightarrow$ and the boundleas rage of an 1
*3. Law: Beiling to desth was establighed as the punishment for poisoaing by 22 Hen. li., c. 9. This inhnman ensctment was wept awsy by 1 Ed. VI., c. 12.

## boiling-furnace, s.

Metallurgy: A reverberatory furnsce emgloyed in the decarbonisstion of cast-iron to rednce it to the condition for mechsnical treatment by hammer, squeezer, and rolla, by hich it is broaght into bar or plate iron.

## boiling point, boiling-point.

Physics, Chem, \&c. : The point or degree of the thermometer at which, soy liquid boils. [Borlino.] The boiling point of any liquid is are the the aame, if the pbysical conditions are the asme. It is altered by adhesion of the liquid to the surface of the vessel ia which it is contained, or solution of a oolid in the
liquid raises the boiling polat, lacrease of pressure raises, while dimination of atmospherio pressure lowers, the boiling polat. The boiling point of distilled water under the pressure of 760 millimetres is $100^{\circ} \mathrm{C}_{\text {. }}$, or $212^{\circ}$ F. A diflerance of height of about 827 metres lowers the bolling point of water abont $1^{*} \mathrm{C}$., or 597 feet ascent lowers it 1 . F. Whatover be the intensity of the source of lieat, as soon as ebullition commeaces the temperature of the liquid remsins stationary. The boilling point of organic compounds is generally higher as the constitution le mors complex. In a bomologous series the boiling point rises sbont $19^{\circ}$ for every additlonal $\mathrm{CH}_{2}$ in normal alcohols, and $22^{\circ}$ in the oormal fstty acide, as ethylic alcohol, $\mathrm{C}_{2} \mathrm{H}_{5}(\mathrm{OH}) 78{ }^{\circ} 4^{\circ}$; propylic alcohol, $\mathrm{C}_{3} \mathrm{H}_{7}(\mathrm{OH}) 97^{\circ}$; acetic acid, $\mathrm{CH}_{3} \mathrm{CO} \mathrm{OH}^{\circ} 118^{\circ}$; propionio scid, $\mathrm{C}_{2} \mathrm{H}_{5}{ }^{\circ} \mathrm{CO} \cdot \mathrm{OH}^{3} 149 \cdot 0^{\circ}$. The secoadary and tertiary alcohols have lower boiling points than the primsry alcohols. The raplacement of hydrogen in a hydrocarbon by raplacement of hydrogen in a hydrocarbon by chlorine, or by a radical, raises the bouling $\mathrm{C}_{6} \mathrm{H}_{5}$ bl. $135^{\circ}$, amidobenzene $\mathrm{C}_{6} \mathrm{H}_{5}\left(\mathrm{NH}_{2}\right) 182^{\circ}$.
""These are the very solntione it will be remembered, Which behava singularly io respect of thair refractive indices, and elso of their boilsng pointi. -Proct

Bontuc nuts, Bondue seeds, Nicker nuts, Grey nicker nuts: The hard, beantifully-polished seeda of Guilandina bonduc and bonducella. They are strung into necklaces, bracelets, rosaries, dic. They possesa tonic sind antiperiodic properties, and are used in India against intermittent fevera.
bŏnd'-wom-an, s. [Eng. bond; woman] the same as IBondswoman.

The rugitive ond. remiman with her son.
yiuton: Paradive Regained. il. II.
bōne (1), "bōane, "boone, "bön (Eng.),
bane (Scotch), a \& a - [A.8. bán; O. 8. \& Sw
A. As substantive:
I. Ordinary Language:

1. Literally:
(1) Sing.: In the same sense as II., 1. Physioh. (q.v.).
(2) Plur. Spec.: The whole vertebrated skelston, or even the corpse.
"Lot no mos move his bonee. So thor let his out of Samarti." -2 Eings $x$ xitit is.
(3) Used of some snimsl substances, more or less resemhling true bone.' [Wralebone.] (4) Small pieces of wood used by hnilders, \&c., for "setting eat" work. [Bonimo-stick.]
-(5) Used for the atalks or refuse of flax.
 (etherey.)
(6) A piece of whalebone ueed to stiffen tays.
2. Figuratively:
(1) Plur. : Dice.

And watch the box. for fear they thould eanvey
Falso bones, and put upon me in the play
(2) (See 3.)
3. In special phrases:
(1) A bone of contention: Something which incites to quarrel, as dogs often do sbout a literal bone.
(2) A bone to pick: Something to occupy one in an ioteresting way and keep him quiet, as dogs become sileot when they have obtained a bone to gnaw.
To have a bone to pick with any one is to have cause of quarrel with or complaint againat him.
(3) To be upon the bones: To attack.
(4) To get one's living out of the bones

Among lace-makers: To get one"s living by weaving bone-lace (q.v.). (Nares.)
(5) To make bones: Te hesitate. The metaphor is taken fron the idea of wasting time in picking bones. (Skeat.)

Hes to amere and $1 \mathrm{ye} \mathrm{c}^{\circ}$
(6) To make no bones: To awallow whole, not to scruple abent deing something.
II. Techrically:

1. Physiol.: A hard, dense, opaque subotance nsed as the internal framewerls of man, the vertebrata and some cephalepoda, and as the external covering of several classes of animals. It is composed partly of an organic or animal, and partly of an inorganic or earthy material. In a child the earthy material is a triflo under half the weight of the bone, in an adult four-fifths, and in an old person seven-eighths. The animal part of bone consists of cartilage, with vessels, medullary membrane, and fat. Three hours' boiling will convert it into gelatine. The animal part conaists of phosphate and carbonate of lime, with smaller portions of phosphate and carlonate of magnesia. The outer portion of a bone is in general compart end strong, the interier reticular, spongy, or cancellated, that fa, having spaces or cells called cancelli communicating freely with each other. [Cancellit.] The hard aurface of bone is cavered by a firm, tough membrane called the periosteum. [PERLostevm.] In the compact tissue are vascular canals called Haveraian Canals Haversian.] There are in boue pores coalescing into a lacuna beneatl. It has bloodveasels sad nerves. Bones may be classified into Long, Short, Flat, and Irregular. (See Told at Bowman's Physiol. Anat., vol. i., ch. v.. p. 103.) A long bone is divided into a alaft or central part and two extremnities. (Ibid.) There are 198 bones in the fully developed inman skeleton
2. Chem.: Bones conaist partly of animal and partly of earthy matter. The former is called ossein (q.v.). it yields gelatine on being boiled. The composition of human bones, as anslyzed by Berzelins, is -
Animal matter selnble by boiling - $32 \cdot 17$
Vascular anbstance
$1 \cdot 13$
Vascular anbstance
Calcium phosphate, with a little
calcium fueride
Cagnesium phosphate
Soda, with a little cormmen salt
53.04
$11 \cdot 30$ 1.16
$100 \cdot 00$

In the other vertebratos the proportions are slightly different.
3. Palcoont. : Excepting teeth, no part of a vertebrated animal is more iodestructible than bones, and these are so correlated to the testh, digestlve organs, external covering, \&ec, that in many cases the finding of a siagle bone will enable a akill
4. Music. Pl. (Bomes): Four pieces of bons taken from the ribs of horses or oxen, sad strick together for the purpose of marking time in accompsniment to the volos or an instrument. Sometimes only two lones are instrument. Sometimes only two lones are used, or in lieu of these two amall wooden macee. The instrument is probably of Arrican Theban era. Negro minstrels atill patronise it. Country people call sach bonee knickyknackera (q.v.). (Stainer \& Barrett.)
"Let's bave the tougs and the bonse." - Shakera:

- 5. Weaving: A kind of boblins made of troller boaes for weaving bonelace (q.v. 2 (Johnson.)

6. Art: Bonea are used in many of the arts. See the example.
"Mechanically considered, the uzes of bone are for toruing, itiaying, bandles of knives and toots, bililard

 boae (so callioul) it not ebone, hat partsken of the anture
of born Bone is ased hy husband zen on a masurre. Bonan binuched in an ovea Are, removing the carbon, Yield a powder which is used in making the eupein of
B. As adjective: Of or belonging to bose.
"it Item, a bane cofre, and in it \& grete cork of gold, coll Invencorion (S. 1489), 1.12 . (Jamieion.)
C. In compos.: Made of bones, in the bones, containing bones, or in any other way pertaicing to bonea. (See the compounda.)

## bone-ace, s.

Card-playing: A game at cards in which he whe has the highest card turned uy to him wins the "bone," i.e., half the stake
bone-ache, "bone-ach, s. As ache or pain in one or more of the booes, opecially one prodnced by syphilis.

Itcurabis bone-ache"-Shakesp. : Tr. $\&$ Grean.,

## bone-ash, s. [Eng. bone; and ash.]

Commerce: Ash made of calcined bones. It consists chiefly of tricalcic phosphate $\mathrm{Ca}{ }^{\prime}\left(\mathrm{PO}_{4}\right)_{2}^{\prime \prime \prime}$, mixed with abent ene-fourth its weight of magnesinm pheaphate and calcie carbonate.

## bone-bed, Axmonth bone-bed, .

Geol. : A dark-celoured bed, ao called from the remains ef sauriana and fishes with which it abounds. It is qeen at Axmeeth in Devonahire, and in the cliffs of Westbury snd Aust in Gloncestershire. It was formerly snpposed to be the lowest stratum of the Lias, hut 8ir Philip Egerton showed, from the character of the fish remains, that it was really referable to the Upper Trias. Its characteristic fishes are Acrodus, Hyboduk,Gyrelepis, and Saurichthys.

## bone-black, 8.

Comm. : Animal charcoal. It is ebtained by charring bones. It centains about 10 per cent. of finely divided carbon disseminated through the porous phosphate of calcium. It has the the prous phosphate of calcium. it has the power of absorbinggases, removing the colonr-
ing matter and alkaloids, se., from their soluing matter and alkaloids, se, from their roll-
tions. It is used to disinfeet ulcers, dc., also to decolourize angar and other organic aubstances; ita properties can be restored by heating' it to redness in closed vessels. If treated with dulute bydrochloric acid, HCl , for two days the mineral matters are removed and a black palverulent substance is oltained, which has been used as an antidote in cases of poisoning with vegetable alkaloids.

- Among the rulatils prodncts obtained When bones are calcined in close vessels is a peculiar cil, which is burned in lamps in close chambers; while the soot which sccumulates on the sides is collected and forms the pig. ment known, according to quatity, as bone black or ivory-black.

[^72]Moine-black cleaning apparahus: A device for purifying, screening, and cooling bone-black after treatment fn the revivifying retort.
Bone-black cooler: An epparatus for cooling enimal charcoal after its removal from the turnaco.
Bone-black furnace: A form of furnace for revivifying bone-black.
Bone-black kiln: A chamber or retort monnted in a furnace for reburning bonablack to remove imparities with which it has become saturated or impreguated during ita u6e as a defecator and filtering material.
bone-breaker, s. [Eng. bone; and breaker. In Ger. beinbrecher.]

1. Gen.: A person who or a thing which breaks bones.
2. Spec.: A name for the aes-eagle, osprey, or fishing-hawk, Pandion haliaetus.

## bone-breacia, s. [Baeccia.]

Geol. : An admixture of fragments of limestona and bones cermented together into a hard rock by a reddish ochreous cement.

## bone-brown, s.

Painting: A brown pigment made by roast ing bone or ivory till it assumes a brown hue.
bone-dust, s. Bones ground into dusi to be made into manure.
bone-earth, 2. The earthy residuum left after hones have been calcined. It is also called bone-ash. It consists chiefly of tri calcic phosphate, mixed with about one fonrth fita weight of magaesic phosphate and calcic esrbonate.
"Ast, the phosphato of lime id the name an bon h. p. 40

## bone-elevator, $s$.

Surgery: A lever for raising a depressed portion of bone, as, for instance, a part of the craniam.
bone-grease (Eng.), bane-grease (Scotch), s. The oily substance produced from bones which are bruised and stewed on a olow fire. (Jamieson.)
bone-manure, s. Manure raade of bones.
bone-mill, a A mill for grinding bones or making either manure ar bone-biack Bone-grinding is effected by passing the bones throngh a series of toothed rollers arranged in pairs, the rollers being tonthed or serrated in different degrees of fineness, and riddles sre provided for sifting the bones into sizes, and they are then sold as inch, three-quartera half-inen, and dust

## bone-oll, bone ofl, a

Comm.: An oil called also Dippel's OII (Oleum animale Dippelii), obtained by the dry distillstion of bones and other animal matter It containg the following organic tertiary bases: Pyridine, $\mathrm{C}_{5} \mathrm{H}_{5} \mathrm{~N}$; Picoline, $\mathrm{C}_{6} \mathrm{H}_{7} \mathrm{~N}$ Lutidine, $\mathrm{C}_{7} \mathrm{H}_{9} \mathrm{~N}$; Coilidine, $\mathrm{C}_{8} \mathrm{H}_{11} \mathrm{~N}$; Parvoline, $\mathrm{C}_{2} \mathrm{H}_{13} \mathrm{~N}$; Coridine, $\mathrm{C}_{20} \mathrm{H}_{15}{ }_{5} \mathbf{N}$ : Rubidine. $\mathrm{C}_{11} \mathrm{H}_{17} \mathrm{~N}$; and Viridine, $\mathrm{C}_{12} \mathrm{H}_{19} \mathrm{~N}$. Some of these bases have been obtained gynthetically; the more important will be hereafter de. scribed.
bone-seed, s. The Osteospermum, a genus of planta belonging to toe order Aateracese (Composites).

## bone-spavin, a.

Farr. : A bony excrescence or hard swelling on the inside of the back of a horse's leg.
bone-spirit, s. A spirit or spirituous liqnor made from bone.
bōne (2), s. [Icel. bon =a prayer.] [Boon.] Prayer. "". und sche thar noght of hure oona fullch

Bood'dha, Bud'dha, s. [Pali booddro $=$ known, understood, possessing knowiedge, enlightened, wise; Booddha= the peraonage described in this article. Sometimes the word is spelled with oae $d$, but this is erroaedis, teacher hut the planet Mercury.]

1. Gen. : A man posseased of infinite or infallible knowledge (Childers); a delfed religious teacher. There was said to be s series of them, a number having come and gone before Gantama, the personage described nnder No. 2. When no Booddhs is on earth, the true religion gradually decayg, but it flourishes in pristioe vigour when a new Booddha is raised up. He is not, however, entitled at once to that honourable appella. tion, it is only after he has put forth arduous exertions for the faith that he attains to exertions for the Math of the Booddhas precediog the personage described under No. 2 sppear log the personage described buder pis imppear predecessor, kasyapa or Kassapo, may have been a real person.
 the cnes Sakya Mani was the fourth Buddha of the wotual ige or second division of the Kappo
2. Specially: A distinguighed personage of Aryan descent, whose father was liug of foot of the Nensulese noountring shout 100 milea north of Benares : he was of the Salihya milea north of Benares: he was of the satimya
family, and the class of the Gantamas, hence his distioguished soo was often called Sakhya Muni or Saint Sakya, and Gsutams or Guadama. The Chioese call him Fo, which is the name Booddha softeaed in the pronunciation. The Arysn
invaders of lndia looked down with coatempt ufon tha Turanian inhabitants of that land and to kecp their blood oncontaminated daveloped the system of caste. Booddha, whoge human sympathy was wide-
reaching, broke through reaching, broke through though he was himself an Aryan, preached the equality of races, a
doctrine which the oppressed Turanians eagerly embraced. By the
common account he was born in B.C. ©22, sttained to Booddhahood in 580 and died in 543 or in the opinion of some in B. 4 and other years than these, such as 400 B. C., or even lower, have been contended for. Booddha becane deified by his adrairing followers. Those images of an orientsl god made of white imarble, so frequently geen in Engllsh White marble, so frequently seea in Englsh presentations of Booddha.
Bood'dhạ-hóod. Bûd'dha-hóod, s. [Booddha; and Eng. suffly -hood.] The state of a Booddıa.
Bood'dha-ship, Butd'dha-ship, [Booduh; and Eng. 日uffix -ship.] The degree or condition of \& Booddha.
Bood'dhism, Butd'dhism, s. [Ssasc. \& Pali Booddha (Boonoha), and Eng. sulf. -ism.] Theol., Phil., t Hist.: The system of faith Introduced or reformed by Booddha. [Bonidea.] Ia its origio Booddhism was a reaction agaiost the caste pretensions of the Brahmana and other Aryan [Aryan] Invaders of India, and was therefore eminently fitted to become, as it for a long time was, the religion of the vaoquighed Turanians [Turanian.] As might have beeo anticipated, the equality of all castes was, and is, one of ita most fundaments teoets. [Caste.] Another tenet is the dein cation of med who, when raised to Booddha hood, are called Booddhas. Professora of the peraonages, but practically confine their rever-
ence to sbont seven. Pre-eminent among these stands Booddha himself. Personally, he never clatmed divioe honours. It was his disciples Sakya (For other names, such as Gsntama, \&acy, given to him, see Roondra.) As Gantama, though adored as superhnman, is after all coufeasedly only a deified hero, it has been to admit a Suprame Intelllgence, Governor of this and all worlds Io philosophy, they this and all worlds io philosophy, they
believe the aniverae to be mays, an illusion or phantom. The later Brahmanists do the same; hut in the opidion of Krishna Mohun, Banergea, snd others, these latter seem to have borrowed the tenet from the Booddhists rather than the Booddhista from them. Of the six schools of Hindu philosophy, those which Booddhism most closely approaches, are the Sankhya philosophy of Kapila, and the Yoga philosophy of Patenjall. Booddhism enjofns great tenderness to andmal life. The felicity at which its professora sim in the future world is called Nirvana, or, more sccurstely, Nibbansm. It has been disputed accurstely, Mibbansm. It has beea disputed whether this Means annihilation or blissful
repose. Mr. Robt. Cæsar Chiders, in his repose. Mir. Rebt. Cassar Chiders, in his arguments io favour of the former view. Booddism was attended by an enormous development of monasticism.
The lagguage in which Gantams or Booddhs taught was the Magadhl or Pali, the Isnguage of Magadha, now called Bahar or Behar. [PALi.] It was a Prakrit or Aryan vernacular of a proIt was a Prakrit or Aryan vernacular of a province, but has now been raised to the dignity
of tha Booddhist ascred tongue throughout thic of tha Booddhist asacred tongue throughout the
world. Gsutama'g followers believe that his warld. Gsutama's followers believe that his
saylngs were noted down in the Tripitaka, or "Three Treasuries of Discipline, Doctrine, and Metaphysics," which constitute the Booddhist scriptures. What their real age is has been a matter of dispute; the diacovery by General Cunningham, in 1874, of allusions to them in the Bharhut Sculptures, which sre of date third century B.C., is in favour of their genuineness sud satiquity. [Booodmlst Sangerit Booddhist books digcovered by Brian llodgson in Nepanl are mnch more modern sad present i corrupt form of Booddhism.
The first general council of the Booddhist Church was held at Rajagriha, the capitel of the Magadha kingdom, in B.C. 543 ; the second at Vesal (Allahabad [?], or a place near Pataliputra (Gr. Palibothra $=$ modern Patna) on the Ganges, in 13.C. 307 or 250 . This last one was called by Asoka, an emperor ruling over a great part of India, who had been converted to Boodahism, and ha sometimes called the Congtantine of that faith, having estshished it sa the state religioa of Weatern, Central, and Southern Indis, and slso to Ceylon and to Pegu. Booddlism was doninsnt in India for about I, 000 years after ita establishment by Asoks. Thea, having become corrupt and its vitality having decayed, reviving Brahinsnism prevailed ovcr it, and all but extioguished it on the Jainism, still exista in Marwad and many other laarts. it has all along held its own however, in Cesion. On losing continental India, its missionares tran which still remains Booddhist. The religion of Gautanis flourishes also in Thibet, Burmah of Gautanis flourishcs also in Thibet, Burmah, and Japan, and is the great Turanian faith of
the modern as of the ancient world. [BoooDH15TS.]

Tha Rev. G. Smith pointa out resemblances between Booddhism and Roman Catholicism (these, it may be added, were first discovered by the Jekuit misgionaries, who were greatly perplexed by then): " There is the monastery, celibacy, the dress and caps of the priests the incense, the bells, the rosary of beads, the lighted candles at the altar, the same intonagatory, the praying in an unk inown tongue the offerings to departed spirits in the temple. The closest similarity is in Iamaism, an am plification of Booddhism in Thibet. [Lama ism.] But most of the resemblances are ceremonial; there is no close similarity in doctring between the two faiths.
thon of the existence of Amderhiom previous on Saky Muntis ministry. $\rightarrow$ Coh syces in dowr. A suat. Soc., vi.

Bood'-dhist, Btad'-dhist, a \& \& [San
A. As adjective: Pertaining or relating to Booddhe or to Booddhism.
B. As substan.: One profeasing the Booddhist taith. The Booddhists are not less than from 350 to 455 millions in number, and conthe human race.

## "Palt then is the language of Marediba in Which scriptures of the B.

## Booddhist architecture,

Arch.: A style of architecture characteristic of the I adian or other Booddhists. "There is no known specimen of srchitectare in Indie," Mr. Fergusson says, "the date of which carries us beyond the third century before Christ." When the curtain rises the architecture visible is Booddhist. In 250 B.C. the great emperor Asoka introduced the firat great era of Indisn Up till thia, time all erections had been wood; with him the usa of atone commenced. He engraved edicts, enjoining tenderness and humanity to snimals, on lats (pillars) [Lat] in Cuttack, Peshawar, and Sarastra, in the Dhun or Dhon, and other parts of the Himalayas and in Thibet. He built innumersble topes (mounds). [Tope.] No built tenples or monasteries of Booddhist origin have come down to our times, if indeed any ever exiated; hut multitudes of rock-cut tenuples and monasteries assembled in groups have been found in Behar, Cuttack, the Bombay presidency, and elsewhere. Those of Behsr, Which are cut in graoite, are the oldest, and itself is called. Those of Cuttack pullowed. Thelf is of the Bombay presidency, enbracing nine-tenths of the whole, were the last; they are cut in amygdaloidsl trap. The Booddhiat architecture, though essentially indcpendent, yet showed a tinge of Greek influence. It originated the Jains system of architecture. [Jaina Architecture.] (Fergusson.)
Bood-dhis'-tic, Būd-dhis'-tíc, Bood-dhis'-tic-al, Bud-dhis'-tic-al, a [Eng. Booddist; -ic, -al.] The same as Boonnhist, a. (q.v.)

* (2) Spec.: To register a couple in the aesaion records, in order to the proclamation of banus. (O. Scotch.)
on Saturday, that is, their names wecurled for the publication of the banne, in the books of the Kirk
(3) To pay, at an office appointed for that purpose [Bookino-office], for the tradsmissioñ by rail, \&c., of a parcel or gooda.

2. Fig.: Unalterably to record in the memory.
Book both my wilfulness and errors down."
Shakeap.; Sonnet
II. Intrans. To book to a place: To Iay for and receive a ticket entitling one to ride by train, \&c., to a certain place.
book'-bīnd-ẽr, " bools'-bynd-ẽr, s. [Eng book; binder.]
3. Of persons: One who binds books.
4. Of things: A contrivance of the nature of a temporary cover, for holding together newa papers, pamphlets, or similar articles.
$\dagger$ book'-bind-ẽr-y̆, s. [Eug. book; bindery.] A place for binding booka.
book'-bind-rigg, s. [Eng. book; binding.] The art of atitching or otherwiae fastening together and covering the sheets of paper or similar material composing a book. The edge of a modern book conatituter by the margin of the paper compoaing it ia colled the binding-edge.
© When books were literal "volumes," or rolls, the way of " binding " them, if it could be so called, or at least of keeping them together, was to unroll them from one cylinder gether, wat to unroin them from one cylinder

201, b6y: pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as ; expeot, Xenophon, eydst, -ing.

another. When books becams separate folios another. When books becams separate folios
the first method of dealing with them seems the frat method of dealing with them seems otring passed through in hols at the margin of etring passed through a hols at the margin of the pile. This is still done in the south of Indis and Ceylon with writing on talipot or other palm leavea. The bolding together of folios of a literary man's manuscript hy s small clasp at one edge is an essentially similar dovice. The present method of binding seems to have been invented by or under Attalus, king of Pergamus, or his son Eumenes, about 200 B.C. The oldest bound book known-the binding wes ornamental-is the volume of St. Cuthbert, about A.D. 65e. I vory was used for book covers in the eighth century ; oak in the ninth. The Book of Evangelists, on which the English kiugs took their coronation oath, the English kings took their coronation oath, Was bound in onk boards, A.D. 1100. Velvet,
silk, hogskin, and feather wera used as carly silk, hogskin, and feather were used as early as the 15 th century; needlewors binding began in 1471 ; vellum, stamped and ornamanted, sbout 1510 ; leather sbout the sains date, and caif in 1550. Cloth binding superseded the paper known in England es "boards" in 1823 ; india-rubber backs wera introduced in 1841, tortoise-sheil sides in 1856. The chief processes of bookbinding are the following: Folding the sheets; gatherlng the consecutivs signatures; rolling the pack the back for the cords: rounding the backs sad glueing them. edye-cutting ; bind backs sud glueing them; edge-cutting, binding, securing the book to the sides; covering the sides and back with lesther, muslin, or paper, as the case may be; tooling and lettering; snd, finally, edge-gilding. Books may be fuil bound, i.e., with the bsek and sides leather, or half-bound, thast is, with the back leather sud the sides paper or cloth.

book'-ish-něss, s. [Eng. bookish; -ness.] The propensity to, or the habit of stuaying books. bookish (q.v.). (Johnson.)
book'-keep-ẽr, s. [Eag. book; keeper.] One who, as accountant, sscretary, or clerk, keeps books, making the requisite entriea in them day by day.

Here, brother, you ehall be the book-keeper
Thit is the argumant of that they shew, $\begin{gathered}\text { y } y: S p a n i c h ~ f r a g e d y . ~\end{gathered}$
book'-kēep-ling, s. [Eng. book; keeping.]

1. Arithm. \& Comm.: The art of keeping books in which the pecuniary transactions are so unremittingly and so accurately entered that ons is able st any time to ascertain the exact state of his finsncial aftairs or of any portion of thein with clearness and expedition. The art, in a certain undeveloped state, must have existed from immemorial antiquity, bat it received such improvement and impulas at Venice as to make that compsratively modern city to be considered its birthplace. The first known writer on bookkeeping was Lucas di Borgo, who published a treatise on the snbject in Italisu in 1495. It is generally divided into bookkeeping by single sud bookkeeping by double entry. In the former every entry is singls, i.e., is placed to the debit or credit of a single sccount, whils in the latter it is double, that is, it has both a debtor and creditor account. 10 other worde, by single sntry each transaction is entered only oace in the ledger, and by donble entry twice. Bookkeeping by single entry is imperfect, and is scarcely fitted even for very limited establishmenta. Msny shopkeepers haviug recourse to it have simply a waste-book and a journal, the former ussd as a receptacle s journal, the former used ss the receptacle those to a certaiu extent classified. In other those to a certaiu extent classified. In other cases ${ }^{\text {a }}$ casb-book also is used. Book-
keeping by double entry being first prackeeping by double entry seing the sajacent towns, is often called the Italisu method. In wookseeping by double entry there is wo waste-book, all transactinns inwards falling under four heads: cash, bills, book-debts, and stock. There are, moreover, a cashbook, a bill-book, a book for book-debts -called the sold ledger-and a book for the record of stock, that is, stock in hand. To the hought book for debts receivable corresponds the bought ledger for debts payable. There ars various other books in a large es tablishment. In smaller establishments it is enough to hisve a cash-book, a day or wastebook, a journal, snd a ledger. It is in the ledger that the elaborste classification of al transactions is entered. The shility to mak out a bsiance-sheet is much increased by the simple device of making impersonal entries that is, entering cash, iron, \&c., es if they were nercantils traders, sand grouping s number of articles togetber under the liead ing sundries. Then there are accounts of the form sundries debtor to cash, or cash debtor to sundries. If a merchaut have purchased iron, whit he has paid for it is dehited to iron which is expected to meet it when the metal is disposed of, snd so with every other expense incurred by the firm for purposes of business.

Sometimes instead of bookkeeping by single or that by double entry, there is a combinstion of the two called mixed entry. [Bill bOOK, Cash-book, Day-800k, Ledoen.]
2. Sarcastically: The practice of not return ing books which one has borrowed. (Colloq.)

> part the engageuneots of their warrioura,
> Where both from dide to eide nay kipi, And only encouoter it bopeep."

bŏp'-y̆-ríd, \& [Bopynine.] Any cruetacesn of the family Bopyridæ. (Used slso adjectively.)
bō-pyr'-i-dæ (yr as ir), s. pl. [From Mod. Lat. bopyrus (q.v.).]

Zool. : A fanily of Sedentary Isopod Crusta ceans of shoormal type, which live in the gills, or attached to the ventral surface of ahrimps or aimilar animals. They nadergo metamorphosis, snd the sexes ara distinct.

## bó-pyr'-ŭs (yr as ir), s. [Etym. donbtful.]

 Zool. : The typical genus of the Crustaceons family Bopyridx (q.v.). B. squillarum is a common form.bō'-quĭn, s. [Sp.]
Weaving: A coarse Spanish baize.

- bor (1), s. [Bone.]
* bör (2), s. [Boar.]
" bor (3), s. [Bower.] (Ear. Eng. Allut. Poems (ed. Morria) ; Pearl, 964.)
- bör, pret. of v. [BEAR.] (Story of Gen. and Exod., 425.)
bör'-a, s. [Said to be a dialectal form of Ital. borea $=$ the aorth wind. Cf. Illyrian bura $=$ storm, tempest (N.E.D.).] A violent north wind comnoon in the upper parts of the Adriatic Sea.
+ bör'a-ble, a. [Eug. bor(e): tble.] That may be bored. (Johnson.)
bŏr-a'-çhǐ-ō, s. [Sp. borachio \& borracha $=$ a leatheru bottle; borracho = drunk.]
* L A leather bottle or bag used In the Spsoish peninsula to hold wine, \&c.

2. A drunkard.
"How yon atint- of wioe 1 D'ye thiok my aiece will ever endore such eborachio 1 You're an absolute
bör-ăç-ic, $a$. [In Fr. boracique, from Lat. borax, gen. boracis.]

## boracic acid,

1. Chem. : An acid, now called Boric Acid (q.v.)
2. Min. : Sassolite (Dana). Sassolipe (Brit. Mus. Cat.). [Sassolrte.]
bör'-a-çītc, s. [In Ger. borazit; Lat. borax, genit. boracis; and suffix -ite, Min. (q.v.).]
Min.: An ismmetric tetrahedral mineral; hardness 4.5 when massive, but 7 in crystale; sp . gr. 2.9 ; lustre, vitreous; colour, white or grayish, yellowish, snd greenish. It varies from being aubtransparent to translucent. It is pyroelectric. Compos : boron, 58.45 to 69.77 ; magnesia, $23.80-31.39$; sesquio xide of iron, $0.32-1.59$; chloride of magnesia, 9.97-11.75 and water, $0-6.20$. Boracite is (l) ordinary either crystallized or massive, or (2) it ia ironboracite. Found in Germany; France, de. (Dana.)
bơr'a-coŭs, $a$. [From Lat. borax, genit. boracis (q.v.), and suffix -ous.] Consisting in lart of borax; derived from borax.
†bŏr'-agge (1), \& [A corruption of borax (q.v.).]

## borage-grot,

Numis. : A groat or fourpenny piece of a particular deacription, formerly current ia scotland.
"Item the auld Englls grot anll pase for $x$ vid, the
bǒr'-aġe (2), s. [In Ger. borago; Dnt. burnagie; Fr. bourrache; Sp.borraja; Port, borragem; Ital. borraggine; Pol. borak.] [Borago.]
Bot. : The Engliah name of the genus Borago. [Boraoo.] The common borage is an exceedingly bispid plant, with large, brillisnt, blue flowers, having their stamens exserted. It was once regarded as a cordial ; the young leaves may be used as a salad or potherb, suid the flowera form an ingredient in cool tankards.
bǒr'-age-wõrts (age as íg), s. pl. [Eug., dc., borage, and suffix -worts.!

Bot. : The English name of the Botanical order Boraginaceæ (q.v.).
bơr-ăğ'in- ${ }^{\mathbf{a}}$ '-çĕ-w, s. pl. [Lat. borago, gen. boraginis, snd -acece, nom. fem. pl. of adj. suffix -aceus.]

Bot. (Boragevorts) : An order of plants placed by Liadley under his 48 th or Echeal Alliance. They have monopetalous corollas, generally with five, but aonctimea with four, divisions,
five stamens, a four-parted, fonr-seeded ovarys produciog, when ripe, four nnta distlinct from each other. Leavea generally very rough. Convolvulacees, and other allied ordera, the four yeeds bring them near Lablata. They are natives principally of the temperate parts of the northern hemisphere. 600 species were the northern hemisphere.
known in 1847. (Lindley.) The representa known in 1847 . (Lindey.) The representan tives of the order In Britain ara Echium,
Pulmonaria,
Lithospermum, Mertentia, Borago, Symphytum, Lycopsis, Anchusa, Myosotis, Asperugo, Echinospermum, and Cynoglossum.
bơr-a-ğ̣̆n'-ě-oŭs, a. [Lat. borago, genit boraginis, and Eng. anffix eoous.] Pertaialne or relating to the Boraginacem or to the structure by which they are characterised.
bŏr-ä'sog, s. [Fr. bourrache, from Low Lat boraginem, sccus. of borago, prob. from Low Lat. burra, borra = rough shaggy hair, from the roughness of the foliage.]
Bot. (Borage): A genns of plants-the typical one of the order Boraginacem (Borageworts), It has a rotate calyx, ita throat closed with flve teeth, exterted stamens, with bifid thameata, the inner branch beariag the snther. B. officinalis, or Common Borage, is naturaliged
in Britain, but ls not a true native. [Borage]

* bör'-ą-měz, s. The same as Baromerz (q.v.).
bö-răs'-cō, s. [Sp. \& Port. borraseo; Fr. bourrasque.] A violent squall, generally accompanied with thunder and lightnlag.
bör-ăs'-Bŭs, 3. [From Or. Bópa $\sigma \sigma o s$ (borassas) $=$ the fruit of a palm-tree.]

Bot.: A genus of palme, constituting the type of the eection Borassez. It contains the Borassus flabelliformis, or Fan-leaved Borassus, or Palm; called slso the Palmyra or Brabtree. It grows in the East lndies, rising to the height of about thirty feet. It delighta la elevated and hilly situations. Ths fruit is about the aize and shape of a child's head. Wine and sugar are made from the sap of the trunk.
bör'-āte, s. [Eng. bor(ic), and suff -ate.]
Chem. : A salt of boric acid.
bör'-ăx, "bor-as, s. [In Fr. borax; Sp. borrax; Ital. borrace; Arah. buraq, from baraq $\alpha=$ to chine.]

1. Chem.: Biborate of sodium, sodium pyroborste, $\mathrm{Na}_{2} \mathrm{~B}_{4} \mathrm{O}_{7}$. It is found native in Thlbet, Cslifornia, and Peru, and is called tincal; it is slso obtained by boiling the crude Tuscan boric acid with hsif its weight of $\mathrm{Na}_{2} \mathrm{Co}_{0}$. It crystallizes at $79^{\circ}$ in octohedrs, $\mathrm{Na}_{2} \mathrm{~B}_{4} \mathrm{O}_{7} .5 \mathrm{H}_{2} \mathrm{O}$; and below $56^{\circ}$ in monoclinic prieme, $\mathrm{Na}_{2} \mathrm{~B}_{4} \mathrm{O}_{7} \cdot 10 \mathrm{H}_{2} \mathrm{O}$. When heated In the air it swells up and loces its water, forming a spongy mass. The aqueous colution of borax has a elight alkaline reaction, turning yellow turmeric paper brown.
2. Phar.: Borax acta as a mild alkali on the alimentary canai and prodnces diuresis; it has a peculiar topical sedative action on the mucous membranes, and is used as a gargle in aphthous conditions of the tougua and throat, and in cases of mercurial salivetion.
3. Manuf.: Borax is used in the process of soldering oxidizable metals; being apriakled over their surface it fuses and diesolvee the oxide which woutd prevent adhesion. it is used for fixing colours on porcelain.

4. Afineralogy: A monoclinic, rather hrittle aweetish alkaline mineral, with a hardness of $2-2 \cdot 5$, a sp . gr. of 1.716 , a vitreous, resinons, or earthy lustre, \& greyish, bluish, or greenish white colour. Composition : Boric acid, 36.6 soda, $16 \div 2$; water, $4 \div \cdot 2$. It has been calle tincal, borate of soda, chrysocolla, \&e Found first in a salt lake in Thibet, and afterward in Ceylon, California, Canada, Peru, \&e
borax beads, s. $p l$.
Chem.: "Beads" made of borax. They ara naed in blowpipe analysis to distin. guish the orals the varions raetals, and hent to form a small loop st pasend: this heated to reduesa and dipped on powdered borax. The adhering borax is heated in the flame to drive off the water; it theo forme a colourless tranaparent bead. A minute frag colourless the substance to be tested is pisced
fate, făt, färe, alidst, whãt, fall, fathor; wē, wět, hëre, camel, hẽr, thêre; pine, pĭt, sïre, sir, marine: gō, pơt,

on it, and it is hested in the blowpipe tiame
till it diasolves. It gives characteristio colour in the reducing and in the oxidizing blowplpe flame.

Reducing flame: Colourless-silicates of earth metala; $\mathrm{Al}_{2} \mathrm{O}_{2} \quad \mathrm{SnO}_{3}$; alkaline earths, ourths, lanthanum, and cerium oxides, tantalic acid, manganio oxide, didymium oxide. Yellow to brown-Tungatic scid, titanic acid, molybdic acid ; and vanadic acid, when hot. Red Suboxide of copper, $\mathrm{Cu}_{2} \mathbf{O}$. Green$\mathrm{Fe}_{2} \mathrm{O}_{3}$ uranic oxide, chromio oxide; and vanadic acid when cold. Grey-Aga $\mathrm{O}, \mathrm{ZnO}$, $\mathrm{CdO}, \mathrm{PbO}, \mathrm{Bi}_{9} \mathrm{O}_{3}, \mathrm{Sb}_{2} \mathrm{O}_{5}$, tellurous salts, and NiO.
Oxidizing flame: Colourless bead-Silicates, alumina, stannic oxide, alkaline esrthe ; $\mathrm{Ag}_{2} \mathrm{O}$, Ta, Niob, Te, ealts; titanic acid, tungstic acid, molybdic acid, $\mathrm{ZnO}, \mathrm{CdO}, \mathrm{PbO}, \mathrm{Bi}_{2} \mathrm{O}_{3}$, $\mathrm{Sb}_{2} \mathrm{O}_{5}$. Yellow to brown- $\mathrm{Fe}_{2} \mathrm{O}_{3}$, uranium oxide; venadic oxide when hot. Red- $\mathrm{Fe}_{2} \mathrm{O}_{3}$. crrium oxide, and oxide of nickel when cold. Violet-Mn selta, didymium oxide; and a mixtare of CoO and NiO. Blue-Cohalt oxide ( CoO ), copper oxide ( CuO ) when cold Green -Chromium oxide $\left(\mathrm{Cr}_{2} \mathrm{O}_{3}\right)$, vanadic acid when cold, CuO when hot; and $\mathrm{Fe}_{2} \mathrm{O}_{3}$, containlag CuO or CoO.
bör-bǒn'-1-a, s. [From Gaston de Bourbon, Duke of Oriesoa, aon of Henry IV. of France, a patron of botany.]
Bot. : A papilionaceoua genus of plants containigg about thirteen speciea, all from Sonth Africa; yellow flowers.
bor'-bor-hs, s. [From Gr. Bópßopor (borboros) $=$ slime, mud, mire.]
Entom.: A geaus of two-wioged fliea belonging to the family Muscldæ. The apecies are small insects, and frequent cucumberframes, duug-heapa, and marshy apota.
bor'-bあr-ygm ( $g$ ailent), *bor-bor-ygg'müs, ${ }^{3}$. [In Fr. borborygme; Irom Gr. $\beta$ opBopuypos (borborugmos) = a rumbling in the boweta; $\beta$ op $\beta$ opvís (borboruzó) $=$ to have a rumbling in the bowela; from the sound.]
old Med.: a rumbling in the bowels. (Glossog. Nov., 2nd ed.)

bor'-dẽr, " bör'-doure, " bör'-dure, a. \& a [From Fr. bordure (Littre) ; from Fr. border = to border, to edge; Low Lat. bordura $=\beta$ margin Compare Sw. brddd $=$ brim, margio, briak; Dut. boord = border, edge, brim, . . .] [Board.]
A. As substantive:

1. Ordinary Language: The brim, edge, margin, or boundary lioe of enything. Spec.-
2. Of earthenware, a looking-glass, a picture, tc.: The brim, the margin, the frame, or anything else aurrounding it.
Sordery of crymal, and great countertelt precious "tones "-Bacom.
3. Of a garment: The edge or hem, aometimes ornamented with needlework, or at least of a diverse colour from the rest. [BorDURE, I.]
4. Of a garden, a country, a lake, dc.: Ita limit or boundary.
(1) Of a garden: The raised flower or other bed aurrounding it.
"All with a border of rich trult.trees crownd." $\begin{gathered}\text { Waller: On Se. Jamei" Part. }\end{gathered}$
(2) of a country: Its confine, Its limit, its boundary line, or the districta io the immediate vicinity.
(a) Gen. : Io the foregoing senae.
"Blowly and with difficalty peace was esto bllshed
on the border."-Macaulay: Hist. Eng., ch, $1 i 1$. (b) Spec. : The border territory between Eogland and Scotland, where, while the two countries wers independent, mutnal inroads, raida, cattle-lifting, \&c. [Bordrao, Bordmaginol, for conturies prevailed. Siace the happy union of the two kingdoms in 1707, the hardy race of adventurers genersted by thesa enterprises have found their proper sphere in the British army. [Borderer.]
(3) Of a lake: Its bank or margin.
"It was situated on the borders of an ortanaive hat World (ed. 1870) ch. जि., parinin: Voyage round the
T (l) Crabb thua diatinguiahes between border, edge, rim or brim, brink, margin, and verge: "Of these terms, bonder in the least definite point, elge the most ao ; rimand brim are apecies of edge; margin and verge are are apecles of edge; margin and verge are
apecies of border. A border is a atripe, an apecies of border. A oorder is a atripe, an
edge is a line. The border lies at a certain edge is a line. The border lies at a certain
diatance from the edge; the edge lis the exterior distance from the edge; the edge is the exterior
termination of the surface of any substance. termination of the surface of any substance.
Whatever is wide enongh to admit of any apace round its circumference may hava a border; whatever comes to a narrow exteaded sarface has an edge. Maoy things roay have both a border and an edge; of this description are caps, gowns, carpets, and the like other have a border but no edge, as lands, and others have an edge but no border, as a knef or table. A rim is the edge of any vessel; the brim is the exterior edge of a cap; s brink is the edge of any precipice or deep place; a margin is the border of $s$ book or a piece, of Water; a verge ls the extrome border of a place.
(2) Border, boundary, frontier, and confines
are thus discriminated: "These terms are all applied to countries or tracts of land" "The applied to countries or tracts of land, The rune along a country; it is mostly applied to rune along a country $;$ it is mostly applied to countries runuing in a line with each other, as the bonders of England and Scotland; the boundary is that which bounde or limits, as the boundaries of countries or proviaces; tha frontier ia that which lies in the front or forms the entrance into a country, as the frontiers of Qermany or the frontiers of France; the confines are the parts lying contiguous to others, as the confines of different atatea or provinces. The term border ia employed in deecribing thoae parts which form the borders, as to dwell on the borders or to run aloug the borders. The term boundary is used in apeaking of the extent or limits of piscea ; it belongs to the acience of geography to describe the boundaries of countries. The frontiers are mostly apoken of in relation to military matters, as to pasa the frontiers, to iortify frontier towne, to guard the frontiers, or io respect to one's passage from one country to snother, as to be stopped at the frontiers. The term confnes, like that of borders, is moatly in respect to two places; the border is moatly \& line, but the confines may be a point; one therefore speaks of going ded io its application to any apace, and boundary to any limit. Confines is also figurstively applied to any space included withio the confines, as the confines of the grave ; precinct ia properly any place which ia encircled by something that gerves as a girdle, as to be within the precincts of a court, that is, within the space which belonge to or is uader the control of court." (Crabb: Eng. Syn.)

## II. Technically:

1. Milling: The hroop, rim, or curb sround a bedatone or bedplate, to keep the meal from falling off except at the preacribed gap. Uaed in guopowder mills and some forms of graingrinding mills.

## 2. Printing:

(1) A type with an ornamental face, Buitable for forming a part of a fancy border
(2) Ornamental work aurrounding the text of a page.
3. Locksmithing: The rim of a lock.
4. Weaving:
(1) That part of the cloth containing the aelvage.
(2) Plut. (Borders): A class of narrow textile fabrics deaigned for edgiags aad bindings, quch as galloons and laces.
5. Her.: Of the form bordure (q.v.)
B. As adjective: In any way connected with the borders. [See the compounds.]
" With wome old Border nong, or catch."
Wordsworth: Fountain.
T Compounda of obvious signifleation : Bor-der-guard (Lewis: Ear. Rom. Hist,., ch. xil., pt. ii., § 30, vol. ii., 144) ; border-line, border border song'[B]: border-stream (Byron: Lara, ii. 13).

(d) Of an energetic person piercing through or penetrating a crowd.

Whit ricts seen, what basting crowds 1 borid
How oft crused where carte and coaches roar'd.
(2) To hollow out by means of boring.
"Take the barrel of a long gun, perfectly bored...."
(3) To make way by plercing or scraping oot.
"These dimiaative catterpillars are ahle by degreen,
to pierce or bore thetr way into a tree, wlth very amail boles ; ..."-tay.
2. Piguratively:
(I) To weary one out by constant relteration of a narrative or anbject in which one has but
slender interest; to fatigue the attention, to weary one. (Colloquial.)
(2) To befcol, to trick.
"I am abused, betrayod; I ann lyushed at, noorned

## B, Intransitive:

L. Ordinary Language:
I. Literally:
(1) (Byomitting the objective after the transitiva verb): To pierce by boring: as, "tho
uger bores well.
(2) (In its nature intransitive): To be pierced or penetrated by a boring inetrument; as, "the wood is hard to bore."
2. Fig.: To pneh forward.
"Nor eorth ward to the raining rytome rum, But soring to the weat, and hor ring thery
With gaplig nouthe they draw prolick
böre, pret. of v. [Beak, v.]

## böre, pa. par. [Bors.]

böre (1) (Eng.), böre, bölr, bör (Sooteh), 8. [From bore, y. In A.S. bor = (1) a borer, a gimlet, (2) a lancet, a graving iron; Sw. borr =an auger, a gimlet; Dan. bor, boer =a gimlet; but. boor $=a$ wimble, a drilu; Ger. bohs $=$ an auger; bohrloch $=$ bore, anger hole.)

## 1. Ordinary Language:

1. Literally:
(a) The instrument with which 2 hole to bored ; e borer. [Etym.]
" "Moshall that hole be et Ior the ale, or rquare some"

- yoxan.
(2) A hole made by boring. Used-
(a) Gen.: Of the hole Itself, withont reference to its size.

Thlek rammo in allow angines long and round other bore with tomot of tro Dilated, and liufuriste." Niluton; P. $h$, bitivi. (b) Spec. : Of its size or calibre.
"And ball and certridge sorte for every bona".
 and 30 oa, to n toxtaple
evary oueglveth. Bucon.
(3) A hole made in any other way. Spec.-
(a) A amall hole or crevice; a place used for ahelter, especially for amaller animela. (Scotch.)
"A annoe hem ful bright
Schon opon the queue
"Schute wat the door: in at a boir 1 hient PaNce \& Bonour, ill a

(b) A rift in the clonde; aimilar open epace between trees io a wood. (Sootch.)
"When. gllmmeriag throush the groaning treen

| Throukh ilks dore the boams were glancing." |
| :---: |
| Burns : Tam |

2. Figuratively:
(1) Of things: Importance.
"I bave words to npeak in thine ear will make theo (2) af pens bamle, iv.
(2) of persons or thingy: A person who wearies one by perpetuslly calling when there is no time to receive visitors, or by harping oo a snbject in which one has no loterest, or in some similar way. Also a thing similarly wearisome.
3. In special phrases:

II (1) A blue bore: An opening in the clouds wheo the sky is thick and gloomy. (Sooteh) (Lit. © Fig.)
"Thin style plensed us well. It was the firm Bue Lett. 1. 177.
${ }^{*}$ (2) The bores of hearing: The ears.

- For mine's heyond beyond- say, and apeak thick;
II. Technically:

1. Metallurgy:
(1) A tool bored to fit the ahank of a forged nail, and sdapted to hold it whlle the head ts brought to shape by the hammer. The depresaiou in the face of the bore is adapted to part of the head.
(2) The cavity of a steam-engine cylinder, pump-barrel, pipe, caanon, barrel of a fire-arm,

[^76]lameter: in cannon in the welght in pounds of solid ronnd abot madsted thereto.
(3) The capacity of a boring tool, as the bore of an suger
2. Music: The calibre of a wha instrument, as the bors of a flute.
böre (2), a. (Icel. bd́ra = a wave, a billow caused by wind (Wedgwood and Skeat): N. \&o M. H. Ger. bor: O. H. Ger. por = height, top. Remotely connected with A.S. beran, beoran $=$ to bear.]

Physic. Geog. \& Ord. Lang. :

1. A tidal wave running with fearful height and velocity up variong rivers. In India it occurs on the Ganges and the Indus, but, according to an "Anglo-Burman," is nowbere better seen than in the Sittang between Rangoon and Moulnein in the Eastern Peninsula. In Britain a bore rushes at spring tides up the Bristol Channel from the Atlantic, and being narrowed by the funvel-shaped estuary of the Severn, rises into a bore below Newnham, sad does not entirely expend its force tall it has passed Oloucester. It affects also the river Parrett, just below Bridgewater and other rivers which run into the Bristol Chanael. Tliere is a bore also in the Solway. [Eaore, H yore.]
"TTe bore bud cortainly warmed us for ninety or a
2. Less properly: A very high tidal wave, pot, however, so abrupt as in No. 1 , seen in the Engliah Channel, the Bay of Fuady, \&c. (Dana.)
bor'-ă-al, a. [In Fr. borbal; Sp. boredl; Port. voreal ; Ital boreale; Lat. borealis; from Boreas (q.v.).] Northern.
"Crete" umple aldas dininish to our eye,
Pope.
boreal-pole, z. In French terminology, the South-seeklng pole of the magnet.

## Boreal Frovince.

Zoology: The sedcond of eighteen provinces within which Mr. S. P. Wood ward distribnted tea and fresh-water mollusca. The Boreal Proviace extends across the Atlantic from Nova Scotia nnd Massachusette to Iceladd, the Faroe and Shetland 18lands, and along the coast of Norway from North Cape to the Naze. 75 per cent. of the scandinavian shells are common to Britain, and more than half of the sea-abells found on the coast of Massachusetts, north of Cape Cod, occur also in the North Sea Some of the principal specles are Teredo navalis, Pholas crippata, M ya arenaria, Saxicava rugosa, Tellina solidula, Lucina borealis, Astarte borealis, Cyprina Islandica, Leda pygmea, tarte boreatis, Cyprina iskandica, Leda pygmea,
Nucula tenuis, Mytilus edulis, Modiola modioIus, Pecten Islandicus, Ostrea edulis, Anomia ephippium, Terebratulina caput-serpentis, Rhynconella psittacea, Chiton marmoreus, Dentalium entale, Margarita undulata, Littorina granlandica, Natict helicoides, Scalaria graenlandica, Fusus antiquus, Fusus islandicus, Trophon muricatus, Trophon elathratus, Purpura lapillus, Buccinum undutum. Several geners are now living on the coast of the United States which only occur fossil in England, as Glyeimeris, Cardits, \&c. (S. P. Woodward: Mohhusca.)

Bör'-6-ăs, \& [In Fr. Boré ; Sp. \& Port. Boreas; 1 tal. Borea; all from Lat. Boreas; Or. Bopeas (Boreas) = (1) the North-wind, (2) the North. According to Max Mitller, Boreas is probshly $=$ the wind of the mountsins, froin Gr. Bipos (boros), another form of opos
(oros) $=$ a monntain.] The North.wind, (oros) $=$ a monntain.] The North-wind, chiefly poetic. (Eng. \& Scotch.)

bör'-io, a. [Eng., \&c., hor(on); -io.] Contained in or derived from boron (q.v.).
borle acid, boracic acld, s.

1. Chem. : Boric acid, or orthoborio acid,
$\mathrm{B}(\mathrm{OH})$, is formed by dissolving beron trioxdde $\left(\mathrm{B}_{8} \mathrm{O}_{2}\right)$ in weter. It accurs in the ateam which iseues from voleanio vents in tuscany called enfloai, or fumarolea. These are diwhich becomes charged with bortc acld, and it is obtained from it by evaporation. Boric scid ls supposed to be formed by the action of watar on BN (nltride of boron), which is decomposed by it into bario acid and stmmonia Borto acid crptoulzes ont in als-eided laminm Borio acid cryetalizes ont in eix-日ided lamiam, it forme salta and borates, which sre very nnstable, as $\mathrm{Mg}^{\prime}{ }_{3}\left(\mathrm{BO}_{3}\right)_{2}$ (magnesium orthostable, as ${ }^{\text {as }} \mathrm{Mg}^{3}\left(\mathrm{BO}_{3}\right)_{2}$ (magnesium ortho-
borete), being a tribasio acid. Its solution in borete), being a tribasio acid, It solution in
alcohol borns with a green-odged flame. Boric acid turns litmus paper brown, even in the presense of free hydrochloric acid; the brown colour thus formed is turned a dirty blue by canstic sodia. Pyroborio acid, $\mathrm{H}_{2} \mathrm{~B}_{4} \mathrm{O}_{7}$, is ohtained by heating for a long time the crygtals
of orthoboric acid at $140^{\circ} \mathrm{C}$. Ita chief salts are borax, $\mathrm{Na}_{2} \mathrm{~B}_{4} \mathrm{O}_{7}$, eodium pyroborata, and $\mathrm{Ca}^{\prime \prime} \mathrm{B}_{4} \mathrm{O}_{7}$, calcium pyraborate, which occurs as the mineral borocalcite. Metsborio acid $\mathrm{B}^{\prime \prime \prime} \mathrm{O}(\mathrm{OHI})$, is formed when boric acid is heated to $100^{\circ}$; it is a white powder. Ita salta are called metaborates; as, barinm metaborste, $\mathrm{Ba}{ }^{\prime \prime}\left(\mathrm{BO}^{\prime}\right)_{2}$; and calcium metaborate, $\mathrm{Ca}^{\prime \prime}\left(\mathrm{BO}_{2}\right)$,
a white powder precipttated when $\mathrm{CaCl}_{2}$ is a white powder precipttated When $\mathrm{CaCl}_{3}$ is is soluble in acetic acid, and $\ln \mathrm{NH}_{4} \mathrm{Cl}^{\circ}$.
2. Min. : A minersl, called also Sassollte (q. F.)
bör'-Ick-ite, s. [From Borlcky, who anslyzed it.]
Min.: A reddish-brown opaque mlnersl of waxy lustre, occurring reniform or massive. It contains phosphoric acid, $19 \cdot 35-29 \cdot 49$; gesquioxide of iron, 52 .29- 52.99 ; water, 19.06 $-19 \cdot 96$; lime, $7 \cdot 29-8 \cdot 16$; and maguesia, 0 $0 \cdot 41$. It occurs in Styria and Bohemia. (Dana.)

3. The set, operation, or process of perforating wood, iron, rocks, or other h.id gubstances by means of instrumenta adapted for the purpose.
"Aoryngs or percynge. Perforacto." - Prompe.
4. A place made by boring, or where boring operstiona ara in progress.
5. Pl. : Chipa or fragmente which drop from a hole which is in the process of being bored.

## boring and tenoning machine, s.

Wheelwrighting: A machine adapted to bore the holes in the fellics and to cut the tenons on the ends of the spokes.

## boring-bar, s.

Metal-working:

1. A bar anpported axially in the bore of a piece of ordnance or cylinder, mid carrying the cutting-tool, which has a traversing motion, end turns off the inside as the gun or cylinder rotates.
2. A cutter-stock used in other boringmachines, auch as those for boring the brassea of pillow-blocke. (Knight.)

## boring-benoh, 2.

Hood-working: A bench fitted for the use of boring machinery or appliances. [BeachDeILla!
boring-blt, s. A tool adapted to be used in a brace. It has variona forms, enumerated under the head of Bir (q.v.)

## boring-block, 8

Metal-working: A slotted block on which work to be bored is placed.
boring-collar, s. A back-plate provided with a number of tapering holes, either of which may be hrought in line with a piece to we bored and which is chucked to the lathebe bored and which is chucked io the end of the piece is exposed at the hole to a boring tool which is held against it. (Knight.)
boring-fancet, 2. One which has a bit on its end by which it may cut its own way through the head of a cask.
 -cian, -tian = shann -tion, -alon = shŭn; -fion, -sion = zhŭn. -tious, -siouk -sious =shŭs, -ble, -dle, sc. = bel, del.
noring-gage, s. A clamp to be attsched to an auger or a bit-shank at a given distance from the point, to limit the penctration of the tool when it has reached the determinato depth. (Kright.)
boring-instruments, s. [Boring-xachines.]
boring-lathe, s. A lathe used for boring wheels or zhort cylinders. The wheel or wheels or short cylnaders is fixed on a large chnck screwed to cylinder is fixed on s
the mandrel of a lathe.
boring-maohines, sol. Machines by which halea are made by the revolution of the tool or of the object aroned the tool, bnt not incloding the aimple tool itself. Thus an angur, gimlet, awl, or sny bit adapted for boring, independently of the machinery for boring, independentiy of tha machinery for driving it, would not be a boring-nach is on the dividiag line, if such the brace is on the dividing line, if such thare be, machines. (Knight.)
boring mollusca, *. The principal bor lug mollusca are the Teredo, which perforates timber, and Pholas, which bores into chaik, clay, and aandstona. These shells are aupposed to bore by mechanical means, either by the foot or by the valvea. But certaio shellis, as Lithodomus, Gastrochaena, Saxicava, and Ungulina, which attack the hardest marble and the ahells of other mollusca, have smooth valvea and a mmall root, and have a limited power of movement-(the Saxicava is even fixed in ita crypt bys byssus)-so they have been aupposed either to diasolve the rock by chenical meana, or clas to wear it rock by with tha thickened anterior margins of the mantle. Tha boring mollusks have been called "atone-eaters" (lithophagi), and "woodcalied "atone-eaters" (hthophagi), and woodeaters" (xylophail), and aome at least are obiliged to awallow the material produced nourishmeat from it. No boring mollusk deepens or eniarges its burrow after attaining the fuli growth naual to ita apecies. The animais do great injury to abips, piers, and breakwaters.
boring-rod, s. An inatrument used in boring for water, \&c. [Boring-machines.]
boring-table, s. The platform of boring-machine on which the work is laid.

## boring-tool,

Metcl-working: A cutting-tool placod in a cutter-head to dress ronnd holes.

- borlth, s. [Buryt.] (Bailey.)
börk-hâu'sici-a, s. [Named after Moritz Borkhausen, a German, who publiahed a botanical work to 1790.]

It can also be obtained from oil of valerian by can also be obtaned from Borneene ia almost insolubie In water, and has the odour of turinsoluble
Bör'-né- $\overrightarrow{\mathbf{o}}$, \& \& a. [From Brunai, the local name for the capital of tha kingdom of Borneo proper.]
A. As substantive: An island, about 800 miles long by 700 braad, in the Eastern Archipelago, between $7^{\circ} 4^{\prime}$ and $4^{\circ} 10^{\prime} \mathrm{S}$. lat. and $108^{\circ} 50^{\prime}$ and $119^{\circ} 20^{\prime}$ E. long.
B. As adjective: Growing in Borneo; in any way convected with Borneo.
Borneo camphor, A gum, called also Borseol (q.v.)
bör'-nĕ-ŏl, z. [From Borne(o), and (alcoh)ol.] Chemistry: Borneol, or Borneo camphor, $\mathrm{C}_{10} \mathrm{H}_{17}(\mathrm{OH})$, occurs in the truaka of a tree growing in Borneo, the Dryobalanops oamphora. It has been prepared by the action of aodinm or of alcoholic potash on common camphor. Borneol is a menad slcohol, forming ethera. When heated with HCl in s gealed tube $\mathrm{C}_{10} \mathrm{H}_{17} \mathrm{Cl}$ (camphyl chloride) is formed. By heating borneol with $\mathrm{P}_{2} \mathrm{O}_{8}$ it is converted into a hydrocarbon borneene ( $\mathrm{C}_{20} \mathrm{H}_{26}$ ). Borneol forms small transpareot crystals, amelling like camphor and pepper; melting at $198^{\circ}$, and boiling at $212^{\circ}$. Its alcoholic solution is dextrorotary. Heated with nitric acid it is converted into ordinary camphor.
bör'-nĕ-sisite, s. [From Borneo (q.v.).]
Chem.: O.N. $\mathrm{C}_{7} \mathrm{H}_{14} \mathrm{O}_{8}$, a crystalliue substance melting at $175^{\circ}$. It occurs in Borneo caoutchouc.
bör'-nine, s. [In Ger., de., bornine; from Von Born, an eminent mineralogist of tha eightecath century.]

Min.: A nineral, called also Tetradymite (q.v.).

- The British Museum Catalogue calls this also Bornite, but Dana limits the latter term to a perfectly distiact mineral.

## * born'-ing rod, s. [Bonino Ron.]

bör'-nite, s. IIn Ger bornit. Named after Von Born.] [Bormine.]

Afin.: An ísometric, brittle mineral, occurring misaaive, granular, or compact. The hardness is 3 , the sp. gr. 4.4-5.5, the lustre metallic, the colour betwecn red and brown, the streak pale greyish-black, slightly shining. Composition: Copper, $50-71$; sulphur, $21 \cdot 4-28 \cdot 24$;
iron, $6.41-18.3$. It is a valuable ore of copper found iu Cornwall, where the minera call it
horae-flesh ore: st Rou Ieland In Killarney, in Ireland : in Norway, Germany, Hnngary Siberia, and North and Sonth America. (Dana) [Bornine.]

* bor'-ny̆n, v.i. (O. Fr. burnir = to burnish) [Burs, v.] To burnish. (Prompt. Parv.)
* bor-nyst, pa. par. [Burnrered.]
Eng. Allit. Poems (ed. Morris); Pearl, 77 .
bör-ǒ-căl'-gìte, s. [Eng., tc., boro(n); calcile.] Min.: The same as Boronatrocalcite and Ulexite (q.v.).
bör'-ŏn, s. [From borax (q.v.).]
Chemistry: A triatomic element, symbol B. At. Wt. 11. It occura in nature combined in the form of boracic acid $\mathrm{B}(\mathrm{OH})^{5}$ and tta salts. Boron is obtained by fusing boric trioxide $\mathrm{B}_{2} \mathrm{O}_{3}$ with sodinm. It is \& tasteless, inodoroua, brown powder, is non-condactor of electricity; it ta slightly solnble in water, permanent in the air; burnt in chlorine gas it forma boron chloride $\mathrm{BCl}_{3}$, a volatile, fusiog liquid, boiling at $18 \cdot 23$, ep. gr. 135 ; it ts docomposed by water into boric acid and hydrochloric acid. When smorphous boron is heated with aleminium the boron discolves in it, and separates ont as the metal coola. The ainmininm is removed by caustic sodis It crystallizes in monoclinte octohedra, which acratch ruby and corundum, but are acratched acratch ruby and corundum, int are scratched by the diamond; the sp. gr. is 2.68 . Heated
in oxygen it ignites, and is covered with a in oxygen it lgaites, and is covered with a coating of browa trioxida. Amorph, explodes, Boron forms ons oxide $\mathrm{B}_{2} \mathrm{O}_{3}$, obtatned by heating boric acid to redness; it forms a glassy, hygroscopic, transparent aolid, volatile st white heat. It dissolves metallic oxides, yielding coloured beads (see Borax-beads), Boron unites with fluorine, forming a colourless gas $\mathrm{BF}_{3}$, having a great affinity for water. It carbonizea organic bodiea; 700 volumes are aolubie in one volume of water, forming an olly fusing liquid. Amorphous boron combinea directly with nitrogen, forming boron nitride BN. a light aniorphous white solid which, heated in a current of steam, yields amnonia sad boric acid.
bör-ob-n̄-trot-cal'-çite, s. [Eng., ad boro(n); natro(n); calcite.]

## bor-rẽr'-1-a, s. [BoraERA.]

Bot. : A genus of Cinchonads, of whlch one apecies, Borreria ferruginea and B. podya, both from Brazil, yield s bastard ipecacusnha.
" bor'-rø̌t, s. [From Dut. borat =a certain light stuff of silk and fine wool. (Secsel.).] Bombasin. (Scotch.)
 p. 7.

* bor'-rīw (1), "bor'-rowe, *bor'-ow. *bor'owe, * bor'-ewe *bor'-we, "borw, "borh, "borgh, Borghe (Eng.), borow, " borwoh, "borwgh, "bowrch, "borgh, * borch (Scotch), s. [A.S. borh, genit. borges $=(1)$ a security, pledge, loan, or bail, (2) a person who gives security, s surety, bondsmsn, or debtor (Bostoorth); Sw. borgen $=$ bail, security, surety; Dan. \& Dut. borg $=$ pledge, bsil, trust, credit ; Ger. borg $=$ credit, borrowing.]

1. Of things
(1) A pledge, a surety.
$\begin{aligned} & \text { And thar till into borwoel draw I } \\ & \text { Myn herytaqe anl halliy. } \\ & \text { The king thocht he whe traint Inewel } \\ & \text { gen he in bowech hys landis dreweh." }\end{aligned}$
Sen he in bowrch hys landis drewch."

Thin wan the fret nourse of whepheards norowe,
Chat now nill be quitt with baile nor borrowe."
That now all be quitt with baile aor borrower.
(2) The act of borrowing or tsking as a loan. "Yet of yoor royal prusence Inl adventure
The borrow of \& week" $\begin{gathered}\text { Shakesp.: Wint. Tate, i. } 2\end{gathered}$
2. Of Beings or persons: A surety, a pledge, a bail ; ons who stsnds security.
"He that hiddeth borroweth, * hringeth himsolf in For det, bers borowoa euer, and their borowe is God To yelid fem
iors Plow., iol. 33,
For if dara bo his boid borove, that do bet will be For ceuter.
Thengh dobeat draw on him day attor other."
II Special phrases: (1) Have here my faith to borwe: Have here my faith for s pledge.
(Chaucer.) (Chaucer.)
(2) Laid to borwe: Pledged. (Chaucer.)
(3) St. John to borrowe ; Sanct Johne to borowe, or to borch: St. John be your protector or cantioner; St. John be or being your security.
"Thar leyff thai tuk, with conforde Into playn.
Sanct Jhone to borch thal suld meyt halle agayn."
Wallace, fii. 3 sob
Of falowe and frende, and thus with one aseent We pullit up suile nnd furth our way is weat. King's Quair, 11. 4. (Jamieson)
bor'-rōw, * bor'-rowe, *bor'-owe, *bor we, * bor'-ow-on, " bor'-wyn, *bor ewe, "borlwen, * bor'-o-wyn (Eng.) bor'row, * borw, "boroh, *borgh (Scotch), v.l. [A.S. borgian = to borrow, to lend (Somner) lel. \&Sw. borga; Dan. borge Dut. \& Ger. borgen $=$ to take or give upon trust. From A.S. borg $=$ a loan, a pledge. [Bonnow, s.]
I. of giving security:

1. To give security for property

Thare borooyd that Erie than his iand,
That liny fato the kyngiz hand.
2. To become surety for a person.
"Oif any man borrooves another inan to anawere to the moyte of suly partie, either he borronoes him ${ }^{\text {a }}$ him borrowed there to nppeare, and be discharged ac Inwwil, -Baron Courth, e. 3 .
II. Of asking in loan:

1. Lit.: To ask and obtsin money or property for or upon loan, with the implied intention of returning it in dus time
(1) of money:
midioos the governinent was anthorined to borrow twe
(2) Of property:
"Thep he asid, Goo, borrows thee vesele shrond of al
thy neighbours "-2 Eimgs iv, \&
IIn Exod. xi. 2, ". . . let every man borrow of his neighbour, sind every woman o her neighbonr, jewels of silver, and jewels of gold," the translation is incorrect. The mar

[^77]ginal rendering ask is accurate. The Hebrew verh is hepp (shacl), the ordinary one for ask, in the sense of request to be given, and ls rendered aste in Paitm il 8 , te, and desired in 18 Bam. xij. 19.
2. Fig.: Of taking without the obligation, or in some cases even the possibility, of re turning what is sppropriated. Used -
(a) Io an iadifferent sense.
"Therse verbal elgns they rometimen borrow from Whilt hence they borrone vigour
(b) In a bad one.

- Forgot the hiush that viryin fears impart To modeat cheeks, and Dorrovid one irom art",
Hence (c) not to borrow is more honourable then to do so.

## "It given a hight to every nge,

 'Itweil a star, pot borrowing bight, But ta its own glid evence bright" Vocre: Fire Wornhippere

". $23 s^{\text {" . In the bot window, . . ."-Pitscoctie: Chron. }}$ P. 238

- Into the boss windove. - - Ibid. (ed 1785), p. 15s. 2. Empty. (Lit. or fig.)
"Or shon'd her paunch for want grow bowa"
He eaid, he sloom'd, and whook hin : Poemst, phes.
Be eaid. he gloom'd, and shook hia thick bous head."
Aamsay: Poems, 1.25.

3. Resonant ; sounding in a hollow msnner. that is hollow." sound. that which in emitted bs a bods
B. As substantive (of the forms boss, boiss, nd boce):
4. Gen. (of the forms boss and boce) : Anything hollow.

> The Eoulet had sjek wiful cryis
> An wind within a boce. ${ }^{\circ} \mathrm{y}$.

Eurel: Watsonis colh, iL 26.
2. Spec. (of the forms boss, boiss, and boce) :
(1) Lit. Of things:
(a) A small cask.
chaider of mele out of his meirnale out of a boce thre thre chalder of mele out of his girnale thre malvay bocis, prive the (Ja miecon)
(b) A bottie of the kind now called a "grcybeard;" a bottlo made of earthenware or of leather.
(2) Fig. of persons. Plur.: $\mathbf{A}$ despicable r worthless character.

- Generally conjoined with the epithet auld $=$ old.
"1 npeak to you anld Boustit of perditioun."If (1) The boss of the body: The forepart of the body, from the chest to the loins.
(2) The boss of the side: Tbe hollow between the ribs and the haunch. (Jamieson.)

4 böas (1), *boge, booce, v.t. [From bass (1) s. (q.v.) ; O. H. Ger. bozen, passen $=$ to beat.] To beat out, to render protuberant.
botes (3), s. \& a. [Dut, baas $=$ a master.]
A. As aubst.: An employer, a master. (Bartlett.)
B. As adj. : Cbief ; most esteemed. (Bartleth.)
bðess (2), v.t. [Boas (3), s. \& a.] To mansge, to control; to be the master of. (Bartlett.)
bǒs'-saśe, 8. [Fr, bossage, from bosse $=\mathbf{a}$ boss, a protrberance.]

Architecture:

1. Projecting stones, ouch as quoins, corbels roughed out before insertion, to be finished in situ.
2. Rnstic work, consisting of atones which seem to advsnce beynnd the plans of a building, by reason of indentures or channols left in the joinings.
" bossche, s. [Busa.] (Sir Ferumbras (ed. Herrtage), 2,887.)

- bosse, s. [Boss.]
bŏssed, pa. par. \& a. [Boss (1), v.] As adjective:

1. Ord. Lang. : Furnished with bosses artificisliy made.
" Fine linen, Turkey eushione bosed with peari."
2. Bot. : Rounded in form and with an umbo or boss more or less distinctly projecting from ita centre, so as to maks it resemble many ancient and modern shields.
bǒs-si-m'-a, s. [Nsmed after M. BoissieuLamartine, who accompanied La Perouss in his voyage round the world.]
Bot.: A genus of plants belonging to the sab-order Papilionacea. The species are ornsmental shrubs from Australia sad Vin Diemen's Land.
bǒss'-ing g, pr. par., a., \& z. [Boss (1), v.] A. \& B. As present participle \& participial adjective: (See the verb).
C. As substantivé
3. The act of ground-laying the surface of porcelain in an unflnished state, to form s basis of adherence for the colour, which is deposited by the pencil, by cotton-wool, or by stencil, according to the mode.
4. The substance laid on in the ground-laying des cribed under 1. It is a coat of boiled oil to hold the colour. The oil is expelled by the heat of the ensmel-kiln, and the colour vitrified. The bossing is lsid on with s hair-pencil, sad levelled with a boss of soft-leather.

## 

Polit.: A condition or system under which one msn controls or attempts to control s majority of the voters in s district, ward or city; personsl political tyrsany.

* bŏs'-sǐve, a. [Eng. boss; -ive.] Crooked, deformed.
"Wives do worse than"miscarry, that go their full time of a fool with a blan (1658), p . 70 .

Shakeip : hin horse Tam of shreie, illi. $2{ }^{\text {bewn with the both"- }}$ " ". . . to give poor jnies the bocs."-Ibid., 1 Hen IV. I Bots on it: An exscration. (Shakeap, Per., ii. 1.)
B. As adjective : Producing the larve called bots.

## bot-fiy, s.

Entomology:

1. Singular: One of the names given to any specias of the genus (Estrus, or even of the family Cstrida. These insects are sometimes called slso Breeze-flies, Brize-flies, and Gsd-flies, the last of these names not being properly distinctive one, for it is applied also to the Tsbsnide, a totally distinet family of dipterous insects. The bot-fly, which bas attracted most notice, is Gasterophilus equi, often called the gad-fly of the horse. It is a downy two-winged fly, which in August deposits from 50 to 100 egrs on the legs, the back of the neck, snd other parts of a horse accessible to the animsl's tongue. Slightly irritated by them the horse licks the part affected, with the effect of bursting the egg and transferring the effect of bursting the egg snd whence they make way to the stomach snd grow to be an make wsy to the stomach snd grow the food, inch long. They are ejected with the food, spend their chrysalis state in the earth or
dung, and emerge perfect insects but with no proboscis capable of being used for feeding purposes. It is not food they require, it is to propsgate their species and die. A stmilar

[^78]moect is CEstrus hemorrhoidalis. Sheep, oxen co. have parasites of an analogous kind.
[Breeze-ply, Bhize, GAD-FLY, ©LSTBIDAE, [Baeeze-pi
2. Plural: The English name for the family of ©stridæ.

bơt'-an-Ў, s. \& a. [Gr. ßotávך (botanẽ) = grassfodder; $\operatorname{\beta ó\sigma x\omega }(b o s k \bar{O})=$ to feed, to tend cattle or sheep.]
A. As substan.: The science which treats of plants. It emhraces a knowledge of their oames, their extermal and internal organizations, their anatomy and physiology, their qualities, their uses, snd their diatribution over the world, with the laws by which this distribution is regulated, or the geological occurreaces by which it has been brought about.

History: From the remotest sntiquity plants must have been at least looked at, and to a certain extent studied; and it is reported io Scripture regarding Solomon, that "' he spaks of trees, from the cedar tree that is in Lebanon even unto the hyssop that springeth ont of the wall" ( 1 Kings iv. 33). If his sayings on that sabject were put in writing they have perished; the first inportant scientific notices regarding plants which have reached our time are in Aristotle's Inquiries Concerning Animals, about B.C. 347. Tbecphrastus, who sne ceeded him in B.C. 324, gave great attemtion about 355. Pliny, among the Romans, was absout interested in botanical study, as in natural also interested in botanical study, as in natural
listory generally. The Arabs gave some atlistory generaily. The Arabs gave some A. 1231, according to Sprengel, only about 1,400 plants were known. After the revival of letters, Cobrad Gesner, who died in 1565 , collected materials and made drawings for a history of plants. Matthew Lobel, A Dutchman at the court of Queen Elizabeth, attempted a natural classification of plants, and some of his orders are still retainel. Cæsalpinus, a Roman physician attached to the court of Pope Sextus V1., made various botanical discoveries. About A.D. 1650, the microscope began to he used for the examination of plants. Grew and Malyighi flourished in the same century; and in 1686 Ray published the first volums of his Systema Plantarum. About first volums of his systema Plantarum. Abont Systema Naturev, the botanical portion of which contains his artificial system, which is even now obsolescent rather than obsolete. As a rule, his classes were founded on the number, position, \&c., of the atamens, and his oriers on the number and character of the pistils. He founded twenty-four claases, viz., (1) Monandria, (2) Diandria, (3) Triandria, (4) Tetrandria, (5) Pentandria, (6) Hexandria, (7) IIeptandria, (8) Octandria, (9) Enneandria, (10) Decandria, (11) Dodecandria, (12) Jcosandria, (13) Polyandris, (14) Didynsmia, (15) Ts(18) Fulyadelphia, (19) Syngeneaia, (20) Gyn-
andria, (21) Monœecia, (22) Diœcia, (23) Polygamia, and (24) Cryitogamia (See these words for farther details, and for the onden Into which the saveral classes are divided) Besides his artificial aystem of classification Linnæus attempted a natural ons. In 17S9 Antoine Laurent de Jussien published his Genera Plantarum, in which, following io the direction in whtch Lobel, Ray, and Linnæus himself had led, hs elaborated a natwral system, the essential fsatures of which are still retained. In Lindley's Vegetable Kirgdom, published in 1867, the classification is as follows : Class 1. Thallogens, II. Acroget A $_{8}$ III. Rhizogens, IV. Eadogena, V. Dictyogeus, III. Rhizogens, IV. Endogena, V. Dit
VI. Gyrnnogens, and VII. Exogans,

Modern botany, or phytology, as it is sometimes called, comprises a number of subordinate sciences.
Lindley, in the main following Decandolle, divided it tnto Organography, or sn explanation of the exset atructure of planta; Vegetaille Physiology, or the history of vital phenomen whtch have been observed in thern: Gloss ology, formerly called Terminology, or a detlnition of the adjective terms used in botany and phytography, or an exposition of the rules to be observed in describing and naming plants. (Introd. to Bot., 3rd ed., 1839. Pref.) Al plants. (Introd. to Bot., 3nd ed., 1839. Pref.) Al which is the classificaton and description of Which is the classification and description of
the several classes, orders, families, genera the several classes, orders, families, genera,
species, varieties, \&c., of plants in regular arrangement
Thome, suthor of the recognised text-book of botany in uss in the technical schools of Germany, divides the science into-I. Mor Phology, or the Comparativg Anatomy of Plants; II. Physiology, which is concerned with their vital phenomens; 1II. Botanical Geography ; IV. Palæophytology; V. Vege Plants; and VIL. Practical or Applied Botany

Rolt. Brown, jun., in his Manval of Boteny published in 1874 , divides it into-I. Qeneral Anatomy or Histology of Planta: 1. Organography, 2. Morphology, 3. Organogenesis, 4. Phytotony ; II. Physiological Botany 11I. Vegetalie Chemistry; 1V. Nosology, or Vegetable Pathology: V. Teratology, s atudy of abnormalitiea, Yi. Taxology, Taxonon!s, Classification, or Systematic Botany : 1. Tir minology, 2 Glossology; VII. Phyto-gengraphy ; VIII. Pslao-phytology, Geological Botany, Vegetable Pslæontology, or Fossil Botany; 1X. Medical Botsny; X. Agricuttural Botany; XI. Horticultural Botany and XII. Industrial Botany. (See these Dom, \&c. \&c.)
B. As adjective: In which good botany exists, in which interesting plants sboumd. [Botany-gay.]
Botany Bay, s. \& a. [So called from the number of new plants discovered there whed Captain Cook's party landed in 1770.]
A. As subst.: An inlet of the sea five miles jong and broad, about seven miles north of Sydney Heads in New South Wales.
B. As adj.: Growing at or in any other war eomnected with Botany Bay. (See the comjounds which follow.)
Botany-Day Kino: A gum which exudes from the bark of an Australian tree, Eucalypters resiniferg, and other species of the genus. It is an astringent. It has properties like those of Catechu or Kioo.
Botany-Bay Tea: The English name of the Smilax glycyphylla, an evergreen climbingplant, with three-nerved leaves, and petioles with tendrils.
bō-tăr'-gō, s. $[\mathrm{Sp}$. botarga $=$ a kind of jantaloons, the dress of harlequin; harlequin himself; a sort of sansage. Contracted from botalarga $=$ a large leather bag.] A relishing sort of food, being a sausage made of the roes of the mullet fish, and eaten with oil and vinegar. It is much used on the consts of the Mediterranean as an incentive to drink.

- The French editor of Rabelais says"In Provence, they call botargues the hard roe of
the unulet, pickled with oll nad veesar. The mulle (muge) le a 1 lith which is catched about the meddile of Deceraber; the hard roes of it are salted negalnst Lent and this is what is called botargues, 2 sort of boudive (puddtaga), which have ootiai
"Because he was maturally fiegmatic, he began his mengues, lo'argos, siusages, and such other toro
tunners of wine."-Gzell: Rabelais, bi, ch, 21 .

bốn'-gíe, s. [Froun Fr. bougie $=$ a wax candle a bougie; Prov. bogia; Sp., Port., \& 1tal bugia = a wax candle ; so called from Bongie, a town of Algeria, where such candles were firet made.]

Surgery: A smooth, fiexible, elastic, alender cylinder, desigued to be introduced into the urethra, rectua, or cesophagus, in order to urethra, rectua, or or dilate it in cases of stricture or other diaeases. It is formed either aolld or hollow,
and ie eometimes medicated. It was originally made of alipa of waxed linen, coiled luto a cylindrical or olightly conical form by rolling them on a hard, emooth aurface. Buugies for surgical purposes are sajd to have been invented by Aldareto, a Portuguese physician. They wore first deacribed in 1554 by Amatus, one of his pupils. The sleaderer forms of bongiea are adapted for the urethra, the larger for the rectum, vagine, and cesophsgus.

I Ao armed bougie is one with a piece $\alpha^{r}$ caustic fixed at its extremity.
*bou'-goun, s. [Etym. unknown] Somokind of musical instrament.
"Symbales and sonetes

bôul, bốol, bûle, s. [BOOL (2).] (Sootch) Anything hoop-shaped.
Fi Boul of a pint stoup: The handle of a pint atoup.

To come to the hand like the boul of a pins stoup: A proverbial expression applied to aat thing which takes place as easily and agreeahly as the haudle of a drinking vessed comes to the hand of a tippler. (Scott: Gloss. to Antiquary.)
bôu-lan'-gèr-ite, s. [Ia Ger, boulangerit, from Boulanger, a French mineralogist.]

Min.: A mineral ( $3 \mathrm{PbS} . \mathrm{Sb}_{2} \mathrm{~S}_{3}$ ) existing in phumose crystaline masses, as also granular and compact. Ita hardaese is $2 \cdot 5-3$, its ap. gr. $5 \cdot 75-6$; ite lustre matallic; its colour bluish lead-gray. Compas. : Su!phur, 18.2 antimany, $23^{\circ} 1$; lead, $58.7=100$. Found in France, Oermany, Bohemts, and Tuscany. Embrithlte aad Plumbostib are conaldered by Dana as identical with Boulangerite.
bốnl'-d̆̈n, pa. par. [Bolden (2).] Swelled, inflated. (Scotch.)
bōul'-aẽr, "bōwl'dẽr, s. da. IWedgwood derives this from the 8 w . dialectic word bul leraten = the larger kind of pebbles, as opposed to klappereten $=$ the smaller ones. With this Skest agrees. Connected with Sw. bull $\mathrm{a}=$ to make a loud noise, to thnnder: Dan. buldre $=$ to racket, rattle, make a noise, to chide, to bully; Dut. bulderen $=$ to bluster, rage, or roar. From Sw. buller = noise ; Dan. bulder $=$ noise, tumbling nolse, bnstle, brawl. So called from the noise which boulders make when rolled over a rocky or pebbly beach by a atormy sea or a river in flood.]

## A. As substantive:

I. Ord. Lang. (of the form bowlder): A word of Scandinavian origin, used, sccording to Jamleson, in Perthshire, where the term "bowlder-stane" was applied to "the large single stones found in the earth by those Who inake rosds." Probably the terni was also employed elsewhere than in Perthshire.
II. Geol. (of the form boulder) : The adontion by geologists of the local word boulder has given it universal currency. it is ased to Bignify a large, ronnded block of atone, which, whether lying loose on the eurface of the ground or imbedded in the soil, is of different composition from the rocks adjacent to which it now rests, and must, therefore, have been transported from a lesser or greater distance. From the lsst-mentioned facts, bouldera are often called erratic blocks, or, simply, erratics. [BOULDER-FORMATION, BOULDEH-PERIOD.]
B. As adjective: Marked by the presence of boulders; acting as boulders do.
boulder-clay, s. A clay atratified or unstratified, belonging to the boulder forma tion (q.v.).
boulder-formation, boulder for matlon, $s$

Geol.: A formation consisting of mud, sand, and clay, more frequently unstratified than the reverse, generally studded with fragments of rocks, some of them angular, others rounded, with boulders scattered here and there through the mass. When onstratified, it is called in Scothand till (q.V.). As much of the material has been transported from a greater or less distance, it is sometimes called drift. The old name diluvium, being founded on nowabandoned hypotheses, has become obsolete Diluvium.] The formation exists only from the poles to about $40^{\circ}$ of latitude, onless where the Alps or other high mountains io warmer climes have originated boulder formations of climes have originated awn. The nearer the poles one travels their own. The nearer are the erratic boulders. The rocks the larger are the erratic boulders. The rocks on which they rest are furrowed and scored
with lines, as if ice with stones projecting with lines, as if ice with stones projecting
from its surface had heavily driven over them. [Gioaciation.] Fossils, where they exist, indicate a very cold climate. [Boclofa-period.]

## boulder-head, $s$.

Hydraulic Engineering: A work of wooden atakes to resist the encroachment of the sea.
boulder-paving, s. Paving with round, water-worn boulders, set on a graded hottoni of gravel.

## boulder-peried, boulder period,

Geol.: The period specially characterised by the scattering over all the colder parts of the world of erratic blocks or boulders many of them transported by ice. It comprehended apecially the Pleistocene period, but extended intu the Post-pleistocenc. It is now generaliy called the Glacial Period (q.v.).
". In the southern bemisphere the Macrazchenta, Boulder-period $\rightarrow$ Darwin: foyage round the worl (od. 18rof. ch. Vini., p. 174 .
boulder-stone, * bowlder-stone, The same as llauloer (q.v.). (Scotch, chiefly the Perthshire dialect.)

## boulder-wall, 6

Masonry: A wall made of boulders or flints set in mortar.
bönl-ä̈r-ing, a. [Scotch and Fng. boulder ing.] A term used only in the sabjoiaed compound.

## bouldering-stone, $s$

Metal-working: A amooth flint atone, used by cutlers to smooth down the faces of glazera and emery-wheels.
-boule, s. [BowL.]

## " bón-lê'-na, s. or interj. [Bowlins.] A

 e日a cheer, signifying "Hale op the bowlings. (Gloss. to Complaynt of Scotland.) (Jamieson.) (Jamieson.)
" bön'-ly̌ne, s. [Bowlinz] "The semicircular part of the sail which is presented to the wind." (Gloss. to Complaynt of Sootland) More probably the bowline, i.e., the rope fastened to the midale part of the outaide of a sail.

With bantelez twelua on basyu: boun
Ear. Eng. Allit. Pooms (od Morrit), Peart, 991
Ti Bound, in the expression "bound for a place," is corrupted from Old Eag. boun. [Bound.]
boun, * boune, * bon-nen, * bounne, bowne, v.i\& $t$. [From boun, a. (q.v.).]
A. Intranstive:
4. To prepare, make ready.
5. To hasten
6. To depart, to go.
B. Transitive:
7. To prepare, make ready.

To boune mo berree
2. (Reflexively): To prepare one's self.
"To hatailo ho bounnes hym.
bounge, "bounghe, " bounse, "boun' sðn, * bun'-sén, v.t. \& i. [Dnt. bonzen = to bounce, to dismiss; L. Ger. binsen = to knock or to fall with a hollow noise; $\mathbf{H}$. Ger, bumsen (same meaning); bums, interj. = bounce. 1mitated from the soand of a knock, blow, or tall.] [Bounce, s. Bump.]

## A. Transitive:

$\dagger$ 1. To drive forcibly agalost snything.
2. To cauee to bonnd, as a ball.
3. To turn out, eject; beace to diecharge oummarily. (U, B. slang.)
B. Intransitive:
I. Literally:

1. To knock against anything so as to make a sudden ncise. Used-
(1) Of one besting himself or another.
(2) Of a person knocking at a door.
"Just as I was putting out my light, another
(3) Of the throbuing of the heart.
" The fright awakened Aroito with a start,
Agatist his bosomb bounced hil heaving heart""
Dryden: The Fables ; Palamon and Areien, bk.
2. To spring suddenly forth, eved when there is no collision with anything.
"Nay, master, sald not I as mach when I saw the porpus how ${ }_{1}$
II. Figuratively :
3. To be strong, bold, or, if the female sex over-masculine. (Used only io the pr. par.) [Bouncina.]
4. To boast. (Colloquial.)
(1) Gen.: In the foregoing sense.
(2) Specially:
$\dagger$ (a) To threaten, to bully.
(b) To utter falsehood, as hossters are continually tempted to do when sounding their own praises.
bounçe, s. [Dan. bums = b bounce ; Dut. bons $=\mathrm{s}$ bounce, a thump (imitated from the sound).] [Bounce, v.]
L Ordinary Language:
5. Literally:
(1) A sudden and heavy blow or thump; a knock at a door.

When blustering Boreas tosseth up the deap,
Alld thumps a Ford: The Lover's Melancholy, 1. 1
"I heard two or ihree irregular bounces on my land-
hady's door, and on the openimg of it. ."-Addison.
(2) A sudden crack, the noise of an explosion.

Two hatel nuts 1 threw into the lame.
And to each nut gave soneethearts named
That in a tlame of brightest colour blazid. ${ }^{\text {r }}$ Gay.
(3) A sudden spring. (Gederally followed by out.)
(4) Expulsion; dismissal. (U. S.)

To get the grand bounce or G. B., to be summarily dismissed.
2. Figuratively:
(1) A threat. (Colloquial.)
(2) A lie suddealy, boldly flung forth. (Col loquial.)
II. Technically: The large spotted Dog fish, Scyllium Catalus.
bounng'-ẽr, e. [Eng. bounde); -er.] A beaster; one who, rlyeaking of his exploits, 80 exag gerates as to be chargeable with lying; one much larger than ordinary; is thamper; alse (U. S.) a mascular fellow employed in placer of public resort to eject disorderly persons.
boung'-ing, pr. par. \& a [Bounce, v.]
A. As present participle: In senses corrosponding to those of the verb.
"Their wealth the wild deer bouncinp thro' the plado."
B. Ae adjective: Rude, strong; if of the femioine sex, then over-masculine in aspect or manoer.

Forsooth, "the bounetng Amazon." 1
Bouncing Bet: A plant, Saponaria oflcinalite (American.)
bou'n-çing-1y̆, adv. [Eng. bouncing; -ly.] With vain boasting, so as to make an unfounded assertion.

## Plighinas sald, bouncingly. the judgemeot of the apostolical see with counci of domeatick prients, is tir more certhin thao the judgemeat of an universal che Pope's Supremacy.

bound (1), "bounde, s. [In Mod. Fr. borne $=$ \& Imit. From Norm. Fr. bunde, boune, bonn$=s$ bound, $s$ limit; O. Fr. bonde, bonne, bodne: Low. Lat. bodina, bodena, bonna; Arm. boun $=\mathrm{a}$ boundary, a limit ; boden, bod $=\mathrm{a}$ tuft, a chaster of trees which may be used to mark a boundary. Cf. also Wel. bonn = stem, base, stock ; Gsel. bonn $=$ a sole, a foundation, stock; Gsel. bonn $=$ a sole, a foundation,
bottom, base.] A boundary, a limit, a conbottom, base

1. Lit.: Of material limits
(a) Set up or conventionally arranged by msn.
"The princes of Judah were like them that remove "Assyria, and her om

Hilton: P. R, blc liL.
(b) Prescribed by God in nature.
"He hath compassed the waters with boundt, natil the day sad tight come to an end - - $006 \times x .10$. "Os earth's remotest bounds how welcomo herei" Campbell: Gert tude of $H$ yoming, pi. ${ }_{21}$
2. Fig. : Of limits not formed by ony material thing:

## hust thou cross'd that unkn Life's dreary bound '

Burns: Elegy on Capkain M. Henderton.

- Crabb thus distinguishes between bounds and houndary:-"Bounds is cmployed to deaignate the whole space including the outer line that confines: boundary comprehends ouly this onter line. Bounds are made for a local purpose; boundary for a political purpose: the master of a sehool prescribe the bounds beyond which the scholar is not to go; the parishes throughout England hsve their boundaries, which are distinguished by marks; fields have likewise their boundaries, which are commonly marked out by a hedge or a ditch. Bounds are temporary and changeable; boundories permanent and tixed: whoever has the authority of prescribing bounds for others, may in like manner contract or extend them at pleasure; the boundaries of places are seldom altered, but in conseguence of great political changes. In the figurative sense bound or bounds is even more frequently used than boundary: we speak of setting bounds or than boudary: we speak of setting bounds or
keeping within bounds; but to know a boundkeeping within bounds; but to know a boundary: it is necessary occasionally the set disposcd children. Who canuot be expected to know the exact boundary for indnlgence." (Crobb: Eng. Syn.)
bound (2), s. [From Bound (2), v. (q.v.).]
I. Ordinary Language

1. A leap, a spring, a junp.

All, all our own shall the forests be.
As to the bound of the roebuck free ?
. Hemans: Song at Emigration. 2. A rebound; the leap of something fying back by the force of the blow.
"These inward disgusts are but the first bound of
this ball of contentiou."lbis ball of contentiou."-necay of Piets
II. Technically:

1. Dancing: A spring from one foot to the other.
2. Mil. : The path of a shot comprised between two grazes. [Ricochet-fining.]
bound (1), * bownd, v.t. [From bound (1), s. (q.v.).]
I. Ordinary Language:
3. To limit, to terminate. Used sf limits-
(1) Prodnced by material obstacles pre enting extension.
"Of that maynificent temple which doth bound
(2) Produced by obstacles to extension or advancement not of a materisl character.
"Tbus Heaveo, though all-sufficient, shows a thrift
In his economy, and bounds his gitit,
Vast was his empire, aboolute his power.
Or bounded only by a lawin
Or bounded only by a law" Cowper: Task, hk vi.
4. To indicate the boundaries of.
II. Geom. : In the same sense as No. 1. bx. xi.. def.
I Crabb thus distinguishes between the verbs to bound, to limit, to confine, to circum-
scribe, to restrict:-" The first four of theas terms are employed in the proper sense of parting off certain spaces. Bound apples to the natries sre bounded by mountains and seas: countios are often brinded by each other"; " Limit spplies to any artificial boundary : as landmarks in fields serve to ehow the limits of one man's ground from another ; eo may walls, palings, hedges, or any other visible sign, be converted into a limit, to distinguish one spot from another, and in this manner a field is said to be limited, because it has limits assigned to it. To confine is to bring the limits close together ; to part off one space absolutely from another: in this manner we confine a garden by means of walis. To circumscribe is literally to surround : in this manner a circle may circumscribe s square: there is this difference however between confine and circumscribe, that the former may not only show the limits, but may also prevent egress and ingress; whereas the latter, which is only a line, is but a simple mark that limits. From the proper acceptation of these terms we may easily perceive the ground on which their improper scceptation rests : to bound is an action euited to the nature of things or to some given rule ; in this manner our views are bounded by the objects which intercept our sight: we bound our desires according to principles of propriety. To limit, confine, and circumscribe, all convey the idea of control which is more or less exercised.
much as all these terms convey the idea of being acted mpon involuntarily, they become sllied to the term restrict, which simply exsllied to the term restrict, which simply ex presses the exercise of controlit and confine, we use restriction when we limit and conine, but we may restrict without limiting or con-
fining: to limit and confine are the acts of things upon persons, or persons upon persons; but restrict is only the set of persons upon persons. Bounded is opposed to unbounded, limited to extended, confined to expanded, circumscribed to ample, restricted to unshackled." (Crabb: English Symon.)
bound (2), v. i. \& t. [From Fr. bondir $=$ to leap: 0 . Fr. bondir, bundir $=$ to resound, connected with Lat. bom:bito $=$ to buzz, to hum; bombus $=\mathbf{a}$ humening, a buzzing.] [Bombus, Воом.]
A. Intransitive:
5. Of man or the inferior animals: To lesp, jump, to spring, to nove forward by a succession of leaps.

Whom my food heart hal huaged to itself
Hemans: The siege of Jehonela.
Now, while the birds thus sing a joyous song.
And while the young lambs bound And while the young lambs bou
To me alooe there came a thougbt of griel "

(1) Of time.
"Thongh we make duration boundlese as it fa, we (2) Of power, the human desirea, or anything.

- Boundless rapacity and corruption wore lald to his anrge. - Nacaulay: Mitr. Eng., ch. Xxiv.
"The news was received in
I Crabb thas distinguishes between boundless. unbounded, unlimited, and infinite: "Bonndless, or without bounds, is appiied to infinite objects which admit of no bounds to the nuade or conceived by us. Unbounded, or not bounded, is applied to that which might be bounded. Unlimited, or not limited, applies to that which might be limited. Infinite, or not finite, applies to that which in its nature admits of no bounds. The ocean is a boundless object so long as no bounds to it have been discovered; desires are often unbounded which ought always to be bounded; and power is sometimes unlimited which is aiways better limited; nothing is infinite but that Being from whom ali finite beings proceed." (Crabb: Eng. Synon.)
boư'nd-lĕss-ly̆, adv. [Eng. boundless; -ly.] limithessly; so as not to be confined withio any bounds
ous . $\therefore$.an your constitution be so boundlesty amor-
boùnd-1ĕss-nĕss, s. [Eng. boundless; -ness.] The quality of being boundless, i.e., without bounds; limitless in auy respect.

## A. As substantive:

I. Ordinary Language:
I. Goodness, excellence, kiodoess, bened cent feeling in the abstract or in general ; the quality of being kind.
(1) Gen.: In the foregoing sense.
"In world nie non so Fiter mon
Spec. Lyr. Poetry (ebout 1300) Alysoun, 29, 30. Upper

* (2) Spec.: Valour. (Scotch.)

That thus the king of Ingland,
And throut thair lordes gret bounte,
Discomfit in his owne euntre, ",
Barbour : The Brucs (ed. Skeat), svill. 683-
2. Such beneficent feeling carried into action, speciaily in the direction of almsgiving; the act of giving money or other favours gractously or muniffeently; in act of kindoesa, generosity, liberality, munificence.

- For (as I selde) loo, that was sho

That dide to me os gret bounte.
3. That which is given liberally or munill centiy.

* (1) A good deed; a special deed of valour resulting from the "goodness" of the individual. (Scotch.)
"To do ane ow trageoas bounee."), ill. 1 sz
Barbour: The Bruce (ed. skeat),
(2) Alms, a donation of money, or anytblog gimilar, the result of generosity.
"'To worth or want well-welgh'd be Bounty given"
(3) Success resultiog from the Divine goodnesa; welfare

OR man so hard (sted) as wes he
That ettirwart com to see bounte.
Barbour: The Bruce (od. skeat), ii 4i-8.

## II. Technically

1. Ch. \& Civ. Hist.: A grant or henefaction from the state to those whose services indirectly beoefit it, and to whom, therefore, it desires to accord some recompense, or at, least recognition
I Queen Anne's Bounty: A bounty to the more poorly-endowed livings in the English Church. It was conferred by a royal charter confirmed by Queen Anne ( 2 Anne, ch. 11), and provides that all the revenue of firstfruits and tenths ghall be vested in trusteea for ever, and used as a perpetual fund for augmenting the endowments of poorer livings, and for advancing money to incumbents for rebuilding parsonages thereon. The trustees rebuildisg parsonages thereon. The tristees administering it have been formed into a corporation, and when applied to for grants act
on rules which they have framed for the administration of the trust.
2. Law, Comm., \& Polit. Econ.: A premium paid by Government to the producers, exporters, or importers of certain articles, or to This is done either with the view of fostering a new trade duriag its infacy, or of protecting an old ove which is aupposed to be ot apecial importance to the country.
Tha hiatory of bountiea affecting general commerce naturally divides itself into two perioda. During the first of theae, atatesmen, and the educated clases generally, believed in the advantage of bountiea, and they were paid on the exportation of coro, of linen, and other commoditiea, and in conoeetion with the herring and whaia fisheries. They were denounced by Adam Sinth and other political economiats. To tax the general public that goods may be benevoleutly Iuroisbed to the foreigner st unremunerativi rates cannot possibly make s nation richer and if a manufacture or a fiebery cannot pay its way unaided, it should be sbsodoned, sac tha money which it has lockediup be turoed into more profitsble channels. Theae views baviog bean adopted by the Engliah Parliaoleot, the bounty oo the expertation of coro waa abolished in 1815 , and that on the exportation of linen and several other articles in 1330. In the last-Inentioned year the bounty oo the axportation of herrings was swept away, that paid on the toonagg of the vesaels empioyed in whale-fishing having ceased in 1824.

The second period in the hlatory of bounties
bon, boy; pout, jowli cat, çell, ohorus, chin, bench; go, gem; thin, this; sin, aç; expect, Xenophon, egist. ph $=$ f.

affecting British commerce is in certain respects the antithesis of the former one. The British mannfacturer, standing manfully on his own resources, is in certain cases exposed to unduly severa competition, bounties to the foreign manufacturer ensbling him to eend his goods into the country at rates which he wauld otherwise find unremunerative. The cystem is now before the public in connecton with the home and colonial sngar industries, The sugar dity in France and America s tevied on the raw sugar, if the Freach or American manufacturer export refined sugar, the dnty previously levied on the raw material is returned noder the name of drawback, and as it is difficult to know how much raw sugar was used in making a certain weight of the refined article, he so takes the benefit of the doubt as to obtain s greater drawback on a given quantity than the duty he paid upon it in ite raw state. The excess-in other words the profit, which he nakes from the public treasury of his conotry, is the export " bounty." The same eystom obtains in Holland and Belgimin, besyides which the beetroot sugar mannfacturers of these conotries, together with those of Austria, Germany, sud Russia, obtain a sianilar bounty on beetroot sugar. In Germany, Aus. tria, and Russia the duty is levied on the weight of the root ; in Beligium, on the density of the juice. In Austria and Russia the weight of the root is estimated according to the capacity of the apparstus. Under such systems a large portion of the sugar produced entirely escapes taxation, and as the full drawhack is sllowed on all sugar exported, the result is a large bounty on exportation.

In the Cnited States, the McKioley Tariff Bill, which removed the duty from imported sugar, placed the American sugar producer, with whom the natural advantages tor sugat cane culture were legs favorable thao in the West indies, under a disadvantage. To obviate this, and also to encourage the develojnent of
the beetroot sugar industry, a bounty was the beetroot sugar industry, a bounty was
granted to the sugar producer, sufficient to overcome the disadvantage named. The term bounty was also employed to designate the sume paid to indnce enlistment during the Civil War, and to obtain substitutes for drafted men. These men frequently deserted, aod were then kauwn by the title of bocsty-semper.

The same term is applied io the United States togrants of land to soldiets and sailors, their widuws aod children, for services in the army and nary. 1t is aiso applied to snma of mouey paid by government to owoers of fisling veesels, by Act of Congress of July 29, 1:1:3, for the encouragement of the fisling induatry sud to sums of muney appropriated for the destruction of wild beasts during the time that the couotry was sparsely settled. The amounts paid to companies which carry the mail by lant or water have beea called bounties, but a more proper term for them is that of appropriations for carryigg the mails.
bôu'quet (quet as k̄̄), s. [Fr. bouquet $=$ (1) a thicket, a clump or plantation of trees, (2) a prosy of flowers. The ssme as bosquet,
Prov. bospuet: Sp . bosquete; Ital. boschetto Prov. bosquet: Sp. bosquet
Low Lat. boscum.]
[Bosk.]

1. A nosegay, s bunch of flowers.
2. An agreeable perfume, emanating from fowers, wine, or essence.

Ecclesiol.: A very youthful functionary in the Mediæval Chureh, chosen in aome, if not In all, eathedrals on the 6th of December (St. Ni-holas's-day), and retaining office till fonocelts'day, the 2sth of the same month. st. Nicholns was said to hava been deenly pious, eveli from infancy. He was, therefore, helt up as a model for imitation by boys. The boy-bishop elected on hia day was chosen by the anffrages of children. Once alpointed, he had to "hold up the state of a biellop answerahly, with a crozier or pastoral-staif in lisa band and a miter upon his head." He was attended by a dean and prebendaries, also chillren. Puttenham describes him as "a blalop who goeth about blessing and preachIng with such childish terms as miketh tha peeple langh at hia foolish counterfeit apeeches." Ha was called also a barne-bishop. (Old Eng. barne is thee sams as the Scoteh bairn, meaning a child.) [Nick.]
*boy-blind, a. mind as a boy, undiscerving.
"Pat cane be could be oo boy bilind and foolith.".
boy's play, * boyes-play, s. Play aueli as loys engage in, trifing.
"You whall find no boy's play here".
boy (2), \&. (Bow.l A bow." (Chery Chase, 60.)
boy, v.t. [From boy, s. (q.v.).]

1. To treat as a boy. (Beaum. \& Flet.: Knight of sfalta, ii. 3.)
2. To act as a boy, in allosion to the practica of employing boys to act the parts of women on the early English stage (?). Founded only on the early English stage
on the subjoined example.

Shall be hrought drauken forth, aud int shanl see Some squeaking Cheopinatra sog my greatuess." Shakesp: Antony
Sehmidt, in his Shakespeare Lexicon, considers tbe word boy aa forming, with Cleopatra, a conppound noun, giving this explanation, "l ghall see some boy performing the part of Cleopatra as my highness.
3. To get with male child. [Girl, v.]
boy'-age, s. [Eng. boy; -age.] Tha conditiun of a boy; youtl, boyhood.
by' ar, bol'-ar, s. [Russ. bojarin; O. Slav. bol,arin, boljar =a nolleman; from bolli $=$ grcat, ilustrious (Mahn).]
In Russia: A Russiau nobleman, a person of mank, a soldier; what in the west would be called a baront.
boy $-\mathbf{a u}(\mathbf{a u}$ as $\overline{\mathbf{o}})$, s. $\quad[\mathrm{Fr}$. boyau $=$ (1) a gyt, (2) a narrow house, an apartment, (3) sea def.\} Fortif.: A trench of zigzag form, to avoid all estitading fire, leading from one parallel of attack to another, or to a magazine or other phint. Such trenches are often called boyarts of con, mnunication.

Boy -côtt, v.t. [Named from Captain Boyeott, of Lough Mask Hnuse, in Mayo, land agent in 1880 to Lord Erne, an Yrish noblemao. The former geattleman having given offence The ormer gantheman having given offence
about agrarian matters to the people among about agrarian matters to the reopie among Whotn he lived, during the and-agitation or case being reported in the Press, about sixty Orangemen, belonging to the north of 1reland, each man carrying a revolver, organised themselves into a "Boycott relief expedition," ass if the captain had been a beleaguered British camp in Aghatistan or Zululand. The Government gave them a strong eeeort of cavalry, besides font-gnldiers and constabulary, artillery also being added on the return journey. The crops were gathered in and geut away, and the captain himaelf brongbt of to a region of greater aecurity.]

In Ireland during agrarian exoitement: To put a person outsida the pale of the soclety, high and low, amid which he lives, and on which he depends; aocially to outlaw him. In one form or another eimilar practices hare been common at all periods of history, in all parts of the world, and in all classes of pociaty.
"Thyy advise that men who pay full reata shall be Boyooted: nobudy is tw work Lor them, nubody la to
sell them snything nobody is to buy suything of
them."

Boy-cottt, s. \& a. [From Capt. Boycott.] Heycotr, v.]

## A. As substantive:

1. The land-agent mentioned in the etym. of Boycott, v. (q. v.).
2. The act of "Boycotting." [Boycotiluo.] "They alas do wot feel warranted in regarding the throat of $\begin{gathered}\text { nycott } \\ \text { Act, as one which comos within the } \\ \text { doue } \\ \text { not refor to }\end{gathered}$ Act, as it doesg not refer to violence.
B. As adjective: Pertaining to Captain Boycott, or arising out of the Boycott case.
"The Boyoots polico-tar will be tevied . . ."-Echo.

In Gilrisifand thar was that brache th lirede Wallace, v. 2s MS. (Jamieson.)
brăch-čl'-y̆t-ra, s. pl. [From Gr. Beaxús (hrachus) = ahort, and èiutpov (elutron) $=$ a
cover; one of the 1 wo wing-cases of a beetle. [Elvtaon.] Animals with ahort wing-cases.] Entom.: A large group of beetles characterised by having the elytra so ahort that they do not nearly cover the abdomen. Some make dhem a subsection of Pentamera, the tarsi of most, thongh not all, of the genera being five. Othera, we think more justly, consider them a section by themselves, connecting the Colenptera with tha Dermaptera (Earwigs). The Brachelytra have large membranous winga folded under the small elytra. They fly well. They are sometimes called Cocktails, from a habit they have of setting up their taila in a threatening attitude when menaced. The familiea are Pselaphidæ, Tachyporidæ, Staphylluidex, Stenidæ, and Omalidæ (g.v.).
brǎch-ĕl'-y-troŭs, a. [Mod. Lat. brachely$\operatorname{tr}(\mathrm{a})$; Eng. suff. -ous.] Belonging to, or connected with, the Brachelytra (q.v.); having short wing.cases.
- brăch'en, s. [Bfacken.]
-brăch'-ét, s. [O. Fr. brachet; dimin. of braque.] [Basch.] A hound.
" Brachetes bayed that best, ns bidden the maysterez
brăch'-1-a1, a. [In Fr. brachial; from Lat. brachialis $=$ of or belonging to the arm; brachium; Gr. $\beta$ ßaxicu (brachion $)=$ the arm.]

1. Science generally: Pertaining to the arms, or to one of then.

I(1) The brachial artery :
Anat.: The portion of the axillary artery betweer the shoulders and the elbow.
(2) The brachial plexus: [From Lat. plexus a fold.]
Anat.: The junction of the first dorsal and
the lower cervical nerves from which those of the arm issue.
2. Bot. : Measuring twenty-four inchea long, or what la coaveationally asanmed to be the length of the arm. (Lindley.)
brăch'-Y-ate, a. $\quad$ [From Lat. brachiatus $=$ with arm-like branchea; brachlum; Gr. Bpa $X^{i}{ }^{\omega} \nu($ brachiōn) $=$ the arm.]

Bot.: Preaenting a certain resemblance to the extended arme of a man; that 1a, haviog horizontal branchea standing forth aearly at right anglea to a stem, and which, moreover crosa each other alternately; having opposite braaches decussate. (Lindley, dc.)
brach-in'-I-dw, s. pl. [From brachinus (q.v.).]

Entom.: A family of predatory beetles belonging to the seetion Truncatipennes. It contains the British genera Brachinua, Tarus, Lamprias, Lebia, Dromius, \&c.
brach-i'-nŭs, s. [From Gr. Bpaxúve (brachunô) $=$ to ahorten.]
Entom.: A genps of beetles, the typical one of the family Brachinidæ(q.v.). The apeciea have their head and thorax comparatively narrow. Their chief peculiarity ia a power which they possess of expelling from their hiadar extremity a pungent acrid funid with a loud report. Hence Latreille called them Bombardiers, or Bombardier Beetlea. About flve speciea occur in Britain, Brachinus crepitans being the laust common. [Bombasdier.]
brăch'-I-ot-nĭd, s. [Beachionide.]
Zool. : Any Rotifer of the family Braehion. idæ (q.v.).
brach-1-ŏ'-1-da, s. pl. [From brachionus q. V.).]

Zool. : A family of Rotifers, with a broad shield-shaped lorica, and short jointed.
 genit. Apaxiovos (brachionos) = an arm.]
Zool. : The typical genus of the family Brachionidx (q.v.), with several species. B. ur ceolaris has beea found is London water.
brăch-1-ŏp'-ot-da, s. [From Gr. $\beta \rho a x i \omega \nu$ (brachion) = the arm, and oblique cases of nous (pous), no $\delta 0 s$ (podos) =a foot. Animals with arm-like feet. The reference is to two long eiliated arms developed from the sides of the mouth, which are used to ereate currents in the water and bring food within reach of their month.]
Zool. \& Palceont. : Ons of the great classes nuto which the molluscuns sub-kingdom of the aninal kingdom is divided. The Brachiopoda aninal kingdom is divided. The Brachiopoda are bivalves, with one shell on the back of the
animal, and the other in front: these are nuimal, and the other in front: these are ealled dorsal and ventral valves. The two valves are never equal in size. They differ from the Conchifera (called also Lamelli. branchiata), or ordinary bivalves, in uniformiy luaving one side of the same valve symmetrical with the other. In teelnical language, the Brachiopoda are inequivalve and equilateral while the True Bivalvea are equivalve and in equilateral. The organisation of the Braehiopoda is inferior to that of the True Bivalves. They are attached to bodies by a pedicle which passes as the wiek does in an antique lanp, whence the older naturallsts called then "Lamp-shells." The shell is lined by them "Lamp-shells." The shell is lined by They are very impartant in a geological point They are very impertant in a geological point of view, existing from the Cambrian rocks ill
now; but culluinating apparently both in now; but culminating apparently both in lurian. In 1875 ahove 1,800 fossil speeles were known, more than 900 of them British In 1879 Dr. Alleyne Nicholson made a much higher estimate, considering that nearly 4,000 extinct apecies had been described. The recent apecies are eomparatively few. They are all marine, occurring chiefly in the deep sea. The families are-(1) Terebratulider, (2) Spiriferidæ, (3) Rhyneonellidæ, (4) Orthide, (5) Productidæ. (6) Craniade, (7) Discinidæ, and (8) Lingulide (q.v.). (Woodward \& $R$. Tate.)

A slightly different classiflcation ranges the Brachiopods in iwo sub-classes-
(1) Inarticulata or Tretenterata: Fam. (1) Craniadie, (2) Diseinidre, (3) Lingulide.
(2) Articulata: Fam. (1) Terebratulid\&, (2) Rhynconelidee, (3) Theciidæ, (4) Spiriferida, (5) Pentameridæ, (6) Strophomenidæ, and (7) Productidæ.
 cBiopoda.] A mollusc belonging to tha clasa Brachiopoda (q.v.).

TI. The age of brachtopods: The Silurian period.
brăch-1̌-ŏp'-t-doŭs, a. [Eng. brachiopod(e); -us. [BaACHIOPODA.]

1. Having arm-like feet.
2. Pertainiag to the Brachiopoda.
brach'-1-um, s. [Lat., an arm, particularly the forearm, from the hand to the elbow. In Gr. $\beta$ paxi iwv (brachiōn).]

Bot.: An ell, ulna, twenty-four inches, considered to be the average leagth of the erm in men.

## Brach'man (1) (ch silent), s. [Bramin.]

Brach'-mạn (2) (ch ailent), s. [Banaman.]
brăch-y̆-căt-a-lěo'tǐc, 8. [Lat. brachycatalecticum; from Gr. $\beta \rho a \chi$ úкатá $\lambda \eta \kappa т$ ós (brachukatalēhtos), as adj. = eading with a short syllable, short by a foot ; Bpaxús (brachus) = short, and катадүктıкós (katatêktikos) = leaving off, stopping.] [Catalectic.]

Greek \& Latin Prosody: A verse wanting a foot; a verae wanting two syllables to complete it.
brăch'-y̆-çĕ-phăl'-io, $a_{0} \quad$ [From Gr. $\beta \rho a \neq u ́ s$ (brachus) $=$ short, and Eng. cephalic (q.v.).]

(o) The pieces by which the hoiler of ocomotive le maintained in poaition.
(b) The pieces which bold and guids the sinde-bars.
6. Ordnance:
(1) The choek of a mortar-bed.
(2) The carriage of a ship's or casemste gun. 7. Printing (pl.): The signs or marka which follow [ ]. They are used to enclose a word or seatence, to isolats it from the other matter.
"At the hend of each article, I have referred. by nerts volume where the section, from which the abridgement is made, begina"-Paley: Evidences
B. As adjectivs: Pertaining to or consisting of a bracket in any of the foregoing senses.
bracket-crab, s. A hoisting apparatua designed for attachment to a post, wall, \&e.
bracket-light, s. A gas-light projecting trom a side wall.
bracket-shelf, s. A form of conaole for snpporting a pier-glass or other object.
brăck-ět, v.t. [From bracket, s. (q.v.).]
I. To place within trackets, to connect by brackets. [Baacket, s. , 7.] (Barket.)
2. To couple names with a bracket in a list of successful candidates, to denote equal merit.
bră'ck-et-ěd, pa. par. \& a. [Bracket, v.] 1. Ord. Lang.: (See the verb.)
9. Arch.: The bracketed style is one of which brackets are a prominent feature.
brǎ'ck-ět-ing, pr. par. \&s. [Впаскет, v.]
A. As present participle: (See the verb.)
B. As sutstuntive: A skeleton support for mouldings. Thia plan is commonly adopter in making the arches, domes, sunk panels, covea, pendentive work, \&c., at the urper parts of apartments. (Knight.)
brăck'-ish, a. [From Ger. brack; Dut. brak $=$ brackish.]
Of water: Partly fresh, partly salt, as fresh water becomes wheo it flows over saline sol or the sea obtains occasional access to it.
"As springs in deserts found seem aweet, all brachish
So midst the wither'd waste of life, those tears would
brăck'-ish-něss, s. [From Eng. brackish; -ness.] The quality of being brackish, the quality of being partly fresh and jisrtly salt.
"All the artificial strainings hitherto leave a brack-uheest-Cheune

Brack-le-sbam, s. \& a. [From the place mentioned under A.
A. As subst.: A bay near Chichester, is A.
B. As caj. : Occurring at or near the bay Entioned under $A$.

## Bracklesham-beds, s.

Geol. : The midlle division of the Bagshot series. The Bagshot aeries has been meparated into three divisions: the Upper Bagahot is nearly the same age as the Burton series (q.v.). The Bracklesham beds occur at Bracklesham Bay [A.], and also at Brook, in the New Forest. They consist chiefly of dark green aands and brown clays. Among the
fosalls found in them are Cerithlumgiganteum, Voluta Selseyensis, Convs dependitus, Pleurotoma attenuata, Strepsiduro turgida, Cardita planicostata, Candtum porulosum, Peotunculus pulvinatus, Nummulites hevigata. The plant beds of Alum Bay, \&c., are Lower Bagshot.

## brł̌oks, s. [Braxy.] A disease of sheep.

* brackBrackish.
"The bracky fountains."-Drayton: Polyoth, song XI "The bracky marsh."-1bid., song xiv.
brā-cŏn, s. [Etym. doubtfal.]
Entom.: A genus of Ichneumons, with a histus bet ween the mandibles and the clypeus, sad a lengthened ovipositor. . Several occur in Britain. [Braconiden]
brā-cŏn'-1-dse, s. pl. [From bracon (q.v.).] Entom. : A family of the Ichneumon tribe of Hymenoptera, distinguisbed from the true Ichnenmon fiies by having a single recurrent nerve in the fore-wing, instead of two.
brăct (Eng.), brăe'-tĕ- a (Lat.), s. [In Ger. bracktei; Fr. bractec. From Lat bractea $=\mathrm{a}$ thin plate of metal or gold-leaf.]

1. Bot.: A leaf growing upon the flower-stalk. Thoas which occupy this aituation have, as a rule, a different size, form, snd sppearance from the ordinary leaves. There are cases, however, in Which it is diff cult to decide to particular foliaceparticular folizceous expansion ia to be referred, and at times a yet greater uncertainty vails as to whether one of those situsted close to the
 flower is a bract or a sepal. The involucre in composite plants, the great spathe in Araces, the palem of grasses, the acales of catkina, \&c., are all bracts.
2. Zool.: A part of a hydrozoon, somewhat resembling the bract of a plant. [Hynaophyllia.]
brăc'-te-al, a. [Lat. bractealis $=$ of metallic platea; from bractea (q.v.).]
3. Pertaining to a bract. (Brande.)
4. Furnished with bracts. (Brande.)
brăc'-tě-ate, a. \& s. [Lat. bracteatus = covered with gold plate; from bractea (q.v.).]
A. As adjective. In Bot.: Furnished with bracts. (Brande.)
B. As substantive: A silver coin formerly current in Scotland.
brǎe'-těd, a. [Eng. bract; -ed.]
Bot.: Furnished with bracts or with a bract.
brăc'-tĕ- $\mathbf{o}-1$ 1pe, s. $p 1$. [Plural of Lat. bracteola $=$ a thin leaf of gold ; dimin. of bractea (q.v.).] Bot. : Small bracts.
brăc'-tč-ō1-āte, a. [From Lat. bracteol( $a$ ); and Eng. suffix-ate.] [Bracteole.]

Bot. : Furnished with small bracts or bract lets. Applied especially to involucres, which have an outer row of such foliaccous appead. ages. (Lindley.)
brăc'-tě-ōle, s. [From Lat. bracteola; dimin of bractea (q.v.).]
Bot.: A small bract, a bractlet.
brǎct'-lěss, a. [Eng. bract; and suffix-less.] Bot.: Without bracts. (Webstex.)
brǎct'-let, s. [From Eng. bract; and dimin. sliffix-let.] A amall bract. Used apecially of the exterior bracta of an involucre. When these exist it is then aaid to be bracteolate a the base. (Lindley.)

* brī-ç̆yn, v.l. [Brace, v.]
"Bracyn, or sette stresta. Tendo."-Prompt, Parr.
brăd, pa. par. [BaADE (2).] (Scotch.)
bräd, a. \& in compos. (compar. * broedder, -bradar). [A.S. brid = broad, large, vas (Boworth); as, Bradford $=$ the broad ford;

## Braugate = the broad gate.] Broed. [Braan.]

 (O. Eng. Soolch.)
## A. As a separate word: <br> Barbour: 2he Bruce (ed. Bkenth "ili. <br> - And wele bradar thar-ofter soyrs <br> B. In compos. : (See etymology.)

brăd, * brod, " brode, s. [Icel. broddr = any pointed piece of irou or steel; Sw. brodd =a froaf nail, a blads; Dan. brodde $=$ a apur, an ice spur, a frost nsil. Ce, also A.S. brord $=(1)$ a prick or point, the first blade or spire of grass or corn, an herb (Somner), (2) a aword Dan. braud $=$ a prick, a prickle, a thorn, sting; brod $=$ a prick, s thorn, a sting. [Brod, v. \&e \& ; Bristle.]

1. A thin, qquare-bodied nall which, instead of a head, has a lip or projection on one aide only. Brads are of different leogths, of the same thickneas throughout, but they taper in width from the lip to the point

- Brode, bedlese nayle,"-Prompt. Par*

## 2. (Pt.) Money. (Slang.)

## brad-awl, s.

Joinery: A small boring-tool with a chiseledge. Used for opening holes for the insertion of naila.

## brad-driver, s. A brad-setter (q.v.)

## brad-setter, s.

Joinery: A tool which grasps a brad by the head, and by which it ia driven into its appomted place.

* brade (1), v.t. \& i. [From A.S. bregdun, brédan $=$ to wesve, . . . to gripe, lay hold of, draw, take out.]
A. Trans.: To draw. (Used specially of pulling out a knife or sword.) [Bnam, v.]
"Wyudyr hie hand the knyff be bredit out,
B. Intrans.: To extend.

He were a bleapnt of blwe. that bradde to the erthe.
brade (2), *brad, v.t. [Frola A.S. bradan $=$ to roast; Dut. braden; O. 11. Ger. brátan; (M.H.) Ger. braten = to roast.] To roast.
"The king to sonper is set, served in halle.
Briddes branden, aind brad, in bankers bright" $\begin{aligned} & \text { Str Gavon and Sir Gol., ii, } \mathrm{I}\end{aligned}$

* brāde, a. [Braid, a.; Bnoad.] (Ear. Eng. Allit. Poems, ed. Morris ; Pearl, 138.)
Brăd'fõrd, s. \& a. [A geographical name, evideotly from A.s. broud = broad, and Eng forl; the aame as Broadford.]
A. As substantive: Various places, the best known being Bradford in Yorkshire, the geat of the woollen manufactura; another is
"Great" Bradford-on-the-Avon, in Wiltshire.
B. As adjective: Connected with Bradford; found near Bradford.

Bradford clay, s. [From Bradford in Wiltshire, where the clay is well developed.]
Geology: A marly stratum occurring in depressions above the Great Oolite and below the Forest Marble. It is characterised by the numbers of stone lilies (Apiocrinus rotundus), which oceur in it, alao by Terebratuta digona, $T$. cardium, and T. coarctata. It is well seen at Bradford in Wilts, also near Tetbury Road Station, but the crinolda do not ocenr at the latter locality.

## * brà'-dit, pa. par. [Brade.]

brăd(q.v.).]

Zool.: A family of mammals belonging to the order Edeotata. It containa the Sloth and its alliea.
 Lat.), s. pl. [From Gr. Bpaסv́nous (bradupous) = slow of foot: Bpaivis (brodus) = slow. and пov's (pous), пooós (podos) = a foot.]
Zool: Slow-footed animals. Blumenbach's name for an order of manmalia, containing the genera Bradypus, Myrmecophaga, Manis, and Dasypua. Cuvier substituted the term Edentata, from the abseace in theae animals of incisor teeth.
brăd'-y-pŭs, s. [Mod. Lat. bradypus; from Class. Gr. ßpaîútous (bradupous) =s slow of foot.] [Bradvpons.]

[^81]1. Zool. : A mammalian genus, tbe typical one of the family Bradypodidæ (q.v.). It con tains the Ai, or Common Sloth (Bradypus tridactylus), and other apecies. The only other genua is Cholopua, originally written (incorrectly) by Illiger Cholæpus (q.v.).
2. Palcont.: Various genera and apecies of the family are found in South America. They are gigantle as compared with the modern aloths. The most notable are Megotherium, Mylodon, Scelidotherium, and in-tha Postpliocene of North America Megalonyx. (See these worda.)
brāe, " brāy, " brā, s. \& a. [Icel. brá, A.S. brifw, breaw = the eyebrow. "The word nust have passed through the sense of eyebrow to brow of a hill, but no quotations illustrating the change appesr. in spoken use brae ia mainly Scottish, but ia employed in literary English." (N.E.D.)]
A. As substantive:
I. Literally:

Brahma-fowl, s. [Braqmapootra row L.]
Brah'-man, Brah'-mĭn, *Bra'-mĭn - Brach-man, s. da. [In Sw. \&c., Bramin; Ger. Bramine, Brachmane; Fr. Bramin, Bramine, Bracmane; Sp. \& Port. Bramin, Bra mine, Brachmane; Ital. Bramino; Lat. pl, Brachmanae, Brachmanes; Gr. Spaxuàve Brachmanes); Mahratta Bráhman; Sanscrit Brahmán, not Brähman $=$ Brahma (q.v.) $=$ member of the sacred caste, from Bráhman $=$ Brahma (q.v.).]

## A. As substontive

1. Originally: One of the Aryan conquerora of Iodia who discharged priestly functions Whose ascendeacy, however, over his fellows was intellectual and spiritual, but not yet political or supported by tha caste syatem.
2. Now: One of the four leading castes of India, the others, theoretically at least, being Kshatryas (Warriora), Vaisyas (Merchants) and Sudros (Labourers), not reckoning out easts beyond the pale. [Caste.] [For the ise of the Brahmans see Brahmanism.] Th Brahmans in many places at present are about a tenth part of the community. They are the most intellectual of all castes, haviog great mental subtlety. They are admirably adapted for metaphysical speculation and for mathematical reasoning; lunt throughont their vast literature they have almost nniformly told monstrons myths in lieu of history. Nor do they care much for natural science. In these wo respects they fall short of the average European mind. [Brahmanism.]
Brit. India, thangusge of the Brammens."-Mill: Hist
"The worshippers of Agin no longer form a distinet
 the Hindus.
B. As adjective: In any way pertaining to a member of the caste described under A
I Brahmana beads, Brahman's beads: A amee given in India to the corrugated secd of Eleocarpus, nsed by the Brahmans and thers as necklaces. They are sometime worn as beada by children in East London, having been brought from India by seafaring relatives or friends.
Brahman bull, Brahminy bull, s. The Zebut, a variety of the Bos taurus, or Corn mon Ox. 1 it is distinguished by having a large fatty hump on its shonlders. Divine honoure are paid to it in India, and it is daemed an act of piety to turn one loose in tha streets, withont any provision for its maincenance. It therefore heljs itself from greengrocera stalis or from gardens. It is not, as a rule, dangerous to pedestrians, bnt at times has warlike encounters with its huuped com-
peers, beaides aystenstically persecuting all cattle deatitnte of a hamp. It is unpopular wh bit, though the writer has heard of one being it, though the writer has heard of one being
killed, suspicion falling on a European whose killed, suspicion falling on a Europe
garden the divins least had robbed.
Brah'-măn-io, Brah'-mĭn-icc, a. [From Brahman, Brahmin, and sutf. -ic. In Fr Brahmanique.] Pertaining to Brahmans or to Brahmanism

## the corruption of the Brahminto religion."Mosheim: 716 . <br> "The earlier ayotems of Branmanic philosophy" Max Muiller : Chips from a German Workshop, yoi i (1s67h p. 225: Chips from a German Workshop, vol

Brah-măn'- i-cal, Brah-min'-i-cal, a [From Brahmanic, Brahminic; -al.] The same as Brahmanic (q.v.).
Brah'-mạn-ĭsm, Brah'-mín-ĭṣm, s [From Eug., dc. Brahman, Brahmin, and snff -ism. In Ger. Bramanism; Fr. Brahmanisme. Theol., Hist., \& Phil.: The systen of reli gious belief and practice iutroluced and propagated by the Brahmans. This greatly varied with the lapse of agea, but to every auccessivg
form of it the name Brahnaniam may be applied.
The earliest inhabitants of India seem to have been mainly Turanians. [Turanian. When, at a very remote period of antiqnity, these entered the peninsula, an Aryan oation or tribe existed ill Central Asia, N. W. of India, apeaking a langnage as yet unrecog nised, which was the parent of nearly all the present European tongues, our own not ex cepted. At an unknown date a great part of this Aryan nation migrated to the north-west, and rettled in Europe, the remainder taking the contrary direction, and enteriog India by the way of the Punjaub. [ARvan.] Admiring the giorions Eastern sky, they applied to it, and to the elements of natnre, glowing ad jectival epitheta; these gradnally became abstract substantives, then the qualities ex pressed were personified, and gods ruling over tha several elements were recognised. Thus the aky was first called Deva, adj. $=(1)$ bright then (2) brightness, next (3) the Bright God; or, if the adjectival meaning be retained, Divine. This is the familiar Lat. Deus = God Similarly Dyaus $=$ the sky, is Gr. Zevs (Zeus) genit. $\Delta$ ós (Dios), from $\Delta i s$ (Dis), Latin Dies piter $=$ Jupiter. Other divinities worshipped were, Agni $=$ fire (Lat. ignis), Surya $=$ the sill, Ushus = the dawn Gr. そेes (ēs)], Marut $=$ storm (at. Mo, $i=$ the rivers earth $A p=$ the waters, Nad $i=$ the rivers, Varuno $=$ the sky $[G r$. ovpavos (ouranos)], Mitra $=$
the sun, and Indra $=$ the day. These gods are invoked in the 1,017 hyims of the Rig Veda, the oldest Aryan book in the worli Dr. Haug, of the Sanscrit College at Poonah, hinks the oldest of these may have been com posed and uttered from $2400-2000$ B.C., or at least from 2000 to 1400 B.C. Max Miiller, the ranslator of the Rig-Veda, more moderately dates most of them between 1500 and 1200 B.C., believing the collection to have been finished about 1100 B.C. [Rig-Veda, Veda.]
Whilst the Aryans were in the Punjanb a religious schism took place amongst them,
and a large number of them left India for Persia with feelings so litter that what their former friends left behind called gods they transtormed into demons. The venerable Deva $=$ God, was changed into drûva $=$ an evil spirit. Iran (Persia) was the place to which the seceders went, and there their faith deve loped into Zoroctstrianism (q.v.). (See also
The Rig-Velle was followed by three more, the Yajur-vela, the Suma-veda, and the Atha-roa-reda, each with a Sanhita or collection written in poetry, and Brähmanas and Sutras, prose compositions; but these are not so valuable as the Rig-Veld for tracing the old heliefs.
From about 1000 to 800 B.C. collections were being made of the old sacred literature From about 800 to 600 B.C. tha Brahmanas were composed (Dr. Mang thinks between
1400 and 1200 B.C.). Then the Sutras (excgetical compositions), which follow, make Brahmanas as well as Mantras divine.
The exact date of the two great epic poems the Ramayana and the Mehabharat-is unknown; but the former is believed to be the stellation of Vedic gods had get, and one of
deified heroes was arising or had arisen. Rama, the deified King of Ayodhya (Oude) the hero of the former poem, is still exteo the hero of the former poem, is stil exteaaively worahipped, along with his friend and follower, Hunooman, the monkey go
During the period of the Brahmanas, the Brahmanic priesthood had risen to great power; during that of the Sutras they were in quiet enjoyment of their caste dignity. By the sixth century Booddha had arisen to preach the equality of all castes, and his system was dommant in India from about 250 B.C. till 750 A.D., that is, for a thonsand years. [Boomphism.]
When Brahmanism reasserts its away the Hindoo triad of gods - Brahma, Vishm, and Shiva-have arisen (see these worda) Nay, Brahma has become almost obsolete Nay, Brahma has becomc almost obsolete and the respectiva advocates of Viahnu and and the sixteenth centuries monastic reformerg and the sixteenth centuries monastic reformerg formed gects, some Vishnuvite, others Sivaite.
New sacred books, called, howevar, Puranas New eacred books, called, however, Puranaa
(meaning old), are penned to advocate the (meaning old), are penned to advocate the
tenets of conflictiog sects, and, though contradicting each other, are accepted as divine The Mohammedan invasion somewhat re pressed their quarrela. [Puranas.] At present, the worahip of Vighnu under the forms of Krishma and of Rama, and of Siva under that of the Lingam; with the veneration of Sukti, the power and energy of the divio nature in action ; to which must be added the adoration of Hunooman, Rama'a friend; and in many places of aboriginal Turanian gods, ar the inost prevalent forms of popular IIinduism Reformera are falling back on the Vedas, and Christianity oltains converts from it in every part of the land
Brah'-mann-ist, s. [From Eng., \&e. Brah man; and sulf. -ist.] A professor of the Brah manic faith. [Bfahmanism.]
"Berghard, in his 'Physical Atias.' gives the follow ing division of the human race according to religio chipsfroma a German Workethop vol i., Max Mis. Note

## A. As substantive:

I. Ordinary Language:

1. Literally: The aoft mass contained within the cavity of the skull, the encephalon. [II., 1.]
"Proceeding from the heat-oppreased brain.".
(1) In this aense it may be used in the plural, when the braina of different indlviduals,
human or animal, are compered to each other.
acriea i- at ao period of lifo do their bratno perfectily ch. L., p. sa
(2) When only ona individual is referred to. "Volces were heard throatening, aome that his
brains should be blown out, .. Macaulay: five. Eng, ch. xii
2. Figuratively: The intellect.
the brain devise lawe. Mar." of Ton., 1.2
In this sense used also in the plural.
. . to beat this from his brains, vié. tha.
T To cudgel the brains: To stimulate the faculty of attention, with the view of colving an intellectual difficulty which could not be satisfactorily dizposed of in one's ordinary listless mental atate.
II. Technically:
3. Anat.: That part of the nervoue syatem contained within the crantum, or encephalon, the central part of the nervous system, composed of the cerebrum, cerebellum, and meposed of the cerebrum, cerebellum, and mocontinuity of the fibres of the apinal cord continuity of the fibres of the
upwards to the cepbalic centres.

I (1) Compar. Anat.: The centre of the nervous aystem in the lowest of the animals which possess a brain is in the form of a donble cord; a step higher, and knots or ganglia are developed on one axtremity of the cord. Such is the rudimentary atructure of brain in the lowest vertebrata. In the lowest fishes the anterior extremity of the double cord shows a suecesaion of five pairs of ganglia; in the higher fishes and amphibis the firat two become fuaed into a aingle gangion; then follow only three pairs of syminetrical gadglia. Thia carries us upin the animal acale to mommalia ( q . v.) ; for instanca, in the dog and cat we find a slngle ganglion cerebellum, then three pairs followiog each
fate, făt, färe, ạmidst, whât, râll, tather: wē, wět, hëre, camẹl, hẽr, thêre; pine, pit, sïre, sīr, marine; got, pơt

other, and the primitive ganglia of opposite sides, at first separato, become united by means of transverse fibres, commissures (commisoura $=a$ joining), for associating in function the two symmetrical portions. Hence the deduction that the brain in the lower animals consiato of primitive corde, primitive ganglia apon these cords, and commiesures whioh connect the aubstance of adjoining ganglia and associate their funotiona.
(2) Human Anatomy :
(a) In the fatus: In the human flatue, the earliest sign of the spinal cord ia a pair of minute longitudinal filaments side by side ; on ths anterior extremity of these five paira of minnte awellings are seen, not in a straight line, as in fishas, but curved ou each other to correspond with the future cranium. The posterior pair aoon become cemented on the middle line, formiag ons; the second pair alao viite; the third and fourth, at first distinct, are soon veiled by a lateral developminct, are soon veiled by a pateral developmend the anterior pair, at first amsll, becomc and the anterior pair, at first emsil, becomc less and almost lost in the development of the other paire; so that the srchitecture of the animala, but progreasive. [ARChEncephala.]
(b) In the adult: In the adult the primitive cords, described under $2(a)$, have become the spinal cord, at the upper extremity they separate under the name of crura cerebri; the Grst pair of ganglia, developed from the primitive cords, have become the cerebellum; the second pair (the optic lobes of suimals) becoms the corpora quadrigemina of man; the third pair, the optic thalami, and the fourth, the corpora atriata, are the basie of the hemispheres, which, the nuereat lamina in the fish, have become the largest portion, the the fish, have become the largest portion, the cercbrum, of the brain in man; the fifth pair
(olfactory lobes), so large in the loweat forms, (olfactory lobes), so large in the loweat forms,
dwindle into the olfactory bulhe of man. The dwindle into the olfactory bur is composed of fibrea or fasciculi ranged in some parta longitudinally, in others interlaced at various angles by cross fibres, and connected and held together by a delicate areolar web, which is the boud of support of the entire organ. It is enveloped by threc hining membranea, the dura mater, the arachnoid, and the pia mater (q.v.). The brain substance is of two kinds, differing in density and color, a grey or cineritious or cortical substance, and a white or medullary subgutance. The grey substance forms a thin atance. The grey substance of the convolulamelia over the entire surface of the convolu-
tions of the cerebrum, and of the lamina of tions of the cerebrum, and of the lamina of the cerebellum, hence it has beelt named
cortical; but itis lik zwise found in the centre cortical; but it is lik ewise found in the centre
of the spinal cord through its entire length, of the spinal cord through its entire length, cerebri, thalami optici, and corpora striata; also in the locus perforatus, tuber cinereum, commissura mollis, pinesl gland, pituitary gland, and corpora rhomboidea. As clearly Ghown by Dr. Sleveking, there is a peculiar property in the white matter of the brion, namety, the great elasticity of the medullary nubstance, and the reailiency afforded by this is the counterpoise of the rigid structures enveloping the brain, and which do not, as enveloping the supposed, remove it entirely from erroneoosly supposed, remove it entire

The microscopic elements of the brain are white nerve-fibres from $\overline{0} \overline{0} \overline{0}$ to $\Pi \frac{1}{0.0}$ of an inch in diameter; grey nerve-fibree, one-half or one-third lesa than the white in diameter
 an inch in diameter; and nerve-granules, be-
 with a variable number of pignent-granules. The division of nervea into cranial and spinal is purely arbitrary, for with respect to origin, the epinal cord or ita immediate prolongation into the brain.
The weight of the human brain, according to Semmering, is 2 lbs . $5 \frac{1}{2} \mathrm{Oz}$. to 3 lbs .1 cz . 7 dra ; Dr. Aitken says from 30 to 52 ounces, with a bulk of from 65 to 84 cubic inches. Dr. John Reid atates that there is au average difference of 5 oz. 11 drs. in favor of the mala brain. According to Scemmering, the largeat brain of a horae ia 1 lh .7 oz .; that of an elephant dissected by Sir Astley Cooper had a weight of 8 lbs .1 oz .; and Rudolphi found that of a common whale (Baleena mysticetus), 75 feet long, to weigh 5 lbs. 10 foz .
The average ap. gr. of healthy brain is 1.036 mean of grey matter, 1.034 ; of white, 1.041 . lits blood supply is derived throngh the piamater membrane.
2. Chemu: The chemical conetituento of tha brain are albumen; fatty matter, Including two acid compounds containing a large amount of phosphorus, from eight to ten parts in 1,000 , or one-twontieth to one-thirtieth of the whole soltd matter; also aalts, and from four-fifthe to esven-eighthe of water.
3. Physiol. : The organ for manifestation of the intellectual faculties, such as ths emotions, the passions, and volition, and also of sensation. The evolution of nerve-force consensation. The evolution of nerve-force connected with mind emanates directly from the
hemispherical ganglia. The spiual cord, by hemispherical ganglia. The spiual cord, by of combined movements. The brain alone furnishes conditions necessary for intelligence; the spinal cord for movenent; and together they connect the belancing and co-ordination of motor and sensitic power.
4. Path.: The chiel diaeases of the brain are-abscess of the organ, aphasia (in which are-abscess of the organ, aphasia (in which of expressing thnught), apoplexy (q.v.), brein of expressing thnught), apoplexy (q.v.), brain faver, cancer, concussion and compreasion,
epilepsy, hydrocephatue, hysterie, headaohe, induration, inssnity, paral ysia, sottening, aunstroke and tumora (q.v.).
R. A* culjective: Relating to the brain in any of the foregoing acnses. (See the compounds which follow.)
II Obvious compound: Brain-development (Darwin: Descent of Man, pt. i., vol. i.).
brain-born, $a$. Generated by one'a own brain or mind.

With hath his pang. but feeble nufferer groan

## Byron: Childe Harold Pillarimage, il

brain-bred, a. Engendered $\ln$ or sprung from the brain.
"I Iove's brain.bred girle,"-J. Taylor: Works (1080),
brain-oase, s. The part of the skull which encases the hrain.

## * brain-child, s. An idea

A brain child of my own" B. Jonson.'Now Inn, 1. 1.
brain-fever, s. A term in common use for inflammation of the lining membranes of the braio, meningitis; or of the brain itself, cerebritis. These are generally found in conjunction, seldom separate, and are termed phrenitis, or encephalitis. Often associated (a) with tuberculosia, or acrofula; sometimes (b) with gout, rhcumatism, or syphilis; in the first iustance generally in the case of children and delicate young femsles, in the others chiefly in adult males; very frequently, also, from injury, or as a consequence of previous diepases. Brain-fever is characterized by violent headache, intolcrance of light, excitement, extreme aensitiveness, hyperemia, delirium, convulsione, and coma. These are the aymptoma of cerebral irritation, which is often fullowed by cerebral dapresaion. So real is the delirium that it caanot be distinguiahed from true perceptions.
brain-pan, s. The aame as Brain-cass (q.v.). [Brainpan.]

## - brain-wood, a. [Brainwoon.]

brain-worm, s. (Fig.) A worm infesting the brain. (Used in controversy contemptuously of an adversary.) (Millon: Colasterion.)
brain-wright, s. One who thinke or devises for another. (Halliwell: Cont. to Lex.)
bräin, v.t. [From brain, s. (q.v.).]

1. Lit. : To dash out the brains.
"Thers thoo mayit brain him" Shakesp, Tempert, ili 2
2. Figuratively:
(1) To defeat. (Used of a purpose, dc.)

(2) To conceive in the brain, to underatand. Tongue and bruin oot." shakesp, : Cymbeline, v. 4
bräindge, v.i. [Etym. doubtful.] To rush rashly forward.

inade in short space and stoppapeas were nade in short space, and With
Weekly Seotaman, May 17, 1879 .
13. Basket-making: An iron crotch with a absrp-edged re-entering angle, adapted to peel the bark from osiers drawn therethrough
B. As aljective: Adapted to, pertaining to, or in sny way conneeted with \& brake.

## brake-beam, 8 .

$V^{\prime}$ ehicles: The trausverse bearm connecting the ahoes of opposite wheels. A brake-bar.

## brake-block,

Raitroad engineering: The block attached to the brake-beatn and holding the ahoe or rubber.
brake-shoe, s. That part of a brake which is brought in contact with the object whose motion is to be restrained

## brake-sleve,s.

Mining: A rectangular sieve operated by a forked lever or brake, from which it is sus torked lever or brake, from which it is susponded in s comstern of water for the agitation of comminuted ore. The meshes are of atrong
iron wire, I of an inch square. The lrake is iron wire, of an inch square. The hrake is
supported by a rolling axis. [JICoer.] The poorest light pieces are cuttings. Pieces of poor, aparry, lieavy ore are chsts. (Knight.)

## brake-wheel, s.

1. Railroad engineering: The wheel on the platform or top of a carriage by which the brakes are pnt in action.
2. Machinery: A whee! hsving cams or wipers to raise the tail of a hammer-helve.
brāke (2), s. \& a. [L. Ger. brake = brake, urushwood ; connected with Ger. brache $=$ fallow-ground; Dut. brack (sdi.) =fsllow ; Dan. brak = fallow, unploughed; and, perhaps, with Dan. bregne $=$ ferm-brake. Cf. also Wel brug, brygan = growth, lirake : Arin. bruk, brug = heath, heather; Ir. \& Gael. frooch $=$ hesth ; Prov. bru $=$ heath.] [Bracken.]
A. As substantive:
I. A thicket of brushwood or fern ; s place overgrown with prickiy or thorny shrubs, with brushwood or with feru.
(1) Literally
(o) Overgrown with prickly or therny shrubs, as brambles and briars, or with brusbwood. [Cane-brake..]
"That seelid to lreak from an expanding heart:
And with such nort mazyerials line, her nest.
Fixd in the centre of a prick ly braker neest
(b) Covered with a growth of the fern described under 2.

(2) Fig. : Trials, difflculties, afflictions If rm tradued by tongues, which nelther know
My facutiles nor persou: is hut the fate of plece, and the rough brate hakesp. : Hen. FIHI, L 2
3. The English name of Pteria, a genus of ferne belonging to the order Polypodiaces [Ptenis.] It is ao called from growing abundantly in such brakes as those doacribed under No. I. The common brake, called, more especislly in scotland, the bracken, is very abondant in woods and on heaths, and constitutes quite a feature of the scenery in auch localitiea. It is the commonest British fern. It is very ahundant in Epping Forest, and is tha only fern that is common there if an excursioniet ellow aid hin in picking his steps to know tbat wherever the brake or bracken grows the apot is presumably dry, wherever it is absant the place is presumably marahy. It is an excellent covert for game, and where deer exist they love to be among it. The country people believa that, taken medicinally, it will destroy worma, and that to lie upon it will cure the rickets in children. Its leaves aro used for thstching cottages. Its astringent quality has led to its employment for dressing and preparing chamois leather, and the ashes are useful in the msnufacture of soap and glass. It is aometimes apelled also brakes.
" Motley accontrement-or power to amile
At thorns, Ada brakes and brambles and in truth
Wordsworth: Nuting.
I Broke of the wall: A local name of the
fern Polypodium vulgare.
T Rock brakes: A name of the Parsley Fern, Allosorus crispus.

## brake-fern, a.

1. Pteris aquilina.
2. Any other fera. (Ray.)
hrake-nightingale, brake nightins: gale, s. A book-name for the Nightingale (Philomela luscinia). [Niahtinoale.]
Brāke, "brak, a. [Dan. \& Dut. brak; Ger. brack.] Brackish ; somewhat sslt.

> "The entrellis sik fer in the flud ts brake

brāk'-íng, pr. par. \& \&. [Bнаке, v.]
A. As present participle: (See the verb.)
B. As substantive:

Flax-manufacture: An operation by which the straw of flax or hemp, previonsly ateeped ant grassed, is broken, so as to detsch the ahives or woody portion from the hare or useful flbre. [FLax-brake]
braking-machine, s. A machive for braking flax or hentp after rotting, to remove the woody portion and pith from the fibre.
brāk'-y̆, a. [From Eng.brak(e); -y.]

1. Lit.: Thorny, prickly, brambly; overInn with lrushwood sad fern.
fāte, făt, färe, amidst, whãt, fall, father; wē, wĕt, hëre, camel, hẽr, thêre; pīne, pit, sire, sir, marîne; gō, pơt

2. Fig.: Choked up with other and rougher things ; left in obacurity, hidden from view.
"Redeem arta from thoir rough and braky menta Where thoy hie hid and overgrown with
pure and open light, whero they my thke
zony bo theen by tho hand --Ben Jonoon.

- brā̄r'-y̆r, v.f. [Break, v.]
"Brakyn' assunder cordya and ropts and other lyko.
- brā-lăy, vi.i. [O. Dut. braken; O. Icel. braka.] To vomit.
-Prompt. Purn.
brā'-ky̌age, pr. par. \& s. [Beaxym.]
A. As pr. par.: (See the verb.)
B. As subst. : The act of vomiting.

brald, pa. par. [From Sw. prald $=$ bedecked; prala = to cut a figure, to boast.] Decked, dreased; a term used of a woman, who is said to be-
"Rycht hraivile brald."
Naitland Poems, p.s19.
- bral-ien, v.i. [Brawl, v.] (Town. Mysteries.) bra'-ma(1), s. [Lat. brama.]

IChthyol.: A genus of spiny-finned fiahes belonging to Cuvier'a family Squamipennes, meaning Scaly-finued fishes, now called Chætodontidx. It containa but one speciea, the Brama Raii, which ia common in the Mediterranean, wheuce an occasional straggler finds Its way to the British seas.

- Bra'-ma (2), s. [Brahma.]

Era'-mah, s. \& a. [From Mr. јoseph Bramah, who was born at Stsinborough, in Yorkahire, on April 13, 1749, and died December 9, 1814 . See A.]
A. As subst. : Mr. Bramah, who invented the Bramah-lock, the Bramah-preas, sce
B. As adj. : lovented by Mr. Bramah

Bramak-lock, s. A lock patented by Bramah, in England (1784 and 1798), having a number of alides which are adjusted in the number of alides which are adjusted in the nianner of tumblers, by meana of a stepped key, 80 that the slides of unequal length shall
be brought into a position where their notches be brought into a position where their notches
lis in the aame plane, that of the lockinglie in the aame
plate. [Lock.]

Bramah-press, s. A machine designed to turn to account Pascal's Law [LAw] of the equality of pressure in a mass of liquid, by asing water nader pressure to produce a mighty force. It was patented by Mr. Bramah in 1790. It is called also the Hydraulic or Hydrostatic Press. It consists essentially of a large, very strong cylinder, in the collar of which a cast-iron piston or ram works water-tight. Above the ram is a movable cast-iron plate, and at some distance higher than it a fixed one, both being kept in their places hy four strong columns. The portion of the cylinder beneath the ram is full of water, and is connected by a pipe with a small forcing pump. When the latter is put small forcing pump. When the latter is put that preasure transmitted by the pipe to the that preasure transmitted by the pipe to the large cylinder ln which the ram works, acts
equally pu every part of it [Pagcalis-LAw], equally pu every part of it [Pascal's-Law],
with the practical effect of enornously inWith the practical effect of enornously ill-
creasing the original force. Thus, if the diameter of the piston in the forcing-pump is an finch, and that of the ram in the cylinder fonr feet, then the pressure on the latter is $12 \times 4)^{2}=2,304$ times greater than that exerted by the former. Gools to be pressedbales for cloth, for instance, or beet-roots, are placed on the lower or movable plate, and are forced up against the fixed one. The portiona of the Menai tubular bridge were raised to their positions by means of a powerful Bramal-press.
bra-ma-thë'r-i-ŭm, s. [From Brama, old apelling of Brahmall (q.v.); Gr. Ampion (thērion) $=$ wild animal.]
Zool. \& Paloont.: A genus of Antilopidx, conaiating of a gigantic species with four horns. It is allied to Sivatherium, which also is fourhorned. Both occur in the Upper Miocene, or Lower Pliocene beds of the Sewalik hills in lodia.

[^84]=(I) a brier, a blackberry bush, a brambie, a mulberry ; (2) a tormeating (Bosicorth). In Sw brombdir = a blackberry; Dan. bramber; Dut braam; L. Ger. brummel-beere; (N. H.) Ger. brombeers; О. H. Ger. brdmal, brdma, f ., bramo, m.]

## A. As substanlive:

1. Ordinary Languags:
2. Of plants :
(I) Gienerally:
(a) The blackberry or any allied plant. [11. 1. Bot.]
" Doth the bramble cumber a ganden 1 It makee the
better hedge; where if it chauces to prick the owner better hedge; where if it chauces to prick the owner.
it will tear the thio. ${ }^{-}$-Oreer: Cosmologia Saera,
(b) The common dog-rose, Rosa canina. [Bramble-Flower.]
(2) Fig.: Any thorny shrub.
"The hush my bed, the bramble wha my bow'r,
The woods can wituess suany o volul dore."
3. Of animals: The same as brambling and bramble-finch (q.v.).
4. Technically:
5. Botany:
(1) The blackberry, Rubus fruficosus, or any closely allied species of the asme genus. The ahrub now mentioned runs into a number of well-marked varieties. Hooker and Arnott, in the 7th edition of the British Flora (1855), enumerate seven : $R$. suberectus, or the Erect; R. fruticosus, or tha Common; R. rhammifolius, or the Buckthorn-ieaved; $R$. carpinifolins, Hornbeam-leaved ; $R$. corylifolius, or the Hazel-leaved; $\boldsymbol{R}$. glandulosus, or the Glandular ; sud $\boldsymbol{R}$. cesius, or the Dewberry Bramble. $R$. saxatilis, or the Stone Bramble, is made a distinct species. The above are European species; the American ones alse are numeroua. The raspberries are asaociated with the brambles in the aame genus Rubus.

IT Blue bramble (so called from the blue bloom on the fruit): A book-name for Rubus coesius. (Britten \& Holland.)

Heath bramble: Rubus casius. (Lyte.)
Mountain bramble: Rubus Chamemorius. (Treasury of Bot.)
Stone bramble: A book-name for Rubus saxatilis. (J. Wilson.) (Britten \& Holland.)
(2) The fruit of the bramble, called also blackberry.
$t$ (3) A book-name for the whole genua Ruhus, though it contains the raspberry as well as the bramble.
2. Scripture:
(1) The reodering of Heb. lated bramble in Judges ix. 14, 15, and thorns in Psalm lviii. 9 . The former passage shows that it was littie regarded, the latter that it was thorny and used as fuel. Atad is supposed to be the aame as Arab. ausuj= a kind of buckthorn, and is probably a rhamnaceous plant, Zizyphus spina Christi, because it ia thought that from it was made the crown of thorna, which for purposes of insult and torture was placed around the aacred forehead of Christ immediately before his crucifixion (John xix. 2, 5).
(2) The rendering of the lleb. דוֹ (chhoah) in Isaiah xxxiv. 13, probably a thoray tree or alirub of the genus Prunus.
(3) [Bramele-gusu (2).]
B. As cajective: Consisting of or pertaining to the Blackberry (Rubus fruticosus) or any allied speciea of the genus. (See the compounds.)
bramble-bonds, s. pl. "Bonds" or bancls made of the long shoots of the bramble. They were formerly used for thatching roofs. (Ogilvie.)
bramble-bush, s. [In Ger. brambeerbusch.]

1. Ord. Lang. \& Bot.: The rame as Bramble (q.v.).
2. Scrip.: The rendering, in Luke vi. 44, of the Greek word Báros (batos) $=$ a bramblebuah. (Liddell \& Scott.)
bramble-finch, s. The same as Bramelino (q.v.).
bramble-fiower, * bramble-flour, s.
3. The flower of a bramble, Rubus fruticosus.

* 2. The dog-rose, Rosa cauina.
"The brambto-four that berest the red hepe." $\begin{gathered}\text { Chaucor : C. T., 13,67\% }\end{gathered}$
bramble-loop, s. The loop or curve made by the atem of a braunble when the extremity of the long and feeble branch has rooted itself in the ground.

 Buckman, in Treas of Bot. (Articie Eubus),
bramble-net, s. A net to catch birde.
t bram'-bled, $a$. [Eng. brambl(s); eak] Thickly grown over with bramblea.
" Boneath yon towar's unviulted gato,
Forlorn she itt upon the brambled tion
bram'-blǐng, * brăm'-line, s. [Ger. brämling.] A bird, Fringilla montifringilla, called also Brambia, Bramble-finch, Moun-tain-finch, and Mountain-chaffinch. [Moun-tain-finch, Fringilla.]
1 bramm'-bly̆, a. [Eng. brambl(e); -y.] Full of brambles.
" Hark, how they warbil in that brambly bugh
The gaudy goldanch, and the specklythrush
A. Phillipu, Past 4.
* brāme. s. $\quad$ [Cf. O. Eng. breme $=$ aevare aharp; A.s. bremman $=$ to rage, to roar. Sharp passion.
" But that shee still did waste, and still did wayle,
Thit, through tolig languour and barthurning bra
Thit, through tong languour and hart burning brame,
She shortly like a pyned ghopt became.
bra'mila, s. [From brami, the local name of the plant.]
Bot. : A genua or aub-genue of plants belonging to the order Scrophulariace: (Fig worta). Bramia serrata has a alimy penetrat ing odour. It is used in Brazil in the pre paration of bark for rhemuatic patient (Lindley.)
$\dagger$ Bra'-min (1), s., † Bra'-min-ēe, s., \&o [Brahman, Brahminee, \&c.]
Bra'-min (2), Braoh'-man (ch ailent), s. Iln Ger. (aing.) Brachmane, Bramine; Lat Brachmanus (pl. Brachmani); Pali Brahmana O. Pain Bamhana, Bahmana, Babhana. An Booddha, the Greek historian Arrian, and the Latin father Ambroae, and generally identified by the classic writers with the Gymmosophists. It is matter of diapute whether they were identical with the membera of the Indian aacerdotal caste now universally known as Brahnsans or were of Booddhistic origin. Col. Sykes strongly maintained the latter view
brám-mle, brăm-mleş, s. [Corruption from Eng. bramble.] [Brasble.] (Scotch A N. of Eng. Dial.)
brăn, *brănne, * bren, s. [From Fr. bran $=$ (1) the thicker part of the husk of ground corn, (2) sawdust, (3) fecal matter; O. Fr. Pr., \& O.Sp. bren $=$ bran ; Low Lat. brannum brennium, bren; Wel., Ir., \& Gael. bran = ran, husk; Arm. brenn.]

1. Lit.: The skins or husks of ground corn, especially wheat, separated from tha flour The nutritive value of these husks increases as we proceed from the outaide of the grain toward the interior. The outer akin, or coarse bran, is very indigestible, owing to the presence of a layer of silica. The inner skins, called pollards, are more nutritibus, centsining from 12 to 15 per cent. of nitrogenous matter, and from 20 to 30 per cent. of atarch. Unless, and from 20 to 30 per cent. or atarch. they are ground very finely, they are however, they are ground very finely, they are apt to set up irritation of the bowels and
diarriæa. Though rich in uitrogen, bran apdiarrhæa. Though rich in uitrogen, bran appears to possess but little nutrite velower. It
may be of usc to those who are well fed, and need a laxative, but to the poor who need nourishment it is of very little use. It is however, of some commercial value, being largely employed in the feeding of horsea and cattle, and in brightening goods during the rrocesscs of dyeing and calico-printing.
"The citleens were driven to grent distress for want
of victuals: bread they made of the coas ${ }^{2}$.est bran,.... - Hayncard.

## 2. Figuratively.

## I'maturet hath merir father <br> bran-duster, s. <br> 基

Miling: A machine in which tha bran, as Noed out of an ordinary bolt, is rubbed and
 flour which yet adherea to it.

[^85]brixn, adv. [A contraction from brand.] (Uaed only ln the expression bran-new.)

T Bran-new, l.e., brand-new: The brand was the fire, and brand-new was newly forged, fresh from the fire. It was equivalent to Tresh from the fire. It was equivalent to
Shakespeare's fire-new. (Trench: English Past Shakespeare'a fre-new.
\& Present, pp. 179,180 .) anei

* brănc, s. [Etymology doubtful.] A linen vestnent like a rochet. formerly worn by womed over their other clothing. (Opilvie.)
* brannc'-ard, a. [Fr. brancard $=$ a litter, the shafte of a veblcle.] A horse-litter.
"The gentieman. ${ }^{\text {make }}$ proposed, that he would either nake nus of a boat to Newpori or Ostend, or a tran.
brannh, * brançhe, *raunç, * braunche, s. \& a. [From Fr. branche; Prov. branca (f.), and brenca (m.); Ital. branca; Low Lat branox = the clsw of a predatory aaimal; Wallachian brëncē $=$ a forefoot; Arm. brank = a branch; Corn. brech = an arm ; Wel. braich = (1)an arm, (2) \& branch, (3) a verse.]
A. As substantive:
I. Ordinary Languags:

1. Lit.: A shoot of a tree or other plant especially one from the main boughs, which sgain divides into minar brauches or branchlets.

"Aud then he pearcheth on some braunch theroby "
Spenser: The Pate of the Auterephie.
"By them shall the fowlo of the heavea have thelr
hahitation, which slag among the branchea "-Ph clv. 12.
2. Figuratively
(I) Of things material:
(a) Anything extending like the branch of a tree from a central column or other support, as the divisiona of a chandelier or anything similar.
"And six branches shall come oat of the aides of it: three branches of hie candlestick out of the ooe side, and three branches of the candlestick out of the other
(b) Anything joi it is subordinate.
(i) A chandelier, perhaps viewed as conuected with, and subordinate to, the roof from which it hangs.
(ii) A river tribntary to a larger one; a vein, artery, or anything similar joining another larger than itself; a tributsry, an affiuent.
III. Erom a mala river, any branch be eeparated and divided, thea, where that hranch doth frret burand titelt Th new bauks, there is that part of the river. where of the river." ${ }^{\text {" }}$ Raleligh.
"His hlood, which disperseth lteelf by the branches "His hood, which disperseth ituelf by the brancres
of velum imay be resembled to waters carried hy
brooke.-18id.
(iii) A aubsidiary line of railway.
(iv) A division of a stag's antler.
(2) Of things immaterial or abstract. Spec.
(a) Of human or other descent.
(i) Any part of a family descending io a collateral line.
$\because$ His father, a younger branch of the anclent atock planted
(ii) Offspring.
"Grest Authony! Bpoin'e wellibeeeming pride,
(b) A part of a whole, a section or division of a subject or anything similar.
"It will be desirable to begin with this branch of the
II. Technically:
3. Bot. : One of the diviaions into which a stem separates. Many aames are applied to different modificationa of branches, and it is on the character of the branches sent forth that the classification of plants into trees, shrnbs, ander-shrubs, and herbs, at least in part, depends. [See these terms.]
4. Arch.: Arches in Gothic vaults, constituting diagonals to other arches arranged in the form of a square, and themselves forming a cross.

## 3. Fortification:

(1) The wing, or long aide of a horn or crown
ork.
(2) One of the parts of a zigzag approach.
4. Blacksmith's work: One of the quarters or sides of a horaeshoe.
5. Harness-making: One of the levers attached to the ends of the atirl bit of a curb-bit, and having rings or loops for the curb-chain, the cheek-straps, and the reins. [Curb-bit.]
6. Mining: A small vein which separates from the lode, a metimea reuniting. A leader, striog, or rib of ore runoing in a lode.
7. Hydraulics: The metallie plece on the end of a bose to which the nozzle is screwed.
8. Gas-fixtures: A gas-burner braeket.
B. As adjective: Pertaining to the 8 rm of \& tres, or to the projecting part of anything.
branch-chuck, $\varepsilon$.
Turning: A chuck having four branches, each of which has a aet screw whose ead may be made to impinge upod the object.
branch-leaf, a. A leaf growing on a branch.
branch-line, s. A subsidiary iine of railway.
branch-peduncle, a A peduacle growing from a branch.
branch-spine, s.
Bot: A spiae on the branch of a plant, sach as in the sloe, as distinguiabed from a leaf-

branch-bptine.
spine, of which an example is presented by the holly thorn.

## branch-worlc, s. [Branched-work.] <br> Benenth branch-work of coetly sardonyx,

 Benenth hranct-work of coetly sardony,Bat sulling. babie in arm.
Tennyon: The Palace of Art.
branch, v.i. \& t. [From branch, s. (q.v.)]
A. Intransitive:

1. Lit. of trees: To separate ioto actual branches.
$\ddot{O}$. therefore those trees rise not in a body of any pyramis is the keeping in of the asp, loug before it branch sed the tepuding of it when it beginueto to branch, by pqual degrees -Baron.
2. Fig. : Te separate into divislona. Used-
(1) Of material things. Spec., of a stag's horns: To separate into antlers.
(2) Of thinge immaterial or abstract
that woold bent instroct us whea we shoald.
I To branch out :
(1) Lit. Of trees: To separate into branches.
(2) Figuratively:
(a) Of things materlal: To separate lnto divisions widely apart.
"The Alps at the one end, aud the long range of
Appeaines that pass throxat the boody of it, branch Appeaines that pase throxgh, the body oit branch

(b) Of speaking or writing: To be diffuae threngh not confining one'a aelf to the salient points of a subject.
"I have kuown a woman branch out in to a long dis. . B. Transitive :

* 1. To adorn with Deedlework, represeating the branches of trees.
"In robe of lllly white she was arayd.
That from ter shoulder to her heele downe raught:
The traina whereof bose far behind her sirayd,
Braunched with gold and perle most richly wroaght.

2. To part anything into divisions of branchlike form.
Bacoin. . and are branched into canals, as blood la"-
brançhed, pa. par. \& a. [Bbanch, v.]
3. Ondinary Language: (See the verb.)
4. Bot.: Separating into many branches of aome size. if they are amall the term used of the plant la ramulose.

## branched-work, 8 .

Arch.: Carved or sculptured branches or lesves in monnmeats or friezes.
bran'ch-ẽr (1), s. [Eng. branch; -er.]

1. That which ahoots out into branches. (See example nuder No. 2.)
2. One who develope fruitful progress is various directions.
"Ir their chlld bo net exch a speedy preader and onger expectantion, as useful and miore sober truit that
bran'ch-ẽr (2), s. [Pr. branchier.]
Falconry: A young hawk.

brançh'-ẽr-y, s. [From Eng. branch; er;-y.] Bot.: The ramificationa of the vesaels dispersed through the pulpy part of fruit.
brän'-chi-a, s. [ID Fr. branchies. From Lat. branchia $=8$ gill of a fiah; pl. branchice $=$ the gille of a fish;Gr. $\beta$ póyxcov (brangchion) $=8$ fin; $\mu \mathrm{l}$. $\beta \rho \dot{\alpha} \gamma \chi^{\prime}{ }^{\circ}($ brangchia $)=$ the gills of sfish.]
Zool. : The gills of fighes and varions other Inhabitants of water. They are the spparatus for eoabling the animsl to extract sir from the water, inatead of heing dependent for respiration on the atmosyhere.
 lat. branchialis; from Lat. branchia; Ge. Bpáyxıa (brangchia) = the gills.]
3. Pertaining to the gills of a fish or other aquatic animal.
4. Performed by means of gills.

II (1) Branchial arches: Four beny arches which bear the branchix in fishes; they are connected inferiorly with the byoid arch, and above are united with the base of the skult.
(2) Branchial basket: The gill-support is the lamprey (q.v.).
(3) Branchint heart : A dilated vascular canal specialised for the supply of blood to the gilla.
(4) Branchial sac: The respiratory chamber in the Tunicates.
(5) Branchial sinus: A vascular sinus into Which blood passes from the visceral sac lu Tunicates on its way to the gills.
(6) Branchial tuft: A tuft of contractile filaments, serving as gills, in some tubedwelling chætopods.
brăí'-chi- $\overline{\mathbf{a}}-\mathrm{ta}$, s. pl. [From Lat. branchice; Gr. Bpáyx^a (brangchia) = gills.]
Zoology:

1. A primary division of vertebrated sub-kingdom. It containa the Fishes and Amphibia. it is contra-distingnished from Abranchiata, which compriaes Reptiles, Birds, and Mammals.
2. A division of Annclids, containing the Tubicola (Tubeworms), and the Errantia. (Sandworms).
3. A name sometimes given to the division of Gasteropodous Molluses, now commenly denominated Branchifera, or Branchiogasteropoda (q.v.).
brăñ'-chĭ-āte, a. [From Lat. branchiox; Gr

Zool.: Having gilla. (Index to Dallas' Nat. Hist.)
TThe Branchiate, or Branchiferaus Annelida, consists of two orders, the Tubicola and the Errantia. The Abranchiate Annclides distiognished from the former, are also divided into two-the Suctoria, or Leeches, and the into two - the suctoria, or (Dallas: Nat. Hist., pp. 94,95.] [Branchiferove.]
brăńchǐf-ẽr-a, s. [From Lat. branchice $=$ gills, and fero $=$ to bear. Gill-bearing animala.]
Zool. In some classifications: An order ef gasteropodous molluses, including all the species breathing by gills, whilst the air bireathers are ranked under the Pulmonifera, or lung-bearing molluacs. The Branchifera or lung-bearing molluacs. The Branchifer are divided into two anb-orders, the ( Opist
"The gasteropoda form two natural groupe, one breathing nit (pulnoaifera) and the othe
chtera). - Woodvard: Moulusoa, p .98 .
hrăn-chill -er-oŭs, $a$. [In Fr. branchifere See branchifera, and snff. -ous.]
Zool.: Having branchise, breathing hy gills. [Branchiate]
"The developmeste of the braveh/ferous gevternpode

\end{aligned}
$$ 2. A local name for salmon parr.

brănd'-new (ew as $\bar{n}$ ), brănd new (Eng.), brand new, brént new (Scutch), a. [Eng. brand, s., and new.) So oew that the mark of mannfacture have not worn off; perfectly new. (Commonly, but improperly, pronouaced sa If oran-new.)

With hast of coning mat, in fact forgoty
What
With hast of coming aff, to tetch my cost,
What wall I do it was allomist brand new.
If In Scotch it is aometimes written brent new.
"Nee cotillion brent neve frae France."
Burni: Tam o shanter.

- brănd'-rith (1), s. [Brander.]
brănd'-rith (2), z. [Probably the same as the previous word.) A fence or rail round the opeaing of a well. (Provinctal.)
* brăn'-dũr, s. A mlsreading for braudur $=$ embroidery. (N.E.D.).]

Hin trease, and hia baenet, burneshed fol beup; dur abought, al ot breade golde."
Sir Gaw. and Sir Gil. (Jomienon.
brăn'-dy̆. "brănd'-wine, "brăn'-dy̆Wine, s. \&a. [In Fr. brandevin; Gacl. (from Eng.) branndaioh; Sw. branvin; Dah. brcendeviin; Ger. brandwein, branntwein. The first part is from Sw. branna; Dan. breende; Dut. oranden, all $=$ to burn, to distil. Su. brame $=$ frand, burning, conflagration. [Brand, $v, \& \&$.] The second part is from Fr. \& Sw. vin; Dan viin; Ger. wein; Dut. wyn.] [WiNe.]
A. As substantive:

1. Formerly. (Of the forma brandywine and brandwine, etymologically meaning burnt or distilled wine.) [Brandy-wine.]
2. Now. (Of the form brandy, being the adjective in the foregoing compound dis aevered from its associate wine, and made to stand alone as a subatantive.) A apirit produced by the distillation of both white and red wioes, prepared chiefly in the gouth of France. The brandy most esteemed in our laud is that of Cognac, which is obtained by diatilling white wioes of the finest quality An inferior kind of spirit ia frequently prepared from the "mare" of grapes and the refuse of wine vats. When first distilled it is as colourless as alcohol, and continues so if kiju in bottles or jars. When atored in casks, however, it acquires from tha wood a pale however, it acquires from tha wool a pale amber tiat, and in this state is sold as pale
braudy. The dark colour of brown brandy ia bravdy. The dark colour of brown brandy is
produced artificially, to please the public taste, produced artificially, to please the public taste, by means of a solution of caramel, and this is
frequently added in excess to give a rich appearance to a brandy of low quality. A large proportion of the brandy aold in this country is aimply raw grain spirits flavoured and coloured. The spirit is exported from England and Germany into France, where it is redistilled and converted into Freach braady Brandy improves in flavour by being kept, but loses in strength. Gevuine brandy cont sists of alcohol and water, with small quan tities of cenanthic ether, acetic ether, aud other volatile bodies produced in the process other volatile bodiea produced in the process
of fermentation. The value of brandy as a of ermentation. The vaine of brandy as a
medicine dependa on the preseace of these medicine dependa on the preseace of these
ethers and other volatiia products; when, therefore, it ia adulterated with raw graio spirit and water, the amount of these ethers is so reduced that the brandy becomes almost valueless for nuedical purposes. In the United Stater Lrandy is made from cherries, apples, pears and peaches, while nuch common whisky is exported to France, from which, after manijolation, it is returned as brandy. A more legitimate manufachure of hrandy goes on in California, where large quantities of pure wine brandy' are anoually proluced anul distributed through thes states. The strength of brandy as sold varies from proof to 30 or even 40 under proof. Imitation braody is prepared iy flavouring highly-rectified spirit with essence of Cognac, or by distilling it witlo bruised prunes, acetic ether, argol, and a little genmine brandy Thia ia aaid to be greatly improved by keeping
B. As adjective: Consisting of or containing brandy, resembling brandy, designed for the sale of brandy, or in any way pertaining or relating to it. (See the compouuds.)
brandy-ball, s. A kind of aweetmeat made in the form of amail balla.

## brandy-bottle, s.

1. Lit. : A bottle full of brandy, or designed to hold brandy
2. Fig.: A name for the common rellow water-lily, Nupher lutea.

- Flowers larye, smelling like brandy, which circum vessels, has led to the uame brondy-botetle. $-\boldsymbol{H}$ ooker Arnott: Brit. Flor. (ed. 1855), p1 15, 16 .
brandy - fruit, s. Fruit preserved in brandy or other alcoholic spinit. (ogilvie.)

brass = to flame; Dan. brasa = to iry aibly connected with say there is no evidence of any connection between the twa.)
A. As substantive:
I. Ordinary Language:

1. Literally:
(1) The yellow-colonred componnd metal, consisting of an alloy of copper and zinc, described under II. 1.
$f(2)$ Any articla mada of brasa, a brasa fitting. (Ganeraily in the plural.)
"The very scallion who cleans the brasses, - Hop-
(9) 1 nourmental bras
(3) A monumental brass. [II. 3.]
"If not by them on monnmental $\begin{gathered}\text { Thomson: } L \text { iberty, } \mathrm{V} \text {. }\end{gathered}$
(4) Musical instrumenta of brass, as distinct from thosa of wood. [Brass-band, 1 (2) (b).]
(5) Money, both in Old English and in modern slang, on account of the uad of tha metsl in the coinage. [Tis, Coppers.]
"And bere here bras st thi bakke to calleys to
selle.:
2. Figurafively: Hardness, tha typical quality of the metal. It is frequently in tha Bible mentioned slong with iron in a aimilar sease, as in the following cases-
(1) Strength for defence or attack.
${ }^{\text {In }} 11$ will rake thine horn Iron, nod I will make thy

(2) Obstinacy in wickedness.
"They are al grievoas revolters, walling with
slanders: they are brats and irom : they are all cor-
rupters. - Jer, vi. 25.
(3) Effrontery, impudence, whamelessness incapability, like that of brass, either to yiel or to change coluur in circumstances where en nrdinary being composed of flesh and blood would do so.
"Because I knew that thou art obstinate, and thy

his forehead of brass and his tongue of venom II. Technically:
3. Metal.: An alloy of copper and zinc.
(1) In ancient times: It is said that when the Roman consul Mummins, after capturing the celebrated Grecian city of Coriath, barbarously by nt the place to the gromnd, in B.C. 146, varicus metals, fased in the conflagration, became united into s componnd or slluy, called frons the circumstances now ststed Carinthian brass. This is often gupposed to have betn the first discovery of jrass itself, but Assyriologists cousider it to has been mentioned in cuneiform inseriptioas, both Chaldran and Assyrian. (See an elsborate dissertation on the subject by Francis Lenordissertation on the suhject. in the Bib. Arch. Soc. Transact., vol. vi., mant, in the beb. 28.1
(2) In modern times: Before zine was obtained in its metallic form brass was manonfactured from calamina (nativa carbonate of zinc) mixed with copper and charcoal. Even now this process is easier than tha direct fusion together of the two metals. The proportion of eopper and zine vary. Ordinary rass is a yellow alloy of copper and twentyight to thirty-four ler cent. of zinc. The density of cast brass is 7.8 to 8.4 ; that of brass wire 8.54. It is harder and yet more fusible than copper, more sonorous ond a woraa conductor of heat. it insy be turned npon a lathe. It is extensively used for candiesticks, handles of doors, the framework of locks, mathematical instruments, se., while in the state of wire it is much used in pinmakiag. [DUTCR GOLD.]
4. Scripture: The Heb word for " brass" is nein (nechhosheth), from (nachhash) = to ahine. The metal thus designated evidently ocenrs in nature, for it is digg out of hilis (Deut. viii. 9) and " molten out of the atone" (Deut. xxxiif. 25 ), which the artificial alloy, brass, never yet has been., In most parts of the Old Testanent " brass" should be altered into "enpper," though occasionally in the later hooks of the Old Testament it may be bronze. In the New Testament, in I Cor. yiii. I, and Rev. ix. 20, the rendering ta
 xalxos (chalkos) $=$ (1) copper, (2) bronze;
whllst in Rev. i. and ii. it is xadкohíavov (chalholibanon), probably = frankincense of a deep colour.
5. Arch. (pl): Monnmental engravings on sncient churches, representing tha effigies,
coats of arms, sco., of illustrious personages. (Gloss, of Arah)
6. Mach.: A pillow, bearing, collar, box, or bush anpporting a gudgeon. The name ta applied from its being sometimes of brass, though in various instances it is of bronze.
7. Mining: Imon pyrites. The name, which is a misnomer, is given from the lostre, which resembles that of brass.
B. As adjective: Conaisting more or less of brass; brazen, reaembling brass, in any way pertainIng or relating to brass.

If Compounds of obvious signification: brass-
bound (Carlyle: Sartor Re

honcmental brass. sartus, bk, 1i., ch. v.) ; brass-hoofed (Pope: Homer's Ifiad, xi. 19) ; brass-paved (Spenser: F. Q., I. iv. 17): brass-studded (Longfellow: Courtiship of Miles Standish, tw.); brassthroated (Longfellow: The Spanish Student, fii. 1) : brass-visaged (Ben Jonson: Every Man out of his Humour).

## brass-band, s.

1. Literally:
(I) Gen.: A band of musicians performing upon inatruments of brass.
(2) Spec.:
(a) The amaller variety of tha military band, employed chietly in cavalry regiments, on sccount of the greater ease with which brass inatruments can be played on hursehack. Those used are various; cornets, ssxhorns, euphoniums, one or mora bombardons, \&c. (Grove.)
(b) One of the divisions of the "wind" of s full orchestra, cousisting of trumpets, horns, trombones, and occasionally an ophicleide. [Bano.]
2. Figuratively. In political conirorersy, conlemptuously: A party ors section of a party scting noisily in concert. Soma years ago extreme Protestant controveralalists denominated a knot of Roman Catholic members of Parliameat voting together "the Pope's brass band.'
brass-foil, z. Very thin beaten sheetbrass, thinner than latten. It is called also Dutch gold.
brass-furnace, 3. A furnace for fusing the metallic constituents of brass. These are melted in crucibles, tha copper being first melterl, and the zinc then added piecemeal, as it is vapourised by an excess of heat. The moulding-trough is on one sida of tha pouring or spill-trough, and tha furnace is on the ther. Thera is a core-oven, heated by the furuace, snd serving to dry the corea for tha faucets or other hollow articles which are cast. (Knight.)
brass-powder, s. A powder made of brass, or anything resembling it. Two kinds are made.
3. Red-coloured: Ground copper filings or precipitated powder of copper with red ochre. 2. Gold-coloured: Gold-coloared brass or Dutch leaf rednced to nowder.
If Thay are mixed with psle varnish, or elsa they can be applied by dusting over a aurface which has been previously covered with varnish. (Knight.)

## brass-rule, 8

Printing: Brass atripa, type-high, nsed by printers for cutting into lengths to separata advertiseraents sud columns; also for fisgerules sud table-work (technically knowa as rule and figure work). (Knight.)
brass, v.t. [From brass, s. (q.v.).]
Metallurgy: To giva a brass coat to copper.
bràs-sage, *. [O. Fr. brassage.] A fina formerly leved to defray the expense of coinage.
bra'part (pl. brasasarts), a [Fr. bras sard.] Bracer.] Plate armour for defence of the arm, reaching from tha ahoulder to the elbow.

bras'-scs, s. pl. [Brass.]

* bră's-sĕt, s. [Etym. doubtful.] A cesaque or head-plece of armour.
bra's-sǐ- ${ }^{2}$, s. [Named after Mr. Brass, a gardeuar who collected seeds and plants in Africa for Kew Gardens.]

Bot.: A genns of Orchids, consisting of four opecie growing on trees. Tha flowers are larga, and pale-seliow, with brown apots.
brăs'-sǐo, an (From Lat. brassica (q.v.), and Eng. suffix-ic.] Pertsining to or derived from the genue Braseica (q.v.).
brassic acid, s. Brassic acid or erucie acid, $\mathrm{C}_{22} \mathrm{H}_{48} \mathrm{O}_{2}$. An acid extracted from colz oil by saponification. It is solid at ordinary temperatures, hut melts between $30^{\circ}$ and 32 in it cryatallises from an aicohole and occur also in the oil of white mustard and of rape.
bră's-sī-ca, s. [Lat. brassica; Celt. bresic = a cabbage.]

Bot.: A genus of cruciferous plants coataining aeveral well-known culinsry berbs. There are three wild species in Europe: Brasica oleracea (Sea Cabbage), the origiual of the cabbaga of our gardens [CabbaoE]; B, monensis tha Isla of Man or Wall-flower Cabbage ; and the $B$. compestris or Common Wild Navew Tha B. napus, the Rape or Cole-seed, and the $B_{0}$ rapa, or Common Turnip, have here and there rooted themselves apontaneously, but they are not indigenoua. The colza of the Dutch is B. campesiris; B. procox is the Summer Rape of the Germans: and $B$. elongata is cultivated in Ilungary for its oil. The various cultivated species, as a rule, require a loany aoil, wellspeces, and and with jlenty of water. [Brasbicacere, Brassicioce.]
"They adorned him [the poet laureatlindth a new and
 srameica,
Laureat.
brăs-sic ${ }^{\mathbf{a}}$ '-çě-2e, s. pl. [From Lat. brassico, sud fem. pl. adjectival anffix-acece.]
Bot.: An order of plants, more generally called Crucifere (Crucifers). It is placed by Liadley under his Ciatal Alliance. The aepsis are four, the petals four, cruciate; the atauens six. two shorter than the other four Ovary superior, with parietal placentz. Fruit, a siligne or silicula one-celled or apurtously two-celled, seeds many or ona. It constitutes Linnæus' order 'Tretradynamia. Lindley dividea the order into five sections-Pleuro rhizez, Notorhizeæ, Orthoplocez, and Diple colobes. The Brassicacer or Crucifers aro one of the most important orders in tha whole vegetahla kingdom. About 1,730 apecies are known. Their chief oeat is in the temperata zones. Many geners and species occur in Europe; none are poisonous. Anong the well mown plants ranked nuder the order may be nentioned the wall-fower, the stock the water-creas and other cresses, the cabbage the turnip, \&c.
brăs-siçc'i-dab, s. pl. [From Latu brussicas (q.v.).] A pamily of Cruciferona plants of the sub-order or section Orthuplocess. Type, Brassica (q.v.).
brăs'-sǐ-dac, s. pl. [From Mod. Lat bruesio (q.v.).] A family of Orchids. Typical genus, Brassla (q.v.).
† brass'-1̆-nčss, s. [Eng. brassy; -ness.] The quality of being brassy

## brass'-íng, propar. \& 2. [Bpace, u.]

Metallurgy: The art of giving a brase coal to copper.
bras'-smith, brass'-smith, s. [Eng. brases; mith.] A smith working in brass.
-Hns he not neen tho Beottith brammith.

Five bomile lasse ronnd thelr table.
And seven brave follows stout an able
Burns: A Dodicafton to Gavin Hambon
8. In Scotch: Often used intensively, some times as a superlative, when jomed by the copula to another word, whether adjective or adverb; as, braw and able, abundantiy able for any work or undertaking; braw and weel in good health; braw and soon, in full time, \&c. sc.

Bydty, neist day, When noon comea on, appears,
And Lindy, what he could, his couraze cheera:
And 'd braw whi canty, whan she canne in hy,
And raya, Twice weicome, Bydhy, here the diy."
Ross: Helenore, 32 (Jamieson.)

- A word which came originslly from the Romance languages, entering English in the 6th century, while the corresponding term in German, brav, entered that language in the 17 th century. (From the Select Glossary, p. 24.)
brāpe, s. [Brave, a.]

1. A brave person, a chief. (Used especially anongst the Indians of North America.)
Came to parley with Standish, and offer him fure a
Friendship
Friendship was in their looks, but in their heart
Braves of the tribe were these, and hrothers giganti
2. A heetoring, bullying fellow.

Hot braves like thee may fight, but know not well
To manage this, the last great stake.

* 3. A boast, brag, challenge, defiance.

And to in this to bear me down with brames,
4. Bravado.

To call my Iord rantor knave
briave, v.t. \&i. [Bhave, a.]
A. Transitive

1. To defy, challenge, dare, set st defisnce. (1) Of persons.

Bure I shan see yon heaps of Trojane killd, Pe. Hos, had brave me on the field.
(2) Of things personified.

Whore braring aligry winters storm
Burns: Where Braving Angry Winter's Storms "But no man had in larger measure that evil corrage Macoulay: Bist. Eng., ch. $\mathbf{2 i}$

* 2. To risk, venture on.
" Iv hraving arms ngainst thy soverolgu
Shakesp. : King Ricienter /I., iL, 2
* (1) To present a boastful show of.
" Both particular perrons and fnctions are apt enough to fistrer themselvra, nr, at lesst, to orave that whict
* (2) To make fine or showy, to sdom, set off. "Gru. Face not mp: thon hast braved many men gy unto the, I bid thy master cut out the gown hn Idid not hid him cut it to pieces. Ergo, thou West ${ }^{\text {m }}$ Shakesp : Taming of the Shrew, iv. s.
* (3) To give courage to, encourage.
B. Intransitive : Toswagger sbout, show off "As at Troy most dastards of the Greekis
Did brave about the corpes of Hector colde."

T Crabb thns distinguishes between the rerbe to brave, to defy, to dare, and to chal tenge:-"We brave things; we dare and chal lenge :- persons; we defy peraons or their aclenge persons; we defy peraons or their ac-
tions: the eailor braves the tempestuous ocean, and very often braves death itself in ite most terrifle form; ho dares the snemy whom he meets to the engagement; he defies all his boastings and vain threats. *. . Brave and defy ara dispositions of mind which display themselves in the conduct ; dare and challenge are modes of sctjon: we brave s storm by meeting its violemce, and bearing it down with superior force; ws defy the malice of our enemies by pursuing that lins of conduct which is most calculated to increase its bitter Tess To braee convers the idea of a direct es. To blo conter of to direct defing is carried on by of ror indirect efying is car on by moret and ircutous ion procedure: mith brave dangers which threaten them with evil; the defy the angry will which is set up to do them harm. To dare and challenge are both direct and personal ; but the former consists either of sctions, words, or looks; the latter of words only. . . . Daring ariaes from our con tempt of others; challenging srises from s high opinion of ourselves: the former is mostly accompanled with unbecoming expres sions of disrespect as well as aggravetion; the latter is mostly diveated of all angry persomality. . . We dare only to scts of violence; ws challenge to sny kind of conteat in which tha skill or ths power of the parties are to be tried." (Crabb: Eng. Synon.)
bräved, pa. par. \& a. [Brave, v.]
brāचe'-1亳, adv. [Eng. brave; -ly.]

1. In a good sense: In a brave manner courageously, valiantly, nobly.

> Record it with your high and worthy deeds; Twas bravely done, if yon bethink yon of '1t."

children; and all thetr bravery with their wives and children, and all their bravery, congrexated periodi-
cally from their different citios to glorify him. Grote: Biat. of Greece (1046), vol. L., pt. i, ch. L. $\mathbf{\mathrm { p }} 62$
(3) Ostentstion, show.

But, sure, the bravery of his grief did pnt me
Into a tuwering passion.
Shakesp.: Hamlet, v. 2
"Let princen choose ministere more senalhle of duty conscletuce than upon bravery."-Bacon

* (4) Fins dress.
my estate, I wot not how, hath of late been those bravertes, wherewith it is incumbent on un, wha are chosen and selected spirits, to distinguish aurselven (5) vulgar. -scort.
* (5) A showy peraon.
"A man that is the bravery of hid age."-Reasumone
II. Fig.: Applied to fins diction or ornate language.

I Crabb thus distinguishes between bravery conrage, and valour:-"Bravery lies in the blood; courage lies in the mind: the latter dspends on the reason; the former on the physlcal temperament: the first is a species of instinct; the second is a virtue: a man if brave in proportion as hs is without thought be has courage in proportion as he reasons of reflects. Bratery seems to be something in voluntary, \& mechanicul mowement tlist does not depend on one's self. courage require conviction, and gathera strength by delsy; it is s noble and lofty ssntiment: the force of example the charms of music the fury and tumult of bettle the degperation of the con lict will make cowards banve the courage us man wants no other incentives then what bls own mind euggests. .. It is as poasible or a man to havs courage without bravery as to have bravery without courage: Cicero bewrayed his wsit of oravery when he sought to shelter himself against the sttacks of Cataline; he displayed his courage when be laid open the treasonable purposed of this conapirator to the whole senate, and charged him to his fscs with the erimes of which he knew bim to be guilty. Valour is s higher quality than either bravery or courage, snd seems to partake of the grand characteristies of both; it combines the fire of bravery with the determinstion and firmness of conrage: bravery is most fitted for the soidier and all who receive ordera; courage is most adapted for the genethe leader and framer of enterprises, and all the leader sind framer of enterprises, snd all who carry great projects into execntion: bravery requires to be guided; courage is equally fitted to command or obey; palour directs snd execntes. Bravery has most relation to danger ; courage and valour include in them s particular reference to action: the brave man exposes hiniself; the courageous mav advsnces to the ecene of action which is before him; the valuant man seeks for occasions to act. The three hundred Spartans who defended Thermopyle were brave. Socrates drinking the hemlock, Regulus returning to Carthage, Titus tearing himself from the srins of the weeping Berenice, Alfred the Great going into the camp of the Danes, were courageous. Hercules destroying monsters, Perseus delivering Andromeda, Achilles running to the ramparts of Troy, and the kuighte of more modern date who have gone in quest of extraordinary sdventures, are sll entitled to the peculiar sppellation of valiant." (Crabb: Eng. Synon.)
brāv'-īng, pr. par., a., \& s. [BRave, v.]

brax'- ${ }^{\prime}$, brăx' $^{\prime}$-ĕs, brăx'-ít, brăcics, s. \& a. [Possibly contiacted from A.S. broceseocnes $=$ the " breaking" sickness, the talling sick ness, epilepsy; from broce = broke, pa. tense of brecan = to break; Gael. bragsaidh $=$ braxy Ct. also A.S. broc = diseasc, affliction, misery and Gael. breac = small-pox.]
A. As substantive:

1. A disease in aheep. This term is frequently applicd to totally different disorders, but the true braxy is undonbtedly an intes. tinal affectlon, attended with diarrhcea and retention of the urine. After young sbeef have been weaned, they are apt to gorge themaelves with grass, turnips, \&c.; this producee a kind of colic, which usually ends in death. Again, when a lean flock of sheep is placed suddenly on rich tood, or on coarse pastura of an indigeatible nature, irritation and infiam. mation of the bowels get in, and thla fre quently proves fatal. In both cases the sheep are said to die of braxy. The duration of the disease is very short, in come cases terminating fatally in twenty-tour hours. Hilly land is favourable to the prodnction of braxy, and hence we find it far more prevalent in the

Highlands of Scotland than in any other part of the country. The treatment of the disease is ous of very great difficulty, but it may to a certain extent be prevented by regulating the animal's diet, and sheltering the Hock during evere winter weather.
 "Many are cut off hy a disease which la here ealled the braxas."-Par. of Zothnot: Forfars. Statist, Acc. Iv. 8

2. A sheep which has died of braxy.
"While Highlandmen hate tolls and taxea: While zuourla. herds like guld fat braxies."
Barns: Epistle co filliam Simpon.
3. The mutton of such a sheep.
E. As adiective: Of or belonging to a sheep which has djed of braxy.
II Braxy-mution: The flesh of a sheep which has died of braxy. As the duration of the disease is very short, it may be gsanmed that the structures of the body have not been affected by it, and that the disease has been limited to the intestines. Every part of the sheep therefore is eaten, except the liver, the kidneys, and the integtines. As to its being wholesome food, Mr. J. Willison, one of the largest sheep-fariners in Scotiand, who has had seventy yesrs' experience, says, "In had sevent braxy resembles grouse or black-game more than any food 1 have ever tasted. It is wholesome and very digestible, aud in my Wholesome and very digestible, sud in my long experience 1 have never known of any

II. Seripture ot Theology: In the earlier part of ths Old Testament, brazen, in the authorised verslon, means made of copper; in come of the Ister parts it may mean made of broaze. Nowhere, spparenty, in the Old Testament does it signify made of what we now cail " brass." [Brass.] Connected with the Jewieh tabernacie and the worahip there offered there were "brasen" (or copper) vessels and vtensils, as "brasea" censers (Num. xvi. 39), poto (Lev, vi. 28), a "grate of natwork" (Exod. Exvii. 4, mxxv. 16, xxxvili. 4), rings (ibld. xxvil. 4), s laver (ilid. xxk. 18)." (See also brazen-aliar, brasen-sect, and brasen-serpent.)
I (1) Brazen age.
Myth.: The third of the four ages into which history was fancitully divided, each marking a new etage in the progress of degeneracy. [Ace.]
(2) Brazen altar, brasen altar.

Jewish worghip: (a) Connectal woith the tabernacls: An aitar of "shittlm wood," overlaid with plates of brass (copper?).
(b) Connected with the temple: An altar of bumt-offering, all of brass (bronze or copper?). (3) Brazer dish

Mining: The standard by which other dishes are gauged in Eugland.
(1) Brasen sea.

Jewlsh worship: A large reservoir or tank of "brass " (bronze or copper?), connected with Solomon's temple, contrining at the lowest estimate sbont 16,000 gallons. (1 Kinga, vli. 26 ; 2 Chron. iv. 3.)
(5) Brasen serpent.

Jewish IIistory and Theology: A serpent of "brass" (copper?), placed upon a pole and elevated in the aight of the Jewish people in the wilderness, that those bitton by flery serpenta looking at it in faith might be cured. (Num. xxI. 9.) Jeaus drawa a parallel between the lifting up of the aerpent (upon a pole) and his own lifting up (upon the cross), as the object of faith for the attainment of eternal life. (Joha iii. 14, 15.)
n brazen-browed, $a$. Havings forehead ss incapable of blushing as if it was composed of brass ; shameless, impudent.
"Noon-day vices, and brazem-sraved Intquities"
brazen-clawed, $a$ Having claws of brass, or as capable of inficting injury as if one had such claws.
"Demona produce them doobtiens, brazen-tzand d""

(2) Of thinge immaterial or abstract:
(a) Gen.: In the foregoing sense.
${ }^{\text {un }}$ A wheleaome tongue in a tree of IHe: but porversw
(b) Spec.: Broken frieadshlp; difference beween people mutually alienated; quarrel.
"To finish it: that so nutimely breach

IThe metaphor being that of a broken bone; the expresaion "to heal a breach" is common.
"The Art of supremacy would be the mesos of healHint. Eng., eh. V .
I Rute of brache: Source of dissension. (Scotch.)
 II. Lnvo:

1. Eng. Lav:
(1) Breach of close, i.e, of what is enciosed in Ract or in the eye of tha law. The entry into enother man'a isnd. (Blackstone: Comment., by. iii., ch. xil.)
(2) Breach of conenant: Tha violation of a rritten agreement. (Blackstone: Comment, lok. iif., ch. ix.)
(3) Breach of duty: Violation of the dnty incumbent upon one rightly to discharge the functiona impoaed upon him by the ofice or crust which he holds. (Blackstone: Comment., bk. iii., ch. ix.)
(4) Breach of the peace: Offences against the public, involving personal violation of the peace, or incitement or provocation to othera to doso. (Blackstone: Comment., bk. iv., ch. xi.)
(5) Breach of pound: The act of breaking into s ponnd, or any aimilar piace, to reacue one's cattle or other property there enciosed. (Blackstone : Comment., bk. iii., ch. ix.)
(6) Breach of prison: Escape of a prizoner trom prison by breaking the building, or in uny other way. (Blackstone: Comment., bl. .v., ch. x .)

## (7) Breach of promise:

(a) Gen. : Vioistion of one'a pledged word, sspecially if the promiae be written down.
(b) Spec.: Breach of promiae of marrisge. an action lies for it on the part of either man or woman, though, as a rule, only the latter is beifeved to be substantially injured or deserve damages.
(8) Breach of trust: The violation of one's juty as trustee, or anything similar.
2. Scots Law. Breach of arrestment: Tha uct of paying away money in one'a hands on which a legal arrest has been laid, thus showeng conternpt for the law or its administrators.
I Crabb thua distinguishea between breach, break, gap, and chasm: "The idea of an openlng is common to these terma, but they differ in the nature of the opening A breach and a in the are the consequence of a violent removal, which destroys the connection; a break and a Which destroys the connection, a brise fron the absence of that which wayid form a connection. A breach in a wall is made by means of cannon; gapa in fencea are commonly the effect of aome vioient effort to pass through; a break ia made in a page of printing by leaving off in the middis of a line; a chosm is left in writing when any words in the sentence are omitted. Abreach and a chasm alwaya imply a larger opening than a break or gap. A gap may be made in a Enife: a breach is alwaya mads in the walls of a buidiug or fortifeation : the clouda aonetimes separate so as to leave small breaks; the ground is aometimea ao convulsed by earthground is aotnetimea an convolsed by eareaand chasm ara used moraliy; break and gap and chasm ara used moraliy; oreak and gap seldom otherwise than in application
tural objects." (Crabb: Eng. Synon.)
B. As adjective: Desizned for breaking through tha wail of a fortification. (See the compound which follows.)

## breach-battery, s.

Mil: A battery erected for the purpose of breaching the wall of a fortification.
brēaçh, o.t. [From breach, s. (q.v.). Originally to break and to breach were but different ways of spelling the same word. (Trench: English Past and Present, p. 65.). $]$ To make a
breach, i.e., s hola or gap in the wall of a breach, i.e., s hola or gap in the wali of a
fortification, in a reef of rocks at aea, or anything aimilar.
 p 477.
t breach'-fith, in. [Eng. breach; sul( $)$.] Full of hreachea. (Webster.)
t breaçh'-y, a. [Eng. breach; -y.] Tending or pmoe to maka hreachea in fences, walls, or anything aimilar. (Holloway.)
brĕad (I), "breed, "bred, "brede (Eng.), bread, breld, bred, brede (Sootch), i.da. [A.S. bread, breod $=$ a bit, a fragment, bread; O.S. brod; Icei. braudh; Sw. d Dan. brod; Dut. brood; Ger. brod, brot.]
A. As substantive:

(3) A kind of food on which bees feed. [Bee-bread.]
3. In special phrases:
(I) Bread and butter:
(a) Lit.: Slices of bread covered with bntter.
(b) Fig.: Means of living, esp. In the phrase To suarrel with one's bread-and-butter.
(c) Used attrib. : Childiah; pertaining to, or characteristic of, a schoolgirl.
(2) Bread and cheese, bread-and-cheese:
(a) Lit. :
(b) Fig.: The young leaves and shoots of the Hawthorn (Cratogeus oxyacantha), which are sometimes eaten by chidren in apring (Britten \& Holland.)
(3) Bread and milk, bread-and-milk:
(a) Lit.:
(b) Fig.: A plant, Cardamine pratensis.
(4) Bread and salt:
(a) Lit.:
(b) Fig. : Oathe were formerly sworn by them, perhaps as symbolizing the necessariea of life.
"I will trust him bettor that offereth to swasre by
oread and saut, than him that ofifereth to aweare by

(5) Bread and urater: Tha necessariea of life.

(6) Bread and wine: The elements in tha Holy Communion.
"She swore hy bread and wino she woold not breakk"
(7) Cuckoo's bread: A plant, Oxalis Acetosella.
(8) Tartar bread: The fleshy root of a plant, Crambe tatarica. (Treas. of Bot.)
(9) To be in bad bread: To be in a plight or lilemma. Probably it meant origiaaliy to be on ahort allowance.
II. Tecknically:
4. Baking: Loavea or cakes made from tha four of wheat, rye, or aome other grain, and baked.
(I) Hist. : The art of baking bread is very sncient. It was known to the Egyptians, the Hebrewa, the Greeks, the Ronans, and other nations. In Engiand, bread was made with yeast in 1634. Machinery was used in its prodnction in 1858. Aerated bread was made in 1859 , having been in use aome years earlier In the Únited Statea.
(2) Modern process of manufacture: There are two kinds of bread, leavened and unleavened. Leavaned, or fermented bread, is prepared by mixing together certain quantitiea of four, warm water, allt and yeast, or leaven. After the lapse of some time fermentation eets in, comes permeated with carbonic acid gas, a small quantity of alcohol being alao formed. As soon as the mass ia in a brisk atate of fermentation, fresh portiona of four and water mene added, snd the whole thoroughly mixed or kneaded. The dongh is next cut and ahaped
into loavea, and theae, after being left for abont two hours, during which they awell to nearly donbla their size, are then ready for the oven. The heat of the oven checke tha far mentation, and expels all the alcohol, and most of the carbonic scid gas.
The art of bread-making consiats in producing a light, porous crumb, and a palocolored crust. The cramb should conelist of dextrine, starch, gluten, and from 35 to 40 per cent of water. The crust should consist almost entirely of dextrine.
Leaven, which is now seldom used in this country, is a misture of fiour, potatoes, and water, kept in a warm place tilii it begins to ferment.

Unleavened, or unfermented bread, ls of two kinds. In the one, fionr and water only are used, and thia produces a heary and compact bread. In tha other, an scid and a carbonate are added for tha purposa of disengaging carbonic acid gas, which, in imitation of yeast, raises the dough sad renders the bread light and porous. The substances used are carbonato of ammonia or carbonate of soda, in combinstion with hydrochloric or tartaric scids. None of theae ingredients ars deleterious; but by far the best ia carbonate of ammonia, as it is entirely driven of in tha oven.
Aerated bread is prepared by forcing purt carbonic acid gas into the dough contained in a strong iron vesael. When thia carbousted dough is introduced into the oven the gas expands and escapes, leaving the bread light and poroua. Brown hread ia ordinary whita bread with from 15 to 20 per cent, of fine bran.
Whola meal bread, made from unaifted ground wheat, is the oniy true brown breed, being richer in zutrienta than white bread. Tbe smount of nitrogenous matter in white bread variea from 5 to 8 per cent., whilst in whole meal bread it risea to 14 per cent.

The adulteration of bread fa carried on to a large extent, more expecially in London. The quality of a loaf is very fraquentiy judged by its whiteneas; when. therefore, an anscrupulous baker has used an inferior or damaged flour, he finds tbat by adding alura or sulphate of copper, he is able to produce a loaf equal in whitencas to one made from the finest flour. These two aubatancea ere, how ever, dangerous adniteranta. They not oniy render the bread indizestible, but when taken into the aystem for any leagtb of time, are apt to disorder the atomach and produce various diaeases. It ahould alao be remembered that sulphate of copper is a poison.

Boiled rice, beana, and potatoes sra also frequently used to adulterate bread. They are harmiese in themselves, but are added for cheapness, and to increase the weight of the losf, these substancea retaining nure water lhan whent flour. In a.recent experiment, it was proved that when half-a-pound of rice was proved that when half-a-pound of flour was substituted for haif-a-pound as Wheat flour io a two-ponnd loar, the noistare found to contain five per cent. more moistare
than that found in a loaf made from pure wheat flour. [SHip-gaEAd, Cassava-berad.]
2. Theology:
(I) Tha first of the two elemants in the communion.
IT To break bread: To partake of the communion.
T To break bread with: To eat with; to partake of one'a hospitality.
(2) With refcrence to the descent of manna in the wilderness. Christ or his death 200 cepted by fisith as the apiritual nourishment of the aoui.
"I ano the bread of life."-John, vi. skense (See the 3. Zool. : Crumb of bread sponge. [Crimb.] B. As adj. : Conaisting of or reaembling brea

"I It is crediliby affirmed, that npon that very day whed the river first riseth, great plagues in Cairo use
(c) To be dissolved, to separate. (Used especially of achools.)
Like youthful steers unyok'd, they took their coursea ch, west, north, south : or, like a school broke up."

Waits.
(d) To begin to give way, fail, be impaired. (Used of health.)
45. To break upon : To come suddenly and violently
enter the that those mad to break $\because$ mpon the be permitited to producing the least luminous impression."-Tyndall: rag. of science (3rd ed.), ix. 282.
46. To break upon the wheel: To punish by atretching a criminal upon tha wheel, and breaking his bones with bats.

## 47. To break with :

* (1) To make a communication to ; to open ona"s mind to.

## I num to break with thee ol some atrairs That touch me pear.

te dissent from on opioion from those holding it.
-and would break with any church in the Forid noo this single point; nnd would tell thein doubt it is too had to be believed."-Truseson (srd ed.
(3) To quarrel with; to cease to be friandiy with.
"Ons there be anthing of Iriendshlp In anares
hooks, and trepans? whowotver breaks with his friend
 dom, both berore god and man -soud.
I (a) Crabb thus distinguishes between to break, to rack, to rend, and to tear:-" The forcible division of any substance is the cornmon characteriatic of theas terms. Break is the generic term, tha rest apecific: every thing racked, rent, or torn is broken, but not vice versa. Break has, however, a specific meaning, in which it is comparable with the others. Breaking requires leas violence than either of the others: brittle things may be broken with the slightest touch, hut nothing can be racked without intentional violence of an extraordinary kind. Glass is quickly broken; a table is racked. Hard suthitances only are broken or racked; but everythiug of a aort texture and composition may be rent or torn. Breaking is performed by means of a
blow ; racking by that of a violent concusblow; racking by that of a violent concusquences of a pull."
(b) To break, to bruise, to squezze, to pound, and to crush are thus discriminated :- "Break always implics the separation of the compothe destro of a body; bruise denotes a parts. Hlard, brittle substances, as glass, are broker; aoft, pulpy substsncea, as flesh or fruits, are brused. The operation of bruising is performed either by a violent blow or by pressure; that of squeczing by compreasion only. Metals, particularly lead and silver, may be
bruised; fruits may be cither bruised or squeczed. In this latter sense bruise applies to the harder substances, or indicates a violent compression; squerze is used tor soft substances or a gentle compression. Tha kernels of nuts are bruised; oraages and apples are squezzed. To pound is properly to bruise in a mortar 80 as to produce a aejiaration of parts; to crush is the most violent and destructive of all operations, which amounts to the total dispersion of all tha parts of a body. What is
bruised or squeezed may be restored to it former tone and consiatency; what is pounded is oniy reduced to amaller parts for conva nience ; but what is crushed is destroyed."
(c) The following is the distiaction between to break, to burst, to crack, and to split:Break denotes a forcibls separation of the conatituant parts of a body. Burst and crack are onomatopeïas, or imitationa of tha sounds which are made in bursting and cracking. Splitting is a species of cracking that takea place in some bodies in a similar manner place in some being accompanied with the noise. Breaking is generally the consequence of aome Breaking is generaily the consequence of aome
external violeace; everythiag that is exposed external violeace; everythiag that is exposed to wiolence may without distinction arises mostly from en extreme tenBursting arises mostly from su extrems terst. Cracking is caused by the application of ex cessive heat, or ths defective texture of the substance: glass cracks; the earth cracks; eather crachs. Splitting may arisa from combination of external and internal causes wood in particular is liable to split. A thing may be broken in any shape, forno, and degree; bursting leaves as wids gap; cracking and plitting leave a long aperture; the latter of which is commonly wider than that of the former." (Crabb: Eng. Synon.)
brêak, * brāke, * brek, * breke, s. \& a [A.S. gebrec, gebrac, gebrece $=$ a breaking, crash, noiae. In Dut. break; Sw. brott; Dan brud; Ger. brechen, bruch.] [Break, v.]
A. As substuntive:

## "Terentig boing a mout cruel woman, and woartyp

 Come. Iopez let's give our wives the breeches too Come Lopez letivgive our wives the broeches too
## II. Teehnically:

1. Firearms and Ordnance: The rear portion of a gun ; the part behind the chamber.
2. Shipbuilding: The outer angle of a kneetimber ; the inner angle is the throat.
B. As adjective: Pertaining to a breech in any of the eenses given under $A$.

## breech-band, 8.

Harness: The same as breeching, a. (2) (q.v.)
breech-belt, * breche-belt, " brekbelt, s. A belt or girlle used to sustain the breeches; a waist-belt.

Hin brecho-belt all tobrast
Huntyng of the Hura, 205 .
breech-block, s. A movable piece at the breech of a breech-landing gun, which is witbdrawn for the insertion of a cartridge and closed before firing, to receive the impact of the recoil. [Fire-Ar.3.]
breech-girdle, *brech-gurdel, * brech-gerdel, * breek-girdille. * breg-gurdel, "brich-gerdel, brekguracl, bre-gurael, * bri-gurdel *bry-gyr-dyll, s. [Eng. breech; O. Eng. brech, breche, \&c. $=$ breech, and girdle.]

1. The ssme as breech-belt.
"Smanl trees that ben non hyere than a maunees breekgindille:- Ma underille, p so
"Jeremte's brech gerdel rotede bexide the wetere "-
Ayenbite of inteic (ed. Murris)
2. The waist, the middle. [Breggurnel.]
breech-loader, s. A fire-arm in which the charge is introduced at the rear instear of at the muzzle. In amall arms the barrels may be hinged, or the breech may be opened and closed by means of a movahle block of metal ; in artillery the breech is closed by a screw or a wedge. The use of breech-loaders goes back to the sixteenth century; indeed, it is probable that that form of arm is about as old as the muzzle-loaler. In the modern form, however, it is of quite recent introduction. The Prussian needle-gun, which dates from abont 1840, was the first breerth-loading rifle used as a military weapon. The solidiers of all European srmies now use breecb-loaders. [Magazise-fifle.]

Another and still more Important lesson of the present war in found in the nue at onae of latreuch-
breech-loading, $a$. Made to be loaded the breech.
Brech-loading gun or cannon: A gun or camnon mada to be loaded at the breech in place of the muzale.
Brech-loading rifte: A rifle made to be loaded at the breech.

## breech-pin, s.

Fire-arms: A pling acrewed into the rear end of a barrel, forming the bottom of the charge-chamber. Otherwise called a breachplug or breech-screw.

## breech-screw, $s$

Fire-arms: The plug which cloess the rear end of the bore of a fire-arm barrel. The parts ara knowa as the plug, the face, the tenon, the tang, and the tang-ecrew hole.

## breech-sight, s.

Firearms: The hinder aight of agun. In conjunction with the front sight it servea to ain the gun at an object. It le graduated to degrees and fractions, their length on the cale being equal to the tangents of an are having a radius equal to the distance between the front and rear sights. The front sight is merely a short piece of metal acrewed into the gun, usually et the muzale, but sometimes letween the trunnions, or on one of the rimbasee, with its upper edga parallel to the bore of the gan. The rear aight may lee detached, baving a circular base fitting the base of the gua, or may slide through a slotted lug. end be retsined at aoy given height by a set scraw. The breech-bight, the tangent scale, and the pendulum arg menely ditlerent forme of this device. (Knight.)

## breech-wrench, s.

Fire-arms: A wrench used in torning ont the breech-pin of a fire-arm.
brēegh (or as briçh), e.t. [From breech, s. (q.v.).]
I. Ordinary Language:

1. To put into breeches.

2 To whip upon the breech
II. Technically:

Of a gun: To fit with a breech; to tasten with breeching (q.v.).
brēeçhed (or as briçhed) (Eng.), brēeked (Scoich). [Breech, v.]

breeze (1), brize, s. [Fr. brise; Sp. brisa; Port. briza = the north-east wind; Ital. brezza = a cold wind.]

1. Lit. : A gentle gale, $s$ light wind.
"We find that these hottest rextons of the world, refreshed with a dafly gale of eastorly wind, which the Spaniards call breeze that doth ever more blow " His yo mae weady low, and deep

His voice Fas nteady, low, and deep.
Like distaut weves wheo breezes ale
Scott: Nokoby, サ1. 12
†2. Fig.: A slight quarrel or disturbsnce.
II Crabb thus distinguishes between breeze gale, blast, gust, storm, tempest, snd hurricane All these words express the sction of the wiod, in different degrees sud under different circumstances: "A breeze is gentle; s gale is brisk, but steady: ws hsve breezes in a calm summer's dsy; the mariner has favourable gales which keep the ssils on the stretch. A blast is impetnons: the sxhslstions of a trumpet, the bresth of hallows, the sweep of
s violont wind, are blasts. A gust is sudden and vehement: gusts of wind are enmetimes so and vehement: gusis of wind are enmetimes so while thay last Storm, temppet, and hurricane while thay last, Storm, tempeset, and hurricane, include other particulars besides wind. A storm throws the whole stmosphere ints com-
notion ; it is e war of the eiements, in which motion; it is a war of the eiements, in Which the hesvens. Tempest is a species of starm which has alno thnoder and lightning to add to the confusion. Hurricane ie a species of storm which exceeds all the rest in violence sud duration. . . ." (Crabb: Eng. Synon,
brēeze (2), a. [O. Fr. brese; Fr. braisa = cinders.]

1. Brick-making: Refase cinders used fo buraing bricks in the clamp.

A．\＆B．As present participle \＆participial adjective：In senses corresponding to those of the varb．
＂He saw mulschlet was or rewin＇．＂
C．As substantive：
I．Ordinary Language：
1．Literally：
（1）In the same sences as II． 1 （q．v．）．
（2）The quantity of beer brewed at one operation．
＂A A brewing of new beer，wet hy old beer，maketh it
2．Fig．：The aet of mixing different things together．
＂f am not able to avonch nnythlug for cortalnty， mach a mreofng nud wophieticatioo of them they make．
II Technically：
I．Liquor manufacture：The art of making beer．This term is also spplied to the first operation of the distiller，viz，the extrsc＊ing of the wort from grain，msit，or any other saccharine substance．
（1）History：According to Herodotus，the Egyptians made wiae from barley．The Greeks learned the process from them，and，according to Xenophon，uaed s barley－wine．Tscitus loforms us that beer was a common beverage among the Germans，and Pliny adds that it was so among all the nations of Western Europe．
（2）Moderu melhods of operation：In mndern methods of brewing，the brewer is no longer confined to the exciusive use of malt and eugar，but is at liberty to make nse of any material capable of being employed in the production of beer．The ateadily increasing consumption of beer in the United States has not only revolutionized the mannfacturing ayatems，but lias developed brewing into a highly important industry．it is eationated that the yearly counumption of graio and bops in the breweries of the United States is of the value of more than $\$ 50,0 \times 1$, ，（h）$)$ ， while the amonnt of capital invented in the business is very large，Before the year 1806 the tax upon fermented beseragen wae col－ lected io money at the rate of $\$ 1$ per barrel． Sioce then it is collected by means of revenme stamps．The consumption of beer in thia country to－day is teo times as great as it whe thirty years rgo．There are aix operationa in brewing，viz．，grinding or cruehing， cleansing．
（i）Grinding：The malt or corn is brulsed or crushed hy smooth metal rollers，snd left in a heap for a few daya hefore brewing，hy which it becomes mellow，and is more easily exhausted by the water in the mashing．
（ii）Mashing：The crushed or bruised malt is now thrown into the nash－tun，snd wster added at \＆temperature of from $158^{\circ} \mathrm{F}$ ．to $172^{\circ} \mathrm{F}$ ．After \＆maceration of three or four hours，Rssiated during the flrat half hour by coustant stirring，the liquid portion is strained off through finely－perforatsd plates in the bot－ tom of the mash－tun，into the underback，and pumped into the copper．In mashing，the aino of the brewer is，not only to dissolve out the augar in the malt，but glso to canse the so－ called diaatase contained in the malt to act on the starch and convert it into sugar．If tha heat of the mash－liquor etands below $140^{\circ} \mathrm{F}$ ．，the diastase will Le inactive ；if a bove $185^{\circ} \mathrm{F}$ ．，it is apt to be destroyed．A medlum temperature of $165^{\circ} \mathrm{F}$ ．is tound to be the most auitable for mashing．
（iil）Doiling：As soon as all the wort is col－ lected in the copper，the hops are sdded，and the whole boiled for sbout three houra．The object of boiling is to cosgulste and precipitate
the excess of albumen present，and to extract the aromatic oll and bitter of the bop．
（iv）Cooling：In order to prevent an mneh as pussible the formation of scid，it is nemes－ sary to cool the wort as quickly as possible． This is dons by exposing it to a current of air in lsrge alallow vessels，or running it over refrigerating plpes．
（v）Fermenting，or fermentation：As soon as the teruperature has falleo to $60^{\circ} \mathbf{F}$ ．the wort is run futo the fermenting vats，and yeast sdded．In sbout four hours fermentation begins，and is allowed to continue for torty eight hours，when the yeart is okimmed off and the beer run into large casks．Fermentation is the most delicate operation of the brewer as on it chiefly depende the quality and con－ dition of the beer．His alm is，not to decom－ pose all the sugar in the wort，but to leave a sufficiency to give body to the beer and keep np the evolution of carbonic scid gas．
（vi）Cleansing：The ordinary prsctice in cleansing is to run the liquid from the fer menting 4 sts into a series of casks placed with their bung－holes slightly inclined，$\theta$ o that the yeast atill gencrated may lass over into veasele placed to receive it．The ohject of clesneing is to cbeck the action of the yeast． When sugar is used it is dissolved in the copper．The findshed weer varies in apecific gravity from $1,002^{\circ}$ to $1,030^{\circ}$ ，and contains from four to twenty－tour per cent．of proof opirit，together with s eugar，called maltose， dextrine，colouring matter，and various aalts．
2．Naut．：A collection of dark clouds por＊ tending a storm．

## brewing－tnb，s．A tub for brewing．

## 2. Figuratively

(1) A specles of Joaf, so called trom Its shape aomewhat resembling a brick. It is applied to bread of differeat sizes; as, a penny brick, a three-penny brick, a quarter brick, i.e. a quar tera loaf.

## "....-a perny brict, ou which we made s com tortabia

(2) A good fellow (Colloquial)
(i) He good ellow. (Colloquial.)
II. Technically:

1. Arch.: A monlded and burned block of tempered clay. The word is also applled to the hock in its previous conditions, as a moulded plastic mass, and as a dried block in Which the water, hygrometrically combined with the clay, ia driven off. Wben this condition is accepted as a finality, the block so dried is an adobe. The burning of the previously dried brick drives off the chemically combined water, and for ever changes the character of the mass. An adobe may becorne re-saturated with water, and resume its plasticity ; a brick may become rotter and disintegrated, but not plaatic. Air-brick is an irom grating the aize of a brick, or a perforsted brick, let into wall to allow the prassago of air. Arch-brick uaually means the hardburned, partially vitrified brick from the arches of the brick-clamp In which the fire is made add maintaiaed. A brick made voussoirshaped is known as a compass-brick. A cap-ping-brick is one for the upper conrse of a wall; clinker, 3 brick from an arch of the clamp, so named from the aharp glassy sound when struck; a coping-brick, one for a coping course on a wall ; feather-diged brick, of prismatic form, for arches, vanlts, nlches, etc.; matic form, for arches, vaults, niches, etc.; fre-brick, made of intractable material, so as to resiat fusion in furnaces and with opeoings for ventilation; stocks, a name given to the best class of bricks, and alao locally to peculiar varieties, as graystocks, red-stocks, etc. Pecking, place, sandal, semel brick, are local terms applied to imperfectly burned or refuse brick. Bricka vitrifled by exceasive heat are termed burr-brick: or burrs. (Knight.)
2. Hist.: Bricka were manufactured at remote period of antiquity by the Egyptians, the Babylonians, the Assyrians, \&e, and some of them being inseribed with written cha racters bave been of pricelcsa value in conveyracters bave been of pricelcsa value in conveying historic facts to the present age. About made Ronnang, and in A.D. 886 by the AngloSaxons under King
Aifred. Uoder Hears Alfred. Uoder Henry V1lI. and Queen Eliza. beth the manufacture greatly flourished, lated by Charles I. io 1625.
3. Her.: A charge reaembing o billet, but showing its thick ness in perapective.
B. As adjective:

Pertaining to bricks or briekwerk.

BRICK-AXE.
brick-axe,
Bricklaying: An axe with two eada which are presentod like chigels. It is used affits of bricks to the onts or bricks to the asw-kerfs, which have been previously mad quired dejith, in order quired depith, in order to prevent the brick
from spalling.
brick-bat, s. [Bhickbat.]

[^89]
brick-buillt, a. Built or constructed of brick.
"Yot, entar'd in the brick-buift town, he try'd."
briol-burner, s. One whose trade or occupation it is to euperintend the barning of bricks la the kiln.
brick-clamp, s. A stack of bricks in order for burning.

## brick-alay. s.

1. Ord. Lang.: Clay used for making brick. "I I observed it in pita wrought for tile and brick-
2. Geol.: The term brick-clay occurs frequently in descriptions of Scottiah geology, whist the term used for the somewbat similar deposits in the valley of the Thames la brickearth, or the pl. brick-earths (q.v.). Most of the Scottish brick-claya are of inter-glacial age, and soms of them eacloae arctic abells. Brick-clays, of excellent quality, are very abuodant in maay parta of the Uaited States, and the City of Philadelphia io built apon a broad deposit of euch material, the result it is believed, of the grindling of rocke to clay duriag the glacial ege.

## brick-colour, brick colour, s. ta

A. As subst. : The colour of brick. [B.]
B. As adj. : Dull acarlst mixed with grey.
brick-dryer, \& An ovea ia wbich green bricka are dried, 80 as to fit them for bnilding np in clampa or kilas for burning. A series of drying-chambers are aeparated from each other by iron-folding doors, through which chambers a railroad track is laid. Under oae end of the atructure is a furnace, aod hot air, of increasiag degrees of temperature, is introduced succesaively iuto the separate chambera. (Knight.)
brick-dust, brickdust, s. Dust made or arising from pounded hricks. ( ( lit. \& fig.)
"This ingentous author. belng thus sharp set, got
together a convenisut quantity of brickiust, and dir. together a convenisunt quantity of brickdur
posed of it into several papers.-spectator.

## brick-earth, s.

1. Ordinary Language: Earth used for brickmaking.
2. Geology:
(1) The term is sometimes used in the singular.
"From the sub-netrial conditions nder which the
brick-earth was formed"-Q. J. Geol. Soc., xili. 68.
(2) Pl. (brick-earths) : A term apecialiy used of two beds or series of beds, the Upper and the Lower Brick-earths. The names were given by Mr. Searles Wood, jun. The latter are eapecially intereating. They exist near London at liford, Gray'a Thurrock, Crayford, Erith, and Wickhan. Besides freshwater and terrestrial aheila, \&c., they contain no fewer terrestrial aheila, de., they contain no fewer than twenty-four species of mammais, among
others tbe Wolf(Canis lupus), the Beaver (Castor fiber), and the Wild Cat (Felis catus), a fossil fiber), and the Wild Cat (Felis catus), a fossil
horse (Equus fossilis), a Hyæna (Hyena spelea), and yet more remarkable Elephas antiquus, primigenius and priscus, Rhinoceros tichorhinus, Eeptorhinus and megarhinus, and Hippopotamus major. Prof. Boyd Dawkins conaidera them Pleistocene and Pre-glacial. He believes that In a descending order the following is the sequence of the aeveral beda:-(1) Poat-glacial depoaits, climats severe, but graduaily becoming temperate ; (2) Glacial deposits, climate aevere; (3) Lower Brick-eartha of Tharnes Valley, cilmate comparatively temperate ; (4) Foreat bed of Norfoik, climate temperste. (Q. J. Geol. Soc., xxiii. (1867)
 pointa differs fearles Prof.' Boyd Dawkiaa. (Ibid., $894-417$. )
brick-elevator, s. An apparatua for raiaing materiais uaed io conatruction. Endless chaina are carried over wheels above and below, and the material is carried up on boxes enpported by frames attached to the chaias.
brick-field, s. A feld in which bricks are made.
"The newer deposits of the brick-feld."-Q. J. Geol.
brick-furnace, s. A furnace for burning bricks. In Hoffmann's annular brickfurnace there is a central chimaey and removable divisions for separating the annuins into different chambers. These are filled and emptied tbrough doors. The chambers being charged with brick, heat ia applied to one
chamber, and the volatils material thence reoulting is led through the next one, so as to heat and dry the bricks in the next in series. The bricks in chamber one being burned, tha fre is applied to number two, and so on to tbe eud.
brick-lailn, \& [Brickilln.]
brick-layer, s. [Bricklayer.]
brick-machine, s. A machine for making bricks. Many auch machinea exiat diverse in type from each other, patents for their conatmiction in ths aggregats amounting to hundreds, having been taken out in England or in the United States. In one of these, a patent clay-tempering and brick-making machine, iovented in 1831 by Mr. Bakewell, of Manchester, the clay, after being tempered, is compressed fato tbe proper form by a cornbinstion of levers. By Messars. Cooke and Cunningbam's machlncry 1,800 bricks can be made ia an hour. The maklag of bricka by band la vaniehiog ia the Uaited States in consequence of the rapid and effective work doae by machinea. Theee macbiaes ere capable of turaiog ont from 10,000 to 30,000 bricke In tea hours, varyiag considerably in their capacity and also in the quality of the work performed.
bricl-maker, s. [Brickmaker.]
brick-making, s. The operations of brick-makiog may be said to conaiat in-Preparing the brick-eartb, temperiog, moulding, drying, and burning. The qualitiea of bricka may be thus enumerated:- Soundnesa, that ia, freedom from cracks and flaws; hardneas, to enable them to withatand presaure and atrain ; regularity of abaps and size, to enable them to occupy their proper place in the course ; infusibility, in those unteaded for furnace-work. Fire-bricks are made from a compound of ailica and aiumina, and the clay owes its refractory quality to the abseace of lime, nagnesia, potash, and metallic oxides, which act as fiuxes. Hollow bricks are made which act as nuxes. Hollow oricks are suade moving moisture from the wall. In some cases the hollows form fiues, or ahafts for ventilation, or discharge of duat from the upper atories. In other cases the hollows have no mechanical function other than to form air-chambers for warmth, as it is well knowo that an imprisoned body of air is a very poor cenductor of heat. (Knight.)
mäing. ${ }^{\text {. dark }}$ - grey. Geol, Soc.blue clay worked for brick
†brick-mason, s. A bricklayer. (Ogilvie.)
brick-mould, s. A box in which clay for bricks is moulded into shape. It is anmetimes of wood lined with iron or brass; sometimes it is made of sheet-iron in four pieces, rivetted together at the angles, and atrengthened with wood at the aides only.
brlck-moulder, s. Ons who moulds bricka.
brick-nogging, s. \& a.
A. As substantive:

Building: Brick and atud work. [B.]
B. As adjective: Conaiatiag of brick and atud work.
T A brick-nogging wall or partition is one in which the spaces between the timbers or

BRICK-NOGOINO WALL.
scantling are filled up with brick laid in mortar. In a brick-nngging partition the wooden portiona are called nogging-pieces.
brick-pit, s. A pit from which bricks are dug.
"The The Srick-pit at Lexden in situsted. . ."-e. J.
brick-press, s. A kind of brick-machine, which effects its ohject by compressing the bricks into ahape. [Brick-Machine.]
brick-red, s. A reddisb colour, like that of bricka. (Used also attributively.)
brick-tea, :. The larger leaven, rofuse twige and duat of the tee plant, coftened and moulded ioto a brick-like mass for easier trans portation from Chias to Russia.
briok-trimmer, s. [TRIMMER.]
Arch. : A brick arch abutting againet

BAICK-THMMER. wooden trimmer place, to a fireplace, to guard against
brick-trowel, s. [Trowel.] A trowel naed by bricklayera.
brick-trucla, 8. A truck with wide tires to travel over the flat aurface of the frick-yard in moving brick from the hack to the kiln.

## brick-wall, s. za.

A. As subst.: A wall of brick.
B. As adj. : Conslating of such a wall

- And they, that nereer pases their brick-waill bounda

## brick-work, 8.

Bricklaying: Work executed in brick. The standard aize for Engliah brick is $9 \times 4 \frac{24}{}$ inches, and walla are deacribed as half-brick, brick, brick and a half, \&c., in thicknesa. The outer walla of inodern houses are generally brick or brick and a hall thick, the system of leases for ainety-niae years haviag given rise to the practice of building houses only aufficiently atroug to last till the lease falls in.
brick-wise, a. or adv. Arranged like bricks in a wall; so laid that the joints do not come immediately over eaeh other.
brick-yard, s. A "yard" or enclosure, or aimply a place where bricks are made.
brick (2), s. [Corruption of break, a. (?). I
Brick of land: A division, a portion dlstinguished from other portiona.
 vii, p. 61s (Jamiesom)
brick, v.t. [From brick, a. (q.v.).]

## Buildina:

1. To lay or conatruct with bricks.
"The sexton comes to know where be is to be leld,
and whether his grave ls to le plain or bricked."
2. To initste or counterfeit a brick-wall by amearing a wall with red ochre, cuttiag divisioas in it, and filling the latter with plaster.
brick'-băt, s. [From Eng. brick, and bat (1), 8.] A broken piece of brick.
" Rarthen bottles, filled with hot water, do provoka in bed
brick'-Yíg, s. [Back, s.] The imitation of brickwork on a plastered or stuccoed surface.
brǐck'-kĭln, * bricke-kill, s. [Eng. brick, and kiln.] A chamber in which green bricks are loosely atacked, with spaces between them for the prassage of the heat, and in which they are burned by firea placed either in arched furnaces under the floor of the kiln, or in fire-boles placed in the side wails.
brǐck'-lāy-ēr, s. [Eng. brick, and layer.] A man whose trade it ia to lay or set bricka.
 ch. ${ }^{\text {a crowit }}$

## bricklayer's-hammer, $s$.

Brichleying: A tool having a hammer-head aod a aharpened peeg, forming an axe for dressing bricks to ahape.
bricklayer's-hoist, s. A winch and tackle for iifting bricks and mortar in building.

## bricklayer's-1tch, s.

Mred.: A digease to wbich bricklayers are aubject, cauaed by the particlea of brick-dust enteriog the akia add produciog great irritation.
bricklayer's-labourer, s. A labourer who assists the brickiayer by supplying him with bricka, mortar, \&c.
bricklayer's - trowel, s. - [BackTROWEL. $]$
Drǐck'-läy-ing, s. [Eng. brick, and laying.] The art or trade of building with bricka, or of laying or aetting bricks.
"Who is to fadge bow moch cotton spinning, or disehimey oweeping is eqnivilevt to so much plought

- The tmplements of tha bricklayer are a trowel, for spresding mortar and breaking bricks when s piece amaller tban $s$ Whola brick ia required; s hanmmer, for making openings in the brick-work and for driving or dividing bricks, for which purposes one end is formed like a common hammer, and the other is broad and flattened, aomewhat after tha manner of an axe; the plumb-rule, mada generally of wood, having a longitudinal opening down its middle snd a plummet auapended from its upper end, for carrying walla up perpendicnlarly; tha level, consistiag of a long horizontal arin, having a perpendicular branch carrying a vertical arm from which a plummet is suspended; a large square, for laying out is suspended; a large square, for laying out
the sides of a building at right angles ; s rod, usually tive or ten feet long, for measuring lengths ; cumpasses, for traversing arches sud vaults; a line and line-pins, for keeping the courses atraight and level as the work progresses ; and a hod, for carrying bricks and mortar to the workman. (Knight.)
- brió-kle-něss, s. [O. Eng. brickte ; -ness.] The quality of being brickle or fragila, brittleдess. (Barret.)
brick'- 1 y̆, bric'kle, "bro-kel, brokie, * bru-kel, * bru-kle, a. [O. Dut. brokel = fragile, hrittle : A.S. brice, bryce $=$ brittle, brecan = to break.]

bridge, "brlege, "bregge, "bragge, *brygge (Eng.), * brig (Scotch \& North of Eng. dial.), s. \& a. [A.S. brycg, bricg, bry, Dan. brygge, bro; Dut. bru ; Frles. bregge; (N \& M. H.) Ger. briucke; © H. Ger. gricoa.]
A. As substantive:
I. Ordinary Languago:
3. Lit.:
(1) In the same sense as त. I. (q.v.).
tăte, făt, fàre, amidst, whãt, fall, father; wō, wơt, hëre, camẹl, hêr, thêre; pine, pît, sire, oir, marine; gô, pơt

(2) Auything laid scross a stream, gap, or bollow. to afford veeaus of passing over

Thas drous It Ia treed then and mad a brid
2. Fig.: Anything einilar to a llteral hridge. [II. 1.]
I (1) of the nose: The upper bony part of the nowe.
"The raldyg gently the bridee of the noes, doth (2) To break down a bridge behind one:

Mici.: To do as deacribed with the view of preventing an enemy from following. It has the additional effect of preventing one's self from easily retreating again across the water. (Lit. \&fg.)
"He had hroken down all the bridges behind him. Hitha bean so talese to ons eidn that he must of neces. Ity be true to the other."- Naccaulay 1 Itist. Eng., elt.
II. Technically:

1. Arch. : A atructure consisting of an arch or series of arches supporting a roadway above it, designed to unite the two banks of a river or the two sides of an open apace.
(1) History of bridges: Bridges seem to have existed in China from a period of considerable sntiquity. The word bridge does not occur in the authorised version of the Bible. Temporary bridges, for military purposes, were constructed befors permanent structures for the convenience of the inhabitants were erected. The former were often of boats Thus Cyrus constructed such bridges abont 336 B.C., Darius Hyataspes about 490, and Xerxea abont 480 B.C. Bridges of stone or brick scem to have been first used by the Romans; there ware none erected in Greece till after the Roman conquest. The firat Roman bridge is said to have been one spantRoman hridge is said to have been one spanning the Tiber between the Jamiculumand the Aventine Mountain, built by or under Abcus
Martius. Now they are univeraal In properlyciartius Now they are upiveraal in properlyperfect civilisation even yet they are few. In India they are not numerous, and most of those which exiat have been erected aince the occupation of the conntry by the British. Loudon Bridge, in its oldeat form, existed about A.D. 978, a new one was built of wood in 1014, yei another in 1209, and the present str xeture was completed in 1831. Old Westminster Bridge was opened in 1550 , old Blackfriars in 1769 , \&c. In the United States lridge buildiug has become a highly deveioped art, had nnmerous nagnificent examples of it are to be seeu. Of the suspension Éridge, ths are to be geeu. int the suspension bridge, ths most striking bostance is that over the fast
River at New York. Or the newly adopted Truse Bridge system, Philadelphia hito several Truss Bridge system, Philadelphia has several
fine exanples, white of the Cantilever Bridges fine examples, white of the Cantilerer Bridges
that at sit. Lonis is considered probably the finest apecimen of bridge construction in the wortd.
(2) Construction and parts of a modern bridge: A bridge is generally made of wood, of iron, of stone, or of brick. The extrene supperts of the arches at the two ends are capled butments or abutments; the selid parts called butments or abutments; the solid parts the sides of the road or pathway parapets.

2. Sharpness, acnteness.
-iThe brighsnew of his parta, the sollidty of he fndgmert sad the candour and generosity of hit nemper, "-prior.

- Crabb thas distingulshes hetween brightness, lustre, splendour, and brilliancy: "Bright ness is the generic, the reat are specific terms: ness ia the generic, the rest are specinc terms:
there cannot be lustre, splendour, and britthere cannot be lustre, splendour, and brib
liancy withont brightness; but thare may be brightness where these do not exist. These terma rise in sense; lustre ribes on brightmess splendour on lustre, and brilliancy on splendour. Brightness and lustre are applied properly to natural lights; splendour and brillianey have been more commonly applied to that which is artificial: there is always more or less brightness in the sun or moon ; there is an occasional lustre in all the heavenly bodiea when they shine in their uncloudad brightness; there is splendour in the eruptione of flame from a volcano or an immenae conflagration; there is brilliancy in a collection of diamonds. There matlancy in a collection of both splendour and brilliancy in sn may be both splendour and briliancy in sn illumination: the splentour arises from the
mass and richness of light; the brillicney mass and richness of light; the brill hancy
from the variety and brig'tness of the ights and colours. Brightress nay be obscured, lustre may be tarnished, splendour and brilliancy diminished. The analogy is closely preserved in the figurative application. Brightrese attachea to the moral character of men in ordinary casea, lustre attaches to extruordinary instances of virtue and greatness, splendour and brilliancy attach to ths achievements of men. Our saviour ia atrikingly represented to us as the brightness of His Father's glory, and the expresa image of Hia person. The humanity of the English in the hour of conquest adds a lustre to their victories whlch are either spiendid or brillinnt, according to the number and nature of the circumstances which render them remarkable." (Crabb: Eng. Synon.)
* bright'-stme ( $g h$ silent), $a$. [Eng. bright, and shff. -some (q.v.)] Bright, clear.

I (1) Qther special spplications of the word are bring to book [Book]: bring to pass [PASS] bring to justice $=$ to charge, bring to trial ; to bring down the house = to be enthusiastically received; bring to nought $=$ utterly destroy; bring to reason $=$ induce one to listen to reason; to be brought to bed, brought a bed $=$ to be delivered of a child; to bring a person on his way, or to bring him onvard $=$ to sc company him.
(2) Crabb thus distingulshes between to bring, to fetch, and to carry:- "To bring is amply to take with one's aelf from the place where one is : to fetch is to go first to a place and then bring it; to fetch therefore is a species of bringing. Whatever is near at hand is brought; whatever la st a distance
must be fetched: the porter at an ina brings a parcel, the eervant fetches it. Bring always respects motion towards the place in which the apeaker reaides; fetch, a motion both to and from ; carry, always a motion directly from the place or at a distance from the place. . . Bring is an action performed at the option of the agent ; fetch and carry are mostly done st the command of snother. Hence the old proverb, "He who will fetch will carry,' to mark the character of the gossip snd tale-bearer, who reports what he hears from two persons in order to please both parties." (Crabb: Eng. Synon.)
brǐng'-ẽr, * bring' er.] He who, or that which, brings saything.

Yet the first bringer of un watcome news
Shakesp. : Henry IT., i. 1

bringer in, s. He who, or that which, brings in or introduces.
"Lucliar is a bringer in of ught ; and therefore the harbinger of
Notes,
P. 79.

#### Abstract

Chem. : $A$ compound called also phenylbromids $\mathrm{C}_{6} \mathrm{H}_{5} \mathrm{Br}$. It is a liquld boiling at. 154*, obtained by the action of daylight on a mixture of bromine and benzene; aiso by the action of $\mathrm{PBr}_{5}$ ph phenol $\mathrm{C}_{6} \mathrm{H}_{5}(\mathrm{OH})$ - brōme (1), s. [Brooc.] (Prompt. Parv.) brōme (2), s. \& a. [In Fr. brome. Prom Gr. Bpónos (bromos) = a kind of oat.] [Bromus.] word used in the compound which foliows.

## brome-grass, s.

Bot.: The English book-nama for the genus Bromus (q.v.)
brơ-měl'-ǐa, s. [In Fr. bromelle. Named after Bromelius, who published a Gothic flora.] Bot. : A genus of plants, the typical one of the order Bromeliacere (q.v.).
 suffix -acece.]
Bot. : Bromelworts, an order of endogenous plants, placed by Dr. Lindley under his Narcissal Alliance. The calyx is sometimes herbaceous-looking, but sonetimes coloured. Petals, three, coloured; stamina, six or more; ovary, three-celled, many-seeded, as is the fruit, which is capsular or succulent. The stem is wanting or, if present, very short. Sometimes it consists of fibrous roots, consolidated round a alender centre with rigid channeled leaves spiny at the edge or point. The fruit is aometimes eatable. In 1847 Lindley estimated the known species at 170 , all from America, whence they have migrated to Africa, the East Iadies, and elsewhere. The wellkeown pine-apple is the Bromelia Ananas. [Ananas, Pine-afple.] Ropes ate made in Brazil from another species of the ssme geans. All the apeciea of Bromeliaceæ can exist withoot contact with the earth; they ara therefore ouspeaded in South America in houses, or hung to the balustrades of balcoaies, whence they diffuse fragrance abroad.
brơ'-mĕl-wôrts, s.pl. [From Lat. bromelia, and Eng. wort.]
Bot.: The English name given by Lindley to the natural order Bromeliaceæ.
brōm'-hȳ-drinş, s. pl. [From Eng., \&c. brom(ine); hydr(ate); and suffix -in (Chem.) (q.v.).]

Chem.: Haloidethera formed by replacing the 1,2 or $3(\mathrm{OH})$ radicals in the triatomic alcohol glycerin by Br . Monobromhydrin $\mathrm{CH}_{2} \mathrm{Br} \cdot \mathrm{CH} \cdot(\mathrm{OH}) \cdot \mathrm{CH}_{2}(\mathrm{OH})$, an oily liguid boillng at 130", obtained by the action of HBr on glycerin $\mathrm{C}_{3} \mathrm{H}_{5}(\mathrm{OH})_{3}$. Symmetrical Dibromhydria, $\mathrm{CH}_{2} \mathrm{Br} \mathrm{CH}(\mathrm{OH}) \mathrm{CH}_{2} \mathrm{Br}$, a liquid boilIng at $219^{\circ}$, obtained by the action of bromine on monobromhydrio. Unsymmetrical Dibrom hydrin $\mathrm{CH}_{2} \mathrm{Br}^{\circ} \mathrm{CHBr} \mathrm{CH}_{2}(\mathrm{OH})$, boiling at $212^{\circ}$ by the action of bromine oo allyl alcohol $\left(\mathrm{CH}_{2}=\mathrm{CH}-\mathrm{CH}_{2} \cdot(\mathrm{OH})\right.$ ) Trihromhydrin or Allyltribromide $\mathrm{CH}_{2} \mathrm{Br} \cdot \mathrm{CHBr}{ }^{\circ} \mathrm{CH}_{2} \mathrm{Br}$, a erystallioe substance melting at $16^{\circ}$, and boiling at $220^{\circ}$; it is obtained by the action of excess of broming on allyl iodide. [Chlohaydrins.]
brö'-mio, $a^{\prime}$ [From Eng., \&c. brom(ine), and guffix -ic.] Pertaining to bromioe; having bromine in its composition.

## bromio acid, 8 .

Chem. : $\mathrm{HBrO}_{3}$. A monobasic acid, forming alta called bromates. When bromine is dissolved in caustic potash a mixture of bromide and bromate of potassium is obtalned, which can be aeparated by erystallieation, $3 \mathrm{Br}_{2}+6 \mathrm{KHO}=5 \mathrm{KBr}+\mathrm{KBrO}_{3}+3 \mathrm{H1}_{2} \mathrm{O}$. Free bromic acid can be prepared by pasaing chlorine into bromine water, $\mathrm{Br}_{2}+\mathrm{sCl}_{2}+6 \mathrm{CH}_{2} \mathrm{O}=2 \mathrm{HBrO}_{3}+10 \mathrm{HCl}$. The acid bromate by argeotic nitrate acid acting on the resulting argentic bromate by acting on $5 \mathrm{AgBrO}_{3}+3 \mathrm{Br}_{2}+3 \mathrm{H}_{2} \mathrm{O}=5 \mathrm{Ag} \mathrm{ABr}+6 \mathrm{HBrO}$, , Bromic acid is a $+3 \mathrm{H}_{2} \mathrm{O}=5 \mathrm{AgBr}+6 \mathrm{HBrO}_{3}$ Bronic acid is a strongly-acid liquid, reddening and then bleaching litmus paper. On concentration at $100^{\circ}$ it decomposes into bromine and oxygen. It is decomposed by aulphur dioxide $\left(\mathrm{SO}_{2}\right)$, sulphide of hydrogen $\left(\mathrm{H}_{2} \mathrm{~S}\right.$ ), and by hydrohromic: acid (IIBr). Bromates are with difficulty soluhle in water, and are decomposed on heating fato oxygen and bromidea.
> bromio silver, s.
> Min. : The same as Bromyrite and Bromarbyrita (q.v.)
brö'-mide, s. [Eng. brom(ine); -ids (Chem.) (q.v.).]

Chem.: A combinstion of bromine with a metal or a radical. Bromides are soluble in water, except silver sad marcurous bromides; lead bromide is very alightly tolubls. They sre detectad in analyais by the following re-actions:-Argentic nitrate gives a vellowish precipitate of AgBr , insoluble in dilute nitric acid, and soluble in strong ammoois Chlorine liberate tromioe, and, if the liguid in ine liberates romiae, and, if the liquid is shaken up with etber, a yellow ethereal aolu-
tion floats on the liquid. Heated with aulphuric acid and $\mathrm{MnO}_{2}$, bromides yield vapoura of Br , which turns starch yeliow.

I Bromide of silver, Bromid of silver:
Min. : The ama as Bromyrite (q.v.).
brō'mǐn-ā-těd, a. [Eng. bromin(e); -ated.] Combined with bromine (q.v.)
"Water and its chlorimated and brominated con-
 stench; Mod. Lat. bromium.]

1. Chem: A noo-metallic element. Symbol, Br ; atomic weight, 80 . Bromine was discovered io 1826 by Balard in the salts obtained by the evaporation of sea-water. Bromine is liberated from the sodium and magnesiumi galts by the action of free chlorine, and is separated by ether, which dissolves the bromine. This red-coloured solution is removed, saturated with potash, evaporated, and hested to redness, and the bromide of potassinm is heated with manganese dioxida and aulphuric acid. The bromine is liberated in the form of a deepred vapour, which condenses into a dark,
reddish-black liquid. Sp. gr., 2.97 ; it boils reddish-black liquid. $\mathrm{Sp} . \mathrm{gr}^{2}, 2 \cdot 97$; it boils
at $63^{\circ}$; its vapour density ja $5 \cdot 54$ times that of air. It has an irritatiog amell, and when inhaled ia poisonous. It dissolves in thirty parts of water, and the solution has weak bleaching properties. Bromine and hydrogen do not unita io the aunlight, but do when they are passed through a red-hot porcelain tube, forming hydrobromic acid (HBr), which is also obtained by the action of phosphorus and water on bromine. It is a colourless fuming gas, which liquifies at $73^{\circ}$, very golnble in water. The concentrated zolution contaias 47.8 per cent. of HBr , it boils at $126^{\circ}$, aod has powerful acid properties; it neutralises bases, forming bromides and water. Hypobromons acid, HBro. ia only known in aolutions; it has bleaching properties. Bromine can diaplace chlorine from ita compounda with oxygen, whilst chloriag can liberate bromine from its compound with hydrogen. Frea bromine turns atarch yellow.
2. Pharm.: Bromina has been applied exteroally as a caustic, but rarely. Ita chief offi cinal preparations are bromide of ammenium, useful in whooping-cough, infantile convul. bions, and nervons disesaes geaerally; and bromide of potassium, now very exteasively used, capecially in epilepsy, hysteria, delirium tremena, diseases of the throat and larynx, bronchocele [Gortaz], enlarged apleen, hypertrophy of liver, fibroid tumonrs, \&c. Also as an antaphrodiaiac, for sleeplesaness, glandular awellings, and skin diseases. Its alterative powers are similar to but leas than that of the iodidea. Ita preparation ia the aame as iodide of potassium, aubstituting an equivalent quantity of bromioe for iodine-6KHO $+\mathrm{Br}_{\mathrm{B}}$ $=5 \mathrm{KBr}+\mathrm{KBrO}_{3}+3 \mathrm{H}_{2} \mathrm{O}$. It bas a pungent aline taste, no odour, and occura in colourlesa cubic cryatala, closely resembling the iodide. As a hypnotic its usefulness is much increased by combining it with morphia and chleral hydrate
bróm'-ǐhg-hạm, s. \& a. [A corruption of Birmingham.] [Baummáem.]

* Bromingham groat: Counterfeit money -In other places whole hines are bodly transferred, and portions1 parts, of lines minted into pyprous Bromingham groats, as counterfeit money was ealled
in thoes day. pt. i1. (Note.)
brō'-mite, s. [In Ger. bromit; Eng., \&c. brom(ine), and -ite (Min.) (q.v.).] The same as Bromyrite and Bromargyrite (q.v.).
brom'-lite, s. [From Bromley Hill, near Alston, in Cumberland, where it occurs; suff. ite (Min.) (q. v.).]
Min: An ortborhombic, translucent miners with hardness 4-4.5, sp. gr. 3.71-3.72, lustre vitrcous. It is colnurless, sonow-white, greyish, pale cream-coloured, or pink. Composition:
of lime, $30 \cdot 10-84 \cdot 29$; carbonate of etrontio $0-6.64$; and carbonate of manganess 0-9.18 It is fonnd near Hexham, in Northnmberland and in Cumberland (atym.). It is called almo and in Cumberla
bró-mð́-ar-gen'-tótȳpe, s. [Eng. bromo; from bromine (q.v.) ; Lat. argentum, and Gr. тітог (tupos) = type.]
Photog.: A photographic agent of very delicate action mads by nitrate of silver, bromid of potassium, and again nitrate of silver, brushed over paper.
brö'-mot-form, s. [From Eng., \&ic., brom(ine), and form(ate), from Lat. formica $=$ an ant.
Chem. : Bromoform $\mathrm{CHBr}_{3}$, or Tribromomethane. It is a heavy volatile liquid, obtained by adding bromine to a solution of caustio potash ia ethyl alcohol. It boils at $152^{\circ}$. Heated with caustic potash, it is converted into potassium bromide and potassium formate.
brö-mó-quí-nōne, s. [Eag., \&e., bromine,
and quinone.] [BromANu.] and quinome.] [Bromanil.]
* brŏm'-ṇ-rĕt, s. [Bromide.]
brō'-mŭs, s. [In Fr. brome; Sp., Port., \& Ital. bromo; Lat. bromos; Gr. Bpópos (bromos) $=$ a kiod of oat, obvena salina.]
Bot.: Brome-grass. A genus of grassen having two unequal glumes and two herba ceous glumelles, the onter one bifid and with an awn from below the extremity. Bromus mollus, or Soft Brome-grass, is widely diffused in Britain and abundant. Its geeds, when eaten by man or the larger animals, produce giddiness, and they are said to be fatal to poultry. B. secalinus, or Smooth-rye Brome-grass, i seeda are accidentally ground with the flour, they impart a bitter taste to bread, and are narcotic like the seeds of Lolium temulentum. The panicles are said to dye green. B. asper, or Hairy Wood-brome grass, is the talleat of British grasses; it is found in moist woods and hedges. B. sterilis, or Barrea Bromegrass, is conmon, and some other apecies are oot very rare.
brŏm'-yr-ite, s. [From Fr. bromure d'argent $=$ bromuret of allver, i.e., a combination of bromine and silver.]
Min.: An isometric yellow, amber, or green aplendent nineral, with a hardness of 2-3 and sp . gr. of 5-8.6, coasisting of bromize 4-2.6, and silver $5-7 \cdot 4$, from Mexico and Chili. It is the same as bromargyrite, bromic silver, or bromide of silver (q.v.).
* bronche, s. [Bannca.]
brŏin'-chi, s. pl. [Latinised word, from Gr.
 Anatomy:

1. Gen.: Any of the air-passagea, great or small, in the luogs.
C. "Thus a bronchus of the size of a straw .WUliame, in Cycl. P. M., art. Bronchitis.-D
2. Spec.: The two great tubes into which the trachee divides bedeath, just before enteriag the lunga.
brơñ'-chil-a, † brơn'-chir-se, s.pl. [Ia Fr. Bpápxia (brongchia), the brouchial tubes; Bporxıa (brongchos) the trachea, the wiodpipe Bporxos (orongchos), the trachea, the wiodpipe.

II．Technically：
1．Metal．，Archeool．，\＆Hist．：An alloy com－ posed of copper and tin，sometimes with is pittle ziac and lead．
（1）Archacol．\＆Hist．：Bronze wsa in nse in ancient China，Egypt，Assyria，Europe，and Mexico．The tin used la parts of the Esstern world was brought from Cornwall or from the penidsula of Malacca．［Bronze hoe．］
（2）Characters，properties，and uzes：Bronze， as already atated，is an alloy of copper and tin．It is harder and more fusible chan copper itself．The proportions of the two constitunits vary according to the parpose for which the alloy is produced．The bronze for cymbols Io composed of 78 parta of conper and 22
of tin，that for cannon 100 parts of copper
tate，căt，färe，amidst，whãt，fâll，father；wē，wĕt，hëre，camel，hẽr，thêre；pıne，pǐt，sire，sĩr，marine；gō，pơts

to 11 of tin, that of ordinary bell-metal about 80 of copper, $10 \cdot 1$ of tin, $5 \cdot 6$ of einc, and 4.3 of lead, and that used in uronze colnage 95 parta of copper, 4 of tin, and 1 of zinc. Its average density to g 4 . 1 l oxidiaes very alowly, even Whon the alr is moist, which reoders it well edapted for atatues and aimilar works of art. 2. Cotton manufacture: One atyle of calleoprinting peculiar rather from the eharacter of its colours than from any apecific novelty in treatment.
8. Ay adjective: Made of bronze, characterised by the preaence of bronze in a literal or figurative sense.

## bronze age,

1. Archocel. : The age of hronze, the second of three ages believed by MM. Nilsson, Steenetrup, Forchhammer, Thomsen, Worsäm, and other Dauish archæologists to have followed each other in the peninsula of Jutiand and alsewhere in the following order:-(1) Tha stona age, (2) tha bronze age, and (3) the fron age. During the frat atone, or sometimes bone, was used for weapona and implements, the working of metal being as yet unknown. Then weapons were made of bronze, the method of alloying the two metals having been discovered, but that of working in lron being covered, but, that of working in lon being
undiacovered. Finally iron took the place of bronze. Theae viewa have lueen generally of bronze. Theae viewa have heen generally
sdopted by geologists and archæologista, though some believe an age of copper to have intervened between those of stone and bronze. The sllegation that the nae of atone came first, that of bronze next, and that of iron lastis not inconsistent with the fact that sll still exist contemporaneously in portiona of tha world.
Dutring the age of bronze the oak was the dominsnt tree in Denmark, the Scotch-fir, now extinct in that country, having flourished during the earlier part of the stone age; while the beech was and remains the characteriatic tree of the iron age. Lake-dwellings of the bronze pariod have been found in western and central Switzerland, and one has been discovered in the lake of Constance. Oeologically even the atove age belongs only to the recent period. (Lubbock, Lyell, \&c.)
2. Fig.: The Age of Bronze: The unheroic age of impudence, the age wanting in veneration for what is good and great, the grovelling age.

- Byron has a poem called "The Ags of Bronze," or Carmen seculare et annus haud minabilis.

## lironze-1iquor, s.

Chem, A solution of chloride of antimony and sulphata of copper used for bronzing gunbarrels.
bronze-powder, s. Finely puiverised metal, or powder having a metallic base applied to the surface of paper, leather, and other materials, for imparting a metallic colour sad lustre.

TI (1) Buccal artery: A brsnch of the internal maxillary artery.
(2) Buccal glands: Small glands gituated under the cheek, which acerete saliva.
bŭc-can-ëer', bŭ-can-c̈er', bŭ-can-lër', 8. [lin Dut. bochaneer; Fr. boucanier = a bucby smoking it. From Caribbee Indian boucan $=$ fleal or fish thus prepared.]

* 1. Gen.: The name given in the Weat Indies to any one who cured flesh or tish in the way described in the etymology. This was done continually by the men describecunder 2.

2. Spec.: An order of men, not quite pirates, Fet with decidediy piratical tendencies, who, for nearly two hundred yeara, infested the Spanish main and the adjacent regions. A having granted to Spain all lands which might be discovered west of the Azorea, the Spaniards thonght that they possessed a monopoly of all countries in the New World, and that they had a right to geize, and even pat to death, all interlopers into their wide domain. Enterpriaing mariners belonging to other nations, and especially those of England and France, naturally looked at the case from quite an opposite point of view, and considered themthe prohibited regions. Being cruelly treated, when taken, by the Spariarda, their comrades made reprigals, and a atate of war was established between the Spanish governments in the New World and the adventurers from
the old, which continued even wheu the nationa from which they were drawn were at peace in Europe. The association of buccaneers began about 1524, and contlnued till after the English revolution of 1688, when the French attacked the English in the Weat Indiea, and the buccaneers of the two countries, who had hitherto been friends, took diffarent aides, and were eeparated for ever. Thus weakened, they began to be auppresaed between 1897 and 1701 , and soon afterwarda ceased to exist, pirstea of the normal type to a certain extent taking their place. The "buccaneers were aiso called "anstiers," or "flilbusters"-a term which was revived about the middle of the nineteenth century in connection with the adventures of "GeDeral"
Walker in spaniah America. [Filibustar.]
brio-can-ëer', bǔo-an-ëer', v.i. [From Eng.; \&c., buccaneer, a. (q.v.)] To set the part of a bnccaneer; to be a more respectable pirate.

3．A blow，sn asssuit．
＂Avd I ohal bide the drat bur，an bare ne I eltta＂
bũr（2），s．\＆a．［In Fr．bourre＝wadding；1tal borra $=$ halr to stuff saddles．From Gaal borr $=\mathrm{s}$ knob，bunch，or swelling．］
A．As substantive：
I．Ordinary Language：
1．Of anything annular：
（1）Artificial：The broad ring of fron behind the place for the hand on \＆tiltling spear． （Holmes，Nares，and Skeat．）
$\because$ He thryst hymaself wyth the myght that he had DP to the bur of King Arthur，epere－Ke Norto （2）Natural：
(a) The rough smnular excrescence at the root of dear'e horn. (Nares.)
(b) A halo round the moon.
2. Of anything knobbed or projecting: The lobe of the ear.
3. Of anything saoelled, though irreqular in form: The sweel bread or pancreas of the sheep or any otber of the inferior animals.

## II. Technically:

1. Weapons: (I. 1.)
2. Tools:
(1) A triangular chigel.
(2) A fluted reaming-tool.
(3) $\Delta$ dentist's instrument of the nature of a drill, but having a serrated or fils-cut head, larger thin the shank.
3. Machinery:
(l) A small circular saw or toothed drum used on s mandrel placed between the centros of a lathe.
(2) A wheel with thin plstes or projections inclined to the axis of the bur in a knittingmachine, and used to depress the thread between the needles and below the beards; it is then called a sinker. It becomes \& knockeroff when it raises the loopa over the top of the дeedle. [SNNKER.]
4. Motallurgy, \&c.:
(1) A roughness left on metal by a cutting tool, such as a graver or turning-chisel. The bur of a graver is removed by a gcraper; that of \& lathe-tool by s burnisher or in the polishing process. A bur is purposely misde on a currier's knife and a comb-maker's file, and in each case constitutes the cutting edge. (Kinight.)
(2) A planchet driven out of a oheet of metal by \& punch.
(3) A washer placed on the smatl end of a rivet before the end is swaged down.
(4) The jet, sprue, or neck on a cast bullet.
5. Brick-making: A clinker, a partially vitrifed brick.
B, As arjective: Pertaining to a bur in any of the furegoing senses.
bur-chisel, s. A triangular chisel used to clear the corners of mortises,
bur-outter, bur-nipper, s.
Metullurgy: A nippers for cutting away the fiange from a leaden bullet.
bur-dxill, s. A drill with an enlarged head used by operative dentists.
bur-gange, 3.
Metal.: A plate perforated with holes of graduated sizes. Whose numbers determine the trade sizes of drills and burs.

* bũr (3), s. [Corrupted from bird (\%).]
* bur-bolt, s. A bird-bolt (Ford.)
* bur (4), s. [Bower.] (Ormulum, 3,323.)
* bur (5), s. [In lcel. bara; O. Ger. bare; Dut. brar $=8$ wave.] [Bore (2), s.] A high thal wave.

## "The bur ber to hit baft that braste alle her gere, Then hurled on s hepe the helme and the sterne. Ear. Eng. Allit. Poems (ed. Borrit): Patience, 1he.

bũr (6), bũrr (1), " bũrre, * borre, s \& $a$ [Sw. kardborre $=\mathrm{s}$ burdock; borre $=\mathrm{sm}$ echinus, \& sea-urchin; Dan. borre $=\mathrm{a}$ bur; cf. O. Fr. bourre, Ital. barra $=$ coarse hair, cog. with Low. Lat. burra $=$ shaggy garment.]
A. As substantive:
I. Literally:

1. Of fruits:
(1) Gen.: Any prickly or eplanous frust, calyx, or involucre.
"Burre Lappa, glis."-Promple Para,
"And fact like burres they cleife haith ene and all,
To bald, o Ood, thy word and wi in thrall."
(2) Spec. : The involuctes of the burdock (q.v.), which are covered with houked scales.
"Its beadn of flowers [thoee of the hardock] ander
the oane of burs."-Treat, of Bot led. 1866), 1,88 , (3) The cone or female calkin of the bopplant before fertilization.
2. of plants:
(1) The burdock.

- Rough thistles, kecksies, burs."-Shakesp: F Em.
(2) The clnb-moss (Lycopodium clavatum).
(3) A thistie, Candrus lanceolatus. "(Sootch.)
(4) The English nama of a grass, Conchrus tappaceus. It comes from India.
II. Fig.: A person whom, or a thing which, one cannot easily shake off.
"I am akind pi
B. As ndjective: Of or belonging to a bur in any of the senses given under A.
bur-bark, s. [Named from the hooked fruits.] The fibrous bark of Triumfetta semitriloba. (Treas. of Bot.)
bur-flag, s. A plsnt, Sparganium ramosum.
bur-marigold, s.
Bot.: A book-name for Bidens tripartita.
bur-parsley, s. [So called from resembling parsley and from baving prickly fruit.] The English name of Cancalis, a genus of umbelliferous plants. The Small Bur-parsley, Caucrlis dancoides, is commou in a chslky soil in cornfields in the east bnd sonth-east of Englsnd. C. Latifolia, an introduced specter, fs now extinct.

## bur-reed, s.

Bot.: An English book-nane of Sparganium, a genus of plants belonging to the order Typhaces (Typhads or Bulrushes). Four species occur in Britain, the Branched (Sparganium ramostm), the Unbranched Upright (S. simplex), the Floating (S. natans), and the Small Bur-reed (S. minimum). The third is rare, the rest are tolerably abundsnt.
bur-thistle (Eng.), bur thristle (Scotch),s A thistle, Candurs larceolatus.
bry-weed, s. [Bunweed.]
bür (7), \& \& a. [Corrupted from bore (q.v.).] bur-tree, s. The same as Bons-treei.e., Sambucus nigra.

* bur-al, a. [Borrel.] (Scotch.)
buir-a-tite, s. [Named by Delessert gfter a mineralogist Burat.]

Min. : A donbtful variety of Aurichalcite. It was called Lime-anrichalcite, bnt the lime is from an sdventitious source. It is found in France, in Tuscany, and in the Altai mountains.
 ICP. Dut. borrelen $=$ to bubble. Perhaps imitated from the sound.]

1. To bubble up, to froth up. (O. Eng.)

Butbu"-Prompt. Paru.
2. To purl. ( Scotch .)

+ bũr'-bling, pr. par. \& a. [BCRBLe, v.] "Throw burblag hrooken, or throw the forest grent",
bũr'-bōt, bũr'-bōIt, s. [Fr. barbote; from barbe $=8$ beard.] A iresh-water fish (Lota vulgaris) of the family Gadide. In some places it is called the Eel-pout, its lengthened form resembling that of the eel, sind the Coney-fish, from hiding itself under stones like a rabbit. [Lora.]
* bũx'-bŭlle, * bũr'-by̆ll, s. [From burble (q.v.).]

* bur-byll, v.i. [Burble.]
bürch (pl. bũrch'-is), s. [BURGH, Bonovgn.] (Barbour: Bruce (ed. Skeat), iv. 213.)
* bur-cnilht, so. [O. Eng. bur $=$ bower, snd cniht = knight.] A chamberlain. (Layamon, i1. 372.)
bũrd (1) (Scotch), "burd, * burde (O. Eng.), \& [BiRD.]
bürd (2), s. [Binth.]
* burd (3), " burde (I), "boord, s. [Board.] - Burdis (nl.), in the following exsmple, is $=$ movable tables.

To lay burdis down: To set aside the tables when a feast is over. (Scotch.) (Skeat.)
bũrd'a-länc, ©S [Scotch burd $=$ bird, and alane $=$ slone.]

file，fat，fire，ąmidst，whãt，fall，father；wē，wêt，hëro，camel，hẽr，thêre；pine，pirt，sıre，sir，marino；gō，pôt，

-1. Originally. (Ofthe forms buriels, buryels birtel, buriall): A tomb, a burying-place.
"ase the that hilden stapuleris of profotez and maken

2. Now. (Of the form burial): The act of burying, the etate of being buried, interment, opulture.
(1) Gen. : In the foregoing sense.
the duke take orier for his burlaz",
(2) Spec.: The act of placing anything under earth or water.
"Wo have great lakes, botb salt and fresb; We use differmog of things hurled in earth, and things haried

## II. Technically:

1. Archreol. \& Hist.: Most nations have selected burial as the best method to dispose of their dead; the practice of hurning them on s funersl pile, pravslent to a limited extent among the Greeks and the Romsns and nasily universal among the Hindoos, being the exception and not the rule. About 1860 (?) B.C Abraham buried Sarah. The Egyptisns, and t least, in some special cases, the Jews, em balmed their dead (Gen. 1. 3, 26; John xix, 39, 40). [Emalmment ] In Europe, according to Sir John Lubbeck, interments in which the corpse is in a sitting or contrscted posture belong to the stone age, those in which it has been burnt and only the ashes interred to the bronze age, and those in which the cornse liea extended presumahly to the age of fron. During the first French Revolution a propoeal was nade to adopt the process of cramstion, bnt it fsiled. The project was revived on the continedt during this century, and has of late yesrs been strongly advocated in the United States. Cremstories have been built in eeveral of our large citieg, and many bodies reduced to ashles, with the result of sonse growth of the custom in public favor. As yet, however the weight of public opinion strongly favors the ofd nethod of burial, and thie innovation csi maske its way but elowly.
2. Law: In 1693, 1733, and 1783 Acts were passed imposing a tax on burials, but it has been long since repealed. A selo de se or suicide was formerly buried in the highws with a stake driven throngh his body, an all his goods and chattels were forfeited to the king. (Blackstone, bk. iv., ch. I4.) [Bur-hal-around, Bumial-bervice.]
B. As adjective: (See the compounds.)

T Obvions compound : Burial-plain.
burial-aisle, s. An sisle in which a body has been interred. (Lit. \& fg.)
"Looks he aiso wisttuliy into the fong buriai-atite of
burial-board, s. A hoard of persons appointed to regulsta burials.
burial-case, s. A mummy-shsped form of coffin, alleged to be an improvement on the ordinary one in the lids, in having glass over the face, in the means of fastening, in her meticsl sealing, and in the complete isolstion of the body from air by enveloping the corpse in a resinous or other air-excluding compound

## burial-ground, $s$.

I. Ord. Lang.: Ground set apart or used for the interment of the dead.

1. Literally

Their mingled shadown intercept the elght
outstretched below.

## 2. Figuratively:

"uriai-ground of ail the time exclaimed that it was the orural-ground or ail the goata in the inandi- Da

## II. Law:

1. In England: Burial-grounds are almost aniversaily gituated around churches, urban as well as rural. They sre consecrated by bishops, sud till recently no one could officiate at the funeral except the clergyman of the parish or snother one appointed by him On his part he was bound, withont delay, to bury sny corpse bronght to the church or churchyard in the manner and form prescribed by the Book of Common Prayer.
\%. In America: In the United States esch city has its large public cemeteries, in which ther is no secterian or other restriction to burial or to charscter of service. Many mocieties sud come religious denoninations have their special cemeteries.
2. In Scolland: The Scottieh parochial bury lng-grounds have long been open to all de-
nominations, the conductors of a funera having ths right to request whom they please to officiate.
3. In Ireland: Bome years previous to the disestshlishment of the Jrish Church the burial-grouuds wers similarly thrown open to ali denominations.
buriai-place, s. A place for barying the dead.
I A more general word than burying gronnd. When one is interred in a church or committed to the deep the church or the ocean-bed is to him a burisl-place, but it is not the burial-ground in which he eleeps. The Romans intarred their dead outside the cities; the early Christians imitating them in this reopect. Then the latter began to bury around their churches. Haydn makes the first Christisn burisi-place be instituted in 596 , burial in cities in 742 , in consecrated places in 750, and in churchyarde in 758. of late, cemeteries, with a consecrsted portion for Church of England interments and an unconsecrated one for those of Dissenters, have been opened, Kensal Green in 1832 being the first. Sanitsry considerstions have led to a graduslly increasing number of theas places nf interment being located ontside of cities.

At rest on the tombs of the knightly race
Homans: The Lady of

## burial-service, burial service,

1. Ecclesiol.: What is called in the Liturgy "The Order for the Burial of the Dead.
2. Law: This "office," the Liturgy intimates, "is not to be used for any that die unbaptized, or excommunicato, or have laid violent hands upon themseives." Till 1880 the elergyman had to read it over all others to whom burial in the parish churchyard was accorded, but by the "Burisls Laws Amendment Act" of that year a certain measure of discretion was given him. The same act opened the parochial grounds to any one who opened the parochial grounds to any one who had previous rights of interment there withont the limitstions that an ordained clergy-
man must officiate, and the burial bervice man must offliate, and the burisi service
mnst be ubed. Any person professing to be a Chriatian can offciate at the request of the relatives, provided proper notice be given to the incumbent. Latitude is given as to the service, but it must be performed in a decent and orderly manner, and without covert attack on Christisnity. An ordsined clergymsn can also offlciate now in unconsecrated ground withont incurring any ecclesiastical penalty or censure.
bur'-led (bur as bexr), pa.par. \& a. [Bury.]

"Wrougbt al of burned steet, ...".
bũ̌'-nẽx, s. [Eng.burn; -er. In Ger. breaner, verbrenner.]
I. Ondinary Language:

1. Of persons: Ooe who burns any thing or person.
2. Of things: A thing which doea so. (Ofteo used in compoaition, as a gas-burner.)
II. Technically:
3. Lighting:
(1) The part of a lighting spparatos at which combuation takea place.
(2) The correapouding portion of a gasheater or of a gas-rtove
4. Chem. : [Bunsen's Burner.]

TBunsen's Burner: [Named from Herr Bunsen, professor of chemiatry at the UDivereity of Breslau.]
Chem.: A Bunsen'a burner consiata of a jet surmonnted by a wide brase tube, at the bottom of which are several holes for the admission of air. The air and gas mix in the wide tube in such proportion that they burn with a non-luminous flame The flame has the follnwing etructure. It consists of (1) a dark cone a, consisting of cold unburnt coal-gas, mixed with 62 per cent of air. (2) Tha flame-mantla $b$, compoaed of burning compoaed of bas mixed with air. coal-gas mixed with air. (3) A luminous point $c$, seen ouly when the airholea at the basa of the lamp are partly closed; the area of this zons may be regulated by opening or ahutting the
 extent. The flame of a Bunaen's burner-
(1) At a low temperature, is auitabla for observing the flama colourstions of volatile substanc
(2) At the highest temperature, is auitable for fusions at high temperaturas.
The lower oxidising flame is auitable for beads.

The lover reducing flame is suitable for rednctions on charcoal, and for fusing borsx or other beads in the reducing flame.
The upper oxidising flame (nbtained by admitting the maximum of air) is suitable for oxidation at lower temperstures than are found at (2) (q.v.).
The upper reduring fame is suitable for redactions, and possesses greater reducing power than the lower reducing flame already mentioned.
bür-ň̌t (1), a. \&\% s. [From Fr. brunette $=\mathrm{s}$ dark brown stuff formerly wom by persons of quality ; Low Lat. bruneta, brunetum; from Fr. brun $=$ brown.] [Brown, BRoNETTE.]
A. As adj.: Of a brown colour.
"Sum peirs, sum pale, sum therex, and euta blow.",
B. As subst : A brown colour.
"Burnees coloura Burnictum."-Prompt. Pars.
burnet-rnoth, 8 .
Ord. Lang. A Entom.: The name for the genue of Hawkmoths called Anthrocera, or by aome Zygrens. Anthrocera filipendulee to the Bix-spot Burnst-moth. Ths six opots, whleh are on the euperior wings, are red, while the rest of the wings are green. It is common in Eagland in June. Its caterpillar, which feeds on the plantain, trefoil, dendelion, \&o., is yellow, spotted with black. A. Loti is the Five-spot Bumet-moth. It la less common. The caterpillar feeds on honeysuckle, bird's foot trefoil, \&o.
bũr'-nět (2), a. \& s. [M. E. burnet $=$ ths pimpernel ; cog. with O. Fr. brunete $=$ the name of a plant ; Mod. Lat. burneta = spridgwort.]

## A. As mbstantive:

1. The Pimpernel.
2. Poterium, s genus of Rosscese(Roseworts) It is oalled also Salad-burnetand Lesser Burnet. The Common or Garden Salad-burnet (Poterium sanguisorba) is abundant in Eagland, but less frequent in Scotlaod and Ireland. It is a herba. ceone plast ons or two feet high, with pianste leaves and dull purplish flowers. The leaves taste and smell like cucumber, and are eaten ia salad. The Muricated Burnet, or Saladburnet ( $A$, muricatum), has larger fruit than the former, to which it is closely allied. It is the former, to which it is closely alled, it is
not comon. There are other apecies, but they are foreign. The Greet Burnet is Sanpuisorba oftcinalis.
B. As adjective. (See the compounds.)
burnet-bioodwort, s. A plant, Sanguisorba officinalis.

## burnet-ichneumon, s.

Entom. : An ichoummon, the larva of which preys upon the caterpillar of tha Buraet-muth.
burnet-rose, s. A book-name for Rosa spinosissima.
burnet-saxifrage, s. A book-nama of Pimpincila, a genus of umbelliferous plants. Thare are two British species, the Conmon Burnet-aaxifrage (Pimpinella saxifraga) and the Greater Burnet-saxifrage ( $P$. magna). The former is frequent, the latter inclining to rare. The root of the common species is acrid, and is used as a masticatory in toothache, also as an external application to remove frecklea, and in gargles to dissolve viacid mucus.

## bũr-nĕtte', s. [Bronette.]

"In mournyng biak, as hright burrnettex" The Romaunt of thn Rose.
bũr'-nět-tize, v.t. [Named after Rurnett, who patented the process in 183i.] To use a certain process to prevent decay in wood aod fibroua fabrica. [Bunnettizing.]
bũr'-nět-tīz-ĭng, pr. par. \& s.
A. As present participle. (See the verb.)
B. As substantive: A process for preventing decay of wood and fibrous materials or fabrics. The wood or fibra is immersed io a golution of chloride of zinc, 1 pound ; water, 4 gallons for wood, 5 galiona for fabrica, 2 gallona for felt, contained in a wooden tank. Timber is saturated two days for each inch of thickness, and than gat on end to drain for from two to fourteen weeka. Cotton, yarns, cordage, and woollena ara immersed for forty-eight hours. (Knight.)
bũx'-ně-wĭn, s. [From Eng. bumn; Scotch e $=$ the, and win = wind Burn the wind.] A Indicrous appellation for a blacksmith.
"Then Aurnewen comes on like death
At evty chanp"* Burns: Scotch Drink.
bũr'-nǐe, t bür'-ny̆, s. [From scotch burn
$=$ a stream, and diminut. anf. -ie $=$ little $]$ $=$ a stream, and diminut. auff. -ie $=$ little.]
A little " buro," bourne, or atream. (Scotch.)

> " Y* burnies wimplin' down your glens,

Burns: ETegy on Captain Mathew Eendervon.
bürn'-ing, * brĕn'-nĭng, * bern-inde, pr.
par., a., a s. [BuRs, v.]
A. As present participle : In aenses correaponding to those of the verb.
B. As adjective:
I. Literally:

1. Flaming.
"Thus oaon, whoa Troy was wrupped in treand emoth

## 8. Hot

Dryden: To the Lord Chanoellor Byde

## I know thit from thine wony Is wrapg that ourning rain.

## II. Figuratively:

1. Of the body: Producing or feeling a sencsation of bodily heat.
"Hor burning brow, or throbbing brost""

## 2. Of the heart or the emotions:

Dotaina him trom Cordella thame
3. Of the utterance of the lips, or of the perm of anything similar:
"Every burning word ho apoke" Bonlicea,
Cowper: Boal

## C. Ae substantive:

I. Ordinary Language:

1. \& 2. The act or operstion of consuming by fire, or the atate of being so consumed.

- Exod $^{\circ} \times \times 1$ burning for burning, wound for wound,

3. Fire
(Lit. or fig.)
(1) Literally:
" In litgid burnings, or on dry, to dwell,
(2) Figuratively :
"The mind surely, of itself, can foel none of the
burningz of a fever.
II. Technically:
4. Lavo:
(1) Maliciously to burn the sovereign's ahips la a highly penal offence; so also is the getting fire to a house, barn, a haystack, \&u. [Arson.] Ons can be fined even for eetting flire to furza, heath, \&c., in a forest, chass, on a common, or auy similar place.
(2) Burniog was once itself a penalty.
(a) Burning in the hand: [Brandino, Benefit of Clerav.]
(b) Burning alive: Women wers formerly burned alive for treason, as men were for the crime against nature, and noder Edward 1 . for arson. It was also the punishment during the fifteenth and sixteenth centuries for so-called heresy; the first peraon who thua auffered being Sir William Sawtre, priest of St. Osyth, London, 12th February, 1401. The cruel practice reached its consummation in Queea Mary's reign (1553-8), during three years of which 277 persons, most of them religioua
 stone: Comment., dc.)
5. Metal-working: Joining metals by meiting their adjacent edgea, or heating the adjacent edges and runuing into the intermediate space soms molten metal of the same kiod. It differs from soldering in this:-In burning a heat is required sufficient to melt the original metal, and a flux is aeldom used. In soldering a lower heat is used and a mora fusible matal employed, assisted by a flux. (Knight.)

- You are so mach the business of our moulh,

If It this aense it may have s plural.
$i^{\text {so full of buinesest . . ."-Shakerp.: ALEs }}$
3. An affair of hoourr, a duel. (Affectodly.)

4. A callng or occupation; also apecial province, sphere, or daty.
of "That great surtu or ndvant of the renses belog tot tow body."-focke notice or other the managesinent of a wine nnd sptrit burinesh
5. Legitimate occupstion.
 LEstranga.
6. That which requiras to be dona, an object. ". . a perpetusl spring wal not do their buriness; nua. - - Bemiley.
*7. Labour and endeavour.

- To drawe foik to heven by falroease,

By good ensarnple, this was hifa busynesse."
I Special phrases: Chaucer: C. T., Prologue, 320.

1. A man of business: A man naturally gifted with capacily, adaptation, and love for managing a great commercial enterprise, a department of the political goveromeut, or anything similar.
of businass in the the most. skillul debaters and men
2. To do the business for one: To kill one, destroy or ruin one, that being the most serious thing which can be done to him. (Colloquial.)
3. To have no business in a place or to do anything: To have no oceupation callimg ons thither, or no obligation or even right to do the thing.
(1) Lit.: Of persons.
(2) Fig. : Of things.
" A frowa upon the atmomphere,
That hath no burings to appear
Where akiee are line, nnd enrth gingai.
Byrron: The Pritooner of Chillon.
T (a) Crabb thus distinguishes between business, occupation, employment, engagement, and avocation: "Business accupies all a per-
8on's thoughts, as well as hia tima and powers; occuration and employment occupy only his time and atrength : the first is mostly regular, it is the ohject of our choice; the second is casual, it depends on the will of another. Engagement is a partial employment, another. Engagement is a partial employment,
avocation a particular engagement: an engagement prevents us from doing anything else; an avocation calls off or prevents us from doing what we wish. . A person who is busy has much to attend to, and attends to it cloaely: a person who is occupied has of full ahare of business without sny pressure; he is opposed to one who is idle: a person who is employed has the present moment filled up; he ia not in a state of inaction: the person who is engaged is not at liberty to be otherwise employed: bis time is not his own; he fa opposed to one st leigure."
(b) Business, trade, profession, ard art are thus discriminated: "These words are synonymous in the gense of a calling, for the purpose of s livelihood: business is general, trade and profession sre particular; all trade ia business, but all business is not trade. Buying and aeling of merchandize is inseparable from trada; but the exercise of one'a knowledge and experieacs, for purposes of gain, couatitutes a business; when learning or particular akill is required, it is a profession; sud when there is a peculisr exercise of art, it is sn art: every shop-keeper and retail dealer carries on a trade; brokers, manufacturers, bankers, and others, carry on business; clergymen, medical, or militsry mes follow a profession; musicians snd paiaters follow an art."
(c) The following ta tha diatinction between business, office, snd duty: "Business ia what
bonl, boy; port, jowl; cat, çell, cherus, çhin, bençh; go, gem; thin, this; sin, as ; expect, Xenophon, exist. -Ihg.

one prescribes to one's self ; ofice is prescribed by another; duty is prescribed or enjoined by Axed rule of propriety; mercantile concerns are the business which e man takes upon himaarelf; the management of parish concerns is self; the management of parish concerus is his inclination; the maintenance of his faraily is a duty which his conscience enjoins tpon him to perform. Business and duty are public or private; office is mostly of a public nature: a minister of state, by virtue of hia office, has always public business to perform; but men in general have only private business to transact: a minister of religion has pubiic duties to perforn in his ministerial capacity; every other mann has personal or relative duties which he is called noon to discharge according to his atation." (Crabb: Eng. Synon.)
business-like, $a$ Like bnsiness, with proper accuracy, with attention to details and a careful adaptation of means to the end simed at, onch as is seen in men expert in business, and is one of the most important elements in their success.
"There fo no oeed however, that it should diminish that atrennous avd business: wike spplication to the matter in hadd, . .- A. A. Mill: Poltitcal Pconoms (1848), vol. 1., bx. L, ch. vil., I 3, p. 125.

* bŭsk (1), * bŭske, busk'- ${ }^{\text {y }}$ " bŏsk, * busch, * busche (Eng.), "bŭsk (Scotch), (pret, buskit), v.t. \&i. [Icel. briask $=$ to prapare one's selif; from bria $=$ to $p r o p a r e$. pare one's self
[Boun.] (Skeat.)

2 Booty.
And yif it bein mair, it sall remano to bute and
partlug. - Badour: Pract, p ( 40 .

- bute, prep \& conj. [BUT.]
bute if, conj. [Bur if.]
bū'-tǒ-a, s. Named after John, Earl of Bnte (I713-92), a munificent patron of botany.]

Bot.: A genns of papilionaceous plants, consisting of trees and scandent shrubs, Butea frondosa (Downy-branehed Butea) is a large tree called in Iodia pullus, wheoce the name Plassy, the locality of the eelebrated battle on Jnoe 23, 1757, which laid the foundation of the lodian empire. It has large exillary and terminsl racemee of deep-red downy flowers, which dys cotton eloth, prevously impregnated with a solution of alum, or of alum and tartar, a fine yellow colour. They are used also as a disentient to indolent tumours. The gum-lac of commerce comes from the same tree.

- büte'-İgg, pr. par. \& \& ' 'Bute, v.]
A. As present participle: (See the verb.)
B. As substantive:

1. The act of dividing goods captured; the atate of being so divided.
prici, and ohe haff rieht that thay of gull hant to the maid
2. The goods divided.

būte'-lang, 2 [From O. Scotah bute $=1$ butt, and lang $=$ long, length.] The length or distance between one butt, used in archery, and another.

* bâte'-Lăspe, *bote'-1ĕsge, a. [Boorless.] (Morte Arthure, 9SI \& 1,014.)
* bu-ten, prep. \& adv. [A.S. buitan.] About. "Thoee buten noe long awing he dreg.", story of den. \& Exod., soa.
bä'-tënc, s. \& a. [Eng. but(yin), and -ena, a ternination used for hydrocarbons having the formula $\mathrm{CnH}_{\mathrm{s}}{ }^{\prime} \mathrm{n}^{2}$.]
A. As substantive:

Chem.: An organic, diatomic, fatty radical, $\mathrm{C}_{4} \mathrm{H}_{8}{ }^{\text {" }}$, called also Butyiene, Quartene, and Tetrene. There are three modifications of it having the formula $\mathrm{C}_{4} \mathrm{H}_{8}$ Normal Butene, $\mathrm{CH}_{3}-\mathrm{CH}_{2}-\mathrm{CH}=\mathrm{CH}_{2}$ : Pseudo - bntene, $\mathrm{CH}_{3}-\mathrm{CH}=\mathrm{CH}-\mathrm{CH}_{2}$; Iso-butene,
$\xrightarrow[\mathrm{H}_{3} \mathrm{C}]{\mathrm{H}^{2}}>\mathrm{C}=\mathrm{CH}_{2}$
Normal-butens is produced by the action of alcoholic potash on primary-butyl-iodide $\left(\mathrm{CH}_{3}-\mathrm{CH}_{2}-\mathrm{CH}_{2}-\mathrm{CH}_{2} \mathrm{I}\right.$.), or by the action of zinc ethide $\mathrm{Zn}\left(\mathrm{C}_{2} \mathrm{H}_{\mathrm{H}}\right)_{2}$ on brom-ethene $\left(\mathrm{CH}_{2}=\mathrm{CHBr}\right)$. It is a gas at ordinary temperatures ; at $10^{\circ}$ it is condensed into a liquid.
Pseudo-butene is formed by the aetion of alcoholie potash on a peeudo-batyl-iodide $\left(\mathrm{CH}_{3}-\mathrm{CH}_{2}-\mathrm{CHI}-\mathrm{CH}_{3}\right.$ ). It boils at $8^{\circ}$. It can also be obtained by the decomposition of can also be obtained by

Iso-butene is formed by the action of alcoholie potash and tertiary-butyl-iodide, or by the electrolysis of isovaleric acid. It boils at $6^{\circ}$ It is absorbed by strong $\mathrm{H}_{2} \mathrm{SO}_{4}$; on dilnting with water and distilling, tertiary butyl-alcohol is obtained, $\mathrm{C}\left(\mathrm{CH}_{3}\right)_{3} \mathrm{OH}$. The di-bromides of the three isomeric butenes, $\mathrm{C}_{4} \mathrm{H}_{8} \mathrm{Br} 2$, boilnormsl at $160^{\circ}$, iso at $159^{\circ}$, snd pseudo at $149^{\circ}$.
B. As adjective: (See the compound.)
butene glycols, s. pl. Chemical compoands, $\mathrm{C}_{4} \mathrm{H}_{8}(\mathrm{OH})_{2}$, called also butylene alcohols and quartene alcohols. They are diatomic alcohols. Six are theoretically possible. The following have been examined :-1. Normal Butene Glycol:
$\mathrm{CH}_{3}-\mathrm{CH}(\mathrm{OH})-\mathrm{CH}_{2}-\mathrm{CH}_{2}(\mathrm{OH})$. Formed by leaving a cold mixture of acetic aldehyde and dilute hydrochloric acid for a few days, when sldol, the gldehyde of butene glycol, is formed; this is treated with sodium smal gam. It is a thiek liquid, boiling at $204^{\circ}$. By oxidating with chromic acid mixture it is eonverted, tirst into crotonie aldehyde, then into acetic and oxalic acids.
2. Ethyl Glycol:
$\mathrm{CH}_{3}-\mathrm{CH}_{2}-\mathrm{CH}(\mathrm{OH})-\mathrm{CH}_{2}(\mathrm{OH})$, obtained from normal butene bromide by saporification with scaustie potash. It is a viscid liquid, boiling at $192^{\circ}$. By rapid oxidation it is converted into oxalie acid, but by dilute nitrie acid into glycollie and glyoxylic acids.
3. Isobutene Glycol: $\mathrm{H}_{3} \mathrm{C}>\mathrm{C}(\mathrm{Oll})-\mathrm{CH}_{2}(\mathrm{OH})$, or dimethyl glycol. It is prepared by heating isobutene impensore for several days with potassium carbonate. It hoils at 178. Oxi dised by jotassium permanganate into carbonic and acetic acid.

Ornith: A genus of raptorial hirds, the typieal one of the sub-family Buteonina. There ars two British species, Buteo fuscus, the Brown or Common Buzzard, and B. Legopus, the Rough-legged Buzzard. [Buzzard.]
 buzzerd, and f. pl. suff. -ino.]
Orwith.: A sub-family of Falconide, containing the Buzzards. It is placed near the Aqutine (Eagles), and has a remote affloity to the Vulturidæ (Vultures). [Buzzand.]
bu-tē'-ó-nine, a. [Buteoninfe] Pertainigg to, or resembling the Buzzards.

bŭt'-mĕnt, s. [Contr. from Eng. abutment (q.v.).]

Architecture:

1. The buttress of sn arch; the supporter, i.e., the part whieh joids it to the upright pier. [Abutment.]
2. The mass of stonework at the extremities of a bridge to give lateral support to its arches, or support to the ends of the beams if the bridge be a woodeo one.

## butment-cheek, s.

Carp.: The part of a mortised timber surrounding the mortise, and agaiost which the shoulders of the tenoa beai:
bū-tō-mā-çĕ-æ, s, pl. [From Mod. Lst. butomas (q.v.), and fem. pL. suff. -acew.]

Bot.: Butomads, an order of plants placed by Dr. Lindley under his seventeenth or Alismal alliance. The sepals are three, generally herb aceous. The petals are three, coloured, and petaloid, being generally purple or yellow The fiowers are in umbela. There are three six, or more ovaries distinct, or united intos single mass. The seeds are numerous and minnte. The leaves, which are very cellular, have parallel veins, and often a milky juice. The species are found in marahes in Europe aod in tropical America. In 1845 Dr. Lindley estimated their number at seven, in four gevera.
bū'-tôm-ads, s, pl. [From Mod. Lat. butomus (q.v.), and Eng. pl. suff. -ads.]

Bot.: Lindley's name for the order Butomacese (q.v.).
bū'-tom-ŭx, s. IIn Fr. butome; Sp. \& Ital. butomo; Gr. Boivouos (boutomos) ; Boirouov
(boutomon); from Bovs (bous) $=$ an ox, and (boutomon) ; from $\beta$ ovs (bous) $=$ an ox, and
rijvw (temns) $x$ to ent. So called because the gharp leaves cut the mouths of oxea which feed upon them.]

Rot: Flowering-rush, formerly called also Water-gladiole, or Grassy-rush. A genas of plants, the typical one of the order Butomaces. It has nine stamens, e very nusual nomber, and six capsules. Butomus umbeh lattes, or Common Fioweriag-rush, is wild in ditches and poads in England and Ireland. It is a highly ornamental plant, with the It is a highly ornamental plant, with tha leaves, which are all radicsl, two or thre seat
long, and an umbel of many rose-coloured lowers.
bŭtt (1), bŭt, s. \& a. [Fr. bout; O. Fr. bot $=$ n ead.
A. As substantive:
I. Ord. Lang.: The end, the furthest limit of anything.
II. Technically:

1. Tools, weapons, dc.
(I) Gen.: Tha hinder, larger, or blunter end of an object ; ss of a gun, s connecting. rod, a crow-bar, \&'e
(2) Spec.: The shouider-end of a gun-stock covered with a heel-plate.
2. Tanning, dc.:
(1) The thick part of an ox-hide.
(2) PL (butts): Those parts of the tanned hidea of horses which are uader the crupper. (Jamieson.)
B. Ab adjective: (See the compound.)
butt-end, s. [But-ENd.]
bŭtt (2), s. in compos. [From butt (1), v. = to s.but.] An abuttal.

I Butts and bounds: The abuttals and boundaries of land. (Holloway.)
$\because$ But or bertel or bysselle (bervell, P.J Weta."-

1. Joinery, \&c.
(1) Tha ead of a connecting-rod against which the boxing is attached by the atsap, cotter, and gib.
(2) The end of an object where it comes quarely against another.
(3) A joint where the ends of two objects come squarely together without acarfing or chamfering.
2. Shipbuilding: The meeling-joint of two planks in a strake. The joint between two atrakes is a seam.
3. Door-hinges: A form of door-hinge which screws to the edge of a door, and butts against the casing instead of extending along the face of a donr, tike the strsp-hinge. It consists of two oblong plates, one edge of each of which is dentated to fit its fellow, a pintle traversing each interlocking portion to form a joint. [Butt-hinge.]
4. Fire-engines: The standing portion of a half-coupling at the end of a hose.

## butt-chain, s.

Saddlery: A ahort chain which reaches from the leather-tug to the siagle-tree, to sach of which it is hooked.
butt-hinge, but-hinge, s. A hinge formed of two platea and interiockiug projecting pleces which are convected by a pintle.

## butt-howel, s.

Coopering: A howeling-adze used by coopers.

## butt-joint, 8

Carp: A joint in which the piecea come quare againgt each other, endwise. In ironwork the parts are welded, and the term is used iu contradistioction to a lap-joint or weld.

## butt-weld, 8

Forging: A weld in which the edgea are quare-butted and jammed against each other, and then welded; a jump-weld.
büt (3), z. \& a [From Fr. but = a butt, a mark, aim, a laughing-atock ; butte $=$ a hillock, mark, e mound of earth, point, aim, goal, butt.]
A. As substantive:
L. Ordinary Language:

1. A place or person almed atw
(1) Lit.: A place on which a mark if placed to be shot at, a target. [11., 1.]
I Often in the pinral, refarring to a line of marks to be aimed at rather than a aingla obe.

TA butts length: The diatance at which the butt is from the person aiming at it.
(2) Figuratively:
(a) A place which one aima at reaching.

- Here lis my formery'a end, here is my huth

(b) A person or persons viawed as an object for \&ugry attack, or for ridicule.
"TThe paphle were the most common-place and the
Suts
Gugale whe whom all the arrowa were directed."-
"Finds thee, st beet, the butt to crack hit jokeon".

2. Ground appropriated for practising urchery. (Scotch.)
3. A plece of ground whlch in ploughing does not form a proper ridga, hut is excluded at. an angle; a piece of land in any way disjoined from the rest. (Scotch.)
Hysod in the the other called the Guthor of had of the mame or enuth end thereot "- 40 Chas 11 (ed 1814 ) vili. 283 ,
I Hence a small piace of land is nometimes called tha butta. (Jamieson.)
II. Technically:

Rifte and Arsillery Practics:

1. A target.
2. A wooden structure, conslating of several thicknesses of boards, separated by amail intervala, for the purpese of sacertaining tha depth of penetration of bullets.
3. A frame of iron and wood, representing a large section of armour-plating, and moored in position for determining the deatructive power of shot, sheli, and given charges of powder.
4. A mound of earth to receive the bulleta In the proof of gun-barrels. (Knight.)
B. As adj.: (Sea the compounds.)

- butt-shaft, but-shaft, \& A kind of arrow, used for shooting at but's; formed without a barb, so ss to stick into the butta, and yet be easily extracted. (Nares.)
"The very plo of his heart cieft with the hliod bow-
"Cupides sutt-shaft is too hard tor Hercules" clobs"
-Shaketp: Lovet Labour Lort, in 2.
bŭtt (t), s. [From butt (I), v. = to kitrike ss a ram does; Fr. botte $=$ a blow in fencing with a foil or aword; Sp . \& Port. bote $=$ a thrust, a blow, a rebound; Ital. botta, botto $=\mathrm{a}$ blow, a stroke.]
I. Ordinary Language:

1. The act or operation of aiming a blow.
2. A blow given by a ram, or other animal, with its forehead.
*II. Fencing: A stroke given in fencing. "II dleputes arise Araong the chanppons for the prive. To prove who gave the fairer butt
bŭtt (5), s. [Fr. botte $=$ boot, a veasel, a butt; O. Fr. bout, bous, bouz; Sp. bota $=$ a leather bottle, a butt, a boot; I Itai. botte = a cask, a vessel, a boot.] [Boor, ह.]

"Boture (botyr, x) Buetrum"-Frompl Fars.
(2) The butter of Scripture: In moat case curded or inspiasated milk.
"und ho took ourceor, and milk, and the oult which
ho had dremed, and met it belare them..." Gem xvili. \&
2. Fig.: A substance resembling butter in consietency, or in any other obvious quality. [II. 2.]
II. Technically:
3. Dairy-work, Comm, da: The fatty portion of milk or cream solidified by churning. In the making of butter, tha cream is collected from tima to time and kept in covered jars. When a sufficient quantity of cream has been ohtained, it is transferred to s chura, or other ouitable epparstus, and kept constantly agitated, untii tha butter forms. In order to preaerva tha flavour and colour, it is important that tha agitation ahould be as regular as possibie, and that the temperature in the churn ahould never axceed $64^{\circ}$ Fahr. As a00n as tha chorning is faished, tha butter is thoroughiy washed with cold water to free it thom tha adheriag butter-milk, and a amall from the adhering butter-mili, and a salt, not axceeding 2 per cent., is worked lato it.
Pure butter ahould consiat entlrely of milk fat, with a amall and variable quantity of water; but in the process of manufacture it is found impossihla to excluda altogether the other constituents of the milk. We find therefore, in geauine butter, from 0.8 to 20 per cent. of casein, or curd, and a trace of per milk gugar. Tha "fat" of butter consists of the giycerides of the lasoluble fatty acidsstearic, palmitic, and oleic-in comblastion with from 5 to 7 per cent. of the glycerides of the soluble or volatile fatty acids, principally bntyric. The characteristic taste and emell of bntter are chiefly dua to the presence of these butter are chis
For mony years it was held by chemists of cousiderable repute that milk fat was eimilar in avery reapect to pure beef and mutton fats, and that there were no meana of datecting foreigu fat, when added to butter. This diflcuity is now overcome, and detection of much adnlterations can be tasily mada.
Butter making in the United Statel ham of recent years leen iargely performed in creameries, or butter factories, each of which nsee the naterial oupplied by a conslderabla number of farms. These were instituted to overcome the difficulty of obtainiag good resulte in small eatablidhments, and their realits have been excellent. By enuploying the co-operative principle farmers are enabled to employ the best trained and most akillful operators, and to introduce the beat machinery and other appllances, the purpose being to keep the product up to a unifurmly high staudard, the outpo of a well-conducted creaniery, whea once well known, securlag a price above that of ordinary farm-made butter. Another part of the worl of many of the creameries fo tha conversion of skium milk into cheese, some pure oll being first added to make up for the ioss of the butter fat. Of late years the American creamery eyatem has been introduced into Britain and Ireland, with a coasiderabla improvement the quality of the butter produced. Ceutrif ugal separators are used, as in Anerica, to rebove the cream from the milk as soon as possible, the ekim milk being sold while atill pweet and fresh.

Batter is an articis of food very frequently anitarated, the chief adulterants being water, curd, and prepared snimai fsts. The quantity of water in butter should never exceed 15 per cent. In some cases as much as 30 per cent. has been found. Curd is used in somes parts of Irelend to increase the bulk and weight of the butter; any excess above 4 per cent. should be considered an sdulteration. Animal fsts, as the fat of beef, mutton, and pork, are prepsred ou a lsrge scale, and extensively sold and eateu uader the names of "butterine,"" oleo-margarine," \&c. These are frequently added to butter to the extent of from 50 to 70 per cent. [Betrerine.] So long as the fsts nsed are pure and good, mod the puras thesers know thst they are not buying butter, chasers knowre of butter and fat, there csn be but a mixture of butter and wat, thers misture mo objection to its sale ; but when nuis butter is sold as genuine hatter, st \& genuins batter
price, the seller renders himself justly lisble price, the seller renders himself justly lisble quantity of common salt is soraetimea added to butter for the purpose of ceusing it to sbsorb and hold more water. Fresh butter should nct contain more thsn 2 per cent. of sait, whilst salt hutter should never exceed 6 per cent.
2. Botany:

Butter and eggs: Several plants, the flowere of which are of two shsdes of yellow ; spec., (1) Narcissus pseudonarcissus; (2) $N$. incomparabilis; (3) N. biforus; (4) N. poeticus; (5)
the double-flowered variety of N. aurantius; the double-flowered variety of N. aurantius;

butter-print, a A piece of carved wood, nsed to mark butter. It is called also a BuTtER-STAMP
butter-sootch, e. A eort of oleaginous taffy.
butter-stamp, s. The aame as Butreaprint (q.v.).
butter-tongs, s. An implement for cutting and transterring pieces of butter.

+ butter-tooth, s. An incisor tooth

## butter-tree, s.

Bot.: A name given to several trees belonging to the order Sapotacee.

1. Indisn Butter-tree (Bassia butyracea). It is called also the Phulwsra. It is a native of Nepaul and the Almorah hilis. A white fitty substance is pressed from its seeds. It can be burnt, mskes good soap, and is used to edultsrats ghee, to dress the hair, and as an applicstion in rheumatism. The juice of the flowsre turnishes a kind of sugar.
2. The Arrican Butter-tres, or Shea-tree (Bassia Parkii). It produces the galam-butter mentioned by Mungo Park. The "butter" is a white fatty substsnce extracted from the seeds by boiling them in water. It is an important article of commerce st Sierra Leone.

## butte-worker, \&

Agric: : An implement for pressing and rolling butter to fres it of the buttermilk. It msy be a fluted roller working in a bowi or on a board, or a conical roller on a slanting board, which permits the buttermilk to run off. (Knight.)
bŭt'-tẽr (2), s. [Bittern.] (Scotch.) (Jamieson.)
butter-bump,s. The bittern. (Johnsom.)
bŭt'tẽr (3), s. [BuTt, v.]
Wood-working: A machine for sawing off the ends of bosrds, to render them square and to remove fsulty portions.
bŭt'-tẽr, v.t. [From Eng. butter, e. (q.v.). In Ger, buttern; Fr. beurrer.]
I. Ordinary Language:

1. Lit.: To spread with butter.
2. Figuratively :
(1) With "bread" for the object: To riske sny thing in one's lot more palstable.

T To butter both sides of one's bread: To sttempt to obtain sdvautages from more sides thsm one.
"Upon all topics; 'twas, besides, his bread,
Byron: The Fifion of Judgment, os.
(2) With a person for the object: To flatter, to coax. (Vulgar.)
*II. Gaming: To increase the staken every throw or svery game. ( $A$ cant term.) (Johnson.) [Buttering.]

- bŭt'-tẽr-ạ̧ed, a. [BUTTRESSED.]

Imbattalled, vaulted, and chareroofed, euficiently butteraced: . "-A Journey through England (1724). (Hallivedl: Contrib, to Lexicog.)
bǔt'-tẽr-cŭp, bŭt'-tẽr-cŭps, s. [Eng. butter: cup.] [BUTTERFLOWER.] A hain given to the Rauunculus genus, sad specially to Ranunculus acris, R. bulbosus, $\boldsymbol{R}_{0}$ tepens,
$\boldsymbol{R}$. Ficaria, sad R. auricomus. (Britten \& R. Ficaria,
Holland, de.)

Water Buttercup: Two plants, (I) Ranunculus aquatilis, (2) Caltha palustris.
bŭt'-tẽr-flǐp, s. [Second element doubtifui.] A local nane for the Avocet (q.v.)
bŭt'-tẽr-flow-ẽr, B. [Eng. butter; flower. so called, spparentiy, because the common people thought that the yeliow colour of butter srose from the cattle eating these plants, which they never do. (Curtis.)]

1. Gen. : Thessme as buttercup; the popular Engiish nsme of the plants belonging to tbe genus Ranunculus.
2. Specially:
(1) One of the names popularly given to a plant, the Ranunculus bulbosus, or Buibous Crow-foot It is called also Buttercups, King's-cupe, and, by Shakespeare, Cuckoo-buds or Jellow hue. It flowers in Msy, snd msy identified by observing that the segments of its calyx are reflexed, whereas in R. repens,
often confonded with it, they are tolerably erect

(2) Ranunculus acris
(3) R. repens.
(4) R. Ficaria.
(5) R. auricomue

Great Butterfonoer: A ranunculaceons plant (Callha palustris).
bǔt'-tẽr-fī̀, "bưt'-tẽr-fiie, "bot-ur-fiye, 8. \& a. [Eng. butter; Aly; A.S. buter-hege (Somner) ; buttor-feoge; Dut. boter-viliga (Skeat); Gar. butterfiege. Why so called la not certain. It may be from appearing at the begianing of the sesson for hntter, or because some species are yellow, or because the droppings of soms are butter-llke.]
A. As substantive:
I. Ondinary Language :

1. Lit. : In the same sense as 11 .
2. Fig.: a pereon who is dressed attrootively, but la shallow in intellect and of no perceptible use to soclety.

II. Entom. : The English asme for any species of the Diurnal Lepidoptara, or Rhopslocera. The antenne end in a club; the wings in rapose are generally quits upright, and there are no bristles on the hinder pair. They fly by dey, whilst their slliea the Hswk-moths do so by twilight, snd the Moths by night Before coming to the perfect state they exist firat as the caterpillar, and afterwards in the chrysalis stste. Butterflies exist in all climstes excep staste. marted by extreme cold; the tropica those sre howeva most pumerous, besides species sro, hoost in size and is as, rule the being the lirgest in size and, as a rule, the brightest in colouriag. The Butterfies, or
Diurual Lepidoptera, are divided into lour Diuruai Lepidoptera, are divided into fsmilies: Pspilionidæ, Nymphsidæ, Lycenifsmilies : Papilionidæ, N
dæ, and Hesperidæ (q.v.).
B. As adj. : (See the compounds).
butterfly-cock, a. A valve having two semicirculsr wings pivoted on a centrsl cross. bar. A butterfiy-vslve.
butterfly-fish, [Nsined from the colour.] A name for a tish, the Ocelisted Blenny (Blennius ocellaris). It has the dorsa fin bilobate. Its snterior lobe is elevated and marked with s rouad and bisck spot, sur-
rounded with ${ }^{2}$ white circle snd a black one. It is found in our seas.
butterfly-net, s. A net of very fag ganze, sttached to $s$ hsndle, and used by ento mologists for capturing butterfijes, moths, de.

## butterfly-nut, 3

Mach. : A nut having two wings sttsched so that it may be easily turned by hsnd.

## butterfiy-orchis, s.

Bot. : A common book-nams for two varie ties of orchis, viz. (I) Habenaria chlorantha; (2) Habenaria bifolia.

## butterfiy-plant, s.

Botany:

1. The nsme of an Orchid (Oncidium papilio) brought from Trinidad. It is so called because its large yellow and red blossoms, poised on slender footstalks so as to vibrats with every bresth of wind that blows, resemble butterflies hovering on the wing.
2. The Indian Butterfly Plsint, Phatenopsis amabilis of Lindley, not of Blume, is another Orchid. It is a very besutiful epiphyte.

## butterfly-shaped, $a$.

Bot. : Somewhst resembling the uspect o: butterfly on the wing. Used especislly of the corolla, in what hsve been called, from tha sams circumstance, pspilionscsons flowera, [Papilionaceous.]
butterfly-shell, s. Any shell of the genus Voiuta.
butterfiy-valve, s. $A$ double clackvalve, each leaf of which is hinged to a bar crossing the passage-way. Theresre buttsrlfy pump-vslves and butterfly throttle-valves.
butterfly-weed, s. A plant (Asclepias tuberosa).
bŭt'-tẽr-ine, s. [From Eng. butter, and suf. -ine.] A substance prepared in imitstion of
bntter fram animal or vegetable fats. The fat ia first freed from all impuritles, snd by heat converted into olein. The olein is then tranaferred to a churn containing \& amall quantity of milk, and churned into ontterine. Lastly, it ia coloured, in iraitation of butter. Freshly prepared, it is aweet and palatable, and when apread on bread or cold toast, is lut slightly inferior to a fair quality batter. Butterine is importad into this country under Butterine is imported into this conntry under various names, "Oleomargarine," "Oleina butter," "Normandy Oleine butter," \&e. It is frequently
[Maroanine.]
Which no there wat enamufactory ior 'sueterine,' Which no wooner got into the shope
bŭt'-tẽr-1ั! pr. par. \& \&. [BOTTER, $v_{1}$ ]
A. As present participle: (Ses the verb.) "It io a inne simile in orue of Mr. Cuogreve's pro-
Iogues, Which comparea writer to a butering gaue-

B, Ads substantive: Flattery. (Scotch.)
bǔt'-těr-1s, s. [From Fr. beutoir =a too] used by curriers and farriers; Prov. boutetan (?).]
Farriery: A knife with s bent ahank, used by blacksmiths to pare the hoofs of horses. It has a blade like a chisel, and is operated by \& thrust movement, the handle resting against the shoulder.
bŭt'-tẽr-mann, s. [Eag. butter; man.] A man who sella butter
bŭt'-tẽr-milk, s. [Eng. outter: milk. In Ger. buftermilch.] That part of the milk which remaina when the butter is extracted. "A poung ran, fallem into an nieerons conmucmption,
buttermilk ore, s.
Min. : Dana"a rendering of the German term Suttermilcherz, a mineral, the sama as Cerar. gyrite (q.v.).
bŭt゙-tẽr-nŭt, s. [Eng. butter: 刀ut.] The English name of a North Amertcan tree, called also the Oil-nut and the White Walnut. It ia the Juglana cinerea. It has oblong, lanceolate, serrate leaflets, downy beneath. The petiolea are viscid and the fruit oblong ovate, It grows to tha leight of thirty feet The North Amejican Indians uae the uuts as cathartics.
bŭt-tẽr-wēed, s. [Eng. butter; weed.] A composite plant, Erigeron canadensis.
bŭt'tèr-wife, s. [Eng. butter; wife.] A woman who seils butter. [Burrenwomas.] "Divers of the quoen", and the mid ducheaniz iniodred ond servanta, and a outterwife, were indicted of mis.
prision of troason, ...
Hen. VIII, p 4 iS .
bŭt-tẽr-wom-an, s. [Eng. butler: 2noman.] A woman who sellis butter. [BuTtenwife] "Tougue I must put you Into a buter-woman's bht'-tẽr-wört, a. [From Eng. butter, A.S. butere, and A.S. wyrt = wort, an herb, a plant. The leavea coagulate milk, like rennet.] Botany:

1. Sing.: The Engliah neme of Pinguicula, a genus of plauts constituting the typical one of the order Lentibulariaces (Butterworts). The Common Butterwort has the leavea, which are thick and greasy to the touch, all radical. The flowers are in single-ftowered scapes, purple in colour, with a spur. The capsule is one-celled. Common in Scotland, $l e s s ~ 80$ in England. There are three other British species of the genus, the Large-flowered (Pinguicula grandifora), the Alpiue (P. alpina), and the Pale ( $P$. lusitanica). The alpine one has yellowish flowers.
2. Plur.: Lindley'a nama for the order Len. tibulariaces. The type ia Pinguicula. [See I.]
bŭt'-tẽr-y̆, a. \& s. [Eng, butter; -y.]

## A. As adjective:

1. Having the appearance of butter.
2. Possosaing the qualities of butter.
"Nothing more convertible into hot cholerick humours than ith bustery parts,"-Harvey.
B. As substartive:
3. A room in which butter, milk, \&c, are sept ; a pantry.
4. The room in which provisions are kept (Now chiefly at oolleges, in the universities.)

#  

bŭt'ting , " but-tínge, pr, nar. \& \& , [Butr, ${ }^{\text {v. }}$.
A. Ae pr. par. : (See the verb.)
B. As subst. : The act of striking.
"Buttingo with eharpe aperse."-Haveloh, 2 gab

## butting-joint, 2.

Carp.: The same as butt-joint (q.v.,

## butting-machine,

Machinery: A machine having planingcuttera on the face of a disc-wheel, and used for smoothing, cornering, or rounding the ends of joists or amall timbers used in the frames of agricultural implements, ete. The stuff is laid alongside the fence or garge, and is fed np endwise to the cutter. (Kaight)

## butting-ring, \&

Vehtcles: A collar on the axde against whioh the bub butts, and which limits the inward movernent of tha wheel, as the linch-pin or axle-put does the outward.
butting-saw. \& cross-cut saw attached to a atock at ona end, and used for butting logs on the carriage of a saw-mill.

- bưtt-nēr-I-a, s. [Byteneria.]

bŭt'-totck, " bŭt-tocke, "bŭt-tokc, " bŭt'-
toke ${ }^{2}$ bot-tok, ${ }^{2}$ bot-ok, \& \& a [From Eng. butt (1), a., and dimin. suff -ock.]
A. As substantive:

1. Ord. Lang. (generally in the pl. buttocks): The ramp, the protuberant part behind.
"The tail of a fox was bever made for the buttoctan of
2. Shipbuitding: The rounded-1n, overhanging part on each aida and in front of the rudder; terminating beneath by merging into the ren.
B. As adj. : (See the compounds.)
bnttock-lines, s.ph. The curves shown by a vertical longitudinal section of the after-part of a ahip's hull, parallel to the keel. A similar section forward exhibits the bow-linea, and \& continuous section through the whole length of the ahip the buttock and bow-lines.

- buttock-mail, s. A fine imposed on any one convicted of formication, in lien ot his sitting on the stool of repentance. (Scotch)
- Scoit: yer buteock-math, and yer stool or repentance."
bŭt'-tōcked, "bŭt'-tôckr, o. !Eng, buttock; ed.]

In compos.: Having buttocks of a particular type.

bŭt-tồn, * bot-bnm, "bot-on, * bot-vn, *bot-wyn, bot-wn, "bot-un, s. \& a. tFrom Fr. bouton $=a$ bud, a button (Littre); Norm. Fs., Prov. \& Sp. boton; Port. betão; Ital. bottone. Cf. Gael. (from Eng.) puian; Wel. botwom. From Fr. bouter $=$ to put forth, to throst.!
A. As substantive :
$\dagger$ 1. A bud, spec., a amall bud.
"The canker gelle the finfanis of the epring
Too oft before their Bratons be disclosed, I.
*Fratr from ita humble bed I reared this Aow'r.

Bright with the gilded buton tipt ter head."
Pope: Duncind, iv
2. A knob or protuberance fastened to another body.
(I) Gen.: In the foregoing aense.

WWe fastenod to the marble certain wirou, and a
bution
(2) Specially:
(a) A knob on a cap. (Lit. \& fig.) (In the case of Chinese mandarins rank is denoted by the material of which the button is composed.) Shakesp.: furtumiet, cap wo nre not the very button."-
(b) A catch to fasten the dreas. It fite into a bitton-hole. [11., 1.]
 fars.
"Pray your, undo thlo button." $\begin{gathered}\text { Shakesp. King Lear, v. \& }\end{gathered}$
(c) The nexpanded head of a mushronm.

TI Not worth a button: Not of any value.

## And once but thate of the Welse mutton, <br> Wu's Recroactome 140

†3. A name for the sea-urchin (Echinus). II. Techntcally:

1. Button-manufacture: A small circolar disk or knob of mother-or-pearl, hora, metal, or other materisl, With a shank for attachment to an object, and made to it into a hole formed in another one for ita reception, the two fastening tha objects together. Its chlef use is to unite portions of a dress together. The ancient method of fastening dressea was by means of pins, brooches, buckles, and tle-strings. Buttons of brass are found on dresses of the 18th eentury. The metallic batton manufacture of England arose in 1670 , and in 1687 becanue locsted specially in Birmingham. Gllt bottons were first made in I768, and others of pspier máché in I778.
2. Carpentry, ico:
(1) A small plece of wood or metal, ewivelled by a acrew throngh the middle, and used as a fastening for a door or gata.
(2) A knob on a sliding bolt
3. Metallurgy: A globale of metal remaining in the cupel after fusion.
4. Harness. The button of the reins or bridle: A leathern ring with tha reins passed through which runs along the length of the reins.
5. Music:
(1) Of an organ: A amall ronnd piece of leather which, when screwed on the tapped wire of a tracker, preventa it from jumping out of place. (Stainer \& Barrett.)
(2) Of an accordion: One of the keys of the firat-1nade accordions. (Stainer a Barrett.)
B. As adj. : (See the sabjoined compounds.)
button-and-loop, button and

## loop, 8.

Naut. : A short piece of rope, hsving st one end \& walnut knotb crowned, and st the other end an bye. It is used as a becket to contlne ropes in. (Oyilvie.)
button-blank, s. A circuiar blank cut out of any material sad designed to be fabricated into a button
button-brace, s. A tool for making buttons. The handla is like the common brace; the bit has cutters, but no router, and ramoves a circular blank or planchet of bone, pearl, wood, or whatever the matcrial may be; an annular bit operating like \& crown-saw or trephine. (Knight.)
button-bung, s. [From Eng. button, and bung = a cant tern for a pockat or purse.] A stealer of buttons. ( $A n A g e$ for $A$ pes.)

* button-bur, s. A plant-Xanatum Strumarium (Johnson: Mercurius Botunious)
button-bush, s. The Cephatanthus oceidentalis, a plant belonging to the order Cin chonacese (Cinchonads). It ia a buahy abrub with leaves either simply oppoaite or in whorls of threo, aud yellowish-white flowers is globular heads.
button-fiower, s. The English name of Gomphia, a genus of plants belonging to the order Ochnacese (Ochnads). It has very beantiful flowers, with aerrsted, shining leavea and long spikes of brilliant yellow flowers. Two apecies have been introduced from Jaruaica
button-hold, v.t. To hold by the batton, so as to detain; hence to detaln (a persod against his will) in conversation.
button-holdcr, s. One who detaina another in conversation against hia will
button-holo, s. [Butroniole.]
button-hook, s. A hook for grasping a hntton lelow the head, in order to draw it through the button-hule and fasten it.
button-key, so A spring loop, the free ends of which, bcing passed through the slaank of a button, expand so as to hold the loop in joaition and keep the button in place A piece of coiled wire, making two or more turns, ia also used for thia purpose. It is called also a button-fustener.
button-latho, 2. A machine for cutting round disca from plates of horn, boue, 1 vory, wood, mother-of-pearl, \&c.

## button-loom, s.

Weaving: A loom for weaviog botton-blank coverings.

Datton-mould; A Adtas of bone, wood, or metal, to be covered With fobrio to form $a$ button.

Dutton-riveting, $a$. Riveting, or deugned to rivet, a button.

Button-riveting machine: A tool for fastaning buttons to garmente by swagging dowa ou the back of the washer the end of the rivet which forms the shank of the butten.
button-tool, s. A tool for cutting out buttons or circular blanks for them.

## button-tree, 8.

Bot. : The Engliah name of Cooocarpus, 8 genus of plants belonging to the order Combretaceme (Myrobaians). The species are trees or shrabs from the tropics of both hemispheres.

## Duttem-weed, e.

## Botany:

1. The Engilsh nems of Spermacoce, genus of plants belonging to the order Cinchonocea (Cinchonads). The specles are inconspicuous weeds, growing in cultivated grounds in the East and West Indies, dic.
2. An American name for Diodia, also a Cinchonad.
button-wood, s.
3. The Cephalanthus occidentalis. [BurronBUsh.]
4. An American name for the genus Piatanus, contalning the true plane-trees.

Düt'-ton (1), bŭt'-tĕn, v.t. [From Eng. bulton, a. (q.v.). In Gael. (from Eng. ?) putanaich; Fr. bontonner; Su, abolonar; Port. abotoar; Ital. abbottonare.]
A. Transitive:
L. Literally:

1. To fix with a batton, or with a row of buttons; having the cost buttoned.
"An housat man, cloce button'd to the chin."
2. To drese, to ciothe.
"Ho gare bin logs, arm, and breent to his ordinary
II Figurativety:
$\dagger$ 1. To fasten around as with buttone
II Sometimes it is followed by up.
"One whoee hard heart is buccorid'd up With etele.",
Shabesp: Oomedy of Rrrors, iv,
$\dagger$ 2. To gather one's thoughts together; to place defences in front of or aronnd one.
I Sometimes it is used reflexively.
$\square$. the frrst mad paroxyorn past, our brave Gneschen eollected his diangmbered phillosopbles, and bick il., ch. vL
Mit'-tha (2), v.t. \& i. [BuTr (1), v.] To drive or cast forth.
"IActton or casto forthe foath P.) Pello."-Prompt.
Mit'toned, -bǔt'-tĕned, pa. par. \& a. [BuTron, v.t.]
Dtet'-ton-hole, s. \& an [Eng. button; hole.]
A. As substantive:
I. Ord Lang.: A hole, elit, or loop made in the dress for ths reception of s button.
"Without hlack relvet breechos what is man!
I will my oill in but tonhooza dipylay." Bramseon
IT To take a buttonhole lower: To humbie, to whe the conceit out of.
" Lot mo take you a buttonhols lonoer."
3. Hort. : A mall bouquet of flowers dedened to be worn in s buttonhole.
buttonhole-cutter, s. A device on the shears principle, specialiy adapted for cutting battonholes.
battonhole sewing-machine, s. A wowing-machine specially adapted for working bnttonholes.
buttonhole - shears, s. A pair of acissors having an sdjustabiity for length of
ȟt'-tôn-hōle, v.i. \& t. [Butroniole, s.] A. Intrane. : To make buttonboles.
B. Transitive:
4. To sew (a garment or material) with battonhole stitches.
5. To button-hold (q.v.).
băt-tour (tour es tûr), s. [Botauros, Bitrers.] A bird, the Bittern (Ardea stellaris).

## butt'-tręss * buit-tèr-čese * brit'-zasce,

*Bŏt'-ër-age, "bŏt'-ër-as, 2. [O. Fr. bouterez, pl. of boicteret $=8$ prop, cog. with Fr. bouter $=$ to thrust, to prop.]
I Ordinary Language:

1. Lit.: In the same sense as II. 1, the word being properly s technical ons.
pollus, fultura of Proma Nathinit, murthoula, mert
When suttreno and buctreses, alternately,
Beem framol of ebou and vory. Nincrel, ii. 1.
2. Fig. : Legal, moral, or any other support or prop to thst which without it would be deflcient in stability.
"It will concern ua to examine the force of thisplem, Whioh our ndverarios aro still setting uy geatiat us, of the ground pillar and bustrece of the grood old caseo

## II. Technically:

1. Arch.: A pier or lean-to pillar on the exterior of a wall, to ensble it to withstand an intarior thrust, as in the case of a retaining or breast wall.
If Fiying Buttress: A buttress which is in

flyino buttresses (st. ailete carn).
the form of a aection of an arch, springing from a wail or piltiar.
2. Fortif.: A counterfort or sustaining wall or pillar, buit against and at right angles to the wall to which it forms a revetnent. [CuUnterfort.]
bŭt'-trěss, v.t. [From buttress, s. (q.v.).] To support by a buttress, to prop. (Lit. \& ftg.)

II Sometines, though rately, followed by up. Butire the remainder are in quite anguiar attitudes, butireised upby prope (of parenthesess and dwhes), ..."
bŭt'-trĕmsed, pa. par. \& a. [Butrress, v.]
" Fain wrould he bope the rocks gau change,
to but soote : The Brodal of Triermain, ill. 3
bǔtts, s. ph [BuTr.]
but'-ty̆, s. [Etymology doubtful.]

1. Of persons: The deputy acting for snother. (Wharton.) A partner in work. (Local.) 2. Of thlnge: Whatever is held in common. (Wharton.)

7 The term butty was often nsed in connection with the truck-system (q.v.)
bür-tyl, s. [From Gr. Bovisvooy (bouturon), קov́rupos (bouturos) $=$ butter, sud id $\eta_{(h u l k)}=$ - matter as a principle of being.

Chem.: An organic monad fatty radical, baving the formula $\left(\mathrm{C}_{4} \mathrm{H}_{9}\right)$; slso cslled Quartyl, or Tetryl, from its containing four carbon stoms.
butyl aloohols, s. pl.
Chem : $\mathrm{C}_{4} \mathrm{H}_{10} \mathrm{O}=$ quartyl sicohols, or tetryl alcohols. Four alcohols hsving this formuls are known, two primary, one secondary, and one tertisry; they sre metameric with ethylic other. They are, (1) Normal Butyl Alcohol, or Pror $\left\{\mathrm{CH}_{2} \cdot \mathrm{CH}_{2} \cdot \mathrm{CH}_{3}\right.$ Propyl Carbinol, $\mathrm{C} \begin{cases}\mathrm{H}_{2} & \text { (2) Isobutyl } \\ \mathrm{OH} . & \text { CH(CH }\end{cases}$ Alcohol, or Isopropyl Carbinol, $\mathrm{C}\left\{\begin{array}{l}\mathrm{H}_{2} \\ \mathrm{OH}\end{array}\right.$
(3) Secondary Butylic Alcohol, or Methyhethyi Carbinol, $\mathrm{C}\left\{\begin{array}{l}\mathrm{CH}_{3} \\ \mathrm{CH}_{2} \\ \mathrm{H}_{5} \\ \mathrm{OH}\end{array}, \mathrm{C}_{4} \mathrm{H}_{6}(\mathrm{OH})_{4}\right.$, and (4) Tertiary Butyl Alcohol, or Trimethyt Carbinol, c\{ $\left\{\begin{array}{l}\mathrm{CH}_{8}{ }^{3} \\ \mathrm{OH}^{2}\end{array}\right.$
butyl aldehyde,s.
Chem. : $\mathrm{CH}_{2} \mathrm{CH}_{3} \mathrm{CH}_{3} \cdot \mathrm{CO} . \mathrm{H}$. It is obtained by distilling a mixture of bntyrate and fornrate of calcium. It boils st $75^{\circ}$. By the action of iodine and phosphorus it is converted into normal butyl iodide, and by that of nascent hydrogen into normal butyl alcohol. Butyl, or butyric aldehyde, heated with alcoholio ammonia, forms dibutyraldiae $\mathrm{C}_{18} \mathrm{H}_{17} \mathrm{ON}$, which distilled ylelds paraconins

## butyl carbinol,s.

Cherm : [AMYL A cconoln]
bū-ty̆̀'-q-mīde, s. [Eng., de., butyl, and amide (q.v.).]
Chem: $\mathrm{C}_{4} \mathrm{H}_{7} \mathrm{O} \mathrm{NH}_{2}$ is 8 crystalline componad which melte at $115^{\circ}$, and boils at $216^{\circ}$.
bū-ty̌1'-a-mine, s. [EDg. butyl; amine.]
Chem.: $\mathrm{C}_{4} \mathrm{H}_{11} \mathrm{~N}$, or $\left.\mathrm{C}_{4} \mathrm{H}_{9}\right\}$ N. There are a Norms1 Butylimine, $\mathrm{CH}_{2}\left(\mathrm{CH}_{2}\right)_{3} \mathrm{NH}_{2} ;$ an
Isobutylamine, $\mathrm{CH}\left(\mathrm{CH}_{2}\right)_{2} \mathrm{CH}_{2}, \mathrm{NH}_{3} ;$ a Secoudary Butylamine, $\mathrm{H}_{8} \mathrm{H}_{5} \mathrm{C}_{2}>\mathrm{CH} . \mathrm{NH}_{3}$; and \& Tertiary Butylamine, or Katabutyiamine, $\left(\mathrm{CH}_{3}\right)_{2} \mathrm{C} . \mathrm{NH}_{2}$.
bü'tty̌l-ëne, s. [From Eng., \&c., butyl, and suffix -ene.]

Chem.: The amme as Butene (q.v.).
bū-ty̆r-ā'-çĕ-oŭs, a. [In Fr, butyrace. From Lat. butyrum $=$ butter, and suffix -aceus.] Having the consiateucy of butter.
bū'tyry-ate, s. [From Lat. butyr(unl); snd Eng., se., siffix -ate] [BUTYRic Acid.]
bū-ty̆r-ěl-ifte, s. [From Lat. butyrumi = butter, and dimin. suffix -eiium, with Eng. suffix-ite (Min.) (q.v.).]
Min.: An acid hydrocarbon, cailed also Bog-butter and Butyrite. Its consistency is like that of the substance after which it is named. It crystalises in ncediles. It is soiluble in slcohol or ether. lts colour is white. Compos. : Carbon, 75.0 ; hydrogen, 32.5 ; oxygen, $12.5=100$. it is derived from the oxygen, $12.5=100$ it ish peat bogs. (Dana.)
bū-ty̆r'-10, a. [Lat. butyr(um); and Eng. suff. -ic.] Connected with butter (q.v.)

## bntyrio acid.

Chem. ; $\mathrm{C}_{4} \mathrm{H}_{8} \mathrm{O}_{2}$.
Normal Butyric Acid: $\quad C\left\{\begin{array}{l}\mathrm{CH}_{2} \\ \mathrm{O}^{\prime \prime} \\ \mathrm{OH}\end{array}\right.$
$=$ propyl formic acid, or ethyi scetic acin. Obtained by the oxidation of normal butyi alcohol with chronic acid; siso by the aetion of slkalies on normal propyl cysnide, or by the setion of hydriodic acid on succinic acid ; also by saponification of butter which contains tributyrin; and by the fermentation of sugar in contact with patrid cheese and chalk, caicium lactate is first formed which decomposes into butyrate, which is then distilled with aulphuric acid, Butyric acid is a colouriess liquid, boiling at $164^{\circ}$. Ita salts are calied butyrates, and are golubie in water. By oxidation with nitric acid it yieids succinic acid. Isobutyric acid, $\mathrm{C}_{4} \mathrm{H}_{8} \mathrm{O}_{2}+{ }_{8} \mathrm{C}$ yieide $\mathrm{H}_{2} \mathrm{O}+\mathrm{C}_{2} \mathrm{H}_{4}$ $(\mathrm{CO} . \mathrm{OH})_{2} \mathrm{C}\left\{\begin{array}{l}\mathrm{CH}^{\prime}\left(\mathrm{CH}_{3}\right)_{2}=\text { Isopropionic formic } \\ \mathrm{O}^{\prime \prime}\end{array}\right.$ acid, or dimethyl-scetic scid, obtained by oxidising isobutyl elcohol, or by the action of sikalies on isopropyl cyanide. It is a colourless liquid, boiiing ot $154^{\circ}$. Both these scid. form fragrant ethers with ethyi.

- Butyric acid has an odour of rancid butter. It is found in swest, urine, and other fluids, and, as 8 neutral fat, in amall quantities in milk. It is the chlef product of the secoud stage of iactic fermentation. [Dextrose.]
butyrio ether, s. The ssme as Erhyl Butyrate (q.v.).
bū'tyry-ite, s. "[From Lat butyr(um), and suffix -ite (Min.) (q.v.).]

Min. : The same as Butyreliite (q.v.).
bū'-ty̌r-ōne, e. [Lat. butyrum; and Eng., \&c., ketone. 1

Chem. : A hetone of the fatty series, also called dipropyl ketone, $\mathrm{CO}^{\prime \prime}\left\{\begin{array}{l}\mathrm{CH}_{2}, \mathrm{CH}_{2}, \mathrm{CH}_{8} \\ \mathrm{CH}_{2} \mathrm{CH}_{2} \mathrm{CH}_{3}\end{array}\right.$ It boils at $144^{\circ}$, and, by the action of oxdizing agents, it is converted into butyric scid,

$\mathrm{CH}_{2} \mathrm{CH}_{2} \cdot \mathrm{CH}_{2} \cdot \mathrm{CO} .0 \mathrm{H}$, and propionio actd, $\mathrm{CH}_{3} \mathrm{CH}_{3}$. CO .OH. 1 l can be pbtained by the dry distiliation of calcium butyrata.
bū'-ty̆r-Zus, a. [From Lat. butyrum=bntter, and Eng. suffix-ous.] Havirg the propertles of butter.
"Its olly red part in from the butyrous parts of chyle."
büx-band-mi-a, s. [Nsmed after John Chris. tian Buxbaum, a German who published a botarical work on Asis Minor in 1728.]
Bot. : A genus of mosses containing a solitary species (Buxbaumia aphylla), sa like a fungus that it might be easily mistaken for one. It is found, though rarely, in Britain.
I Buxbaumis is by some made the type of an order, Buxbaumlaces.

- bŭx'-ĕ-oŭs, a. [From Lat. buxeus = (1) of boxwood; (2) of the colour of boxwood; buxus $=$ the box-tree.] Pertaining to the box-tree.
bŭx'-क्m ( 1 ), "bŭx' òme, *bŭck'-sồme, "buxx'-ŭm, "box-ome, "box-some, - bo-som, *boo-sum, boux-some (Eng.), "bousum, *bowsom (Scotch), a. (Eng.S. bocsum, bihsom $\xlongequal{=}$ obedient, fiexible Aractable, buxom (Somner). In Dut. buigzaam; Ger. biegsam, beugsam = pliant, flexible. From Gier. biegsam, beugsam $=$ pliant, flexible. From
A.S. bugan, beogan $=$ to bow, bend, stoop, A.S. bugan, beogan = to
give way, aub:nit, yield.]

1. Of persons, whether male or femate, but opec. the latter):
*(1) Pliable, compliant, obedient to those to whom obedience is due, polite or conrteons to those who can claim no more than these.
"For who can be so buxom as a wry
Who is so trew and eek so ententy."
Chaucer: c. T., s163-4
IIn this sense often followed by to.
"To make thee buzom to her lawe" The Romaunt of the Ross ". . To make them more tractuble and suxome to

## A. As substantive:

I. Ordinary Language:

1. Lit.: The bird or birds described under II. I.
"Boaarde, byrde. Capuc, ruture."-Prompt. Parv.
-2. Fig: A bird or say person or thing of mferior gitts or character.
I Between hawk and buzzard: Between s cood and a bad thiug, with some relation to sach other.
"'Betwone havok and buseand' mosns, between a
 foriof the mane spocles, but too ignamut, the Alu
II. Zoology: The English name of the Buteo, genus of birds. These are-
IThe Buzzarde are birde of prey, belonging to the family of Fslcoulde, and approach closely to the eagles in appearance and general character, thongh not their equal in strength and courage. In the United States and Canada the Rough-legged Buzzard (Archibuteo lagopuz) is a hird of common occurence, and in equaliy plentiful in the Eastern Hemiin another Americal Buzzard, and one in very bad repute among the farmers and housewives of the United States, from its frequent attacke npon the tensnts of the poultry yard. Thio hahit has given it the titie of IIen Hawk. The Common Buzzard of Europe (Buteo vulgaris) is plentiful in ell the wooded parts of that continent, as weli as in North Africa and Western Asia. This bird measures nesriy four feet from tip to tip of the expanded wings, and is a very usefui bird of prey, from ito destruction of mice adders and similar poxious animsis. The Turkey Buzzard of the Drited States a common acs vanger in some of the Southern cities, does aot cail for description here, as it is not properiy \& buzzard, bnt here, as it is not properiys
belonge to the family of vultures.

I Bald-buzzard: One of the names for the Tishing Oaprey (Pandeon haliaëtus).
Capped-buzzard: [Honev-buzzard.]
Honey-buzzard: The English name of a predatory hird, the Pernis apivorus, called also the Beehswk, or the Brown Beehawk. [Honev. muzzard.]
Moor-buzzard: The Marsh-hsrrier (Circus ©ruginosus).

- B. As adj. : Senseless, stupid.
"Thowe who thought no better of the Hiving God, Thes I roclaimed my burzard lore to fly
At what, and when, and how, and where $I$ choone.".
Donne: Poems, $p$. it.
butzard-cock, buzzard cock, o. The whe of the buzzard.

Bometimes hell hide in the cave of a rock,
Then whis lie ns shrill as the buzard cock."

-Dhrs'zar-dět, $i$. [Eng. buzzard, and suff. -et.] Ornith.: A North American bird, said by Pennant to resemhie the common buzzard, except in havingslightly longer legs. Perhaps the enasylvenlan Buzzard (Buteo pennsylvanicus).
Thrisi-zẽr, \& [Eng. buzz, and aufix eer.] $\Delta$ whisperer. And wanta not buszers to infect his ear
With pestilent apeeches of hain fathern death".
Shakesp. : Hamlet, iv.

A. \& B. As pres. part. \& participial adjecWre: (See the verb.)
"But here, where murder hroathed her thoody rtonm sypon : Chude Earole iv. It2

## C. As subet.: A butz, whispering; talk in

 an undertone.
t bixzi-zing-1y, adv. [Eng, buzzing; -ly.] In a buzzing manner; in a whisper. (Webster.)

- bwnte, a, [Bounty.] (Scotch.) (Barbour : Bruce, x. 294.)
- bwrgh, s. [Bonovoh, Buroh.]
bȳ, • bi, * be, prep., adv., \& in compos. [A.8. be, bi, big = (1) by, near to, to, at, in, npon, sbout, with ; (2) of, from, about, touching, concerning ; ( 3 ) for, because of, after, acccrdtng to ; (4) beside, out of (Bosworth); O.S. \& O. Fries. bt, be; Dut. bij; Goth. \&O. H. Ger. bi; (N. H.) Ger. bei; Dan. (in compos. only) bi.] [Be, pref.; Bi.]
A. As preposition:

1. of place :
(1) Near, not far from, beside, in proximity to, whether the person or thing referred to be as near another, be at rest or in motion.

> "They paseed by ma"" Shakesp
"There is a light cloud by the moon"."
(2) On, npon. (Used often in such phrases as by sea, by land, by water.) (Bacon, Pope, Dryden, dc.)
"I would have lought by hand. whece I was atronger."
IT E. by N., according to the compass card, means one point northwsed from east.
2. of time:
(1) During, thronghout the continuance of. "the invere ofe offered to me olain bosesto and macritices (2) In.
by rigit." that he could not do it by day, that ha did it
I By the morwe: In the morning. (Chaucer.)
(3) Not later than, by the time of. (Followed by a substantive.)
" Hector, by the Afth hour of the ann,
Will with a trumpet 'twixt our tenth ond Troy,
To-morrow mornage call some knight to arma,
T Often used in the phrases by this time, by that time, by to-morrows, dc.
(4) By the time that. (Followed by the clause of a eentence.)

(5) After, succeeding.
"Thue year by year they pease, and day by day."
3. Of ogency, conjoint agency, causation, and instrumentality.
(1) Of agency: Noting the egent by whom or by which anything is done.

- By Hector rinlo. thelr facen to the aky.

All grim with gaping wounds nur heroes lle"

"The sons of Abraham by Keturah."-Gen xxv. (titfe).
(3) Of causction: Noting the cause by which any effect is produced.
"Fisaures near Serocarne, in Calabriz, enued by the
earthquak of 1783.-Lyell: Prin. of Geoh, ch. xxix.
(4) Of instrumentality: Noting the instrument or mesns by which anything is done.
by. - -2 and the hraseo altar thall be for me to euquire .-
beve averted fy war." - Ifacaulay: Bik. Kng., eh. xiv.

II of the part in relation to the whole:
"He tok his ehylle by the hande. "-loumbras, 825,
T Regarding the distinction between with and by, Johnson says that by is commonly used after a verb neuter, while with would be put after an active one. Blair says both these particles express the connection between some instrument, or meane of effecting an end, and the agent who employs it ; but with expresses $a$ more close and immediste connection, by a more remote one. We kill a msn with a aword; he dies by violence. The criminal is bound with ropes by the executioner. In a passage of Dr. Robertson's History of Scotland, We are told that when one of the old kings was mak. ing an enquiry into the tenure by which his nobles held their lands, they atarted ap and drew their swords; "By these, said they will defend them." (Blair: Lectures on Ehetoric \& Belles Lettres, ed. I817, vol. i. p. 283.)
4. Of the effect of causation: Used to denote groand of judgment or comparison in reasoning back from effect to cause, in coustructing and posteriori srgument, in reasoning zrom a fact or occurrence to any slmilar one.
xil. By this I know that thou tavouroort me."-Froinas.
5. Of relation with respect to number or magnitude:
(1) Measured by, estimated by.
"Hullion will zell by the oproes for alx shillinge and
ave pence anclipped monay."-Loote.
(2) By the magnitude or number of.

Meantime she etands prorided of a Lalun, pringa.
Hore young and vigorous too sy tweuty in
Dryden.
(3) Of addition to: Besides, over and above: in Scotch foreby. (Scotch.)

(4) In auccession to, after, following.
"The beat for you, in to reaxanine the canue, and to
try St oven poini by polnt arrament by argumaut "Hooker.
-(5) In the case of.
"Als it fales si a tre."-Psalms, i. \&

6. Of spectfication: In speefflcation of. (Used in naming one, or doing anything similar.)
"Greet the frieds by name."~-s Johor 14
7. Of taking of oaths, \& of adjuration:
"8wear vot tat all: welther by hoarea, for it $L$ God: throne, nor by the earth."-Wat., v. 2t-s
"I adjure thee by the iliving God"-Ibdd., xivi. \&
8. of duty, conduct, or action towards.

Bith. He had discharged bin duty by therri."-Vacaulay :
9. Of accordance with : According to, noting permission or conformity.
"It it exciuded. By, what law ' of workal Bay;
10. Of preference for: Beyond, above, more than, in preference to. (Scotch.)
"For thaw may rew by ill the refte"
Davideone: Schort Discurn, at 7 . (Jamiceon)

- 11. Of absence of or contrariety to, imply. ing the passing of anything by : Without, without regard to, contrary to. (Scotch.)
"öndil tuik him to be bir hurband, by the adwae and conasin of the lordie, for they knew nothtng thairot
- long time thirefter."
-12. With regard to, with reference to. (Sootch.)
"I apeake not this by english eourtierf."*, $\theta$ Oeorge Gatcoigne,
-13. Agalnat
"I know nothing by 1 Rev. Ver. agamel mymole"-1 Cor. 1v. 4
B. As adverb:

1. Near ; situated or temporarily resting in proximity to.
bis dénith alton was standing by, and cousention unto
2. Near, passing near ; moving past; past.

3. Aside, beside.
4. Though a certain contingency take place, as "I carena by" $=1$ don't care, though I agree to your proposal. (Scotch.) (Jamiesom.)
C. In special phrases:
5. By and by, by-and-by, adv. \& m.:
(I) As adverb:
(a) of place: Hard by. (Chaucer.)
(b) Of numbers, or of a plurality of persome or things:
(i) From time to time.
"By and By. Sigillatim. -Prompt. Pars.
IT "The Medulla renders sigillatim $\mathrm{I}(\%)$ singillatim or singulatim], fro seel to neel." (Harl. MS., 2,257.) (Way.) Probsbly sigillation is a mistake for singulatim.
(ii) One by one, singly.

## (c) Of time :

- (1) At once, as scon as possibie, quick, immediately.
"I wlll that thoo give mas by awd by in a eharger the
head of Jobo the Baptit. - ark vi 2 A
II In the Greek of this verse, by and by is s $\xi$ avipis $(e x$ autess $)=$ at the very point of tlme: st once ; from des aviris Tins wpas (ex autès tēs horas) $=$ from this very time (Trench.)
(ii) After s ehort time; after a time. As Trench well shows, the tendency of mankind trench wroarastination has altered the meaning of
thia phrase from "at once, immediately," to "after a time."
t(2) Ag subst.: The future.
${ }^{4}$ In the awaet by and by,
eautiful shore":

2. By hlmself or herself (Eng.) ; By himsell or hersell (Scotch), adv. phrase.
(1) Alone.
" Solymau reoolved to amanult the breach, after he

FThe expresaions by one's self, by itself,
have a similar meaning.
(2) Beside hinself or herself; destitate of reason, insane. (Scotch.)
*3. By one's mind or minde: Deprived of reason.

t. . By that: By tha time that.
"". Din thon thalt delliver it onta him by that the sun 5. By the tead

Naut.: Having the bow lower in the water than the stern.

A. As adj. : Pcrtaiaing to Byzantium, a Doric-Greek city on the European side of the Bosphorus, alieged to have arisea about b.c. 656. A new and more magnificent quarter, added by Constantine between A.D. 928 and 330, was cailed Constantinopie, and occupied the site of part of the modern Turkish city.

T (1) Byzantine architecture:
Arch.: The style of architecture prevalent at Byzantium whilst it was the capital of the Greek empire in the East. The Byzantios churches are usually built in the form of a Greek cross, the centre being covered by a jarge cupola, and the four arms or projections by semicupolas. The arches are generally semicircular, but sometimes segmental or horse-shoe shaped. The capitals, which taper downwards, are square blocke, or namented with foliage or with basket-work. The masonry is varied by horizontal and sometimes by vertical lines of hricks, besides which tlies, arrangad so as to constitute ths Greek ietter gamma, or other figures, sre often found on the exterior of the building. Interiorly, there is fine Mosaic ornamentation. The mouldings, which heve s hold projection, with the angles rounded off, are ornamented with foliage, and sometimes sloo with morocco or painting. A zigzag ornsment, with stiff folisge, may be seen under the eaves ond elaswhere. The apse is coatinually present. The Byzantine style of architecture has been divided into three periods-the firet from the time of constantine to thst of Justinian in the middis of the sixth century; the aecond extends to the eleventh century; and the third to the con quest of Constantinopis by the Turks in 1453. Fow specimeas of the first period remain; mony of the second snd third do so, the former being considered pure Byzantine, the latter Byzantios mingled with Italica, from the influence produced by Venice. [See Gloss. of Archilecture (Oxford, 1845.)]
The most interesting example of this architecture now existing is the grand Masque of Bt. Sophia at Constantinople, an edifice buiit as a Christiaa church, under Justinian, in the first haif of the sixth century, and adapted to their ues hy the Mohammedaos, on their conqueet of the Eastern Empire. In this building the interior is composed of a great ceutrai dome, 107 feet in diameter and 182 feet in height, which is supported on four piers, while length is given the building by the addition of
a semi-dome at each end. The latter erve also to sutaio the premure of the main dome. The building, in its iower part, is divided up The biliding, in its iower part, is divided up to enhance the size and arches, whose ofrect dome. Around the base of the jatter is a row of windows, a characteriatio which becams constant feature in the later Byzanting architecture. One atriking chsracteristic of Byzan. tiae edifices is thie extensive nes of colored decoration in their interior. This is particniarly the case in the Mosque of St. Sophia, and adde much to its interior effect. The pillars are formed of the richest coiored marbies, and the walis lined with them, while splevdid mosaice adord the domes.
Byzantioe ormsmont differs conaiderably alike from the Claseic and from the Gothic, being aiways flat and incised, whilo the latter is bold. The Byzzotines were distinguiahed during the Medizevai period for sili kinde of carving end metal work, which undoubtediy carving and metal work, which undoubtediy had an influence on the development of art, to the revival of painting. A weil-known and very intereating example of Byzantide architectural art exists io the celehrated Church of St. Mark's, at Yenice. This is the oniy example in tie Weet, and doubtless arose through the commercial reiations of $v_{\text {enice }}$ with the Eastern Empire. It was copied ehortiy efter ite erection, in the elevea'h centory, at Perigueax, in Aquatacia, and, as a consequence, the ure of the dome hra been extensive in that part of Fraace.

## (2) Byzantine historians:

Hist. : Numbrous historians yioper, and chroniclers who lived io the Byzarithoe empire between the fourth and fifternth seaturio A.D., and Wrote its history. The wiost celo brated was Procopins, of Cwearon. These brated was Procopius in orearop. These
historiane are divided into three clases: (1) historiant are djvided into three classes: (1) Those witose works are confived in subject to
Byzantine history; (2) those who profess to Byzantine history; (2) those who profess to
deai with univeraal history, but give disprodeai with universal hiatory, but give dispro-
portionate epace to Byzantine events; (3) portionate epace to Byzantine events; (3)
those who wrote on Byzantine customs, srchitecture, antiquities, sic. Their litersry styio is iacking in force and originality, as might be expected from the deapotiem of pedantry duriag the time in which they wrote, but despite this their worke are invaluabie, as our ooly source of information concerning tios history of tin Empire of the Exst. This is particularly the case with those who confine their attention to events which took place under their own observation, or in which they took part. The principal worke of the Byzantice historians wers collected and published is Paric in 36 volumea, with Latia traodintione ( $1654-1711$ ). Io 1828 ' Nieluhh, with others, begao a Corpus Scriptorum Historize Byzanime, cariied oL untii 1855 int 48 volumes, and contioned by the Berlin Academy of Scieucos.
B. Ae subst. : The asme as bezomt, bieanf, byzant. [Bezant.]
II If any obsolate worde have been omitted in by, their modern apelling will probahly be found at $b i, b e$, or $b u$.

I A list of words in which by is a prefix has been given io page 763, column 1. The following more simple words heve the modern apelling bi, st which they may be found opelling bi, st which they may be found *byde, *byge ( $=$ big), obyke *bykere, © (= bicker, s.), "bykker, * bykkir, * byker, * bykkyr, v. (= bicker, v.); *byl, * bylle (= hill), bynde, s. (= hind), * byngs, s. ( $=$ (Scotch), * byrle (= biri, 1), "byrthe, "byschop (= bishop), * byschypryche (= bishopric), "bysme ( $=\mathrm{hism}$, Scotch) * bysquyte (= biscuit), *byshope (= bishop) *bysshoperike (= hishopric), "byte (= bite), "bytt ( $=$ bit, s.), * byttyr (= bitter), bytterly (= bitterly), * byittyrnesse ( $=$ bitternese), *byteyrswete
hitter-aweet). biting).
(2) A very few others are found with the opelling be. Examples-* bynggers (= benger), * bytyile ( $=$ beetle).
(8) Sometimes the old by beconves bu in a modern word. Examples-"byrdune, "byrden. (= burden), * byryele (= burial), * byrgyn, byryyn ( $=$ bysshel ), (= bushai), " bysy ( $\equiv$ buey), bysily (= busily), "bysinesse' (= business).

## 9780 C.

C. In Anglo-Saxon was taken directly from the Latin slphabet, the source, it is belleved, whence it has passed into various languages. In Engliah worde immediately derived from Anglo-saxon, the e of the Anglo-Saxion often becomes $k$ in Englinh, as A.S. cyning = Eng. king; A.s. $\mathrm{cyn}=\mathrm{Eng}$. kin, or kindred. Some. timea the A.S. o becomer $q$ in English, as A.S ewen $=$ Eng. quen. At others it is changed into ch, as A.S. cild = Eng child (See Barworth : A.S. Dict.) ln Modern EngSish $c$ has two leading values. Before $i$ and $e$ it ia aounded as s (axsmples : certain, and eincture), sind befora $a$, o, and $u$ as $~ k$ (examcincture), snd before a, o, and $u$ as $k$ (exainples: cat
C. As an imitial is used:

1. In Chronol.: Chiefly for Christ, as B.C. $=$ (BeIore Christ).
II In tha ambiguona lettera A.C., C may be (1) Christ, and A.C. = After Christ. Or it may he (2) Christum, and A.C. = ante Christom, before athrigt ; or (3) Christi, and A.C. = Anno Christl. See also $A$ as on initial.
2. In Music: For conntertenor or conralto.
3. In University degress: For Civil, as D.C.L. $=$ Doctor of Civil Laws; also for Chirurgia $=$ surgery.
C. As a symbol is used:
4. In Numer.: For 100. Thua ClI is $=102$, $C C=200, C C C=300, \mathrm{CCCC}=400$.
$=\mathrm{C} \mathrm{C}$ in this casa is tha initial of Lat. centum $=100$.
5. In Chem.: For tha element carhon, of which it is also the initial letter.
6. In Music:
(1) For tha first note of the diatonic scala, corresponding to do of tha Italians.
(2) For tha natural major mode, that in which गe sharps or flats are employed.
(3) For common or four-crotchet time.
7. In Biblical Criticism: For the Ephraem manuscript of the Greek New Testament, $A$ being the Abexandrian manascript, $B$ the Vatican manuscript, $D$ the menuscript of Bera, and $\mathcal{N}$ (A in Hab.) tha Sinaitic manuscript. [Conex.]

## C barre. [Fr.]

Music: Tha term for the tima indicstor. C with a dash throngh it. (Stainer \& Barrutt.)
C clef. [Fr.]
Music: Tha clef abowing the position of middle $C$, in which are written tha alto, tenor, and (in old music) other parts. (Stainer \& Barrett.)
C dur. [Ger.] Music: C major. (Stainer \& Barreth)

1. Gardening: Specially those garden varieties of the Drassica oleracea which have plain leaves and "hearts," but sometimes employed in a more general sense for the genus Brassica itself. The common Cabbage is said to have been introduced into England by the lumans, but was little keowo in Scotland until brought into that country by Cromwall's soldiers. The principal varieties were koown at least as far bsck as the sixteenth century, but minor varieties are coming frequently lato use. These varietles differ grestly from each other, sod from the original wild cablage, and could not be recognized for the same plant but that their steps of deviation are well known. The Cabbage io several of ite rarieties is widely grown in the United Stater, and is a commoo article of food in most sections. It varies, in its several varleties, from the Koli-Rabi, io whick the growth furee is carried back iato the stem, which swells iato an underground turuip like form, to the common Cabluage, in which the vegetation Is developed into a compact head, and the Cauliffower, in which the fower log head is enormously developed. Other Varieties are the Brussels Sprouts and the Jersey Cablage. In the last the stem grows to 8 or 10 feet high, and supplies walking sticks and smal: building tiniber, such as spars for small thatched roofs, \&c. The change in the Cabbage are easily accoueted for The present form is of highly vegetative chargeter, as is shown by its habit and halsitat. The surplus vegetative Arce may express itself simply in sin increased development of the leaf, which is threwo into wavy folds, ss is the common Kale; it may remain in the nidribe, which become sucentent, as in the Portugal Cubbnge; may be carried back into the stem, causing a root-like swelliog, as in the hohi-Rabi, or a tall growth of the stem, as io the Jersey cal bace; it may be applied to the formation of bunds, which develop, with the peculiar luxitriance of the Brussels sprouts; or may be withibeld from the lateral buds and supplied to the spical one alone, which swells into the enormous head of the common Cablare. The most evolved and final variety is the Caulifower, in which the vegetative force acts upon the flowering head, of which the flowering is largely checked. There are other varietice, but the above cuvers the diverse varistions.
Wives of Windsor, Li L cabbage." - Shaketp:: Morry eoloor: the floweri congist of four leaves, which are sacceeded by long thaper rods, coutsining heveral round

1. Tech.: A kind of deliberati ve committee - eocancil of the Executive, conslating of the principal members of the Government. In the
great official appointed by the Prealdent an his advieers and assistants in the conduct of the government, and confirmed in thelr office by the Senate. They comprise the Secretary of State, the Secretary of the Treasury, the Secretary of War, the Secretary of the Navy Secretary of Secretary of the Interior, the Secretary of Agriculture, the Attoruey Geveral, and the Postmaster Generai. Fach of these is the head of the Departaneut indicated by his titie, and as a coliective lody they act as an Advisory Board to the L'resident. The United States eystem differs from the Euglieh in the fact that the Cabinet Ministers are nat members of Congreas, and that there is no Prime Minister, the : President roccupying the place of that ofncial, and belag reeponaible for the acts of the Goverament. The members of the Cabinet receive salaries of 88,000 per year. They are remevable at the will of the President, but genersily hold office till their successors are genersily hold ominmed
appointed and confrmed. toted, being formed of members of larliament tuted, being fermed of members of Premier, is
of whom the I'rime Minister, or Prent of whom the l'rime Binister, or Premier, is
chosen ly the Queen, and the others chosen by chosen Ly the Queen, and the others chosen by
him. The Cabinet inciudee the First Lord of him. The Cabinet inciudce the First Lhe Lord Prenident of the Council, the Lord Privy Seal, the five Secretaries of State, the Chancellor of the Exchequer, and the Firat Lord of the Admirslty, elevea membera in all. It has occasionally had others, to the number of geventeen. The Eaglish Cabinet grew out of the former l'rivy Cuuncll, the advisers of the Crown. Thla was a large body, a ad a emaller civisory body greve up within lt, from which adrisory body grew upered after the Revoluthe present Cabinet emerged after the Reavinthe majority in the Ilouse of Cunimona, who the majority in the louse of cuntmona, why are expected to leave onice lif dere the House. The only power at present possessed by the Soverelgn is to appoint a new Premier, in which she has some, but not a. wide, power of choice. The Premier, when appointed, becomea the responsible head of the Goverament, but one with a very uncertain temure of office, as bie position depends on his control of the vote of the Houee. The Englieh Cabinet has grown out of the exigencies of the Government, and has no formal place in the conatitution, while ita functions are limited by no writtea rules. It it one of thoge expedieacien of which It is one government is now so largely composed. The acquisition of the actual governing power by the Premier and the lose of it by the Soverelgn, with the general anffrage of the people, assimilates Great Britain very closely to the Republicau form of government.
The Cabinet has been adopted by other countries, such as France and Italy, nnter conditions clobely mimilar to those of England, the Cabinet Ninisters being members of the legielature, and expected to reaigo office when defented in any measure. The elective head of the Government io Frsuce and the Kiog in Italy, however, retain a power which has been lost by the Queen in Eingland, the Cabinet atanding to them in a position somewhat resembling that of the American Cabinet to the President.
"The cabinet councll, ebortly termed the cobinet, form. only part of the minitutry or zomininatation. crown and tooductify the goverament of the count try

## A. As substantive:

L. Nautical, in Telegraphy, Ac.:

1. A etrong, thick rope, exceeding ten inches in circomference, originally only made of hemp, but now also of iron or copper wire, or most commonly of iron links. A rope less then ten inches in circumference is called a hawser.

T Hemp ia laid up right-handed into yarne. Yarns are laid up left-handed into strands. Three atranda are laid up right-hauded into a hawser. Three hawaers lsid up left-handed hawser. Three hawsers lsid up left-handed make cable. The circumference of hemp
rope variea from about 3 inchee to 26 . The rotrength of a hemp cable of 18 inches circumatreagth of a hemp cable of 18 inches circum-
ference is about 60 tone, and for other sizes the strength varies according to the cube of the diameter. Wire rope consiate ueually of three atrands, laid or spun around a hempen core, while each of these etrande consiets of six wires laid the opposite way around a amaller bempen core. hempen and wire ropes are usually employed for tow linee and for mooring parposes, but chain cables have now almost muperseded those of bemp for anchoring purposes. These are made in llnke, each about six cimee the diameter of the iron employed, in length, and three and a half times in breadth. Compared with the etrength of hemp cable, a oue-inch diameter chain cable is equal to about $31 / 2$ hemp, and a 2 inch chain to an 8 inch hemp cable.
(1) The rope of chain to which a ship's anchor is attached. [Chain-cable.]
Curcula, ", \&c.- Prompl. Parv, or schyp roop, A. P.),

(2) The wire rope used for the aupport of some suspension bridges.
(3) The wire rope used for submarine telegraph. Deep aee telegraph cableo vary greatly in conatruction, so that no general description can be given. One laid in 1865 consiated of a core of seven copper wires, of which aix were wond apirally around a central one. These were thoroughly aurrounded with Chatterton's Compound (a mixture of resin, Stockholm tar, and gutta percha). Over this four costings of the compound and of gutta percha were alternately laid. Around this juta was carefully mrapped, and the whole was eheathed with ten ron wires, each of which was wrapped in trands of tarred manilla yern. The total diameter was $11 /$ inches and the breakiag train 8 tons. "Shore end" cable has elwaya an additional protection of wire and hemp. The cables which have subeeqnently been laid, and which are ao numcrous and extended as to bring almost all parts of the earth into telegraphic communication, vary from the above, as the result of experience, but the same care to produce complete ineulation of the central sonductor is taken.
2. $\Delta$ nantical measure of distance $=120$ tathoms, or 720 feet, by which the distances of thips in a fleet are frequently catimated. This term is often misunderstood. In all marine charts a cable is deened 607.56 feet, or oneenth of a sea mile. In rone-making the cable varies from 100 to 115 fathoms; cablet 120 fathoms; hawser-laid, 130 fathoms, as deternulned by the Admiralty in 1830. (Smyth.) According to Ure, a cable's length is 100 to 140 fathoms in the merchant service; in the Royaj Navy four cablea are employed, each of 100 fathoms, two cables being attached end to end.
III. In architecture:

1. A wresthed or torus convex moulding made in the form of a rope. [Cable-mound me.]

cable-mouldino.

## 1. A moulding representing a cable or splra

T Cable is naed in many nantical phrases, e.g.: 1. 4 shot of cable: Two cables spiliced toge ther
2. To bend the cable: To make it fast to the anchor.
3. To bit the cable: To fasten it round the bits. [Brr.]
4. To drag the cable: Said of a ohip when the cable fails to hold it aecurely, owing to roughuess of weather.
5. To fleat the cabls: To allow it to onrge back on the whelps of the capstan or wind lass, as the cable climba on to the larger part of the cone.
6. To keckle the cable. [To serve the cable.] [Cackle (2), v.]
7. To pry out the cable: To let it run ont.
8. To pay the cable cheap: To let it run out fast ; to hand it out apace.
9. To plait the cable: To serve it.
10. To serve the cable: To bind it round with ropes, canvas, \&c., so as to prevent it from beiog galled in the hawser.
11. To alip the cable: To let it run out, and leave it, when there is no time to weigh anchor.
12. To splice the cable: To join the ends of two cables, or of a broken cable, by working the strands into one another. In the case of iron cables the aplice is effected by means of shackles.
13. To veer the cable: To let more out.
14. To worm the cable: To fill the spiral crevices between the laya with etrands.
B. As adjective: (See the compounds.)
T. Compounds of obvious aignification : Cable-length, cabie-maker.
cable-bends, s. pl. Two amsll ropes for lashing the end of a hempen cable to its own part, to secure the clinch by which it is fasteved to the anchor-ring. (Smyth.)
cable-bit, s. [Brr.]
cable-bitted, a. So bitted aa to eanble the cable to be nipped or rendered with ease.
cable-buoy, s. A buoy or cask used to keep a rope cable to prevent it from being cut in rocky enchorages. Also used to support the ead of a broken cable, to essist in recover. ing it.
cable-cane, s. A specles of Palm, Calamus rudentum, a native of the East Indies, Cochin-chins, \&e.
cable-car, a. A street rallway car moved by a wire rope or cable running in an iron conduit under the atreet. In the aurface of this conduit io a elot, through which passes an iron arm fixed to the car, nnd gripping or releasing the cable at the will of the operator The cable is moved by etaam power at s central atation. Care of thie kind have been introduced in a num. Care of thie kind bave been introduced in a number of the citiea of the United Statea as on acceptable substitute for horse cars, largely in San Francisco and Chicego, and to a lese extent in Philadelphia and New York The idea of using a rope or cable for this purpose is of old date, and various patenta have been taken out, but it was first practically applied in 1873, by Mr. Hallidie, of San Francisco, on Clay Street of that city. Thi a yery ateep street, with a rise of thia one foot in six, and horse power was inipractic sble, but the method proved no aucceasful that it was quickly applied to other atreeta, and San Francisco has now dearly 100 miles of cable road. It was adopted in Chicago about ten years later, and eince then in some eastern years later, and eince then in some eastern citie日. American engineers laid the first cable
lines in Britain, they being opened in eeveral
cities, and particulerly cities, and particularly in Edinburgh, where very ateep streets exist. 1n moat places they will probably soon be superseded by electric trolley lines, which are coming widely into operation, but they are likely to be long retained in euch citiee as San Francisco nnd Edinburgh, whone ateep gradiants render them especially applicable.
cable-gripper, s.
Naut.: A lever compreseor over the cablewell, by which the cable is stopped from runaing out.
anble-hatband. 2 Twisted gold or aliver cord worn as a hatband.

## cable-hoots, \&

Nautical:

1. A hook for attachment to the measenger by which the cable is henled in on a man-of wy which the cable is hanled in on a man-ofwar, or other ehip having a large number of
hands, without having reconree to the caphands, without having reconrse to the capstan. It may also be attached to e hawaer, underrunning the cable.
2. $\Delta$ hook by which a cable is handled Each seaman has a hook in lighting-up the

* cable-laid, a. Twisted in the manner of a rope or cable, in which each etrand is a hawser-laid rope.
cable-moniding, s. [Cable, A. 2.]

## cable-nipper,

Naut.: A device serving to bind the messenger to the cable, and composed of a yumber of rope-yarns or amall atuff marled together. (Knight.)

## " cable-rope, s.

Naut.: A thick atrong rope, a cable.

## oable-shackle, a

Naut.: A D-shaped ring or clevis, by which one length of cable is connected to enother ar, upon occasion, the cable connected to an object such as the anchoring. (Knight.)
cable-sheet, sheet-cable, \& The apare bower anchor of a ship.
cable-stage, s. The place in the hold or cable-tier for coiking ropes and hawsers.

## cable-stopper,

Naut.: A device to stop the paying-ont of the cable.

## cable-tier, 8.

Nautical:

1. That part of the deck where the cablem are stowed.
2. The coils of a cable.
cable-tire, $s$.
3. Naut.: The coils of a cable.
4. Mech.: Any large rope used in raising weights, as in pulleys, cranes, etc.
5. Arch.: A moulding of a convex form at the back of the flutes, representing a rope or a ataff laid in a flute.
6. Milit.: The large rope used in dragging gons.
cable-well, s.
Naut. : The part of the ship where the cable is coiled away.
cà'-ble, v.t. \& i. [Cable, s.]
I. Transitive:
7. Naut.: To fasten or aecure with a cable. (Dyer: Fleece, ii.)
8. Arch.: To fill the flutes of columbe with cable-moulding.
9. Teleg.: To transmit (as news, dc.) by the aubmarine telegraph cable. Since the opening of the oceanic telegraph cablee the price of messagee over them has been greatly reduced, the total reduction having been from $\$ 5$ to 25 cents per word, though quite bigh rates continue to more distant points, en from England to Brazil, where it varies from 68. 2d. (in the gorth), to $1 £, 88$. 10d. There are at present fourteen cables crosing the Atlantic, owned by oix different" companies, besides cables to numerous other parts of the world and telegraphers are not without hope of being able to apply the telephonic aystem to ocear wires, and canble people to talk from contiaent to continent.
of the order, or oven" witton cabled the refusal could have been no possibility of any misunderitand-lag."-Daily News, Sept. 19, 1e7a
II. Initans. : To send a message by the submarive telegraph cable.

cā'-bled (Eng.), oā'-beld (Scatch), a. [GasLE, s.]

* 1. Naut.: Fastened or secured to s cable.

Cautlous appronchinge in Myrinal port
Cult out the eabled stiono upva the pritrund."
2. Arch. : Filled with cable-moulding, an the atutes of columns.
3. Teleg. Of a message: Sent by the subnariae telegraph cable.

căd'-mǐ-ŭm, s. [From Lat. cadmia (Pliny); Gr. ка calamine, an ore of zine.]
Chem.: A diatomic metallic element, discovered in 1818; symbol, Cd ; atomic weight, 112 ; sp. gr., $8.6^{\prime}$; melting point, $315^{\circ}$, boils st $860^{\circ}$. Cadmium is a white, ductile, nualleabla metal. It scarcely tarnishes in the air; it burns when heated in the air, forming a brown oxide, CdO. It dissolves readily in aitric acid ; it dccomposes water at red heat. Ita vapour density is 3.9 eompared with air. Cadminm is found in some zine ores; when these manm distilled it rises in vapour before the zine are does so. It also oeeurs in the form of sulphide in greenockite. The oxide dissolves in acids, in greenockite. The oxide dissolves in acids,
forming colourless salts. The oxide sb forming colourless salts. The oxide sb-
sorbs CO , readily, and is coaverted into sorbs $\mathrm{CO}_{2}$ readily, and is canverted into
$\&$ white insoluble carbonate. Cadmium sul8 white insoluble carbonate. Cadmium sul-
phate, CdSO
44
$\mathrm{H}_{2} \mathrm{O}$, forms colourless menophate, $\mathrm{CdSO}_{44} \mathrm{H}_{2} \mathrm{O}$, forms colourless mono-
clinic cryatals easily soluble in water, snd forms double sulphates with potassinm and smmorium sulphates. Cadmium chlorida, $\mathrm{CdCl}_{2}$, is very soluble; it forms donble salts. The bromide and iodide are also white soluble salts, used in photography. Cadmium sulphide, CdS, is a bright-yellow powder, inaolubls in dilute HCl ; it is obtaiaed by passing $\mathrm{H}_{2} \mathrm{~S}$ throngh sn scid solution of s cadmium aalt; it ia insoluble ia smmonlum aulphide, aalt; it la insoluble is smmonlum aulphide,
thus easily distinguished from sulphides of thus easily distinguished from aulphides of
arsenic, sntimouy, or tin. Cadmium sulphide arsenic, sntimouy, or tin. Cadmium sulphide
is used as a yellow pigment. Cadmium in is used as a yellow pigment. Cadminm
readily detected by the properties of its sut
in, boy; pout, jowl; cat, gell, chorus, ghin, bench; go, gem; thin, this; sin, aşj; expeot, Yenophon, exfist. ph = \&

phide. Ammonia gives white precipitate, solable in excess; sodinm carbonate a white precipitate of carbonate of cadminm, insoluble in excess. Cadmium is essily separaied from zinc by passing $\mathrm{HS}_{2}$ into their solntina in HCl ; the cadmium is precipitated as yellow sulphide, CdS. Cadmium can be separated from copper in snslysis by disaolving their sulphides in nitrio acid and adding ammonis in excess, filtering of oxides of other metals ; then potassinm cyanide is added till the preelpitate first formed redissolves, then $\mathrm{H}_{2} \mathrm{~S}$ epitate irst formed retissique, from which it throws down the cadmium as anlphide.

## cadmium-blende, s.

Min.: The same as Greenockite (q.v.). Min.: The same as Greenockies (q.v.)
cadmium-yellow, s. A pigment, con siating of cadmium anlphide. [CADMrus.]

They have as rregular flower, but not at all bo much so as the Papilionacere. The petals are spreading, the stamens adhera to the calyx. They are mostly ten in number, though in rare case less than five. They have purgative qualities. Though none are wild in Europe, they colt titute a notable and attractive feature of the vegetation in India and other tropiesl conn tries. Lindley divldes them intoeight tribeg(1) Leptolobieæ, (2) Eucessalpindea, (3) Cas aiea, (4) Swartsice, (5) Amheratiee, (6) Ban hinleæ, (7) Cynometrex, (8) Dimorphandrex.
Ço-sär-1-an (1), a. [From Lat. Cosarianus, Casarius $=$ pertaining to Cæsar, i.e., spec. to Caius Julius Cxasar. $]$ Pertaining to any of the Cæsars, and especially to the great Caius Julius Cessar.
 Lat. cesura = a cutting, an incislon; or possibly the same as (1); see def.] Involving the act of cutting, specially in the operation described under the componad terms.

## casarian operation, 2

Surgery \& Miduifery: The most seriens operation in midwifery, and only resorted to in extreme cases, to save life; as, for example, when a woman fully preguant dies snddens, by accident or otherwise, the child being still alive in utera; or when, by reason of deformity, alle birth cannot take place naturally or with the bid cifliary obstetrical instruments, the aid of ordinary obstetraion consists in per naturales chas. making an incision in the moving the child with the coatents ef the womb en mase, and then sewing ap the wount thus made in the usual way. As might be expected, the danger to life from this operation is very great in those cases where the living mother is operated upon. Certsin cases, hewever, have survived the operation-some have even gone through a repetition of it, and the proportion of these cases is increasing, owing to the improvements in modern surgery. The Cesarian operation was known to the Greeks. The Romana also practiged it, and it wes cono sidered by them a ortunste cirentmstance to be $s o$ born. According to Pliny, Sciplo Africanns was delivered in this way (Auspioatius enecta matre nascuntur sicut selpio Afrcanus proor natus). This anthor, with others, also asserts that the name of Cesson, afterwsrds Cessar was firat given to those thus born (Quia caso matris utero in lucem prodeunt).

## cassarian section, s. The same at

C89'-sar-iscm, \& [Eng., \&c. Ccesar; -ism; вee Casarian (1).] Despotic govemmeat; im perialism.
Çw'-si-a, \& [In honour of Frederico Cresio, an Itallan natoralist.]

Bot: : A genus of Mlaceous plants, belonging to the order Anthericea.
 Icthyol.: A genus of acanthopterygious fusiform fishes, having the doraal snd anal spinea mnch larger than the others, snd their base thlckly covered with small acalas. Pamily, Chætodonidx.
 (Used generally of the eyus.)]

Bot.: Blaish-grey, lavender-colour. Akin
to glaucons, but graener. (Lindley.)
fa'-si-ŭm, s. [From Lat. cassius $=$ blnish grey, sky-coloured.)

Chem. : A monad metallic element; aymbol Cs., at. weight 133. It was diacovered in 1860 by apectrum anslysis in mineral waters and in eeveral minerals, as miea, felspar, \&c., aloo in tha ashes of plants. It is separated by the grester insolubility of the double chloride with platinum. The hydrate is a strong base. Cæsinm carbonste can be separated from rubidiam carbonste by its solubility in shaolute alcohoi. Cæesium gives characteristic blue lines in its spectrum.
ceos'-pit-ōse, a [From Mod. Lat. cuespitosus; Cl3ss. Lat. cesppes (genit. caespitis) $=\mathrm{a}$ turf, a sod.]

> Bot. : Growing in tufts.
fers-pitt'-u-löģe, a. [From Lat. coespes (genit. cespitis) $=$ a turf, a sod ; dimin. suffix-ul; and Eng. 日uffix -ose, from Lat. oosus.] Growing in smali tufts forming dense patches, as the young stems of many plants.
\&qes'-tǔs, † GÖs'-tŭs, a. [Int. cosstus = cestua.] A hoxiog-glove. It was of leather, in certain cases ioaded with lead or iron.

> casted.

The prizes next are order'd to the ffeld,
Tor the bold chainpions who the caestus wheld." ope: Homer's liadt, xxII. "Fss-L
pas-mü'-II-a, s. [Lat. ccesus = beatcn.]
Bot.: A genus of plants, consisting of a eingle species, C. axillarts, a ustive of India. It is a small weed, growing in moist places, and has purple or white florets.

güre, s. [In Fr. césure; Sp. \& Ital. cesura; Lat. cosura $=$ a cutting off, from coedo $=$ to cause to fall, to fall, to ent.]

- I. Ord. Lang.: Of the forms ceasure and caesure.

That they long since hasue refused

$$
\begin{aligned}
& \text { other ceanser," } \\

cal－cär＇ec－o，only in compos．［Eng．calcare－ o（us）（q．ү．）．］

## calcareo－argillaceous，$a$

Min．：Consiating of or containing calcareous and argiliaceous eartha．
calcareo－barite， 8 ．
Min．：A white barite from Strontian，in

Argyleshire，containing，probably aa mixture 6.6 per eent．of lime and some sillica apd aln－ mina：
calcareo－bituminous，a．
Min．：Consistlag of or containing caleareous and bituminous earths．

## calcareo－siliolous，a．

Min．：Consiating of or containing calcareou and silicioua earths．
calcareo－sulphurons，a．
Min．：Consisting of or containing calcureons and sulphurous earths．
că1－cär＇－そ－oŭs，a．［Lat．calcarius $=$ pertain ing to lime；calx（genit．calcis）＝lime．］
1．Min．Conaisting of or containing can bonate of lime ；of the nature of limestone．
2．Geol ：Calcareous rocks are geaprally of aoimal origin．They consist of fragmente of shells，corals，encrivitea，or of globigerina， and other foraminifera．Even wben ao wholiy cryataling that no tracea of old organisme can be detected，there is rearon to believe that these previoualy exiated snd have been do－ atroyed by metamorphic sction．

## calcareous barytes，s．

Min．：A variety of barytes，with an sbnormal quantity of carbonate of lims in its compo－ sition．
calcareous earth， 2 ［In Fr．terre cal－ caire；Ger．kalkerde．］A term commonly spplied to lime is any form，but properly to pure lime．It ia also frequently applied to mart，and to eartha containing a conaiderable proportion of lime．

## calcareous marl，

Min．：A soft，earthy tleposit，often hardly at all consolidated with or without distinct fragments of shells；it generally contsins much clay，and graduates into a calcareous clay．（Dana．）

## caloareons spar，$s$

Min．：Calcite，crystallized native carbonate of lime，of which there are many varieties．Tha usual composition is carbonic acid $44^{\circ} 0$ ，lime 56.0 ，but it often contains impurities，upon which depend the colours assumed by the erystal．Carbonates of lime are widely dis－ tributed in nature，as marbles，chalk，\＆c． ［Iceland－spar，Darale］
calcareous sponges，s．pl．An order of sponges－the Calcispongiæ（q．v．）．
calcarcous tufa，
Min．：A term applied to varieties of car－ bonates of lime，formed by evaporation of water containing that mineral in zolution， occurrigg in fissures and caves in limestong rocks，and near springs，the water of which is impregaated with lime．
căl－cär＇－ĕ－oŭs－nĕss，s．［Eng．calcareous； －ness． 1 The quality of being calcareous，or partaking of the nature of limestone．
cǔl－car－Ĭf－ẽr－oŭs，$a$ ．［Lat．calcaria $=$ a lime－kila；fero $=$ to bear．］Producing lime， calciferous．
cãl－cär－1－form，a．［Lat．calcar＝apur； forma $=$ form，appearance．

Bot．：Shaped like a calcar，or spur；spur－ shaped．
cal－car－i＇－na，s．［Lat．calcar $=$ a qupur ；neut． Ill．adj．sutf．－ina．］One of the Rotaline Foraminifera．it is coated with exogenous shell growth，as granules，apines，\＆c．Shell thick．Common in zeveral tertiary strata， and fiving abundantly in the Meditarranean and other warm seas．（Griffith \＆Henfrey．）
căl－ca－vall－la，8．［Port．］A kind of superior sweet wine from Portugal．
＊căl－cé－ā＇－tĕd，a．［lat．calceatus，pa．par． of calceo $=$ to shoe；calceus $=$ a shoe．］Fur－ nished with shoes，shod．
călçed，$a$ ．［Lat．calceatus $=$ ahod．］
1．Gen．：Wearing ahoes or boots，not sandals．
2．Spec．：Pertaining or belonging to that branch of the Carmelite Order，which did not accept the reform of St．Teresa．［Discalced．］

＂căl－çé－dŏn，s．［Calcedonv．］a toul veid like calcedony in eome precioua stones．（Ash．）
 calcedonius $=$ a calcedony.] Pertaining to, or of the nature of, calcedony.

că1-çē'-1̆-form, a. [Lat. calceus=a shoe ; forma $=$ form, ahape.]

Bot. : The same as Calceolate (q.v.).
call-çé-б-la, s. [Lat. calceolus =a little ahoe or slipper ; calceus $=$ a ahoe. 1
Zool.: A genvs of brachiopod mallusca, of the family Orthidx, the bivalve sheli of which is somewhat slipper-shaped. It is fossil only, being found in the Devonian rocks.
*) shoemaker, from calceolus =a little ahoe, a slipper; calceus =a shoe.]

1. Bot. \& Hortic.: A well-known and beantiful genus of plsats-order Scrophulariscere. The resemblance to a shoe is in the bilabiate corolla of the best-known species, the elongated lower lip of which is inflated and turned down. The stamens are only two. The apecies, which are numerous, come from south apecies, which are numerous, come from south of the Andes. The greater number have yellow flowers, others are purple, whilst in a fow the two colours are intermingled. The roots of Culceolaria arachnoida are callected in Chill, where they are called relbun, and are used for dyeing woollen cloth crimson. Various calceolarias are cultivated in this country.
că]-çé-ó-lāte, a. [Lst. calcoolus $=$ a little shoe, a slipper, and Eng. suff. -ate.]
Bot. : Having the form of a ahos or slipper. Examples, the petals of the orchid Cypripedium and the Cslceolaria, or Slipper-plant.
căl'-çēeş, călx'ēș, s. pl. [CALx.]
càl'-çĭc, a. [From Lat. colx (genit. calcis) $=$ lime, and Eng. suffx -ic.] Pertaining to or comprosed in whole or in part of lime, as calcic carbonate, calcic oxide.
că1-çir'-ẽr-oŭs, a. [Lat. calx (genit. calcis) $=$ lime, chalk ; fero $=$ to bear. ]
Min.: Containing or producing calcite or carbonste of lime.
ant-cif-ic, $a$, [Eng. calcif(z); -ic.] Calciferous, calcie. (Hurley: Physiol., ch. 12.)
căl-çı̆f-ī-cā'-tion, s. [Lat. calx (genit. calcis) $=$ lime $;$ facio $=$ to make.] The process of being canverted inta a stony substance containing lime.
fully formed bene is formed by the calcificazion of this fully formed bone is formed by the calcitcation of this
timue.-Carpenter: Princtpes of Physology. p 203.
cali'-çi-fied, pa. par. or a. [CALC1FY.] may be defned as bodiez primarily, if not permat may be defned as boties primarily, if not permancellular and tubular hasin of amimal matter contaioing
earthy particles, a quid, and a vacular puia"-Owen A nat. of Veriebrates
† căl'-çi-form, a. [Lat. $\alpha \times x$ (genit. calcis) $=$ lima forma $=$ form, appearsoce.] in the form of cbalk or lime.
call'çi-fy, w.t. [Lat, calx (sjnit. calcis) = lime; facio (pass. fio) $=$ to make,] To convert iuto lime.

Were this aneath actualiy dentinal in tlasue and united to the law-bone, the rosemblance to the Lepl-
dosiren would te closer, hut it in never calcifed, nidd is shed during the prosrets of the metamorphosia owen : Matat. of vertebrates.
căl-çi-măn-gite, s. [1wom Lat. calcium; Eng. mang(anese); and suff. -ite (Min.) (q v.)] Min. : The same as Spartaite (q.v.).
*ă1'çí-mine, s. [Lat. calx (genit. calcis) = lime.] A superior kind of white or coloured wash for walis. (Webster.)

- call-çl-mine, v.t. [Calcimine, s.] To wash over with calcimine; as, "to calcimine walls." (Hart.)
; căl-çī-na-ble, a. [Eng, calcin(e); -able.] Capable of being calcined; that may be calcined.
"is Not fermenting with aclds, and Impertectly catcon. Gbo ha greal ire. -Eul: Foatis. Of Gnaniz.
call-ginn-āte, v.t. [Low Lat. calcinatus, pa par. of calcino = to calcine.] To calcine.

Ant, it indurateth then maketh fragile, and
câ-çin-ā-tion, cal-ci-za-ci-oun, a [Low Lat. calcinalus, pa. par. of calcino $=$ to calcine.]

1. The operation of expelling from a subatanco by heat, either water or volatile water combined with it. Thas, the proceas of baroing lime, to expel the carbonic aeid, is one of inglime, to expel the carbonic aeid, is one of calcination. The result of exposing tha carits carbonic acid, is the production of calcined magneaia. The term was, by the earlier chemists, applied only when the snbstsnce ex posed to heit was reduced to a calx, or to s friable powder, this being frequently the oxida of a metal. It is now, however, used when any body is aubjected even to a process of wasting. (Ure.) Marble, limeatone, and chaik which are all carbonstes of lime, are deprived of their carbonic acid and waten hy calcination. It also deprives copper and other ores of their sulphur, the aulphurets being axidized and aulphuric acid being diseugaged and volatilised. (Knight.)
"Oure foumeye eke of calcinachoun."
"Adustion eanneth biacknesk and calcination whiteoks. -Bacon: Works (ed. 1,65), voL,
2. The aperstion of reducing a metal to an oxide; oxidation

* 3. The result of the process of calcining.
calcination-pot, s. A sort of cracible nsed for preparing animal charcoal.
t căl'-çı-na-tôr-y̆, s. [Low Lat. oalcinatorium.] A vessel or crucible used in calcination.
UXI'-gine, v.t. \& i. [Fr.calciner; Low Lat. calcino; Lat. calx (genit. calcis) $=$ chalk.]
A. Transitive:
I. Literally:

1. To reduce to a powder.

- Mones, with an actunal Are calcened, or burnt the Sodici.
"The turt being as it were, calcined by the scorching hoota of their diabolical partnera. - Scote: Black 2 To redu
*3. To utteriy consume.
This earth at last shall be calcinod
H. Irore: Enthus. Triumph.
* II. Figuratively: To consume.

Yoa hy a chasto chimicke Art,
Calcine fraile love to pietie.:
B. Intransilive: To be reduced to a powder ; to become calcined.

căl'-çined, pa, par. \& a. [Calcine, v.]

1. Reduced to a powder.
rulyar Errours. 2. Oxidized.
"Wher a decoction of meat is effectnally sereened air. putrefirtzon, never supplied. in. "- Tylely with call: Frag. of Science, 3rdi. ed., xi. 30L

## t căl'-çī-nèr, \&. [Calcine.]

1. Gen.: Oue who, or that which, calcines.
2. Spec.: A calcining or roasting furnace.
cǎl'-çi-nǐngg, "cal-çen-ynge, pr. par., $a$., \& \& [Calcine, $v$.]
A. \& B. As pr. par. and partic. adj.: In aenses correaponding to those of the verb.
C. As substantive: The act of reducing to a powder ; calcinstion.
"In mmalgamynge and calcenynge,"
Chaucer: C. T., $12,890$.
calcining-furnace, s. A large reverberatory furnace, having a fire at one end, two chimmeys at opposite corners, four doors at which the ajcration is abserved, the rabbles introduced, and the material withlrawn, sad hoppera above by which the ore is introduced. (Knight.)
că1-çi-ni'-tre, s. [Lat. calx (genit. calcis) $=$ lime, and nitre (q.v.).]
Min.: The same as Nitrocalcite (q.v.).
căl'-ç̀n-ize, v.t. [CALCINE] To calcine.
(Sylvester: Du Bartas.) ă̌l-çi-b-çĕ-lĕ's-tīte, s. [Lat. calcius $=$ pertaining to lime; calx (genit. calcis) $=$ lime;
colestis, celestis = heavenly, sky-blue; colviw = heaven.]
Min.: A variety of Celeatite (q.v.), containing a large proportion of lime.
canl-çi-ó-rer'-rite, \& [Lat, calcius = pertaining to lime: calx (gen. calcis) $=$ lime ; ferr(um)
$=$ iron; euff. ite (Min) (q.v.).] $=$ iron; euff. -ite (Min) (q.v.).]
Min. : A sulphur, yellow or yellow mineral, from Battenberg in Bavaria. Sp. gr., 2.53 2.529. Compos, : Phosphoric acid, $84 \cdot 01$; ser quioxids of iron, 24.94 ; alumina, 290 ; mag neaia, 265 ; lime, 1481 ; hydrogen, $20^{\circ} 56$.
căl-çí-sponn'-ǧi-20, 8. pl. [From Lat. calx (genit. calcis) $=$ lime, and spongia $=$ a sponge.] [SPONOE]

Zool.: Calcareons sponges. One of the leading divisiona of spongida (aponges), the othera being Keratoda (horny eponges) Siliclapongiz (ailiceons sponges), and miyxospongize (spongea with neither a horny nor a ailiceous skeleton). The living species of cal. careous aponges have a skeiaton composed of apicuia of lime, and ara generally frea and independent of each other.
căl-çi-spón'-gían, s. [CALcigpoxolz] Any individusl of the calciepongix; a chalk sponge.
căl'-çīte, s. [Lat. calx (genit. calcits) = chalk, and suff. - ite (q.v.).] Cryatalliaed carbonate of lime. [Iceland-apar.]
căl-çǐ-trā'-pa, s. [Ital. calcatrippa $=$ the star-thistle.] [Caltrop.]
Bot. : A name for the Star-thistle, Centaurea calcitrapa.

* call'-çi-trāte, v.t. \& \& [O. Fr. calcitrer; Lat. calcitro $=$ to kick, from calx (genit. calcis) $=a$ heel.] To kick, to spurn. (Cotgrave \& Cockeram.)
'căl-çi-trā'-tion, 8. [From Eng. calcitrate (q.v.), and suff. -ion.] The act of kicking.
"The hirth of the child is esused partiy by ite ouk - Roas: Aroana dicrocomem, 653, p. 52.
cal'-ç̌-ŭm, s. [From Lat. calx (genit. caleis) = lime.]

Chem.: A dyad metallic element. Symbol Ca ; atomic weight, 40; sp.gr., $1 \times 57$. Obtained by Davy by decomposing tha chloride by electricity; also by heating the iodide with aodiuin in a closed vessel. Calcium is a brassyellow, ductile, malleable metal, which oxidises in damp air; it decomposes water, and dis aolves easily in diluto acids. Heated in the sir, it melts at red heat, and burns with a bright orange light. Calcium occurs in neture chiefly as s carbonate, silicate, and suljuste Calciam oxide, CaO , called also Lime, is ob tained by heating the carbonate of calcium to redness. It is a white, earthy, innnsibe powder, phosphorescent st high temperatures it is strongly alkaline, and readily absorbe carbonic anhydride. It unites vigorously with water, throwing out great heat, and
forms a hydrate $\mathrm{CaOH}_{2} \mathrm{O}$, which is alightly Pormas a hydrate, $\mathrm{CaOH}_{2} \mathrm{O}$, which is alightly
aoluble in cold water; it is used in nfedicine aoluble in cold water; it is used in mfedicine
as lime-wster. Impure lime mixed with sand as lime-wster.
Calcium sulphate, $\mathrm{CsSO}_{4}$, Found as hydride as gypsum, $\mathrm{CaSO}_{4} 2 \mathrm{H}_{2} \mathrm{O}$, and selenite and alebaster. The water is given off by heating it, sad 8 white powder is left, which dissolves in 500 parts of cold wrter. Mixed with weter, it sets in a lard suhstance; it ia used onder the name of plaster of Paris for making caste of medals and statues, \& Pa.
Colcium carbonate, $\mathrm{CaCO}_{3}$, forms the chief constituent of limeatone, marble, chalk, \&c. it occurs crystallised as calc-sper and aragonite. Calcium csrbonste is insolnble in water, but is dissolved by water containing carbonic acid gas; it is deposited from thil golution by boiling, hence boiler deposits.
Calcium fhosphates occur in the bones of aoimals and are native in Apatite. [Phosphates.]
Calcium chloride, $\mathrm{CaCl}_{2}$, is obtaiaed by dissolving the carbonste in hydrochloric ecid. It crystallises in white prismatic crystals; it ie very deliquescent. Fnsed calcium chioride is used to dry gases, \&c. It absorbe ammonis gas.
Calcium fuoride, $\mathrm{CaFl}_{2}$, ocelurs as fluor spser.
Calcium sulphides and phosphides have been obtained. Salta of calclum are not precipitated

[^101]v2 $\mathrm{H}_{2} \mathrm{~S}$, elther in an acid or alkaline solution. Alkalins carbonatea and ammonia carbonate give as white precipitate insoluble in exceas oxalate of ammonia gives a white precipitate from a neutral solution; the precipitate is not solubla in scetic acid. A aolutlon of sulphate of calcinm gives no precipitate. The chloride gives an orange-red flame with alcohol. The spectrum of calcium gives aeveral character istic lines, eapecially an orange-red and a green line. Chloride of lime, or bleaching powder, is a mixture of calciun chloride and calcinm hypochlorite.

Calcium Arsenate (Min.) ls $=$ Pharma colite; Calcium Borositicate $=$ Datholite Calcium Carbonate = (1) Calcite, (2) Aragonite Calcium Columbate $=$ (1) Microlite, (2) Azorite Calcium Phosphate $=$ Apatite; Calcium Silicate $=$ (1) Wollastonite, (2) Okenite; Calcium Sul phate $=$ Selenite; and Calcium' Tungstate $=$ Bcheelite, all which see.
calcium-light, s. The Drummond or oxyhydrogen light, in which etreams of oxygen and hydrogen are directed and inflamed upon a ball of lime whose incandescence gives a very vivid and brilliant light. [Drummond-Liaht.] (Knight.)
coul-giv'õr-oŭs, a. [From Lat. calx (genit. calcis) $=$ limeatons, lime, and voro $=$ to devour.] Bot.: Eating into or corroding a limestone rock. (R. Brown, 1874. )
cal-aర-grăph'-1-cal, a. [From Eng. caloograph(y); -ical.] Partaining to calcography (q.v.).
axd-ŏg'-raph-y, s. [Gr. кalxős (kallos) $=$ brass, aud ypaфn (graphë) = a writing, drawing, from ypápo (graphō) = to write.] The art of engraving on brass.
"The hatories of refiaing; of makling copperas; of
making alum:-of calcography: of enameling."-

cal-côur'-an-ite, a [From Ger. calcouranit, valk-uranit ; $k a l k=$ chalk, and uranit $=$ uran ite (q.v.).]
Min. : The same as Actunite (q.v.)
càno'sĭn-tẽr, s. [Ger. kalk = cbalk, and intef $=$ dross. 1 The incrustations of carbonat of lime upon the gronnd; or the pendulous conical pieces, called stalactites, atteched to the roofs of caverne, \&c. (Ure.)
axac'-spar, s. [Ger. kalk = chalk, sud Eng. spar (q.v.).] Crystallised carbonate of lime or calcite. [Calcareoug-spar.]
chlo'-tufff, s. [Ger. kalk = chalk, and tuff = tufa (q.v.). ] A formation of carbonate of lime from the deposits of surings, \&c. [Cal-cargoug-tufa.]
$\dagger$ calle-u-la-bil'-1-ty, s. [Eng. calcul(ate); ability.] Possibility or capability of being calculated, eatimated, or provided for.
alc'-n-la-ble, a. [Fr. calculable.] Capable of being calculated.

Woald at "The matculabibe become discatrd
Browning : Red Cott. N. Cap. Country.
"I I have made every cateulable provislon."-W. Tay
Wlo'-u-lar-ك̆, a. \& s. [Lat. calcularius, from calculus $=$ a little stone $;$ oalx $=(1)$ limc chalk ; (2) a pebble.]
A. As adj.: Pertaining to or caused by the disease of stone in the bladder.
"Yotlon was tedious and noxious to hlm, by reason den: Life of Bp. Brownrigg, 1660, p. 218
B. As subst.: A mass of small stony lumps found in the pear and other fruits.
oxlc'-ụ-lāte, v.t. \& i. (Lat. calculatus, pa par. of culcuta $=$ to reckon by uteans of pebbles; from calculus = a little stone, a pebble dimin, of calx = (1) lime, chalk; (2) a stone, pebble. in Fr. calculer; Sp. calcular; Ital. calculate.]
A. 'Transitive:

1. Litterally:
2. To compute, to reckon up in number.

II, in catcutaring the nambers of the people, we tious "-Goldemth: Emeay x

* 2. To divine or prognosticate by the gituadon of the planets at a certain time.
id calculato my birtb."
Shakesp: 3 Hen. VI., iv
"Who were there then in the world to obverve the dies" ${ }^{1}$-Benttoy.
IL. Figuratively: To arrange or adjust for a purpoae. (Seldom used except in the pa. par.) "I ealculatemy ramedy for this ono Individual king
B. Intransitive:

1. To make calculations ; prognoaticate.
"Why ail thoes fres, why alf these glidiug ghowta,
To form ons's shaiow. Jwius carton depend on; to expect. (Colloguial, and chiefy depend on;
American.)

I Ganerally used with tha prep. on before the matter on which the opinion la formed.

oxlo'-n-1ä-tying (1), pr. par., a., \& s. [CALculate, v.]
A. \& B. As pr. par. \& particip. adj.: In senses corresponding to those of the verb.
"With hie cool, calcuiating dispositlon, ho easily
C. As substantive: The act or proceas of computing, reckoning, or estimating.
calculating engine, $s$. The same as Calculatina Machine (q.v.)
"Sach are the facts which, by a certain edjustment of the carcuat ating engine, would be presented to the
ohnerver."- Babbage: Ninth Bridgosoater Treation ohnerv.
calculating machine, s. A machine for making arithmetical calcniations with speed and accuracy. The simplest one is the abneus (q.v.). The best known of such machines is that which Babbage was employed by the Britisb Government to construct. He began the work in 1821, and continned it for about twelve years, till 1833, at an expense of £15,000, after which it was abandoned. The part completed is preserved in the library of King's College. A modification of Babbage's in vention is now in nse at the AlbanyObservatory

* călc'-u-1ā-ting (2), a. [Lat. colculus $=$ a atone, pebble.] Turning into, or forming into a calculus or stone in the bladder. (Topsell.)
calo'-u-1ā-ting-ly̆, adv. [Eng. calculating (1); -ly.] In the manner of one calculating; by way of calculation.
călc-n-lä'tion, s. [Lat. calculus $=$ a smal stone, a pebble, because pebblea wera of old used in this country, as they stili are among some uncivilised tribes, as aids in counting Eng. suff. -ation.]
I. Literally:
I. The ast of calculating, reckoning, or computing in numbers.
"O One Bartholomew Scallet. . . hath by ealculation foarad the very day."-haleigh : Huse. of World, bk ill

And, lavilag it to others to foretell.
By calculation kage, the ebb and fiow
Wordsoarth : Excursion ble vi
2. The result of an arithmetical computa tion or reckoning.
"If we suppose our present catculation, the Pheenix now in natire will be the eixth from the orentlon."Browne: Pulgar Errourt
II. Figuratively:

1. The act or process of eatimating the force and result of circumstances.
2. The result of such estimation; the opinion formed of circumstances.
"The fate of the Trienaial Bill confounded oll the eateulatlons of the best informed pol
o㐅ló-u-ià-tǐve, a. [Formed by analogy of other adjectives from an imaginary Lat. calculativus; from calculus = a petble, stone.] Pertaining to calculation; involving calculation
"Persons hred in trale have in geaeral a much - Burter : On the Popery Laws.
călc'-u-1à-tör, * călk'-ě-1à-tour, s. [Fr. calculateur; Lat. calculator $=$ one who reckons; calculus $=$ a pebble, stone.]
I. Ondinary Language (of persons):
3. One who reckons or computes by numbera; a computer.

* 2. One who prognosticates by astrology ". . . calkelatours and astronomye."-W'yclife:

 cretions in tbe klauey or
că1c'-u-1ŭs, 8. [In Fr. calcul; Sp. calcula; Port calculação the mathematical calculua: calculo $=$ a calenlus (in Med.) ; Ital. calcola, or calculo; all from Lat. calculus $=$ (1) a small stone or pebble, (2) a stone in the bladder, ( 3,4, \&c.) a atone uscd for voting or one for reckoning, \&c.]
3. Among the old Romans: A stone used for voting. At trials white and black stones wera thus employed, the white expressing a vote for acquittal and the black for condemnation.
4. Med.: The medical term for what in popularly known as stone. Calculi vary in size from a pin's head to a pigeon's egg, and even larger, and weigh from a few grains to several ounces. They derive their special name and character as well from the organs of the body in which they are found as from the constituents of which they are composed. Thus, for example, a calcuius found in the kidney or ureter is called renal, in the bladder vesical, and so on; but, according to ita vesical, and so on; but, according composition, it would also be called chemither (1) uric (tithic) acid calculus, or (2) oxeither (1) uric (fithic) acid calculus, or (2) oxat alic (mnlberry) calculus, or (3) phosphatic calculus. Caleuli derived from the bile are alao found in the gall-bladder, and in the biliary and intestinal ducts, where they receive tha dame of gall-atones, or biliary calculi. Thosa found in the salivary glands are called salivary calculi.
5. Math.: Any brancb of mathematica which may involve or lead to calculation. In this aweeping sense it embraces the whole science, with the exception of pure geometry. Thus there may be a calculus of functions, $s$ calcuus of variations, tce., but tha leading diviaions of the subject are the Differential and the Integral Calenlus.
Calculus of functions: The calculus in which
what is aought is the form of a function, and not ite value in any particular case, nor the condition under which it may bave a particular value.
Colculus of tariations: A method in which the laws of dependance, bindiag together variable quantities, are themselves anbject to change.
Tha Diferential Calculus is a method of investigating mathematical questions by measuring the ratio of certain indefinitely small quantities called difereutials. [DIFF ERENT1AL.]
Imaginary Calculus: a method of investigating the nature of inaginary quantities sequired to fulfil apparentiy impossible conditions. The result proves that all absurditics in geometry may be ultimately resolved into attempts to measure a straight line in a direction different from that of its leogth
The Integral Calculus reverses the process which obtaina io the differential calculus, that is, it reasons out from the ratio of the indefinitely small changes of two or more mag. nitudes, the magnitudea themselves, or, as it is technically stated, from the differential of an algelraic expression it finds the expression itself. [INTEGRAL.]
cald, a. \&e s. [CoLn.] (O. Eng. \& Sootch.)
"Thy corse fo clot not carder kepe.".
Ear. Ehg. Alut. Poems; Pearl, sza.
câl'dẽr-a, s. [Sp.] A Spansh term for the deep caldrou-like cavities which ocenr on the summits of extinct volcanoes. (Stormonth.)
cal'-dĕr-ite, s. [Apparentiy from the proper name Calder, and suff. -ite (Min.) (q.v.).] Mia.: A doultful mineral from Nepaul, said by Dana to be mothing but massive garnet. The British Museum Catalogue, however, net. The Rritish Maseum catalogue,

Bamben v. 2
II. Technically:
3. A catalogne or abstract of state papers.
4. Law: A list or regiater of casea to bo tried in a court of law; a register of the names of prisoners.
"The yeuage ie for the Judge to alyn the catendar, or
Jist of ail the prisoners names."-Blacketone: Com
"Rhatamanthua, who tries the Bighter causes below - Lamist: Last Estays of Elia.
5. Astron. \& Chran.: The Romsa calendar is said to have been introduced by Romulus about 738 b.c., and modified by Numa Pompilius about 713 b.c. 1 a 46 b.c., Julius Cæsar, giving effect to the calculations of Sosigenes, an Alexaedrian mathematician and astronomer, reformed the calendar, and introduced the Julian style, by which the year was mada to consist of 365 days, with 366 every fourth or leap year. He commenced it alao with January lat, the adjustmeat producing one year of confusion, which contained 445 daya. Had the solar year consisted of 863 days, 6 hours, the Jolian caleadar would have been perfect ; but its real length is 365 days, 5 honrs, 48 minutes, $45 \frac{1}{2}$ seconds. The operation of the odd minutes and seconds continued during the next fifteen centurics, having again deranged the calendar ten days. Pope Gregory XIII. made A.D. 1582 consist of Pope Gregory XIII. made A.D. 1582 consist of
355 daya only, and otherwise adjusted the calendar. Roman Catholic countries at once adopted the reform. Protestant atstea one after another followed the example, whilst Russia and the Greek Church conserved the old Julian arrangement. When the new atyle was adopted in England by Act of Parliament in 1752, eleren days required to be struck out, the 3 rd of October being called the 14th. new and old style. To prevent further derangement the Gregorian arrangements provide that only one in four of the years ending centuries ahall be leap years; thas tha years 1700 and 1800 were not leap years, nor will 1900 be, but 2000 will.
B. As adjective: (See the componnds.)
calendar-clock, s. A clock which indicated not merely the hour and minute of the day, but also the day of the week and month, and in aome casea even the year and the phases of the moon. (Kright.)
calendar-month, s. A month which, $f$ it be January, has 31 days, if February, has 28 or 29 , if March, has 31, \&ic.
cal'-en-dar, v.t. [Calendar, s.] To register; set down in a list. Esprecially said of insert ing in the Calendar of Saints

[^102]arilix'-thin (1), s. [Named after the founder of the seect.]

Eocles. Hist.: A follower of George Calixtus, a celebrated Lutheran divine, and professor at Helmstait, Brunswick, who died in 1656. He opposed the opinion of St. Augustine on predestinstion, and endeavoured to form a union amoag the various members of the Roman Catholic, Luthersn, and Reformad Churches. (Staunton.)
ca-lǐx'-tĭn (2), s. [Calixtines.]
Jax'-Ixx-tines, s. pl. [From Lat. calix $=\mathrm{a}$ cup, which the sect or party wished restored to the peoplo in the Lord's Supper.]
Ch. Hist.: A Christian sect in Bohomia, the more moderate of the two great sections into which the Hussites were divided in 1420. Unlike the Taborites-the other and extremer section-they did not seek to subvert the constitution and governinent of the Church of Rome, but demanded (1) the restoration of the cup to the peopie in the celehration of the Supper; (2) the preaching of the Gospel In primitive simplicity and purity ; (3) the sepaprition of the priests from secular, and their entire devotion to spiritual, concerns; and entire devotion to spiritual, concerns; and (4) the prevention or punishment, by lawtul anthority, of "mortal" sins, e.g., simony, debauchery, \&c. The conncil of Basel, In 1439, to end the disastrons Bohemian war, Invited envoys from the Hussites. Procopius Rasa-their leader since the death of the famous John Ziska in 1424-and othera appeared, hnt the effort failed. Anterwards the council sent Eneas Sylvius Into Bohemia. He, by conceding the use of the cup to the Calixtines, reconciled them to the Church of Rome. [Hussites.]
calk (1), * câlke, câulk ( $l$ silent), v.t. [0. Fr. cauquer; Lat. calco $=$ to tread, press down, tread in ; from calx (genit. calcis) $=$ the hsel. Cf. "I would thay werg barbarians, as they are
Though in Romo it the porch o'th eapital."
căt-vẽr, cal-vur, v.t. \& i. [Etymology donbtful. Wedgwood suggeste Scoteh callour or caller $=$ feeh.]
A. Trans. : To cnt salmon into thin sllices, while freab, and then pickle theae.
"Calvur as samoon, or othyr fysshe."-Prompt. Pare. $\because n_{y}$ toot-boy shay pat phasamits, calvered al mons. -Ben Jomaon: Alchemus. iU. L
caluerd"."Aive then ohines tried, and the salmon
B. Intrane. : To bear being so aliced and pickled.
"His flesh, [the grayilog a, Jeven in his worat eemoon,
 Angler
oalv'-ẽr ( $l$ silent), s. [Eng. calve, v. ; and \&uff -er.] a cow with calf. (Scatch.)
căl'-vẽr-ed, pa.par. or a. [Calver, v.] Sliced and pickled.
- Calverd salmon is a dainty eclebrated by all our old dramatists. "May's Accomplished Cook," if that be sufficient authority, gives an ample receipt for preparing it. It is to be cut in slices, and scalded with wiae and water and aalt, then boiled up in white-wine vinegar, and get by to cool; and so kept, to be eaten hot or cold ( $p$. 354). It now means, in the fish trade, only crimped salmon. (Nares.)

"* ibe dot even Pripee George, who cared as moch
 for any thing but claret and calvered salluon, Enll-
mitted to be Mr. Morley."- Hacaulay: Hist. Eng., ${ }_{c h} \mathrm{mitted}$,

calves-foot, \&. [CALF's Foot.]

## calves-snont, s.

bot. : A plant, so called from a fancied resemblance to the suout of a calf-Antirrhinum, better known as Suap-dragon, or Toadflax.

## calves-tonguc, $s$.

Arch. : A sort of moulding, usually made at the caps and basee of round pillars, to taper or hauce the round lart to the square.
call'-ville, s. [French, from Lat. calvus = bald, smooth-akinned.] A kind of apple.
calv-ing (l sillent), pr. par., c., \& s. [Calve, ${ }^{\text {v.t. }] . ~ \& . B . ~ A s ~ p r . ~ p a r . ~ \& ~ p a r t i c i p . ~ a d j .: ~(S e e ~}$ the verb).

## C. As subatantive :

1. Ord. Lang. : The act of giving birth to a calf
"I henrd of hate of a cow in Warwikniire, which in
 three calyings ghd twise twins
Descript. of Engt., hk. Wii., ch. 1.
2. Nout.:

Of icebergs: The act of breaking or the state of being broken off a glacier when the latter reaches deep water. Glaciers tend to form on mountain tops when the temperature is low enough for the puryose. Then they gradually descend, new glacial material behind preasing them down. On reaching the ocean they are puahed lito it, and finally they calve or give birth to icebergs, which have an indepeodent existeace of their own.
Cax'-vin-ismm, s. [Fr. calvinisme. From John Calvin, the celcbrated reformer, born at Noyon, in Picardy, July 10th, 1509 ; died May 27 th, 1564. For further details aee deflaition.]

1. Theol.: The tenets of the above-mentioned John Calvin. Sometimes the term Calvinism comprehends his views regarding both theokogical doctrine and eceleaiastical polity; at
othera it is limited to the former，and apecially to his views on the doctrines of grace．These are sometimes called the five points of Cal vinism，or，more briefly，the flve polnts；but this latter curt appellation is not anfficiently apecific，for the rival syatem of Arminisnism was also presented by the Remonstrants at the Synod of Dort in five polnts．Those of Calvinism are the following ：－（1）Particular election．（2）Particular redeinption．（3） Moral inability in s fallen state．（4）Irresist ible grace．（5）Final peraeverance．（For the ible grace．（5）Final peraeverance．（For the
rival Arminian five points see Armrins．） rival Arminian five points see Arminias．）
Auguatine，Bishop of Hippo，who was born Augutine，Bishop of hippo，who was born casentially the same as those afterwards pro－ mulgated by Calvin．In addition to what may be called the doctrines of graca，Calvin held the spiritual presence of Cbrist in the Holy Eucharist，but not the doctrine of con－ sutstantiation．He was thus easentially Zwinglian，and not Lutheran．
2．E＇coles．：Calvin＇s views of Church govern－ ment were essentially what are now called Presbyterian．Ho held also that the Church ahould be apiritually independent of the State， but was willing that the diaclpline of the Church ahould be carried out by the civil power．This last opinion，followed to its logical conclusion，involved him in heavy re－ sponsibility for the death of his Socinian an－ tagonist Servetus，the capitsl puniahment of whom for alleged heresy was approved of not merely by Calvin，but by the other reformers， not excepting the gentle Melanchthon．No ona in those daya aeems to have clearly under－ stood religious liberty
3．Ch．Hist．：The work which first made this system known to the world was Calvin＇s Inst $i$－ tutes of the Christian Religion，published in 1536．In August of the same year be viaited Geneva，and，at the earnest requeat of Farel， its leading reformer，made it his reaidence．In 1538 both were expelled from the city，when Calvin，going to Strasburg，originated the French church there on the model which he deemed acriptural．In 1541 ha was invited back to Geneva，and returning to it was the leading spirit there till his death，io 1564 Various Protestant churches adopted Calvin＇a theological viewa with his ecclesiagtical polity ； thus Knox carried both of these to Scotland where the first Presbyterian General Aasembly was held in 1560
Bishop Burnet gtates that ihe 17th article of the Church of England is framed according to St．Ausustine＇s doctrine，which，as stated，is essentially Calvinistic．The early reformers of the English Church mostly held hia views of the doctrines of grace，which prevailed to the end of Queen Elizaheth＇s reign．Afterwarda they imperceptihly declined．When the rival aystem of Arminius was brought to trial at the Synod of Dort，in Molland，in 1618，the English clevical representatives gave Calvin－ iatic votes，notwithatanding which Arminian－ iatic votes，notwithatanding which Arminian－ ism took deep root in the English as in various
other churches．Archbishop Laud was ita other churches．Archbishop Laud was its warm friend and advocate，as were the High continued Calvinistic，a generalisation which atill remains correct．The ecclesiastical polity of Calvin was embraced by the Puritan party， but never had a majority of the English people in its favour，and an attempt in the early days of the Long Parliament to zet it up，though ander the control of the civil government， was successful only to a linited extent，and for a brief period of time．Most of the clergy－ man whom the passing of tha Act of Uniformity， in 1062，dissevered from the Church，were Calvinista．
Of the two great English revivalista of the eighteenth century，Whitfeld was Calvinistic ［Calvinistic Methodists］，and Wesley Ar－ minian．［Weslevan．］The majority of the English Baptists are Calvinistic．All along， sioce the Reformation，the theological tenets and the ecclesiastical polity of Calvin have nearly always been dominant in Scotland， though the sterner features of both have al－ most imperceptibly bean softened down．
＂The delights arring from these ehfects were to he
sherifeced to the cold and philobophical spirt of Cai－ iniom，which furnished yoplespures to the imagina－ al＇－vĭn－ist，
［Fr．calviniste．］A follower of Calvin；one who adopts tha theological teaching of Calviniam．
＂The Caleinist is tempted to a false security，and mach to himeoli，And too little to God＂－Ato trust too on the Articles，Art． 17.
căl－vin－ǐs＇－tǐc，＊căl－vǐn－ís＇－tǐck，＊cả̉ Fin－Is＇－ti－cai， 0 ．［Eng．calvinist；－ic，－ical．］ Pertaining to Calvin or Calvinism．
the ©alvinizetick disecipline was mioptech＂－Wartor Hist．of Eng Poetry．if 458.

II．Geol．：Of or belonging to the series of rocks described under B．It．（See the terms Cambrian formation，group，or system．）
B．As substantive：
＂I．Ord．Lang．：A native of Walea．
II．Geology：
1．Formerly：In 1835 Sedgwick gave this name to some much－distarbed and apparently nnfossiliferons old strata，until then known as＂Granwacke，＂which he had traced out in Cumberland and North Wales．Just previ－ ously，Murchison had fixed the term＂Silu－ rian＂to a series of fossiliferous deposits in Shropshire and Wales，known by him after－
wards as the Ludlow，Wenlock，Llandovery， Caradoc，Landeilo，and Lingula groaps These were all regarded as younger than，and lying ebove，sedgwick＇s＂Cainbrian＂series； the pasition，however，of the Bala limestons （equivalent to the＂Caradoc Bandstone＂of Shropahire）was mistaken，and consequently the boundary－line provisionally tixed by the two observers was misplaced．Fossila charac－ teristic of the＂Silurian＂were afterwards found in strata thus placed in the＂Cam－ brisa＂serles，and hence the latter name became limited to the lowest beds．This nomenclature was generally adopted，until Sedgwick，renewing his work，criticised it． A better knowledge of the fossils has of late modiffed the classification，as given below．
2．Now：As defined by Hicks and athers， the Cambrian is a thick series of slates， schists，sandstones，and conglomerates，with both intruded and intercalated igneous rocks， linked hy elmilerity of fossils，and older than the Silurian series．They occur in Wales and elsewhere，contain many Trilobites and Bra－ chiopods，with other fossils，and are known as ：－1．Tremadoc Slates（nppermost）；2．Lin－ gula－flags；3．Menevian－beds；and 4．Long－ mynd gronp，consisting of Horlech grits and Llanberris slates．The Geological Surveyora （following Bturchison）limit the term to the Ionowno Grous．ut thera terna to the wick）inclade all Murchison＇s＂Lower Silu－ rian＂（Bala and Llandello groups）in the ＂Cambrian．＂
Cambrian formation ：

A．As substantive：
I．Ond．Lang．：The name given to two ant－ mals，the Camelus dromedarius and C．baetri anus［Camelus］，the fortaer generally called the Arabian Camel，or simply the Camel，and the latter the Bactrian CameL．

[^105]1. The Arebian opecies, which has bnt one
hump on its bsck. Of this there are two varietiea: Variety 1 is large end full of fleeh, and able on an emergency to carry burdena of $1,000 \mathrm{lbs}$. weight, thongh 500 or 600 , or at most 800 libs., are a more eppropriate load. The soft-cnohioned foot is adnirably adapted to oupport the animal in traversing the desart, and ita stomsch can be converted into watertanks, from which a aupply of the preciona fuld can obtained when the animal has no other inethod of slaking its thirst. So admirably is it adapted fer the arid wastes, that it has been called the ship of the desert. VaHoty 2 is leaner ond of a smaller size. It ia often called the Dromedary (from Gr. 8pouas (dromas) $=$ runniag), the name belng given becanas of its swiftness. It is unfit to bear heavy burdens, but will go one hundred milea a day. It ie generally asad for riding by men of quality.
2. The Bactrian species, which is stouter and more muscnlar than the Arabian Camel, from which it differe in having two humpe on its back.
"Him and his men and hire kamaz." story of Gen lad Exod., 1,898.
" Camelle or chamelle."--Prompt. Part.
${ }^{\text {an }}$ "Camets hava largo wild feet, but not hard.
 witl continue ten or twelve days withont drinking, and keep water along
tor their refreshment.
II. Technically:
3. Naut. (Pl.) : Hollow cases of wood, constructed in two halves, so as to embrace the keel, and lay hold of the hull of a ship on both sides. They are first filled with water and sunk, in order to be flxed on. The wster is then pumped out, when tha vessel gradually rises, and the process is continued until tha ahip is enabled to pass over a stoal or sill. Sinilar camels were used at Rotterdam about 1690.
4. Stocking frames: A bar mounted upon four wheels, and capalle of being drawa forward and backward through a small space. Upon it are monuted the jacks with their eprings, and the alur-bar upen which traverses the alur by which the jacke are actuated auceesaively. (Knight.)
B. As adjective: (See the componoda).

T Compounds of obvious signification Camel-backed, camel-hide.
camel-bird, s. A nama given to the ostrich.
camel-insects, 8. pl. A name sometimes given to the insects of the genus Mantis (g.v.).
camel-locusts, s.pl. The aame as Camelinsects (q.v.).

A. As substantive:

1. Ord. Lang. : The hair of a camel
2. Fabric: A rengh fabric made of the hair of a camel.
"Wit camethare was he cledde:-Metrical Homilies, B.
B. As adj. : Made of the hair of a camel
"Boee will act like a camel-hair pencil."-Darwin:

## camel's-hay, $s$.

Bot. : A kind of sweet-smelling rush-the Andropogon schœmanthus-growing in Eastern countriea.

## camel's-thorn, s.

Bot.: A plant, Allogi Camelorum.
cs-mē'-lé-ón, s. [Chameleon.]
cameleon-mineral, s. [Chameleonmineral.]
am-ěl'-i-dæ, s. pl. [From Lat. camelus (q.v.), and feni. pl. anffx -idoc.]

1. Zool.: A family of Ruminanta, containing the Camela and Llamas. The dentition differs from that of the typicsl Ruminantia. In the upper jaw there are three teeth on each aide in front reparated by slight intervals. There are a confcal incisor, a canine, and a premolar. The after a gap the rest of the mowers follow, There are no horns. The lower surface of the foot is applied to the ground. There are two toes enclosed in skin, and the hoofa are rednced almost to the size of nails. Thera are two recent genera-Camelus in the eastern hemisphere, Ancheala in the western.
2. Palcont. : Various extiact genera or Cam elidæ have been found in the Lower Miocene and in tha Pliocene of North America. In the eastern world no opecier has been found earlier than the Upper Miocene (\%) of the earlier than the Upper Mitecene ftimalayas. It is a genuine Camelus, $C$. sivalensis.
căm-ǎ-I'-ng, s. [Lat. From Gr. xauai (chamai) $=$ on the gronad, and $\lambda$ ivov (linon) $=$ flax. Bot. : A small genus of cruciferous planta Brassicacea), containing two or three European and North American species. They are dwarf annual or pereanial herbaceous plants, with stem-clasping leaves, and terminal racemes of yellow flowers. The most interest ing species is tha Camelina sativa, a doulttol inhabitant of Britain, and sometimes called Gold of Pleasure. It is cultivated in some parts of the Continent for the flbre and oil obtsinable from its seeds, which are sometimea imported into this country under the name of Dodder-seed. Iby pressure they yield clesr yellow-coloured oil, something lik linseed-oil, and the residual cako has been re commended as food for cattle. The fibre ia used in many parts for making breoma.
căm'-e-line, a. \& s. [O. Fr. cameline; Fr. camelin; Ital. camellino; Low Lat. cameinus $=$ pertaining to a camnel ; camelus $=$ a camel. $]$ i A. As adj. : Pertsining to or of the nature of a camel.
B. As subst. : A coarse fabric, mada originally of camel's-hair. [Camlet.]

Dame A abtinence streyned, toke on a robe of camee
Rine.
Rom of Roue 7,366 .
căm-ĕ1-i'-nĕ-ms, s. pl. [From Mod. Lat. camelina, and fem. pl. sotfix -ece.] The same as Camelinidæ (q.v.). (Hooher \& Arnott.)
 camelina, and fem. pl suffx -idot.]

Bot. : A family, sub-tribe, or anb-section of the Brassicacea or Crucifere (Crucifers), and the tribe or section Notorhizex. [Camelinee.]
ca-me'-Hi-on, s. [Eng. camel, and lion.] apparently used for Camelopard (q.v.).
in Cametion, that is a beest lllk a camele In the heed,
ca-měl'-lǐ-a, s. [From Camelli, a Jesnit, by whom the flower was introduced from the East.]

Bot.: A genua of planta, order Ternatrömiaceae (Theads). It is very near akin to Thea, which contains the tea plant; indeed, some potaniats combine tha two genera into one. The native countries of the Camellias ara the eastern gida of the Himalaya mountains, Cochin-China, China, Japan, and the Eastern Islands. Camellic japonica, said to have been introdnced into Britain by Robert James, Lord Petre, ia the original whence have been derived all the numerous varieties now cultivated in Britain. It has broad ahining leaves and red fowers. C. maliflora, the Apple-blossomed Camellia, may be a variety of the last-named plant. C. reticulata, a vers fine species, has flowers of a deep roae colour, sometimes aix inches across. The seeds of the Chinese $C$. oleifera yield a valuable oil.

## oạ-mél'-ó-pard, căm'-ĕI-ó-pard,

[ Hrom Lat. camelus $=$ a came] ; and pardus $=$ a panther. He is so named becanse he has n neck and liead like a camel; he is spotterl lika a pard, but his spots are whita npon a red groand. (Trevoux.) Cf. leo-parl.]
Zool.: A name sometimes given to the Giraffe, Camelopardalis Giraffo. [Camelopardalis, Giraffe.
cam-ĕ1-ó-par'-dạ1-і̆8, oăm-厄̌l-ô-par'-dal-üs, s. [Camelopard.]
I. Zool. (of the form camelopardalis): The typieal genns of the family Csmelopardalide ( $\mathrm{q} . \mathrm{V}$.).
2. Astron. (of the form camelopardalns): The Camelopard, a northern constellation, first so pamed by Hevelius. A atraight line, drawn from Cspella to the pole-star, passes through its centre.
căm-ěl-t-par'-dĕ1, s. [From Eng. camelopard, and suffix -el.]
Her.: An imaginary animal, being a Camelopard with two atraight horns, more promicent than thoae which the divinely-made Camelopard (the Giraffe) poaseases.
 dal'-1-dse, s. pl. [From Mor. Lat. camelo pardalis (q.v.), and fem. pl. suff. -tdoe.]

Zool.: A family of Ruminanta, containing only ans known specles, the Camelopardali Giraffa. The dentition is the same as in the Deer. [Camelopardalis.]
2. Palceont.: Some specise of the Camolspardalls have been found in Miocenc rocks in the old World.

## axm' ${ }^{\prime}$ -

căm'-el-rŭ̆, s. [Eog. camel; -ry.]

1. A place where camcls come to receive, or be relieved of, their burdeas.
2. Troops monoted on camels.
cạ-mè'-Iŭs, s. [Lat.]
3. Zool.: A genus of mammals, typa of the awily Camelidæ (q.v.). The species differ from those of Auchenia (q.v.) in having the toes separate, and in posaeasing one or two humps on its back. There are two species, Camelus dromedarius, the Dromedary of Arabian Camel, and C.bactrianus. [Camel.] 2. Palceont. [Camelide.]
căm'-č-ō, că-māi-eu, cä-māy-eu (eu as $\overline{\mathbf{n}}$ ), s. \& a. [Ital. cammeo, cameo; Fr. camée, camayeu; O. Fr. camaheu; from Low Lat. camahutus. Nothing is koowo as to its origin.]

## A. As substantive:

I. Ordinary Language:

1. A precious stone carved in relief, such aa the onyx or agate. The stone used shonld have two or more layers of different colours, and the srt consists in cutting away portions of the stone so as to expose these different colours in the varions parto of the work to which they are approprinte. Shella, especially the strombus or stromh shell, a genus of wing shells, are frequently used for the same parpose.
two forme wh engraving entitied camaier and fritation account of the celehrated to Winkelmanis interesting acconnt of the celehratid cameore which hre hauded
-T The accent is rarely on the second syllable.

2. Any carved work in low relief.
II. Pcinting. [Camaieu (2).]
B. As adj.: Salient as opposed to intaglio.
cameo-Incrustation, s. A bas relief cast of a bust or of a medal inclosed within a coating of white flint-glass. It was first introduced by the Bohemiana.
căm'-ĕ-す-tȳpe, s. [Eng. cameo; type.]
Phot.: A small vignette daguerreotyle for monnting in a jewel case like a cameo.
căm'-ẽr-ạ (1), s. [Ital. kamera $=$ a chamber; Lat. camera = a vault; Gr. камápa (kamara), anything with an arched cover, chantier.] [Chamber.]
3. Ord. Lang. : Any instrument haviog a dark chamber, and espeeially the cameraobscura and the camera-lucida (q.v.).
4. Law: The judge'a chamber in Sergeants' Inn.

T To hear a cause in camera: To hear a canse privately in the judge's own room instead of in open court
3. Naut.: A kind of ship uaed in the Black Sea.
camera-luctda, s. [In Ger. hamera lucida; from Lat. comera (q.v.), and lucida $=$ containing light, full of light, bright; appose to obscura = dark.] An instrument invented by Dr. Woolaston in 1804 or 1807 , and subse quentiy improved by Professor Amici of M dena. Its design is to produce on a plane anrfaca such a representation of a landscape, an object of natural history, or other visible thing, as may enable one to delineate it with accuracy. In Dr. Woolaston'a instrument there is a glass prism of such a form that its base or its apex (it is the sama with both) has the following angles : $90^{\circ}, 67 \frac{1}{3}, 135^{\circ}$, and $66^{2}$. An object placed at a yroper dictance, in a horizontal direction, from one of the plades enelosing the right angle, will aend forth rays. which in their passage through the priam will be twics totally reflected, and finally reaching the observer's eye, placed near one of the acute aogles and loeking downwards, will enable it
to seen the object of which it is in quest depicted on a aurface placed in proper focus beneath. It is difficult for the eye, however, to take in both the tigure and the point of the pencil st the same moment. In Professor Amici's inatrument, designed to cure this defect, thare ia a rectangular glass priam ( $A$ C B ) with one of the perpendicular faces (A C B) turned, s6 in the former case to the ohject ( 0 ) which is designed to be depleted, whilst the other (A c) is at right anglea to an inclined plane of glass (i H). The rays on proceeding from the object o are alightly

amict's camera luctida.
refracted at $D$, totally reflected at $\mathbf{P}$, again refracted at $a$, and partially rellected at $\mathbf{k}$; finally reaching the eye at E , \&c., making it see the image at $o^{\prime}$. The point of the pencil is aceo at the same time quite distinctly throngh the inclined glasa plate, and there is thus every facility for tracing the picture correctly.
camera obscura, s. [In. Ger, kamera obskura; Fr. chumbre obscure; 1tal. camera oseura. From Lat. camera (q.v.), and obscura, f. adj. = obscure, dark.] An instrument of which, as the name importa, the easential feature is a dark chamber. It was inveated, according to some, by Friar Bacon, about the 13th century; but is generally attributed to Baptista Porta, who published a work at Antwerp in 1560 in which it was described. If in the window of a chamber from which light is everywhere rigidly excluded a hole is made, about an inch in dismeter, the raya streaking in will depict on tha opposite wall a rude picture of the moving nanorama seen in the atreet, or any other objects which may rest or pass before it. The delineation is, however, very shadowy, but may be made better defined by jlacing a donble convex lens in the aperture and a sheet of paper in proper focus for the nicture. The lens will reverse the figures, which may be put right again by making the rays fall on a mirror at an angle of $45^{\circ}$. Brewater discovered that the inages became very bright by receiving them on the silvered back of a mirror. In the room now described ara all the essentials of a camera obscura, aod all

that is needful is to imitate the procedure now described inan artificial "camera" or "room" made small enongh to be portable. For the walls may he substituted a rectangular wooden box, formeal of two parts sliding in eech other, like the joints of a telescope, ao ss to adjust the focus to bodies more or less distant. A tube with a lens is fixed in one aide of it, and is turned to the object to be represented. The raya entering fall on a mirror aloped at an angle of $45^{\circ}$, which reflect them upwarda to the observer's eye. It is convenient that they may be mada to pass through a horizontal plate of glasa, on which tracing paper may be placed go as to enable one to traw the figare if he be so disposed, but now this is generally done net
by the hand but by photography (q.v.). Alid to the box is of use in ridding the observer of superfluous light.
Thera are other forms of camera One with a triangular priam which acta both as condensing lens and mirror, and casts downwards on a table or acreen a repreaentation of the gurrounding acene or landscape. Such an ioatrument placed on a hill in a city, and ao adjusted that more or leas diatent objects may adjusted that more or leas diatant objectu may be brought into focus, presenta a beantiful
panorama of the atreete with their moving panorama

## camera-stand, s.

Phot.: A frame on which the camera rests, and which is adjustable to vary the height, horizontal preaentation, or inclination of the optic axis as may be required. (Knight.)
"căm'-ẽr-āde, "căm-ẽr-ā'-āō, \&. [Fr. camarade; ltal. \& Sp. camerada, from camera $=$ a chamber.] [Comrade.] Onc who ocenpiea the same chamber; bence, a companion, an associate, eapecially in arms.

* cam'er-elle, s. [Low Lat. camerella, dim. of camera $=\mathrm{a}$ chamber.] A little chamber, a closet.
căm-ẽr- $\bar{o}$-mĭ-an, $a$ \& s. [Called after the Rev. Richard Cameron, a noted scotch Presbyterian Covenanter and field preacher, who, entering the little town of Sanquhar, in Dumfriesshire, on the 22 nd June, 1680 , boldly issued a proclamation renouncing his allegiance to Charles 11., and declaring him deposed for breach of covenants, tyranny, and other alleged crimes. Mr. Cameron was killed in a conflict with the military at Airdsmoss, in Kyle, and thnse with him slain, taken, or diapersed. Hia followera became a aepsrate denomination aoon after the revolution of 1688 , and develnped into the Reformed Presbyteribn6. [Reformed Presbyterians.]
A. As adj.: Pertaining to or in any way connected with the above-mentioned Richard Cameron or his followerg.
T Cameronian regiment: The 26th of the British army. [B.]
fantry, which is stñ), after the lapee of more of tha
 Came.

## B. As substantive:

Ch. Hist.: A follower of the Rev. Rlchand Cameron. At the tima of his deatb, hifadherents had not aeparated from theír Presbyterian brethran. They did so, however, after the Revolntion of 1688 , and became a diatinet denomination. Though in certain reapects they disapproved of the eettlement then made, yet they considered it a vast im. provement on that of the preceding Stnart dynasty, and gave it active gupport. The government of Wllliem and Mary, in consequence, when in somedanger from the Jacobites, raised two regiments from the Cameronians, one of which (that mentioned sbove), still remains part of the Britisb army. [Caxesonian Regiment.] For tbe subsequent history of the Cameroniana see Reformed Presbyterians.

A. As pr. par. (See the verb.)
B. As subst.: The act of serving with an army in the fleld.
* conm-paj-na, s. [Low Lat. campana $=a$ bell In 8p. \& Ital. the flower is also called camptna, from the shape of the flowers.]

1. Ord. Lang.: A bell, especially one for a
2. Bot. : The pasqus flower.
"Campana here he crops, acconnted wondrous good."
căm'-pa-nal, a. \& 8. [From Low Lat. cam pana =a bell; and suff. -al.]
A. As adjective:

Bot.: Pertaining to the genus Campanula, as the Campanal alliance.
B. As subst. (PL Campanals) : Tha English name given by Lindley to bia alliance Campanales (q.v.).
căm-pan-à'lèss, s. pl. [From Low Lat. campana= a vell; and pl. m. or f. suff. -ales.]

Bot.: Campanals, an alliance of plants, epigynous Exogens, contajning dichlamydeous monopetalous flowers and an embryo with little or no albumen. Lindley places in it the orders Campanulacee, Lobelizeex, Goodeniacex, Stylidiacere, Valerianaceer, Dipsacere and Asteracea (q.v.).
căm-pā'ne, s. [Lat. campana $=$ a bell.]
Her.: A hell, or bell-shaped vessel borna on coat-armour.
† căm-pā'ned, a. [Lat. campana $=$ a bell.] Her. : Furnished with or bearing bells.
căm-pan-ê'-rŏ, s. [Sp.]
Zool.: The Bell-bird, a native of Brazil.

+ căm-păn'-1-form, a. [Lat. campana = a bell ; jormat = furm, shape.
Bot.: Bell-shaped: an epithet applied to flowers which resemble a bell in shave.
căm'-păn-î-lĕ, s. [Ital. \& Low Lat. companile $=$ a bell-tower, steeple; campana $=$ a bell. $]$ A tower for the reception of bells, principally used for clurch purposes, but now sometimes for domestic edifices. The campanile at Cremona is very celebrated, being 395 feet high. That at Florence, by Giotto, is 267 feet high, and 45 feet square. The most remarkable of the campaniles is that at Pisa, commonly called the "Lcaning Tower." It is cylindrical in form, and surrounded by eight staries of columns, placed over one another, each having its entsblature. The height is about 150 feet to the platform, whence n plumbline lowered falls on the leaning side nearly thirteen feet outsida the base of the building. (Guilt.)
*ăm-pan-1̆1-1-form, a. [1tal. camprnilla =a little bell; dimin. of Lat. campana $=$ a bell ; forma = shape, form.] Bell-shaped.
căm-pan-ŏ1'-ó-ğist, s. [Eng. campanolog(y); -ist.] One akilled in the scienca of campan. ology or bell-ringing.
căm-pan-ŏ1-o-ğy̆, s.e [Lat. campant $=\mathrm{a}$ bell, and Gr. $\lambda$ ojos (logos) $=$ a treatiso, discourse.] The scieoce of bell-ringing; a treatise on bell-ringing.
căm-păn'-n-1a, s. [Low Lat. campanula $=$ a little bell, dim. of campana $=$ a bell.]

Bot.: Tha Bell-fiower, so called from the shape of its flowers. An extensive genus of herbaceous plants, giving the name to the order Campanulacere. Campanula rapunculus, Rampion, is much cultivated for the roots, which are boiled tender and esten bot with sance, or cold with vinegar and pepper. OI the Britiah apecies C. latifolia is the finest. the flowere are large and blue, or (in the Scottish woods) aometimes white. The best known apecies is C. rotundifolia, tha Harebell, or Blue-bell of Scotland. All tha foregoing apecies are British. A foreign one, Campanula glauca, is said by tha Japaness to be a tonic.
căm-păn-u-1a'-çĕ-8e, a pl. [Lat. campanula, and ficm. $\mathrm{p}^{1}$. sntf. -ocece. $]$
Bot. : A natural order of plants, chiefly natives of the north of Asia, Enrope, and North America. More than 200 species of this family are known, of which more than 80 are indigenous or cultivated in Britain.
căm-păn-n-lär'-I-a,s. [Low Lat. campanula $=$ a little bell.]

Zool. : The type genns of the family Cun. pannlarlides, in which the enp-shaped hydrotheca are borne at the end of riuged atalles The polypites bear a circle of tentacles below tha conical proboscis.
 Lat. campanularia; fem. pl. suff. -idue.] Zool. : A farnily of calyptoblastio Hydrozoa
 Lat. campanularia, (q.v.), \& veut. pl. onfí -ida.]
Zool.: An order of hydroid Zoophytes. They are closely allied to the Sertularida, but their hydrothecæ, with their containing polypites, are sapported on conapicurus atalks, and are terminal, while those of the Sertularida are sesails or subsessile and placed
isterally istarally
căm-păn'-ul-lāte, ' $a$. [Low Lat campanulatus, from campanula $=$ a 1 tt tla bell, dim. of compana $=$ a bell.]
Bot. \&c.: Having the shape or form of a bell, bell-shaped.
căm-păn-n-lī'-na, e. [Low Lat: campanula $=$ a littla bell ; nent. pl. soff. -ina.]
Zool. : A genus of calyptoblastic Hydrazoa, the typiesl one of the family Campannlinide. There are thres species. Stem simple or brsnched rooted; cells pointed above; polypes cylindrical, with webbed tentacles. Heproduction by frea medusa webs, aingle in each capsule. (Friff. \& Henfrey.)
căm-păn-n-līn'-l-dæ, s. pl. [From Mod. Lat. canpanulina, the type; and fem. pl. suff. -ile.]
Zool. : A family of sertnlarian or calyptoblastic IIydrozoa, with ovatoconic cells, ataliked; polypes long, cylindrical, with a amall conical proboscis.

* cam-par, s. [CAMPER (2).]

Camp'-bell-ite ( $p$ sileot), s. A member of a donomination founded by two Baptist ministers of Keotucky, Thomas end Alexander Campbell. The Camp bellites atyla thamselves Disciples of Christ, and ara also called New Lights

Oămp-cëli'-ing, s. [Mid. Eng. cam = crooked, curved, and ceiling.]
Arch.: A ceiling whose form is convex in wardly.
Căm-pē'a-çhy̆, căm'-pēaçh-y̆, 8. \& a [From the Guif of Campeachy, in Mexico whence the wood is imported.]
campeachy - wood, campeche wood, s. The red dye-wood better known by the name of Logwood, obtained from the Hematoxylon Campechianum.
 esternillar; qayeív (phagein) = to eat.].
Ornith.: A genus of hirds belonging to the Laniade or Shrike family. it is the Iypical one of the snb-family Campephaginz (q.v.).
căm-pë-pha-gi'-næ, 8. pl. [From Mod. Lat. (from Gr.) campephaga (q.v.), and Lat fem. pl. suff. -ince.]
Ornith: A sub-family of Ampelidæ (Chatteners). They are found chiefly in the warmer parts of the Old World. None are British.
tămp'-ẽr (1), s. [CAsp (1), v.] One who encamys or lodges in a tent in the field.
cămp'-ẽr (2), cam-par, s. [CAMP (2), v.] A footisall-player.
căm-pčs'-tral, * căm-pĕs'-trī-an a 10. Fr. campestre; Fr. champetre; from Lat campestris $=$ pertaining to the field ; campus $=$ the field.] Growing in the flelds or country, wild.
căm'-phāte, 3. [Eng. camph(ic), snd ouffix ate.]
.Chem.: [Camphic acid.]
căm-phēn'e, căm-phine, s. [Eng. cam ph(or), and suffix -ene (Chem.).]
Chem.: $\mathrm{C}_{30} \mathrm{H}_{16}$. A crystalline hydrocarbon, obtained by the action of sodium stearate or acetate on a solid compound of HCl and turpentine.

Cate, ratt, färe, ạmidst, whãt, fâll, father; wē, wĕt, hëre, camel, hẽr, thêre; pine, pǐt, sïre, sir, marins; gö, pot

## - axm'phẽr-Ye, \& [Comprey.]

căm'-phic, u. [Eng. camph(or); -lc.] Pertaining to camphor.

## camphio actd, s .

Chem.: $\mathrm{C}_{10} \mathrm{H}_{16} \mathrm{O}_{2}$ Obtained by hesting camphor with alcoholic soda solution in sealed tubes to $170^{\circ}-180^{\circ}$ along with camphol. The solution is nentralised with $\mathrm{H}_{2} \mathrm{SO}_{4}$, dissolv ing out the sodium camphate with alcohel evaporating and adding $\mathrm{H}_{2} \mathrm{SO}_{4}$ which precipitates the camphic acid which is insoluble in water but soluble in alcohol. Its salta are water camphates.
canm-phîn'e, s. [Camprener.]
căm'-pht-غ̇̊̆n, s. [From Eng. eamphor; to produce.
Chem. : The same as Camphene (q.v.)
căm'-phǒl, s. [From Low Lat. camphora $=$ campher, and oleum $=$ oil.]

Chem.: $\mathrm{C}_{10} \mathrm{H}_{17}(\mathrm{OH})$ A monatomic alcohol there are several modificatious, distingulshed by their action on polarised light, as, Borneo camphor or Borneol, obtained from dryobalacops camphora, dextro $34^{\circ} 4^{\circ}$. Another dex tro, 44.90 , is formed together with camphic acid by the action of sicohol potash on common camphar. A third dextro, $4.5^{\circ}$ by distilling amber with potash. A fourth, called levo-camphol levo $33^{\circ} 40$ is follnd in the alcohol obtained by the fermentation of mad-der-root sngar. Dextro-rotary camphol forms mall transparent colourleas hexagonal prisms, which melt st $198^{\circ}$ and distil st $212^{\circ}$; solnbls in alcohol and ether, insoluble in wster Levo-rotary camphol forms a crystalline white powder alightly aoluble in water. Canphol distilled with $\mathrm{P}_{2} \mathrm{O}_{3}$ gives a hydro-carbon, $\mathrm{C}_{10} \mathrm{H}_{1 \mathrm{~s}}$. Boiled with nitric acid it is reduced $t$ common campher, giving of two stoms of H.
oăm'-phôl-āte, s. [From Eng, sc. camphol, and antfix -ate (Chem.) (q.v.).]

Chem.: Camphor fused with potash unites directly with it sud forns potassinm canpholate, $\mathrm{C}_{10} \mathrm{H}_{17} \mathrm{KO}_{2}$.
*m'-phǒr, * căm'-phire, s. \& a. [In Sw. \& Dut. kamfer; Dan. kampfer; Ger. kampher; Wel. comphyr; Fr. camphie; Sp. canfor, can fora, alcanfor; Port. alcanfor, camphora; 1tal. Low Lat. canfora; 0 . ltal. cafura: $\mathbf{G r}$ (from Arab.) кaфovpó (kaphoura). Cf. slso apтiov (karpion) $=\mathrm{sn}$ Indiain tree; Arab. Pers. kafrá; Mslay kapûr; Hindust. kápura, Sansc. karpara.]
A. As substantive:
I. Ordinary Language: The substance described under II. I.
"Yet the country is exceeding good, abounding with all eonmoditlee, ns gesh, corve, rice, sluuer, gold, wood ougt: Voyagec, iL ses.

## II. Technically:

1. Bot.: [See 2 Chem.]

- Borneo or Sumatra Camphor: A kind of camphor made from Dryobalanops aromution or Dryobalanops camphora, a genus of the order Lipteraceza or Dipterads. It differs fron ordinary camphor in having six-sided crystals. It is valusble, but rarely obtained here.

2. Chem. : $\mathrm{C}_{10} \mathrm{H}_{16} \mathrm{O}$. It is called siso Laurel Camphor. Camphor is obtained by distilling with water the leaves and wood of the cam-phor-tree, Camphora offinarum, formerly called Laurus samphora. It is a solid whit volatile crystalline mass, tongh and difficult to powder, has a peculiar odour; thrown on water it revolves and is slightly soluble. It is very solnble in alcohel, ether, and strong acetic acid. It has a dextro-rotary action on polarised light. Msuy essential oils depoait an inactive variety. [Stearoptene.]
3. Comm.: Most of the camphor imported Into this conntry conles from Formosa ria singapore. It is used to preserve natura history collections and clothea in drawers from the ravages of insects.
4. Pharm.: A powerful diffusible stimulant and antispasmodic, very nsefnl, combined with extract of henbane, in genito-urinary irritation. It entera into union with opium, as a sedative, under the name of compound tincture of camphor or paregoric. It is useful in adynamic fevers, and has been employed in the treatmeut of hysteria, epilepsy, chores, sad whooplng-cough and ex-
tarnally, as a atimulant tostitr and painful parts, as a liniment Offleinal preparations: Aqus camphore, linimentum C., inim. C. comp. apiritus camphore, and tinctura camphora composita. Camphor is a poison to the lowest forms of animals and plants. It is antisaptic In large doses it lowera the pulse and temper ature, and produces headache, sickness, coldness of extremitiea, feeble circulation, unconsciousness, and even death. Undiluted it is a powerful irritant to mucous membranes and raw surfaces. "An artificial camphor can be made by passing hydrochloric acid gas through volatils eil of turpentins" (Garrud). The pir tue impated to it of preventing infections diseases is not founded on correct ebservation
B. As adjective: (See the compaunds).

## camphor-gland,

Bot.: The gland in the camphor-tree which secretes the substance after which it is ramed
camphor-oil, s. An aromatio oil obtained from the Dryobalsnops mentioned above. It has been used for acenting aoap.
camphor-tree, s. A tree belonging to the order Laurscee, which furnishes camphor It is the Camphora offcinarum. It has ribbed

leaves, nine stamers, and four-celled anthers It grows in Formosa. The chopped brsnches of the tres are boiled in water, the camphor being deposited alter a time and then onblimsted in order to remove its impurities There are two sorts of this tree: one is a native of the isle of Borneo, from which the best carnphor is taken, which is supposed to be a ustural exudation from the tree, pro duced in auch places whers the hark of the ree has been wonnded or ent The other sor is a native of Jsuan, which Dr. Kempfer describes to be a kind of bay, bearing black or purple berries, from whence the inhabitants prepsre their camphor, by making a simple decoction of the root and wood of this tree cnt into small pieces; but this sort of camphor is, in value, eighty or a hundred times less thsn the true Bornean camphor. (Miller.)
† căm'-phõr, * căm'-phire, v.t. [CАмphor, s.] To impregnate or combine with camphor, to wash with camphor.

Does every proud and self.affecting dams
Camphire her face for thlily"" Toungur: The Revenger's Trage
Wash-balls perfumed, camphired and plain, shal restore comulexions."-ratler, No. 101
căm'-phõr-a, 8. [CAMPHOR.]
Bot.: A genus of plants, order Lauraces. Camphora oftcinarum ia the Csmphor-tree or Csmphor Laturel. [Camphor-tree.]
căm-phõr-ā'-cĕ-oŭs, a. [Eng camphor; -aceous.] Of the nature of or containing camphor.
cham'-phõr-āte, v.t. [Campionate, a.] To impregnste, combins, or wash with camphor.
cam'-phorr-äte, a. \& s. [Eng. camphor; snd snff. -ate (q.v.). In Sp. alcanforudo.]
A. As auljective: 1mpregnated or saturated with camphor, camphorsted.
"By ehaking the sallno sud camphorate liquors tocolourd tiqury -scria
B. As substantive: [Camphoric Acid.]
 par. or a. [Camphonate, v.] Impregnated or combined with camphor.
căm-phör'-ic, a. [From Eng, \&c. camphor snd snff. -ic.] Pertaining to camphor; occur ring in or derived from camphor.

## camphoric acid,

Chem. : $\mathrm{C}_{10} \mathrm{H}_{16} \mathrm{O}_{4}$. Formed by the actlon of hot nitric acid on camphor. Camphorio seld is alightly aoluble in cald water ; tallises in small colaurless needles. By fis tillation tt yields a colonrlese crystalline anbstance camphorio anhydride or orido gnbstance, camphorio snhydride or oxide $\mathrm{C}_{1} \mathrm{H}_{1} \mathrm{H}_{1} \mathrm{O}_{6}$. Caicium camphorate, yields a ketone volatile ofl called Phorone, $\mathrm{C}_{8} \mathrm{H}_{14} \mathrm{O}$.
oxm-phôx-ŏs'mas, s. [From Mod. Lakt cam phora, and Gr. $\circ \sigma \mu \dot{\eta}($ (osmê) $=$ sinall.]

Bot. : A genus of Chenopodiacere, the plsnte of which have a smelt like that of camphor All are found in Asis, except one on the Bisditerranean.
căm'-phy̆l, s. [Eng. camphor, and suffix -yl ; from Gr. vi $\lambda$ (hule) $=\ldots$ matter, as priaciple of being.]
Chem. : A monad radical ( $\mathrm{C}_{10} \mathrm{H}_{27}$ )'. [BorNEOL.]

## camphyl ohloride, s.

Chem. : $\mathrm{C}_{10} \mathrm{H}_{16}$ HCl. A erystalline lavo rotary aubstance, isomeric with the hydro choride of turpentine ail. It is prepared ly heating camphol in a sealed tube with HCl.
camp'-ing (1), * oămp'-y̆nge (1), pr. par.,
A. \& B. As pr. par. \& particip. adj. : (See the verb.)

From courtly pisieful Juno, sent bim forth
From courtiy riends withe wamping foes to Ive."
C. As substantive

1. The act of pitching a camp.
2. The act of lodging temporarily in a tent or in the open air.
oămp'-ĭng (2), * cămp'-y̆nge (2), pr. par., A. \& B. As pr. par. \& particip. adj.: (See the verb.)
C. As subst. : Football, or any bimilar sport

Campynga Pedipitiudium."-Prompt. Parv.
"In our iskond, the exlibititon of thooe manly sports in rosue minong country
ax̆mp'-i-ờn, * căm'-pǐ-oŭn, * căm'-py̆ ôn, s. [CHaMpion.]

1. Ord. Lang.: A champion.
" Quhen dangelr occurrit, thay refust ns maner of besines. nor lathour that mycht pertene to forsy cam 2. Botany
(I) A book-name for various apecies of Lychnis. Prior thinks the datne was given because the plant was used in chaplets with which clismpions st the public games wer crowned.
(2) A name for various spectes of Sileus.
(3) A name for the Cucubalus baccifer, a ailenaceous plant.

- Lychnis chalcedonica is the Campion of Constantinopls; L. Githago is the Corn Campion; L. Flos-cuculi, the Meadow Campion Silene acaulis, the Moss Campion; Lychnis diurna the Red Csinvion; L. coronaria, thie lose Csmpion, and L. vespertina, the White Campion.
 $=\mathrm{s}$ caterpillar; and eidos (eidos) $=$ fom [rom their elongsted shape.]

Entom.: A genns of Thysanara. The insects like their allies the Lepiama, live under stones and in other dark places. Sir John Lnbbock thinks it a modern representative of an sacient type form from which the higher insects originally took their rise. (Nicholson Zool.)
cămp'-ru-1y., a. [CAMP (2), v.] Contentions quarrelsome. (Scotch.)
cămp-tò-ceẽr'-cŭs, s. [Gr. кацтrós (kamplos) $=$ bent, curved; ке́ркоs (kerkos) $=8$ tail.]
Zool.: A genns of Entomostraca, of the order Clsdocera, and family Lynceidæ. Ther is only one species, Camptocercus macrouro Carapace stristed longitudinslly, slightly sinu ated and ciliated on the anterior margin ; besk rather blunt. It is squatic. (Griff. \& Herfrey.)
aămp-tǒt'-róo-pal, a. [Gr. канптós (kamp tos) $\equiv$ curved, bent, and тоón $\eta$ (tropê) $=\mathrm{s}$ turning, a turn.]
Bot.: For definition and example abe Campulitropous.
canmp－tư－1i－cón，s．［Formed from Gr．
 （kamptō）$=$ to bend，curve；and oưdos（oulos） ＝woolly，carled．］it is merely a trada nama． Fabrics：A compound used as a substitute for carpet or oil－cloth．It is mada by a com－ bination of powdered cork and the poorer qualitiea of india－rubber，and is painted or quaditiea of india－rubber，and is painted or ta not suitable for chambers，as being a good a not suitable for chainbers，as being a good conductor of heat，and feeling as cold to the bare feet as wood or oil－cloth．It mey be em－ ployed for cleaning knives，which is dona by covering a atrip of wood with it；then sprink－ ling tha aurface with the cleaning powder，and rubbing on the knifa．The surface doea not wear away，and the result is very aatiafactory．
 pal，căm－py̆－1ơt＇－rơ－poŭs，a．［Gr． ка́лтїлаs（kampulos）＝curved，and тро́тп（tropë） $=$ a turning．］
Bot．：Having the ovule so bent or curved that the micropyle，chalaza，and hilum are near each other．
＂Buch orules are called campylotropat or campylo－
tropous，when the portions either side of the line of tropous，when the portions either side of the the of carvatire Are ture iunl，or eamprotropah when they are

A. As substantive:
I. Ordinary Language :

1. An artificial water-course or channel, especially ured for the passage of boats.
*2. Any channel or meane of communica tion.
II. Technically:
2. Hyiraulic Engincering: In the eame senee as 1.1 .
3. Hist. : The Egyptiane very early mado a canal connecting the Nile and the Red Sea. It was reopeaed by Pharaoh Necho about 605 B.C., and at fotervals by others after him. Most of the anclent nations had canals. The great canal of China was constructed partly in the eventh and partly in the minth century, A.D. it is 825 miles long. The firat known English canal was cut by the Romans at Caerdike. The Trent and the Witham were joined in 1134, and the Bridgwater canal was commencad in 1759. The Caledooian canal was projected in 1803, but not opened till 1822. The Erie canal was begun in 1817 snd completed in 1825. The Suez caosi, connecting the Mediterranean and the Red Ses, was opened on the 17th November, 1869. The sttempted caoal across the Istlimun of Darieo proved a failure. One ia projected, frum the Atlantic to the Pacific through Nicaragua. It ia proposed that thita canal ghall be controlsed add operated by our owe people, to whom it will give coovenient and speedy commnoication between Atlantic and Pacific porta; providing also great strategic advantage in case of wa with a foreigo power. The great Kiel canal conatructed by the Germao goverameat fir strategic purposes, connects the waters of the Baltic and North Seas. It was formally ojened oo June 20, 1895.
4. Anat. : A duct in the body for the passage of liquids or solids.
"In the cells of the Brain, and Cannate of the inewea. .--Eacon : Nat. Hist., No. 30.

## 4. Zoology:

(1) A chanoel or gronve into which the aperture of carnivorone univalve molluses is produced. In distinction from thia, vegetahle feeding uoivalves have the aperture of the shel reeding
entire.
(2) A channei in some actinozos.
(3) A channel or tube in some spongea. Such tubes sre of two kinds, incurrent or afferent cansis, and excurrent or efferent canala.
5. Bot. (Of the petal of a flower): A caoal leading to the central cell of the archegooium.
T (1) Air-breathing cells: The name given by Meyen and Leitgib to lacune in celinlar tiasue produced simply by the amplification of the intercellular apaces, and the separation of the cells without teariog.
(2) Intercellutar canals: Canals anising fron the opaces left between cells which do not completely touch each other. (R. Brown.)
B. As adjective: (See the compounds)

Compound of obvious sigmiffeation : Canalboat.

* canal-bone, * cannel-bone, * canelboon (Eng.), "cannell-bayne (Scotch), s. The collar-bone.
